Brutus applied for a Zimbabwean passport and notified his superiors at Northwestern, who notified the INS that his visa would expire because of the delay in changing passports. The INS left the impression that there was no problem, and Brutus continued to teach African literature. However, when Brutus applied for renewal, the INS informed him that he had broken U.S. immigration laws by working without a valid visa and said he would be deported to Zimbabwe. Brutus appealed, and the case is now in federal court before Immigration Judge Irving Schwartz. The INS has submitted a confidential State Department file on Brutus to Judge Schwartz to back its deportation order; however, the file is so confidential that Brutus and his lawyer have not been allowed to see its contents, adding to their fears that the deportation action is politically motivated.

In his quest for asylum, Brutus and his supporters argue that if he were returned to Zimbabwe, his life would be endangered because he would be an easy target for South African assassins or kidnapers. Zimbabwe has said it would welcome Brutus but could not provide him with 24-hour protection.

The INS has been reminded that in 1981 another black anti-apartheid crusader, Joe Gqabi, was assassinated in Zimbabwe, presumably by South African agents, and that Ruth First, the exiled white South African editor of a newspaper that Brutus once wrote for, was killed by a letter bomb at the University of Mozambique last year.

Brutus would be the perfect target for a South African kidnaper. He was imprisoned because of his anti-apartheid stands and escaped several times. During one escape he was shot in the back. In 1966, when he was given a one-way exit permit by South Africa, the government adjudicated that he would be automatically imprisoned if he ever returned. This man has since become an organizer of intellectuals throughout the world against South Africa. That government would like nothing better than to see his assassination or his return to South Africa by kidnaping so that it could slam him in jail permanently.

And the tragedy is that South Africa may do just that if the United States insists on one standard for Walter Polovchak and another for Dennis Brutus.●

SENATOR BRADY'S GOOD ADVICE

● Mr. PERCY. Mr. President, Nick Brady is one of the finest men who has ever served in the Senate. He was appointed to fill an unexpired term and he did so with great distinction during the 8 months he was here. Before he came to the Senate, he served as managing director of Dillon, Read & Co. and was chairman of the board for Purolator, Inc.

Nick Brady was not a newcomer to either government or politics when he came to the Senate, and he drew a number of valuable lessons from his months here. At the May 14 meeting of the Business Council in Hot Springs, Va., the former Senator from New Jersey shared his views on the relationship between business and Government.

Mr. President, I ask that Mr. Brady's remarks before the Business Council be printed in the RECORD at the close of my remarks.

Mr. Brady notes in his address that business and Government must realize that they have distinctively different roles and operate on different timetables with different rules of procedure. Nick Brady is so right when he points out that the private sector and Government should have a better understanding and higher appreciation for each other's jobs. As a former businessman myself, I can attest to the misunderstandings that can arise between elected officials and the private sector they represent.

As he points out in his address to the Business Council, "the gulf between Government and the private sector would be of interest only to political scientists if it wasn't such a serious matter for the future of us all."

The private sector has the major role in insuring the Nation's well-being and standard of living but the Federal Government has an impact on the economy in major ways. Greater cooperation between the two sectors can provide a base for a stronger economy, especially in international trade where our companies are pitted against foreign competition aided by an array of Government assistance.

Nick Brady points out the gulf that exists between Government and business. He recounts a notion that he encountered when he arrived in the Senate that a few bankers sat down periodically to set interest rates. He states that "I was asked, 'Why won't the banks lower interest rates?' as though it were an easy thing to do. Very little understanding of the process."

The same misunderstanding exists in the private sector: "On the other side of the coin were many friends in the business community who asked, 'Why won't Congress face facts and balance the budget?' as though it were an easy thing to do. Very little understanding of the process."

In his address, Senator Brady proposes four ways that the business community could improve their relations with Government. We all know that Government officials can make efforts to do the same, but Senator Brady focused his remarks on how business could help.

His recommendations are that, first, companies should hold one board meeting a year here in Washington to allow board members the time for meetings with Government leaders on corporate problems. Second, corporations should consider appointing recently retired Congressmen or Senators to their boards of directors. Third, when screening applicants for top executive positions, companies could take a special interest in those men and women who are familiar with Government and political procedure. Finally, he suggests that members of the Business Council make a concerted effort to establish a more personal relationship with Members of Congress to encourage the exchange of advice and ideas.

To highlight what he means, Nick Brady closes his remarks by saying that—

> American agriculture became the world's leader not only because of hard-working farmers and new technology, but significantly because of the partnership between agriculture and government which produced a system to feed a third of the world. . . . Business and government can match that success.

We have a lot to learn from Nick Brady, not only because of his position in the business and investment communities but also because of the advice he can give us on ways to improve the functioning of our Government. I commend him for his willingness to speak out on this topic and strongly recommend his remarks to my colleagues.

The material requested to be printed in the RECORD follows:

REMARKS BY NICHOLAS F. BRADY TO THE BUSINESS COUNCIL, HOT SPRINGS, VA., MAY 14, 1983

It's a real honor to be able to address The Business Council. I'd like to thank Bob Beck for that very generous introduction.

I've been asked to speak about the relationship between business and Government. I hope you'll understand if many of my observations derive predominantly from my Senate experience.

Before I served in the Senate my attitude towards Government was ambivalent, but it wasn't quite as bad as one of George Burns' famous lines about Government. Burns said: "It's too bad that all the people who know how to run the country are busy driving cabs and cutting hair."

My eight months in the Senate convinced me differently and I think many of you who have spent time in Washington and in Government would agree. The majority of people in Government are bright, hard-working and concerned.

People like Howard Baker, Bob Dole, Pete Domenici, Russell Long, Scoop Jackson, Sam Nunn, and a host of younger Senators, could hold top jobs in industry.

And in the same sense, all of you in this room could be involved in Government at high levels if you so chose. Why then, with intelligent and concerned people in both business and Government, do they have such a tough time communicating with each other?

Instead of communicating, trying to understand and work with each other, business and Government are like two ships passing in the night, each one on a separate course, each one, to some extent, ignoring the other, even to a point where it seems a collision might be imminent.

I'll try today to talk a little bit about those two ships of business and Government and to suggest ways that we can perhaps improve communication, cooperation and real understanding between the two most powerful sectors in our country.

If what I say appears critical, then it is also criticism of myself, because to a large

extent it is advice that I might well have politely ignored a year ago. Even though I made frequent trips to Washington in the years preceding my eight and a half months in the Senate, I can now see that I had little real insight into the day-to-day workings of Government.

Why do business and Government miss each other like ships in the night? Perhaps the most important reason is that both sectors have traditions, customs, and even laws that validate their own goals and set their own agendas. Our society has validated these actions and agendas, again and again, over the years. In turn, this had led to a firm confidence among leaders in both business and Government that each has the rightful answer. If one party is sure he is fundamentally right, by definition the other party, if he disagrees, must be wrong. Is this the reason these leaders all too often don't communicate with each other? Frankly, I think so.

In reality the private sector and Government have different jobs to do: Jobs which have been given to them by the American people. For example, it is an entirely acceptable business practice for a corporation, in the name of profitability for its shareholders and the future health of the enterprise, to lay off a thousand, or two thousand, or five thousand people in times of declining sales. In fact, if executives don't act quickly enough at moments of declining sales, their boards of directors and stockholders will surely replace them.

However, at the moment people are laid off, we have decided in this country that it is then the Government's job to do something about the unemployment, to pay laid-off workers and help them buy food. Even further, a current debate in Congress concerns extending health care benefits to the unemployed.

The only question we really ask is how long should they be paid and how much. We decided long ago that Government in part shall pick up where business leaves off and pay unemployed workers in a transitionary period.

In this over-simplified example, you can see that business and Government really do have different jobs and charters as well as different laws and regulations governing the separate mandates the American people have given to each.

The following statement will sound self-serving, but I certainly don't intend it to be so. During my time in the Senate, I was sometimes puzzled by a reoccurring comment a few of my colleagues made to me.

The comment was essentially, "Nick, you have really come to understand us in a way that few other people have." At first I couldn't figure out why they said it. I made very few speeches and sponsored only a few Bills and Amendments. I was able to give some advice and a little knowledge about what went on in the private sector, but in no sense was it a leadership role.

But then I began to realize that many Senators felt there was a deep lack of understanding among their countrymen about the ways of the Senate and perhaps Government. But also, the comment implied that they understood very little of the intricacies of business and they were grateful for any insights as to how business really worked.

The gulf between Government and the private sector would be of interest only to political scientists if it wasn't such a serious matter for the future of us all.

I'm afraid that this lack of understanding has led both Government and business to turn off their hearing aids when the other is talking. The best example I can give you of this is the two questions I was repeatedly asked when I first started in the Senate.

Some Senators were convinced that David Rockefeller, Walter Wriston, and a few other trilateralist bankers convened in the ultimate smoke-filled room and set the interest rates each week. I was asked, "Why won't the banks lower interest rates?" as though it were an easy thing to do. Very little understanding of the process.

On the other side of the coin were many friends in the business community who asked, "Why won't Congress face facts and balance the budget? as though it were an easy thing to do. Very little understanding of the process.

Because of this lack of understanding, to a large extent the time businessmen and Government officials spend together is characterized by a series of monologues. We talk at each other and not to each other. Unfortunately, there does not seem to be much interest in attempting to provide time for two-way conversations.

To be pointed, I would ask you to review the roster of speakers for this Business Council meeting, not only yesterday and today, but over the past several years. How many Government officials stayed for even a short period after they delivered their formal remarks? How many attempted to open a dialogue instead of simply telling us what they've done lately?

Before this becomes an indictment of Government officials alone, I would hasten to add that businessmen's forays into Washington are seldom better. Fly in, give a talk, talk at someone, and leave town as quickly as possible. Why does this happen?

One reason is geography. America is different from most foreign countries because our seat of Government is not a significant business center as well. London, Paris, Rome, Tokyo are all centers of Government and business.

In our country, Washington is all Government, New York has historically been our financial capital, and our business centers are in cities across America. So there is little chance for even the social relationship between business and Government that is taken for granted in most foreign capitals. Geographic distance and diversity can be the enemy of communication.

To some extent, the jet airplane is also the enemy of understanding between business and Government. People fly in and fly out. In the old days, I would guess, when you held your meetings here at The Homestead, you had to take the train to get here, and that anyone who made the commitment of a long train ride would come to stay awhile, during which time real talk could take place. That's no longer the case—jet in and jet out.

Just a brief comment on time. All of you in this room are scheduled out months in advance. If you can believe it, it is worse in Government. There is a saying "with all thy getting, get understanding." We are all so busy with our own agendas, we have very little time to understand others' agendas.

One could ask why is this so serious? It is serious because leaders in business and leaders in government have one central task—to provide for the well-being and the standard of living of the American people.

Average Americans look to their leaders in both business and Government to provide their families and themselves with a decent standard of living. Twenty years ago, maybe even ten years ago, business could provide this standard of living by itself. Before the advent of the Great Society, Government was a very junior partner in our life. Not so today. We are equal partners, or Government may even be the senior partner.

Internationally, it's a whole new ballgame as well. The United States is no longer the unchallenged economic and military force in the world. Oil doesn't sell for three dollars a barrel any more. It sells for twenty-nine. We don't have the same military superiority we had twenty years ago when we could draw a line in the Caribbean and stare Khrushchev down as we did in the Cuban missile crisis.

Nor do we have the economic superiority. Fifteen years ago, "Made in Japan" were codewords for shoddy quality. Today, the words "Made in Japan" usually set the standard for top quality. Today, much is made of the words "Japan Inc." because it implies a dedication in Japanese society among business and Government and labor and the media to work together for the common good of the country.

While I'm in no way advocating the tight structure and Government predominance that the term implies, I wonder why we can't have an America Inc.? I know that one of the reasons is that the lack of communication and coordination between the various sectors of the country is not perceived to be a serious problem by most people. But it will be sooner or later, and probably sooner.

And I'm sorely afraid that if the American people see their standard of living eroding, and if they see America's position in the world declining, then they are going to give pink slips to both Government and business. The Government's pink slip will come in the form of a continual flip-flopping of government, from Democrat to Republican to Democrat from left to right and back again. Indeed, the first signs of this trend can already be detected. No president since Eisenhower has served two complete terms in office.

There is a good chance that we will witness the rise of third and fourth political parties as disillusionment with the two major parties deepens. I believe there could be significant potential for future splinter parties and the kind of political instability that we see in some of our European allies.

The pink slips will go to business as well, and the effects will be just as severe. From our point of view the pink slips will come in the form of increased Government regulation, national economic planning, and Government intervention in the market place.

What can be done to avoid these scenarios, to foster communication and cooperation? Let me ask you a couple of leading questions, one for businessmen and one for the politicians. First for the businessmen—when was the last time you sat down with your Senator or Congressman and you didn't have an urgent problem that required his immediate help? When was the time you met over dinner or breakfast just trying to build a relationship, to establish respect and understanding, the basis for a dialogue, not a monologue?

Now a question I would put to the politicians. When was the last time you called a businessman and didn't either (a) ask him for a campaign contribution, or (b) state that the Acme Widget Company had absolutely no right to lay off 5,000 of your constituents?

I believe it is an absolute necessity for businessmen to look upon their relations with Government in a whole new light. Actually, neither businessman nor politician can look at it as something you can do in

your spare time, as a schedule filler, or something that irritates and interferes with your day.

At some point, probably everyone in this room will want to call into or call upon the Government on an important matter. And just as if you were drawing a check upon a bank, you better have some personal capital built up, some funds on deposit, or your check is going to be returned for insufficient funds.

Enough talk about the problem. The question is what should be done. Without arguing who should take the leadership role, I believe it would be a good idea for people in business to take the first step. Let me suggest four areas where this might take place.

First, without appearing trite, why not hold one of your board meetings each year in Washington? All of us who serve on boards make trips to important plant locations where new products are being developed. Our Government is as important a part of our business life as a new product.

Why not hold one board meeting a year in Washington, finish up your business promptly, then spend the rest of the day in meetings with Government leaders? I would even suggest sitting in the Senate and House galleries for half an hour. It may be Civics 101, but frankly, it will give you a feel you couldn't get any other way.

Second suggestion: We have all made great strides by adding women and minorities to our boards of directors. In a similar vein of "affirmative action," why not add someone recently retired from the political arena. I'm not suggesting that you go out and recruit just any politician for your board, and I'm certainly not suggesting that you recruit me. But in another 18 months, some of you will have the chance to add a man like Howard Baker to your board and he and those like him will be a great asset to any company.

If you agree that this is a good idea, I suggest that you tell your executive search firms to add Government service to the criteria they look for in candidates for your board of directors.

Third, as you pick your top officers, I would suggest that a higher degree of importance be given to someone who has taken the trouble to understand Government and its workings. Now, I'm not advocating political scientists to head our major corporations, but over the long term our country and your corporation will be better served if our corporate leaders have a real understanding of how both business and Government work and, therefore, can work together.

Fourth, I suggest that The Business Council, the foremost business organization in the country, should do some counseling. I know I'm treading on thin ice here and I am not suggesting the establishment of a lobbying effort. To me, there is a tremendous difference between lobbying, which projects a narrow point of view, and giving good advice, good counsel, and earning the respect of your partner.

And like it or not, Government is our partner. Perhaps every member of the Business Council should endeavor to build a relationship with one or two Members of Congress, not to lobby, but to counsel, not to ask for help but to offer help even if the offer is one of a business perspective on the problems we all face.

The way to build this relationship is on a personal basis over breakfast or dinner at your homes by means of a tennis game or a joint community project the same way you build a relationship with good friends.

Increasing communication cannot be a short-term program. The gap in commnication, in cooperation, in understanding is too deep.

Perhaps we should start a series of meetings to figure out other ways of increasing communications. These meetings should not only include Government leaders, but also labor and media.

We may face a special problem with our friends in the media who might see any business plan for increased communications with Government as part of some dark and ominous conspiracy. I believe we should lay our cards on the table and ask the leaders from the New York Times, Washington Post, The Los Angeles Times, The Houston Post, and the networks to join our discussion in hopes of finding common solutions for common problems.

I'm optimistic that Government and business can develop a new relationship. On my way down to The Homestead yesterday I was reading Lester Thurow's economic column in Newsweek. Thurow writes about the world leadership American agriculture has achieved. But, as he points out, it didn't used to be this way. In the early part of this century, American agriculture was in disastrous shape with virtually no growth in production and no productivity increases. In fact, Russia use to be the largest grain exporter in world markets.

American agriculture became the world's leader not only because of hard-working farmers and new technology, but significantly because of the partnership between agriculture and Government which produced a system to feed a third of the world.

Business and Government can match that success. But it will take hard work, understanding, and building a real partnership to face the world's challenges. It's an ambitious goal, but it's a goal that Americans in business and Americans in Government can achieve together.

Thank you for the courtesy of allowing me to speak to you this morning.●

EDUCATIONAL REFORM

● Mr. DURENBERGER. Mr. President, several of our colleagues on the Subcommittee on Education, Arts and Humanities had the privilege of hearing Ruth Randall testify on the recommendations of the National Commission on Excellence in Education's report, "A Nation At Risk: The Imperative for Educational Reform." Ruth is the commissioner of education in Minnesota, and has vast expertise in the Minnesota school system.

I was captivated by her perception of the role of the Federal Government in promoting quality education in our schools.

Mr. President, I ask that her testimony be printed in the RECORD, so that my colleagues have the opportunity to, also, review her testimony. I hope we share her common goal of improving and enhancing education for all learners.

The material follows:

TESTIMONY BY DR. RUTH E. RANDALL BEFORE THE U.S. SENATE SUBCOMMITTEE ON EDUCATION, ARTS AND HUMANITIES, JULY 26, 1983

To: Hon. Robert T. Stafford, chairman, and Members of the U.S. Senate Subcommittee on Education, Arts, and Humanities

Thank you for the invitation to testify before the Subcommittee on Education, Arts and Humanities. I am Ruth Randall, Commissioner of Education in the State of Minnesota since July 1, 1983. For two years immediately preceding July 1, I was the Superintendent of Schools in Independent School District No. 196, Rosemount/Apple Valley, Minnesota, a suburban school district of 13,200 students.

FIRST QUESTION

In response to your first question of how education excellence is achieved in the school system of which I have recently been a part, I submit this answer:

Education excellence is a result of cooperative efforts of students, teachers, administrators, support staff, board of education members, parents, and citizens. There must be cooperative efforts between students and teachers.

A school district must have a mission statement from which the goals are developed and the expectations set. In Independent School District No. 196 our mission statement was "Our mission is to treat each learner as a unique individual with unique potential whose limits he or she will ultimately determine". This statement was displayed on the walls of every classroom, teaching station, principal's office, custodian's receiving room, secretary's desk, executive office, and in the bus garage.

Each of the 1,500 employees was responsible for knowing and understanding the mission. Each was also responsible for helping to make the mission a reality in the district.

The district's long range plan from 1978 to 1983 focused on 3 major areas:

1. The development of teaching using the computer as both the object and means of instruction.

2. Staff development whereby teachers, administrators, and support staff improved and enhanced their skills and abilities.

3. Home-school-community relations whereby teachers and parents developed two-way communication on a continuing basis.

All 1,500 employees and 51,000 citizens were invited to participate in the determination of the strategies and tactics to carry out these goals. Even though all did not choose to participate, much appreciation was expressed for the opportunity to do so.

High expectations were set for teachers, other employees, and the learners. The supportive climate within the district made it possible for the teachers to spend their physical energy, emotional energy, and mental energy on teaching. The teacher is the most important person in achieving educational excellence.

Interested parents and citizens who cared about the quality of the schools were a strong part of the supportive climate in which the teachers and learners worked.

The high self concept on the part of the teachers who "knew they had an important job" contributed to the atmosphere within the district. The teachers were truly role models for the students in this respect.

Even though we worked very hard at excellence in education in Independent School District No. 196, we knew that change was necessary in the schools as we moved from the industrial society to the information society. We believed that change within the institution was no longer sufficient. The institution itself must change.

During the 1982-83 school year all teachers, other staff, students, parents, and citizens participated in developing a strategic

vision for institutional change. The vision included 3 parts:

I. Restructuring of Teaching and Learning: The purpose of education in the 80s must be determined and affirmed by all those involved. After knowing the why, the questions of who, what, when, where, and how of education in the 80s need to be answered. Then the standards and expectations must be set.

II. Management Practices: Participatory management calls for clear goals, participation, and honesty in using the input of others. Decentralization allows for those most affected by decisions to participate in making the decision. School based management provides opportunities for teachers, students, principal, parents, and citizens to make decisions regarding curriculum, staffing, and expenditures of general fund and capital fund dollars for their individual schools.

III. Extending the Financial Date: Wanting and doing so included—

(1) Establishing a 196 foundation to receive gifts and grants.

(2) Learning about regenerative funding and how to act on the knowledge.

(3) Developing school business partnerships in which the business, the school, and the teacher are partners.

(4) Assisting the teacher or other employees to become intrapreneurs or entrapreneurs.

Since ideas are the strategic resource and intelligence is the transforming agent in the information society, we believe in the involvement of others in this era of self help and self reliance. Therefore we began cooperative endeavors with the colleges and universities in the metropolitan areas; with the pastors and priests within the school district boundaries; with the cities and township leaders in our 110 square mile district; and with the presidents of the service clubs, chambers of commerce, and athletic associations.

These three components of the strategic vision restructuring of teaching and learning, management practices, and extending the financial base were in various stages of design, development, implementation, and evaluation in the Independent School District No. 196 when I accepted Governor Rudy Perpich's invitation to become the Commissioner of Education in Minnesota on July 1, 1983.

SECOND QUESTION

In response to your second question of steps which need to be taken to insure educational quality with reference to the recommendations of the National Commission on Excellence in Education's report, "A Nation At Risk: The Imperative for Educational Reform," I submit the following answer:

I support the beliefs upon which the recommendations are made, namely:

(1) That everyone can learn.

(2) That everyone is born with an urge to learn which can be nurtured.

(3) That a solid high school education is within the reach of virtually all.

(4) That life-long learning will equip people with the skills required for new careers and for citizenship.

I support Recommendation A on Content but I would add requirements for the Liberal Arts.

I support Recommendation B on Standards and Expectations.

I support Recommendation C on Time.

I support the concept within Recommendation D on Teaching, namely that the preparation of teachers should be improved and that teaching should be a more rewarding and respected profession.

I support Recommendation E on Leadership and Fiscal Support.

I believe, however, that the Implementing Recommendations in A, B, C, and E and the 7 recommendations in D on Teaching should be the subject of dialogue by all those affected before action is taken. The opportunities for dialogue should be immediate and conducted in an organized fashion so that all of those who wish to be involved have that opportunity. A timeline for dialogue and subsequent action should be set. The dialogue and action should occur at the local and state level as well as at the national level. Real change will occur at the grass roots level when one leader, one school district, one school board, one college or university, and/or one state determine they will act.

If I may be presumptuous, I would submit to you an action that is in addition to the recommendations in the report. Changes need to be made within the institution of schools, but the institution itself needs to change.

Of the three primary institutions of the church, home, and school, the church and home have undergone dramatic changes in the past 10 or 15 years, but the schools have not changed. We are still functioning as schools of the industrial society even though we have moved into the information society.

THIRD QUESTION

In response to your third question of the role federal government should play in promoting educational quality in the United States, I submit the following answer:

The federal government should exert leadership so that all citizens know that education is basic to all that we do in our country. An educated populace is necessary to function as citizens in our political system; to provide workers and consumers for our economic system, and to develop as individuals. The educated individuals will contribute to the quality of life for themselves and for all of us.

If the federal government supports with dollars, I agree with the areas as stated in Implementing Recommendations 3 and 4 Recommendation E. These areas include meeting the needs of:

(1) the gifted and talented;

(2) the socioeconomically disadvantaged;

(3) minority and language minority students;

(4) the handicapped.

They also include:

(1) protecting constituitional and civil rights for students and school personnel;

(2) collecting data, statistics, and information about education generally;

(3) supporting curriculum improvement and research on teaching, learning, and the management of schools;

(4) supporting teacher training in areas of critical shortage or key national needs;

(5) providing student financial assistance and research and graduate training.

However, I would like to offer a significantly different approach to federal support with dollars. Federal collection of money for these programs and its flow and distribution back to the programs' beneficiaries does not allow for the use of the two principles of leverage and accountability.

Leverage.—One consequence of federal taxation may be called the leverage or multiplier affect. An example of this effect is demonstrated by discussion of human capital development. Dollars left in the private economy (whether they be used to purchase a newer car or simply left in the investment portfolio of a rich person) are leveraged or multiplied to benefit others in the chain of purchase. They stimulate production, effort, and economic activity, and their nominal number is actually multiplied by a factor depending on the efficiency of their usage.

The same dollars collected for taxes and used to fund educational or other governmental programs are actually subtracted from and divided in their effectiveness. In many cases their effect is to diminish incentive on the part of the eventual recipient and thus, in these cases, have little if any, redeeming value. When the development of human capital is the aim, the means has severely thwarted the goal and is virtually contradictory.

Additionally, in the current national situation federal dollars are extremely difficult to come by. In the light of the certain national catastrophe and the private economy which will result from the expansion of the federal deficit, it is also extremely dangerous to tax further for any types of federal programs.

Accountability.—in any discussion of federal funding, it is helpful to destroy the myth of "vanishing local resources," i.e., individual persons and businesses. If these local sources are drying up for state collection purposes then they are surely drying up for the federal government as well. The reality is that education dollars are there. There are discretionary dollars to be spent on education and the real issue is accountability. The legislation and funding for educational purposes must be as close to the action as possible if they are to be effective. The siphoning off of the funding due to the rising cost of administering federal programs should also be mentioned. I do not believe the collection and expenditure of dollars by the federal government is cost effective.

I would not, however, want Minnesota to be left in a vacuum. Federal taxation and policy for education should be reduced across the board so Minnesota citizens are not forced to pay for education projects and programs in other states if we are going to use our state resources to support Minnesota's educational system.

Let me make absolutely clear that I believe federal taxation should be reduced for all other projects and programs supported by the federal government. Money should not go to other areas in lieu of education.

I thank you for this opportunity to testify. I look forward to further interaction with you and other members of Congress. I believe we have a common goal of improving and enhancing education for all learners.●

THE PUBLIC SCHOOL SYSTEM

● Mr. DURENBERGER. Mr. President, I recently came across an article written by one of our colleagues in the House, Representative BILL GOODLING. I found his approach to education enlightening and thought provoking. I hope my colleagues find the article as interesting as I did.

I ask that Representative GOODLING's article, "Will Congress Do More Harm Than Good on Education?" be printed in the RECORD.

The article follows:

WILL CONGRESS DO MORE HARM THAN GOOD ON EDUCATION?

(By Bill Goodling)

Fingers are being pointed. Words are flying. And once again, Congress and the country find themselves caught in the emotional crossfire of the latest 'hot' issue: the ills of the American public school system.

As a former educator, I am excited to see education in the national limelight after many years of nonchalant attention. As a legislator, I fear the fallout.

When the public din has quieted and political posturing has ceased, legislators and taxpayers alike will be faced with the next-morning realization that there is no quick-fix, no miracle and no guarantee of success to be purchased by a fast infusion of federal dollars. Yet, I fear that before this homely truth has emerged, Congress, in its customary manner when confronted by a loud public outcry, will have dumped a wheelbarrow full of money in the general direction of the problem and closed its eyes, hoping for the best.

The Twentieth Century Fund, in its recent report to the nation on the state of public education, asked a single question that cuts to the heart of the issue: "Why, despite spending more per student than every other advanced nation, is there a growing gap between the goals and achievements of our schools?".

The answer, includes changes in the American family, the commitment of public education to the teaching of the many rather than the few, the dilution of a strong core curriculum. The overriding message from the Fund's provocative inquiry is that it is perhaps in the intangibles that both the problem and its solution lie.

We can't legislate the chemistry between a student and a teacher. We can't mandate a home environment where discipline and the pursuit of excellence are 'givens'. And we can't sit on Capitol Hill and carve into stone a magic formula to guarantee that every Johnny and Jane can and will study the 'right' amount of literature, math, science, etc. Every child is unique, every school different in character.

Recognition of this singularity and the richness that such diversity can bring to the educational process is the key to understanding that education is best left in the hands of the educator—not the legislator.

What we can and should do—parents, citizens, legislators—is to continue to give education a good deal of attention. Debate, if not translated into rash congressional action, will give the country's educators the courage, incentive and support needed to try new solutions—tougher graduation standards, merit pay for excellent teachers, unconventional class and school-day structures.

Fundamental to this discussion, however, must be the implicit recognition that what works for a school in the Bronx may not work in rural Mississippi, and that to try to dictate a single solution from the federal level for them both or for any other school is to commit a grave error.

In making education a national priority we must take care not to fall prey to the illusion that such a commitment is best-served, or even well-served, by the promulgation of a sweeping national education agenda that presumes to be all things to all people.

What form, then, should our national commitment take? Where do we draw a clear line between appropriate federal support and well-meaning meddling?

We begin, I think, by acknowledging that the kinds of strings that are customarily attached to federal aid can readily strangle the local initiative and inventiveness vital to the improvements we seek. This is not to say that federal support is not necessary, or that such accountability is unwarranted.

The federal commitment, however, must be carefully balanced against the regulatory baggage that goes hand in hand with federal involvement. If our problem, indeed, lies less in dollar amounts than in the accompanying strictures that can stifle flexibility and creative solutions within the walls of the schools themselves, then let us by all means proceed with great caution in dishing out with both hands more of the same.

Let's give schools and communities a chance to look within themselves and to each other for their cures—with our help—before we drown them in high-sounding proclamations about when is right and good for all schools, everywhere.

Instead of shadowboxing with those intangible factors that money cannot fix—home environment, student-teacher chemistry—we in the Congress can foster with a little seed money the kind of experimentation in curricula and standards in our public schools that is rooted in local ingenuity and practicality. Legislation that I recently introduced in the House and that John Heinz initiated in the Senate provides a reasonably small yet potent source of funding for schools willing to pioneer new standards of excellence in the classroom.

For the 500 institutions whose proposals for change receive the blessing of the bill's grant program, such restrained federal participation presents an unparallelled opportunity to innovate teaching and administrative methods with government support, but without government red tape. Over the three-year life of the program and an expenditure of $50 million—a small investment in congressional terms—we can tap the extensive pool of expertise at work daily within the walls of our educational institutions. From them we can learn what works and what doesn't, what helps and what hinders—and pass along successful formulae.●

FOURTH PRESIDENTIAL CERTIFICATION FOR EL SALVADOR

● Mr. PERCY. Mr. President, the Senate Foreign Relations Committee scheduled hearings on the President's fourth certification on El Salvador for Thursday, August 4, in the afternoon. Due to intense committee and congressional interest in recent Executive policy initiatives in Central America, the committee found it desirable to schedule an open hearing with the Secretary of State on the subject of U.S. policy in Cental America. The session was very useful as members were able to engage in a candid exchange of views with the Secretary. I strongly recommend the Secretary's opening statement to my colleagues in the Senate.

Unfortunately, because of the press of time on the committee calendar and the very active floor schedule here in the Senate, I was obliged to cancel the scheduled public witness session of testimony on the situation in El Salvador. I believe the reports on the human rights situation in El Salvador, in particular, would be of interest to the Senate, and therefore, Mr. President, I request that the testimonies of Mr. Aryeh Neier of Americas Watch Committee, Mr. Michael Posner of the Lawyers Committee on International Human Rights, Mr. William C. Doherty of the American Institute of Free Labor Development, AFL-CIO, Charlie Clements, M.D., M.P.H., Senior Fellow for Center for Development Policy, and Col. Samuel T. Dickens USAF, retired, be printed in the RECORD.

The material follows:

TESTIMONY OF ARYEH NEIER, VICE CHAIRMAN, AMERICAS WATCH

My name is Aryeh Neier. I am Vice Chairman of the Americas Watch Committee and Vice Chairman of the Helsinki Watch Committee. I appear here today on behalf of the Americas Watch.

As members of these committees are aware, the Americas Watch has monitored closely the human rights situation in El Salvador. During the past two years, at six month intervals, we have issued four comprehensive reports on human rights in El Salvador. In each instance, those reports were based in part on information gathering visits to El Salvador. I took part in such visits in connection with the preparation of two of those reports. Most recently, I was in El Salvador a month ago to gather information for the report that we published on July 19, 1983. I wish to submit that report as an appendix to this testimony.

On the basis of our close monitoring of developments in El Salvador, the Americas Watch believes that the human rights situation is steadily worsening. The statistics tell part of the story. During the first six months of 1983, the human rights monitoring office of the Archdiocese of San Salvador tabulated 2,527 murders by government security forces and paramilitary groups allied with them and 326 disappearances after abductions by those forces. Since those who do not reappear within fifteen days after such abductions never reappear, these two figures must be combined to arrive at the known total of murders by government forces during the first half of 1983: that is 2,853 murders. This is a higher rate of murders than in 1982 and it brings the total known to have been murdered to over 38,000 (that is more than 36,000 murders and more than 2,200 disappearances) by government forces and paramilitary groups allied to them in less than four years. One finds oneself searching for ways to present such staggering figures in a way that conveys their full horror. It can't be done. But perhaps one way to think about it is to realize that the government of El Salvador has murdered nearly one out of every hundred of its citizens and, if murders were distributed evenly among families, approximately one Salvadoran family in twenty has had one of its immediate members murdered by the government. At least another twenty Salvadorans out of every hundred have fled their homes during the past four years, some of them seeking refuge outside the country, some hundreds of thousands getting no further than a displaced persons camp within the country. Moreover, our finding that the situation is steadily worsening is not based only on the misery that has been inflicted on the Salvadorans up to now.

It is based on the realization that there is no prospect for any improvement. The only prospect is that many thousands more will be murdered by the Salvadoran government's security forces or will disappear after abductions by those forces. Many thousands more will be tortured by those forces. And tens of thousands more will be driven from their homes by those forces.

The reason that the prospect is so dismal is that the armed forces of the government of El Salvador engage in murder, abductions, torture and forced displacement of the population as a matter of policy. Their apparent intent is to exterminate those Salvadorans suspected of harboring views that are contrary to those of the government and to terrorize Salvadoran civilians so that they fear to permit guerrillas to survive in their vicinity.

In response to pressure from members of Congress, the Reagan Administration has made some efforts to persuade the Salvadoran armed forces to change their ways. Those efforts have failed and will continue to fail because the Reagan Administration has made it plain that its support may be counted on under any circumstances. Accordingly, the Salvadoran government has responded to pressure to improve its human rights performance with a few gestures that deal with marginal matters. The central human rights problems of murder, abductions, torture and displacement of population are unaffected, however. The certainty that U.S. support will continue makes it unnecessary for the armed forces of El Salvadore to change their ways on these matters in response to pressure from the United States.

Not only are the Salvadoran armed forces certain that U.S. support for them will continue no matter how many murders they commit, they are equally confident that the United States will continue to put as good a face as possible on their practices. They have every reason to be so confident. Four times, the Reagan Administration has been required by U.S. law to cut off military aid unless the Salvadoran government is making concerted and significant effort to protect internationally recognized human rights and unless the Salvadoran government is controlling all its armed forces to end torture and murder by those forces. Four times, the Reagan Administration has confronted situations in which the conditions of U.S. law cannot be said to be met by any conceivable standard. Yet, four times the Reagan Administration has duly certified that the conditions of U.S. law have been met.

The July 20, 1983 certification is typical. The information cited in the document itself makes it plain that the conditions of U.S. law are not being met in El Salvador. Yet the document's conclusion is offered in disregard of that information.

As of the information in the document, much of it is misleading and much of it is just wrong. Here are some examples:

The certification says that the government of El Salvador "is committed to . . . building a lasting democratic order." Actually, the political leadership of the center and the left in El Salvador is being murdered or driven from the country. (See pages 37-42 of our July 19, 1983 Report) Accordingly, it is nonsense to talk of the establishment of a democratic order.

The certification says that a government Peace Commission "has made several public appeals to members of the Revolutionary Democratic Front (FDR) . . . to find mutually acceptable ways for them to participate in the democratic process, including this year's presidential elections." Actually, such appeals are meaningless so long as incidents take place such as the one in November 1980 when the security forces surrounded a high school where six FDR leaders were holding a press conference, kidnapped them, tortured them, mutilated them and murdered them; or the incident in October 1982 when the security forces kidnapped 17 FDR leaders, initially denied that they had been kidnapped and then acknowledged the imprisonment of eleven. Six remain disappeared. (See pages 30-36 of our January 19, 1983 Report) Any FDR leader who stepped forward to take part in the electoral process could anticipate a similar fate.

The certification says that "Salvadoran organizations which monitor human rights confirms this downward trend in the level of violence over the past two years." This is false. There has been no downward trend. The number of political murders by the security forces has remained steady at the level of about a 100 a week for the past year and a half. The number of disappearances after abductions by the security forces has remained steady at the level of about 40 a month for the past year and a half except that the number jumped sharply in May and June 1983, averaging nearly double as many as previously.

The certification imputes the difficulty in controlling human rights violations by the armed forces to the fact that "the Salvadoran legal system is in a state of virtual collapse." Actually, this is a dodge. It implies that abuses are committed by rogue members of the security forces. In fact, the quantity of murders is so enormous that it is plain that these murders are committed as a matter of armed forces policy.

The certification has nothing to say about the prosecution of members of the armed forces for human rights violations against Salvadorans, only about disciplining or prosecution for common crimes. Yet prosecutions for human rights violations are a central concern of the certification law. In the Americas Watch reports for July 19, 1983 and January 20, 1983, we demonstrate that the Department of State has engaged in deception on this question. Apparently, having been caught, the Department of State left out the subject entirely in the July 20, 1983 certification.

The certification says that reports in the Salvadoran press, from which the U.S. Embassy in San Salvador gets the figures on murders and disappearances that are set forth in the certification by the Department of State, "are subject to a degree of underreporting, but they do accurately reflect trends." Actually, they are subject to gross under-reporting and they accurately reflect nothing. (See pages 77-81 of our July 19, 1983 Report)

The certification says that, "The armed forces in general, are becoming more sensitive to the treatment of both civilians and prisoners." This is false. The sharp rise in disappearances after abductions by the armed forces in May and June 1983 demonstrates that civilians and prisoners face even greater risks than ever if they fall into the hands of the armed forces. (See pages 24-7 of our July 19, 1983 Report)

The certification says that the human rights monitoring office of the Archdiocese of San Salvador "monitors figures on deaths from *Radio Venceremos* (the guerrillas clandestine radio station), denunciations from family members, and other human rights groups' statistics. These figures may be subject to duplication of reporting from other sources. They may also be inflated since there is no distinction made between press reports of guerrillas killed in action and civilian deaths attributed to political violence." This is false. The information compiled by the Archdiocese of San Salvador and published in its monthly reports on political violence is exclusively derived from primary sources—that is testimony taken by the office from eye-witnesses and family members. Names, ages, residences, places and circumstances of killings and abductions are provided along with attributions to the forces responsible, whether government, paramilitary, unknown or guerrilla. Many widely publicized murders are not included in the Archdiocese's reports because the human rights monitoring office is unable to obtain first-hand testimony from family members or eye-witnesses.

In making this false assertion about the human rights monitoring office of the Archdiocese of San Salvador, the Reagan Administration continues its practice of smearing the human rights groups that, at great risk, bring the bad news about the human rights situation in El Salvador.

Again, though the certification document itself is replete with misinformation and distortions, the information it does contain demonstrates that certification is not warranted. Even though the Department of State tries hard to paint a picture of human rights progress, nothing can disguise the fact that El Salvador is a human rights disaster area and that the situation is getting ever more disastrous.

TESTIMONY OF MICHAEL POSNER, EXECUTIVE DIRECTOR, LAWYERS COMMITTEE FOR INTERNATIONAL HUMAN RIGHTS

Mr. Chairman, thank you for inviting me to testify. My name is Michael Posner. I am the Executive Director of the Lawyers Committee for International Human Rights in New York. For more than two and one-half years the Lawyers Committee has served as legal counsel to the families of the four United States churchwomen who were murdered in El Salvador in December 1980. My comments today reflect the families' continuing frustrations over the failure of the Salvadoran Government to properly investigate and prosecute those responsible for this horrible crime, and their growing concerns about our own government's ineffective response to these failures.

Earlier this month I visited El Salvador on behalf of the four families. I was accompanied by Scott Greathead, a member of the Lawyers Committee Board of Directors. While in El Salvador, we met with a number of Salvadoran Government officials, including Dr. Mario Adelberto Rivera, the Fiscal General (Attorney General) of the Republic, and Bernardo Rauda Murcia, the presiding judge in the case. We also met with private lawyers and experts on the Salvadoran legal system, as well as United States Embassy officials.

Based on our visit, we seriously question the conclusions contained in the State Department's recent certification report on El Salvador. While that report concludes that "the Government of El Salvador appears to have made a conscientious effort to prosecute these murders," we believe that the Salvadoran prosecutors have yet to take basic steps necessary to preparing a successful prosecution. While the State Department concludes that "the Salvadoran Government is making good faith efforts to

bring to justice those responsible for the [churchwomen's] deaths," we continue to find a disturbing pattern of official indifference, incompetence and ill-will—attitudes that prevent successful resolution of this case.

INADEQUACY OF SALVADORAN PROSECUTORS

Based on our discussions with the prosecutors handling the churchwomen's case, we believe that they lack both the will and the ability to successfully prosecute those responsible for the murders. Seven months ago, during an earlier visit, we first learned that the Fiscal General of El Salvador was unaware of key evidence developed by and in the possession of the FBI—including a death threat against the church in Chalatenango, where two of the churchwomen worked. According to officials in the U.S. Embassy in El Salvador, this death threat had eight clearly identifiable sets of fingerprints on it. The prosecutors have little interest in obtaining this and similar evidence, and are doing little to ensure that existing evidence will be admissible at trial. For example, they have done nothing to introduce into the court record a thumbprint of Colindres Aleman, the ringleader of the five imprisoned National Guardsman. This print was taken from the van in which the women were riding on the night of their murder. Because the FBI, and not Salvadoran authorities, conducted the fingerprint analysis, this evidence is not now admissible.

In our visits to El Salvador, we have also learned that the prosecutors have made no apparent effort to develop a plausible theory as to the motive for the crime or a response to anticipated defense. Although the Fiscal General conceded that "acting on higher orders" is likely to be a defense, he makes it clear that he does not intend to investigate existing evidence suggesting there were superior orders to apprehend the churchwomen.

During our most recent visit last month, we found that the prosecutors, have done almost nothing in the past six months to advance the case to trial. Virtually the only preparation that has been done has been the result of U.S. initiative and action, such as the appointment of Judge Harold Tyler to help identify evidentiary leads and the FBI's replication in El Salvador of ballistics tests it has previously conducted in the United States. Similarly, last weekend the State Department and the FBI brought a key witness to El Salvador, Dagoberto Martinez Martinez, who had previously given important testimony to the FBI in Los Angeles which was inadmissible until it was repleted in El Salvador. However, only the Salvadoran prosecutors responsible for the case can effectively use the evidence developed by the FBI, Judge Tyler and others. Those now assigned to the case are clearly incapable of doing so.

The complete indifference of the Fiscal General's office to the success of the case is reflected in its present staffing arrangement. Almost all of those working on the case are law students. While in El Salvador, we were reliably informed that one of those students, Bachiller Leonel Romero Cordero, has been acting as a coordinator of the case despite the fact that he was once removed from office for accepting a bribe from the defense attorney in connection with a trial he helped prosecute.

THE NEED FOR A SPECIAL PROSECUTING ATTORNEY

Mr. Chairman, I could go on at length cataloguing the deficiencies that have marked the Salvadoran Government's handling of the churchwomen's case.[1] However, anything else I or anyone familiar with the case could tell you simply adds weight to what is now an inescapable conclusion: Because of the prosecutor's unwillingness to conduct a proper investigation or to adequately prepare for trial, it remains unlikely that anyone will ever be successfully prosecuted for these crimes. Rather than belabor a point that has become obvious—and indeed was evident when I testified six months ago during the last certification hearings—I would like to suggest one important step that can be taken to break the perpetual cycle of inaction that has prevented this case from moving forward.

Mr. Chairman, I strongly urge you and the members of this committee to support the appointment of a special prosecutor by the Government of El Salvador. This week, Senators Leahy, Lautenburg and Sasser introduced a Senate resolution calling on the U.S. Government to urge the Salvadoran Government to make such an appointment. I have a copy of that resolution which I ask be inserted in the record of these hearings. I understand that a similar resolution is being introduced in the House. The families and I very much welcome this initiative because we think that the appointment of a special prosecutor is essential to successful resolution of this case.

Working with the full authority of the Government of El Salvador behind him, a special prosecutor would be in the best position to ensure that the case is properly investigated and tried. Without a special prosecutor, we seriously doubt that a proper investigation and successful trial will ever take place.

The appointment of a special prosecuting attorney in this case would also serve as a symbolic acknowledgment by the Government of El Salvador that it intends to prosecute those who are responsible for the murder of innocent civilians, even in cases where members of the armed forces are involved. In this respect, such an appointment would represent an important step toward curbing abuses by members of government security forces, who, according to the recent certification report, presently "act without fear of official reprisal."

The churchwomen's case may provide the only opportunity to begin to address the problem of unrestrained violence perpetrated by government security forces in El Salvador. During the last three and one-half years, when 35,000 innocent civilians, including El Salvador's archbishop, have been killed, only the cases of murdered Americans have been pursued; only the churchwomen's case is currently being pursued with any real hope of success.

Accordingly, the demand to fix responsibility in this case has become part of a far wider demand that elementary respect for human rights and human life be restored and recognized by those who wield the force of government in El Savlador. In view of the symbolic importance this case has assumed, the consequences of a failure to reach a just conclusion would resound far beyond the halls of Judge Rauda's court. We cannot afford the price of further violence that will be exacted if we fail to do everything in our power to achieve justice in this case. Those in the armed forces of El Salvador must begin to recognize that they can no longer systematically violate the rights of innocent civilians confident that the civilian government will never impose sanctions against them.

THE ROLE OF THE U.S. GOVERNMENT

Congress has recognized the importance of meaningful progress in the churchwomen's case as a means of advancing justice and checking unrestrained violence in El Salvador. Unless such progress can be shown, the certification law therefore prohibits further U.S. aid to El Salvador.

The Administration's repeated certifications that the Government of El Salvador has "made good faith efforts" to investigate the churchwomen's case and to "bring to justice all those responsible" for their murders has made a mockery of that law. By endorsing the totally unacceptable efforts of Salvadoran officials, this certification has also sent an unmistakable signal to the Government of El Salvador: No matter what happens—or fails to happen—in the churchwomen's case, the United States will continue to provide the certification necessary to continue the flow of aid to El Salvador. The Salvadoran Government cannot doubt this when our government certifies progress in the case even while it acknowledges the hopelessness of obtaining a successful resolution:

Convictions in serious criminal cases, in particular those with political overtones of any kind, are virtually unobtainable. * * *

Nor can there be any doubt that the Administration's determination to "certify at all costs" has destroyed our ability to promote the churchwomen's case in particular or respect for life generally in El Salvador. Privately, Salvadoran officials repeatedly note that they do not believe the U.S. will cut off air regardless of what human rights violations are committed in El Salvador.

This perception destroys any incentive on the part of the Salvadoran Government to promote respect for human life. The Government of El Salvador is essentially a military government. Our capacity to influence that government's respect for human life is thus limited to our ability to condition military aid on a demonstrated commitment to promote human rights.

CONCLUSION

In conclusion, I believe that there are concrete steps our government can take to promote progress in the churchwomen's case and, by doing so, to help restore respect for human life throughout El Salvador. First, the imcompetence, indifference and ill-will, that have characterized the prosecutors' handling of this case make it imperative that a capable, independent special prosecutor be appointed by the Government of El Salvador. Congress has the opportunity to make an immediate, urgently-needed, and significant impact on the progress of this case by adopting the resolution urging the United States to call upon the Government of El Salvador to make such an appointment.

Second, our expressions of concern must ultimately be coupled with a credible threat to terminate U.S. aid if the Government of El Salvador fails to take concrete steps to end human rights abuses. This administration's cynical, automatic certification of Salvadoran "good faith" has led to disastrous results: it has destroyed any incentive for the Government of El Salvador to control the abuses of its security forces, and it has

[1] I attach as an appendix a letter that Scott Greathead and I recently sent to Assistant Secretary of State Langhorne Motley summarizing our most pressing concerns about the investigation and prosecution, and ask that the letter be admitted into the record of this hearing.

weakened our international reputation and credibility. Congress must not abandon this opportunity to use the leverage and moral authority of the United States to pressure Salvadoran leaders to bring to justice those responsible for the murders of U.S. citizens and 35,000 other civilians. Therefore, Congress should make it clear that the Government of El Salvador will not receive further arms and money if it continues to flout minimum standards of human rights.

STATEMENT OF WILLIAM C. DOHERTY, JR., EXECUTIVE DIRECTOR, AMERICAN INSTITUTE FOR FREE LABOR DEVELOPMENT

Mr. Chairman, it is indeed an honor on behalf of the AFL-CIO to have been invited again to testify before this distinguished Committee. We have prepared this statement in consultation with Dr. Roy Prosterman, of the University of Washington, and Ms. Mary Temple, of the Land Council, who concur with the land reform section of this text. Most importantly, this presentation expresses the general views of the Unidad Popular Democratica (UPD) with whom we are in constant contact. The UPD has framed a declaration which we have attached to this document (Attachment No. 1).

El Salvador seems to be a problem for the United States that simply will not go away. That may be true for some time to come and, of course, it is only one part of the larger problems of Central America. But if events in El Salvador and the difficult foreign policy choices which they bring are a frustration to U.S. citizens and their representatives in Congress, please believe us when we tell you that those frustrations are shared by, and are even much more important to, the millions of decent democratic Salvadoran citizens who want nothing more than to live in peace in a society which democratically reflects their best interests. The average Salvadoran wants nothing to do with the solutions of either the extreme right or the totalitarian Marxist-Leninist left.

The problem for the AFL-CIO is how best to support the development of the democratic center represented in great part by El Salvador's free trade union movement which has rallied under the banner of the Unidad Popular Democratica (UPD). The problem for U.S. foreign policy is how to support democratic pluralism in El Salvador as the only effective force that can democratically bring about the trade union center, but also other centrist forces in El Salvador who are desirous of necessary social, political and economic change.

Democratic change, which began in October 1979, and is just beginning to take hold in El Salvador is the only true revolution; the idea that men and women of a nation have the right and duty to chose their leaders and an equal right to periodically change them. The AFL-CIO is proud to be a part of this revolutionary process and proud of the democratic trade unionists with whom we work in El Salvador to this end.

GENERAL POLITICAL ANALYSIS

The so-called revolutionary movement of El Salvador's radical left, represented by the guns of the FMLN, promises only another variety of totalitarian rule. On the other extreme of the political spectrum are powerful forces, both in and out of the Salvadoran governmental structure, which, if successful, would return the country to the despotic political rule which existed prior to October of 1979.

Although a threat not to be lightly dismissed, the armed Marxist-Leninist insurgency has not shown the ability to attract large numbers of Salvadorans to its cause. Three years ago, they claimed only the same number of guerrillas under arms that they do today (5,000–7,000) despite the massive military support from Cuba and Nicaragua. Meanwhile, the citizens of El Salvador completely rejected the guerrillas (simply by the act of voting) as a political alternative in the March 1982 elections. If the extreme left could be convinced to participate in the forthcoming elections (and we hope they will), we do not believe that they will show sufficient support to upset the democratic process.

NEGOTIATIONS/DIALOGUE/POWER-SHARING

We think further, that the FMLN/FDR have made the same analysis and have come to roughly the same conclusion. Hence we have seen a renewed interest by the extreme left in the possibility of negotiations that could possibly lead to a sharing of government power. (FDR representatives are currently saying that their interest is only to have "open" negotiations). The AFL-CIO and the UPD positions on "power sharing" has not changed since our last appearance before this Committee. We continue to feel that only an honest electoral process will provide the people of El Salvador with the best possibility of determining their own political solution.

Thus, in general we view the FMLN/FDR as having limited options. Their more radical leadership may continue to fight a "prolonged war" for some time to come with a resultant tremendous loss of life and physical damage, but, unless there are great changes in the military situation, their best hope is for military stalemate. A decision to attempt to gain power through the electoral process would, in our opinion, doom them to an ineffective role in governing the country. It is quite natural, then, that they would like to participate in negotiations for the purpose of sharing power.

There is an added incentive for the democratic forces currently associated with the guerrilla left, the frustrated democrats, to want to negotiate toward this end. They know that in the event of a guerrilla military victory, their role would be ineffective and short-lived as the men with the guns would soon claim their right to rule and impose their Marxist-Leninist philosophies on the people of El Salvador—just as have the Sandinistas in Nicaragua.

THE FORTHCOMING ELECTIONS

As important as the next elections will be in the development of the democratic process, one should not feel that they will quickly end the war, or reduce by themselves the human rights abuses, or immediately guarantee the success of the reform programs. Much obviously depends on the outcome of the elections, and the extreme right is continuing to increase its strength and influence. The most important aspect of the forthcoming elections will be the possibility of the establishment of a government that can and must accept the responsibility of governing in the best interests of the entire Salvadoran people. Only a strongly elected government with a strong popular mandate to rule can fulfill this risk.

The risks are great, and the desired outcome is by no means assured. The greatest risk is that the far right will emerge victorious and continue to try to destroy the reforms. And no one can assure that even a centrist government that emerges from the next election will have received a mandate from the people to rule strongly.

There are many democratic forces today in El Salvador which are calling for a postponement of elections until 1984 in order to have more time to prepare an adequate campaign. Normally, democrats do not seek the postponement of elections, but this is, of course, an exceptional period in Salvadoran history. The Unidad Popular Democratica (UPD) is among those organizations favoring a postponement. An explanation is in order.

The members of the Assembly who were elected in March 1982 legally had only one major task before them—to write a new constitution. They formed a *Constituent* Assembly. After more than fifteen months in office, a new draft constitution has only recently been made public and it has come under very serious criticism from various sectors of El Salvador, including the trade union movement.

(The following are examples of the substance of very controversial clauses in the draft: The land reform program might be killed by guaranteeing unrestricted land rental, only political parties could take part in political debate, and the Army would be responsible for the protection of citizens' human rights as well as determining whether or not the country was being run democratically).

The public debate over these and many more such issues cannot be expected to end quickly without the charge that the new constitution has been "railroaded" through the Assembly and foisted upon the country. If the citizens of El Salvador feel that there is validity to such an accusation, it will make governing under the new constitution an impossibility. Thus, to have been a productive exercise, the public debate will have to be not only allowed to continue but encouraged.

Unfortunately, an electoral law cannot be written until the new constitution is approved. Since we are, in August, only a few months away from the previously announced date of the elections, it is highly unlikely that there will be time for the public debate on the Constitution, the writing (and possible debate) on the new electoral laws, and adequate time to present a political campaign by the contending parties to the general public. For these reasons, many democratic organizations and the UPD are arguing that the election date should be postponed, but held during 1984.

We would like now to discuss some of the specific problems that we face in El Salvador for the purpose of updating this Committee on the Hammer-Pearlman-Viera murder case and the land reform program. In the process, we believe we will be explaining more fully the reasons that we have found it necessary to call attention to the resurgent strength of the Salvadoran right wing.

HAMMER-PEARLMAN-VIERA MURDER CASE

You may remember from our testimony to you of February 2, 1983 that in October 1982 the Fifth Penal Court of El Salvador handed down a decision on the Hammer-Pearlman-Viera murder case that the AFL-CIO considered so atrocious that we decided to make public the information that we then had available. The decision of "insufficient evidence" against Hans Christ and Lopez Sibrian was appealed to the same court, and in January 1983 the judge confirmed his previous decision. The Attorney General's office then appealed to the Magistrates Court and, in an April 29, 1983 decision, sustained the decision of the Fifth

Penal Court. Finally, the decision of the Magistrates Court was appealed to the Supreme Court where the case is now "being considered" only on grounds that a procedural error might have been committed.

Assuming that the Supreme Court finds no procedural errors in the lower courts' handling of the case, the effect of the April 29 decision is that there can be no further civil legal recourse against Hans Christ and that, with regard to Lopez Sibrian, we have one year from the date of the Supreme Court's decision (probably within the next two months) to provide still further evidence that the court would consider "sufficient." If, on the other hand, the Supreme Court does find procedural errors in the lower court's handling of the case, additional evidence against both Christ and Lopez Sibrian may again be presented to a court ordered to reconsider the case.

The AFL-CIO continues to be urged to hire an "acusador particular" but, as yet, our position on this matter remains the same as reported to you in our last testimony before this Committee. (An "acusador particular," you may recall, provides a function similar to the Attorney General's and acts on behalf of the aggrieved parties). We do, however, constantly re-appraise this aspect of the case and have not closed the door entirely on the possible use of an "acusador particular."

Meanwhile, the two confessed murderers, the Army privates who pulled the trigger on orders from their superior officers, Lt. Lopez Sibrian and Capt. Avila have not gone to trial. The elevation of their case to the Plenary, or trial stage, may not take place until the appeal, currently before the Supreme Court, is decided upon.

As a practical matter, no further investigation (by the courts of El Salvador) of the case is possible, since the records are in the hands of the Supreme Court.

AFL-CIO POSITION ON MILITARY AID

The AFL-CIO continues to believe that military aid to El Salvador should be suspended until there is progress in obtaining justice in this case, as well, of course, as in the cases of the other U.S. citizens. We do not feel that anything which has transpired since our last presentation to you can be construed as progress. To the contrary, we consider that we are worse off today than we were six months ago if only because the legal delays in the case, we believe, reflect a basic unwillingness to prosecute those really responsible.

Despite our deep dissatisfaction with the handling of the case and, more profoundly, with the corruption of the Salvadoran judicial system, we should like to point out that many Salvadorans are dedicated to judicial reform, not simply because it serves to placate North Americans, but more importantly because it is they who must live under that system. Responding to the need for reform, President Magana has taken steps to set up a Commission of very distinguished lawyers whose purpose is to recommend improvements in the criminal code. The establishement of this Commission represents only the first feeble step in the right direction, but it is a move that should be recognized, applauded, and supported.

HUMAN RIGHTS VIOLATIONS TOLERATED BY ARMY

The AFL-CIO position has long been that real control of human rights abuses depend in large measure on the functioning of the judicial system. Thus, it is not surprising (although extremely distasteful to accept) that such abuses have increased in the last six months. We accept as true the estimates of other legitimate human rights' organizations of an increase in non-military related violence, since we have no independent capacity to make such evaluations. With that caveat, however, we would like to make two brief human rights-related comments.

First, the UPD has again, thank God, been able to report to us that none of their leadership have recently been victimized by violence. Some have, however, received death threats and we do not believe for one moment that they are immune from the atrocities which have befallen so many of their fellow citizens. We strongly suspect that the majority of the non-combatant violence emanates from the death squads of the far right. Two weeks ago, for example, two campesino members of the Union Communal Salvadorena (UCS) were murdered by "unidentified armed men" in a land reform-related incident.

Secondly, since we last met with you, a group of 74 campesinos, including 18 members of the Asociacion Nacional Indigenos Salvadorenos (ANIS), an affiliate of the UPD, was massacred by members of the Salvadoran Army. The killings, which occurred in the Canton de las Hojas, in Sonsonate, on February 22, 1983, have been well publicized in the press, and it would therefore seem unnecessary to recount the details at this time. In a bizarre turn of events, however, the father of one of the victims was put in jail, (subsequently released on July 26, 1983), accused of attempted murder of one of those who initiated this horrendous crime while the Army officer remains at liberty. It would seem obvious that in this case (as in the Hammer-Pearlman-Viera case), the Army is simply unwilling to punish its own. However, this case has only begun to be processed, and the campesinos are receiving the strong support of the Human Rights Commission of El Salvador. It is, therefore, still too early to make final conclusions.

Nevertheless, such actions by the Army cannot be allowed to continue, if not for obvious moral and judicial reasons, then for more down-to-earth political reasons. This is not just one more "internal Salvadoran matter" not subject to comment by the Government of the United States. This is one more example of an Army whose actions would seem to be above the law. The U.S. Administration is currently engaged in a campaign to inform the American people of the correctness of U.S. policy in Central America and El Salvador. How is the Administration going to explain away this case, the Hammer-Pearlman-Viera case, of the Catholic nuns, and (if they were more widely known to Americans), the cases of hundreds of Salvadorans who have been murdered by the death squads and/or the Army? We cannot ask the American public to understand and accept a policy of support for each elements in El Salvador on the assumption that the other alternative that is offered to them will be worse, i.e., the Marxist-Leninist guerrilla leadership. The U.S. Government must even-handedly protest each and every such barbaric act and, if necessary, reduce military aid accordingly. In so doing, the U.S. would support the democratic center in El Salvador, which abhors these abuses of power every bit as much as their North American counterparts. Only by so doing will there be a possibility of soliciting the support of the American people for our efforts in El Salvador.

On balance, the Salvadoran Army is needed to defeat the guerrillas. On balance, the Army has, in most instances, been supportive of land reform. And on balance, not every Army officer is a killer. Now equally on balance, the U.S. Government must pressure the Army to clean up its own act, and if we are accused of "intervention" in process, so be it. Such a policy will be applauded by thousands of democratic Salvadorans whom we should be supporting.

DEVELOPMENT OF DEMOCRACY

The democratic center of El Salvador has not been dormant during this period of change. A week ago last Sunday, the UPD organized a forum, which attracted more than 1,000 persons from all walks of life, to discuss the new constitution. The development of a commission of lawyers to propose changes in the criminal code has been mentioned. In addition, an Amnesty Commission, established by Decree 210 on May 4, 1983, actually began their work on May 17, 1983. According to the Commission, between that date and July 26, 1983, 542 political prisoners have been released from El Salvador's prisons. (However, according to UPD estimates, an equivalent number of new prisoners have been detained, leaving the situation, on balance, unchanged.)

Under the amnesty law, 339 guerrillas have laid down their arms since May. While it would be naive to think that the war in El Salvador will come to an end as a result of the amnesty decree, it certainly is a step in the right direction.

A democratic society is, nevertheless, still a goal to be obtained in El Salvador, and will remain so as long as the state-of-siege legislation is in effect. We do not believe that arbitrary arrest and jailing without a speedy trial are necessary security measures. Above all, we condemn decrees which freeze wages and declare illegal any strike by labor unions as being in the worst interest of the Salvadoran people. We also do not support strikes designed to overthrow an elected government, but believe that such revolutionary actions can be handled in ways other than by destroying basic elements of trade union liberty.

LAND REFORM—GENERAL

The Phase III (Land-to-the-Tiller) of the agrarian reform program, whose future was in doubt when the AFL-CIO last appeared before this Committee, is alive, but not well. It continues to be beset with serious problems. You may remember that, at that time, there was a real threat that the Constituent Assembly might not provide the legislative authority to continue Phase III. After several weeks of intensive lobbying by the Unidad Popular Democratica (UPD), the Assembly voted 36 to 24 in favor of extending the program to December 31, 1983. While this was a victory for the Salvadoran campesinos, and for those who support constructive economic and social reforms in El Salvador, the victory did not signal by any means the end of landlord resistance to the process.

The statistics of the Phase III program (Attachment #2) indicates a mixed performance by the government of El Salvador over the last six months, with both negative and positive factors. For example, the "front end" of the program, the taking of new title applications, has been up and down. In January and February, applications reached new highs, but during the ensuing four months there was a continuous steep decline. A number of factors at least partially explain this drop in applications. Most revolve around managerial decisions by FINATA regarding the use of their limit-

ed resources. FINATA until very recently lacked the technical and financial resources to carry out sustained implementation of all phases of the program concurrently.

FINATA initiated a new, extensive campaign in the fall of 1982 to obtain new title applications. This campaign to increase the number of beneficiaries covered all the Departments in the country and most of the municipalities. It involved the use of mobile teams which took the reform directly to the campesinos on a major scale for the first time. The success of this approach is indicated in the statistics. In January alone, 8,782 new title applications were taken; overall, by the time the campaign was terminated on February 28, 1983, 21,537 applications were obtained. However, with the completion of the campaign, and particularly the ending of the use of mobile teams, a sharp decrease in the number of new applications immediately became apparent with a low of only 178 applications in June.

The question might well be asked: Why didn't FINATA continue to use mobile teams to obtain applications? One important reason was that a decision was made to use their limited financial and technical manpower on other aspects of the program. Thus, during the period when there was the steepest decline in new applications, there was a directly related increase in the issuance of provisional and final titles. There was, at the same time, a continuation of evictions, particularly in January, February and March—the period preceding the planting season—and a sharp increase in legal oppositions to campesinos' claims presented by former landowners. We will discuss these two points more fully below.

AID has recently noted FINATA's lack of technical and program resources, and has recently approved a two million dollar grant to FINATA to allow them to hire and train up to 500 new employees. Mobility will be increased with the purchase of an adequate number of vehicles under the grant. The training process of the new hires is completed, and FINATA has now launched a major new comprehensive campaign, utilizing the mobile team concept, to simultaneously process and expedite new applications, provisional titles, landlord compensation and the issuance of definitive titles. This new campaign began on July 15.

FINATA's goals for the period between July 15 and Dec. 31 include 20,000 new applications, 14,000 provisional titles and the compensation of 900 ex-property owners, which will facilitate a major increase in the issuance of definitive titles. Given these ambitious goals for the next six months, we must admit that it is much more pleasant to contemplate future successes than to report on past performance. Even if FINATA were to achieve these goals, however, the program would still be significantly short of completion. Moreover, unless the current termination date for applications is extended beyond December 31, 1983, a substantial number of beneficiaries would never be reached. We must emphasize, however, that the land reform program and the current FINATA campaign continue to have the support of the UPD and its campesino affiliates, and we will continue to support their efforts.

THE PROBLEM OF EVICTIONS

Very recently, the magnitude of the problem of evictions has been substantiated by a statistical study jointly conducted by AID, AIFLD, FINATA and the UPD. As of this date, there has not been sufficient time to completely analyze all of the data, but enough is known to state that evictions are an extremely serious problem. All parties to the study agree on this point. In reality, the new statistical information only proves what the Salvadoran campesino organizations have been saying since December of 1981, and what the AFL-CIO has been reporting to various committees of the Congress over the past two years.

Before discussing the statistics, a couple of points should be made. First, every eviction is an illegal eviction because it is against the agrarian reform laws of El Salvador for anyone to evict an eligible beneficiary of the land reform program. Now he has lost possession of his land, and for a person already living at the margin of survival, this is deadly. Third, an eviction of one campesino, when it becomes known to other potential beneficiaries, has the multiplier effect of deterring others not to exercise their legal rights.

Because all of the statistics have not yet been analyzed by all of the parties to the study—much less that they have reached agreement on their meaning—we are going to mention only the most important. The size of the study's sample was designed to provide at least 95 percent confidence level. The study, which resulted in the production of twenty separate tables, will be made available as soon as the analysis is completed. This is expected to take several weeks.

Two separate definitions of an evictee were used in the study. FINATA insisted that only a person who had, at the very least, filed an application should be considered an evictee if he had been thrown off his land. The campesino organizations insisted that any potential beneficiary, whether or not he had filed an application should be considered an evictee if he had been forced to leave his land. Thus, under the FINATA definition, it was found that 5,634 persons as of July 1983 were considered to have been evicted. Using the definition of the campesino organizations, the figure is 9,067 evictees. Both figures derive from a sample universe of approximately 6,200 beneficiary families and do not include evictions among a roughly equal number of families who were not surveyed.

Perhaps it will come as no surprise that we support the campesino definition. But we hasten to assure you that this support is based on policy and logic, not friendship—although friendship certainly exists. We find little value in a definition (the FINATA definition) that excludes an evicted campesino who, primarily because of intimidation and fear of the extreme right, has not been able to apply for what is legally his.

The figure of 9,067 evictions is bad enough. However, we fear that even this figure is understated due to lack of information available under the campesino definition for the region which includes Usulutan, San Miguel, Morazan, and La Union, a conflicted area which had the highest absolute number of evictions even using the FINATA definition. The figure of at least 10,000 evictions, which the campesinos have been using for quite some time (without the benefit of a scientific study) is probably not too far off.

Another disturbing aspect about the study is that the reinstallation of evicted campesinos is only 1,271 persons, which is considerably below the numbers previously reported to AID by FINATA (3,656). We do not, by disclosing this data, accuse the FINATA authorities of falsifying their reports. However, since the process of reinstallation is probably the most practical way of diminishing the resistance of former landowners, this low figure would indicate that we have a great deal to do in this area. At the very minimum, further analysis is necessary to reconcile the study's figures and those fo FINATA's on the reinstallation of illegally evicted beneficiaries.

The study underlines what we already knew. The single most significant reason for evictions is landowner resistance: sixty-eight percent of the incidents were effected by landowners.

Even if satisfactory action on the Hammer-Pearlman-Viera murders were to allow us to support the giving of military aid, the AFL-CIO would insist that the giving of military aid be conditioned on the restoration of the integrity of the land reform process, including reinstatement of evicted beneficiaries and prevention of further evictions, and on the completion of that process in accordance with the agrarian reform decrees Nos. 153, 154 and 207.

THE PROBLEM OF "OPPOSITIONS"

Another matter, not included in the study, continues to be a serious threat to the land reform program. These are the "oppositions" to the campesions' claims submitted by the former landowners and administratively resolved by FINATA; according to the campesino organizations, altogether too many times in favor of the former landowner. This problem must be subject to further analysis to determine what the reality actually is. The campesinos have been claiming for some time that oppositions are a problem of major magnitude. Somehow, no one believes them until a statistical study is done. Behind this assertion is another claim by the campesinos organizations that the ARENA party is guilty of conflicts of interest within FINATA and at all levels. The AFL-CIO believes the campesinos.

CONSTITUTIONAL CHALLENGES

Still another threat to land reform comes from the draft of the new constitution. The language of articles 102, 103, 104, 105 contradicts, through a variety of provisions, the existing land reform laws. For example, Article 104 contains an unlimited right of a landowner to rent his land, which is in direct contradiction of the basic land reform legislation adopted in 1980. We do not believe that this clause was inserted in the draft of the Constitution in isolation; indeed there are a series of provisions in these proposed articles that would be wholly destructive of land reform legislation. If allowed to prevail, any of these clauses would terminate the land reform program, and the U.S. Government, under current law, would be required to end aid to El Salvador. Under these circumstances, the AFL-CIO would support a termination, including economic aid.

LAND REFORM SUMMARY

In fact, we see a general pattern of opposition against the land reform program at all levels (municipal, departmental, and national), and using evictions, oppositions, and the new draft constitution as major weapons. This is one reason that we signaled a new strength of the extreme right at the beginning of this statement.

We must be careful not to let pessimism carry the day. Much has already been accomplished and, we are confident, much more will be accomplished. To date, 64,687 applications representing 50,866 families have been submitted under Phase III of the program. There are an additional 32,000 beneficiary families on Phase I cooperatives.

Altogether this represents nearly 500,000 people who have benefited from the program. To protect and continue the process will require the continued support of the U.S. Government for land reform in El Salvador. We must support those in El Salvador who favor the program and not have the door open to the extremes of political left and political right—either of which would destroy land reform for their own ends.

JACKSON/MATHIAS AND BARNES/KEMP RESOLUTIONS

Support for land reform, of course, is only one aspect of a much larger picture. The AFL-CIO has always favored a sufficiently high level of economic aid for Central America in general and El Salvador in particular so that the conditions of poverty and injustice are eliminated. The proposals of Senators Jackson and Mathias and Congressmen Barnes and Kemp (the so-called and, we feel, misnamed "Marshall Plan for Central America") deserves the positive attention of the Congress. We believe that a carefully conceived, major development effort can be mounted and sustained with excellent chances for success for less than it costs to build another aircraft carrier to patrol the coasts of Central America. However, notwithstanding the present need for short-term economic assistance to shore up the serious balance of payments and budget deficits of the economies of Central America, there is also relative low absorptive capacity for longer term project assistance designed to bring about imperative economic and social changes. We would caution that the monies spent now not allow the political and social status quo to remain. Economic development without complementary sociopolitical changes and democratic accommodations can be as counterproductive and as dangerous as the macro-economic development which may be achieved.

BI-PARTISAN FOREIGN POLICY FOR CENTRAL AMERICA

We support the initiative of the President of the United States to move toward a bipartisan foreign policy for Central America through the establishment of a high level commission, headed by Henry Kissinger, to recommend policy for the area. The AFL-CIO does not accept the proposition that the choices for Central America, or for U.S. foreign policy toward the area, are between right wing dictatorships or Marxist-Leninist regimes. We reject the idea that our democracy needs be "exported." Rather, we know that the overwhelming majority of Central Americans desire to control their own destines so fervently that they constitute a national resource for the growth of democracy; a natural resource that we have a moral right and duty to nourish by aid which is designed to benefit the democratic and pluralistic centrist forces of each country.

In the past, much needed development programs have resulted in a richer upper class and a much more exploited worker and campesino class. The ony way to prevent the economic, social and political exploitation that has long provided the underpinning for the Marxist-Leninist appeal for revolution is to create more wealth and share it more equally among the working people of Central America. There can absolutely be no military solution if it results in the continued injustices and deprivation of the average man. True democracy and an end to rule by the Central American oligarchy is the only legitimate way to defend U.S. national security interests in the region.

Mr. Chairman, we thank you for this opportunity to present to this distinguished Committee our views of the situation in El Salvador.

TESTIMONY OF CHARLIE CLEMENTS, M.D., M.P.H.

It is a privilege to submit testimony to this committee today. My name is Charlie Clements. I have recently returned from a year in El Salvador where I worked as a family physician. It was in a county hospital in Salinas, California that I first began seeing Salvadoran refugees, many of whom still bore psychological and physical marks of repression. I wondered if the Salvadoran school teachers, healthworkers, farmworkers, religious workers, and unionists were the "they" we would have to stop at the Rio Grande, if we didn't stop them in El Salvador? It was at that time that I began hearing echoes of Vietnam with calls for more advisors, more helicopters, and phrases such as "pacification" or "search and destroy." I knew too clearly what they meant because I had volunteered to serve in Vietnam as a young man. I left the conflict in SE Asia disillusioned with the deception and conduct of the war; I also left with a personal commitment to non-violence. So that my remarks may be understood in context of more than a "country doctor," I would like you to know that I am a distinguished graduate of the U.S. Air Force Academy and have degrees in economics, business administration, and public health.

As you may know, many parts of El Salvador were denied medical care when the army occupied and closed the nation's only medical school ending the obligatory rural service of students in their last year of formal training. The place where I worked is a rural area surrounding the Guazapa volcano in the Department of Cuscatlan. It is one of the "controlled zones" of the opposition FDR/FMLN. The conditions of my service were that I would remain medically neutral in accordance with the Geneva Conventions, that as a Quaker I would not bear arms, and that I would work with a civilian population. Quakers are urged to "approach situations of confict with creative, non-violent action to end oppression and promote just and equitable relations among all peoples" and it was with that spirit that I provided health care to guerrillas, government soldiers, and civilians alike. The 10,000 noncombatants, 40 percent of whom were under age 12, accounted for the greatest majority of my responsibility.

The "campesinos" of Guazapa have farmed the rich land on the gentle slopes of the volcano for generations but previously it has been for wealthy landlords and now it is for themselves. Before I went to El Salvador, I knew that in 1960, 1 percent of the population owned 20 percent of the arable land and that by 1980, 2 percent of the population controlled 60 percent of the arable land. Hearing the campesinos relate the story it assumed a very human dimension. They told of having to give 50 percent of their crop yield to the landlords and lenders year after year, which left them enough for a marginal subsistence. In a bad year they would have to decide to either keep sufficient harvest to feed their children and watch their lands repossessed or give the landlord and lender their due and watch another child go hungry. And thus they watched lands that had grown corn, beans, and sorghum become part of larger land holdings and be planted in coffee, cotton, sugar cane, or used to graze cattle. As El Salvador became the hungriest country in Central America, they watched 25 percent of their children die before age five. At the same time another hunger developed in El Salvador, a hunger for change which was inspired by the message of liberation theology which told them that their misery wasn't the result of God's will, but rather the result of a few men's greed. And so they organized . . . not revolution, but rather base Christian communities, church sponsored agricultural cooperatives, associations such as the Federation of Christian Campesinos, and unions. Just as the act of Gulliver standing up tore asunder the threads of the Lilliputians that kept him imprisoned, the poor of El Salvador standing up threatened the very system that kept them underemployed, illiterate, malnourished, and subservient for so many years. In and around Guazapa priests such as Rutilio Grande and Jose Allas were murdered or beaten and left for dead. The next targets were the leaders of the cooperatives or the delegates of the word from the base Christian communities. The sons and daughters of the campesinos began ambushing the death squads who called in the army to help them eliminate the subversives. And there began a spiral of violence that would lead their sons and daughters, now known as guerrillas, to form self defense forces. Before they would learn what a "hammer and anvil" operation was or establish perimeters of defense defining a "controlled zone," there would be many massacres of civilians.

I learned my history of the zone through patient interviews. In a prenatal clinic, I might ask a pregnant women how many pregnancies she had. She might answer eight. I would ask how many children were still living. She might answer two. I would ask how many abortions or miscarriages she had. She might say one or two. Then I would ask what happened to the others wanting to know if there had been birth defects or perinatal problems; it was a question I would learn to ask very gently. The first time I asked it the mother told me that four of her children were killed in the "massacre of Palo Grande" when the government soldiers surrounded and burned a house with 36 women and children inside. I asked her why they hadn't run like we do now when the soldiers invade. She said it was before they knew they were the enemy because they had never belonged to any organizations or gone to any demonstrations. I would hear many similar stories during my year in Guazapa.

The campesinos of Guazapa are creating a society with more social and economic justice than they have known before. The church or campesion cooperatives, which were the early targets of repression, are now flourishing as revolutionary cooperatives. Peasants have a choice of working land individually or collectively, but scarce resources are distributed equitably. The dairy cooperative, which keeps the hundred head of cattle under the cover of trees to protect them from strafings of helicopters, distributes the milk throughout the villages to the most malnourished children. The fishing cooperative distributes the 150 lbs. of fish it catches almost daily to all of the villages where the pregnant women and wounded patients, both with higher protein needs, have priority. There are more than thirty elementary schools in addition to the adult literacy classes. There are more than a dozen health clinics and two hospitals where many patients have access to medical care for the first time in their lives. Every

village has a functioning legal system called the Commission of Honor and Justice which is part of the Popular Committee or town council. The Popular Committees hold regular town meetings where priorities are discussed and decisions made by the townspeople. There are also periodic assemblies and congresses held with great difficulty as any assemblage of people is an invitation for attack by observation planes.

When I testified before a committee of the House of Representatives in March that I had seen the use of napalm-like substance, I was met with disbelief. The Pentagon issued a prompt denial saying, "We don't use that word around here." I asked a Congressional delegation to El Salvador to inquire about its use. They were told by Col. Bustillo, commander of the Salvadoran Air Force, that, indeed, they had used Israeli-supplied napalm until 1981. What they are dropping now may not be napalm but it: (1) comes in cannisters that are dropped from aircraft; (2) upon contact it doesn't explode but rather bursts into a rolling ball of flame; (3) medically has the adhesiveness, prolonged burning time, and higher burning temperature of napalm which favors third degree burns with coagulation of muscle, fat, and other deep tissue; (4) has an igniting agent (presumably white phosphorous) which becomes imbedded in tissues and can continue smouldering and re-igniting long after initial trauma. I don't wish to play "semantics" with the Pentagon, but rather report what I saw and treated as a physician. Too many patients which I saw for white phosphorous or similar wounds were the elderly or very young who didn't have the reflexes to respond to the whine of an attacking A-37 or the whistle of a mortar.

I also told that committee that I couldn't remember a day since last July that the front had not been either bombed by American supplied A-37's, or strafed by American supplied Huey helicopters, or rocketed by American supplied observation aircraft with no distinction made between civilian and military targets. Upon inquiry, Col. Bustillo admitted that Guazapa was considered a "free fire" zone in which any target was legitimate. I would presume that included any of the more than 4,000 children or thirty elementary schools. His admission was certainly consistent with my observations as well as those of one of my patients named Romilia:

"Since we had just finished morning prayer, we didn't want to leave but . . . that little plane kept flying overhead, searching. We were hungry and thirsty; we didn't even have any water there. They then forced us out . . . and it was on that afternoon they massacred some of the people—a lot of them. It was then my daughter was wounded . . . and then the wound—I've never seen anything like the burning from the pieces that fell from the bombs . . . she got some white blisters on her leg and then they turned red and then purple, and her leg got really hard and this awful smell of rot came out of her leg. That's what killed her, I guess, there was nothing we could do. It's like her leg rotted right there on the spot."[1]

She was describing wounds caused by U.S. supplied white phosphorous rockets. Perhaps, it was more merciful for Romilia's daughter to die quickly of white phosphorous burns than to have reached the next village of Tenango, where during the same offensive U.S. trained forces left their calling card—dozens of macheted men, women, and children along with chaulked grafitti congratulating the Atlacatl Brigade on its second anniversay.

Romilia's daughter and more than a hundred other civilians died in a February offensive against Guazapa, but none of their deaths would have been included in the U.S. embassy's "politically motivated deaths" statistics which you heard today because the Salvadoran army reported them as "guerrilla deaths." According to Salvadoran military sources that offensive cost U.S. taxpayers $5 million. It cost the Salvadoran military 50 soldiers and it cost the guerrillas the lives of five combatants or $1 million for each dead guerrilla. That price is not out of line for the costs per guerrillas bodycount in Vietnam. In Guazapa there was no cost attached that week to the more than 100 civilians deaths or to the "hearts and minds" of the thousands of other peasants who returned to the burned shells of their homes and the rotting corpses of their livestock.

Those actions were performed by the same Salvadoran military which President Reagan just told you is "achieving substantial control over . . . its own armed forces" and is "making a concerted and significant effort to comply with internationally recognized human rights." Last week the President also complained that only 10% of the Salvadoran military such as the Atlacatl Brigade had the "benefit" of U.S. training. I fear the result when you supply funds for more of them to have such an "advantage" or for more "small planes that will keep on searching." Those were not isolated events. Guazapa has suffered a dozen such invasions.

Even after Vietnam you cannot understand why "their" Salvadoran soldiers fight better than "our" Salvadoran soldiers. It is not a matter of training or equipment. It has to do with the quality of the society we are asking them to risk death defending. Perhaps that is why more than a 1,000 Salvadoran soldiers have surrendered to the FMLN in 1983 alone. Perhaps that is why the President will eventually have to send U.S. combat forces to El Salvador to do for them what they cannot do for themselves? Perhaps that is the result of a self-defeating foreign policy that identifies military success in El Salvador with the prestige of the United States. For whether, the United States wins or loses militarily in El Salvador, it will always lose in the end. It loses, because, if the United States thinks it has won, it will have done so at the expense of social and economic self-determination of the Salvadoran people. It will have only strengthened prevailing corruption and official brutality and postponed the next insurrection. But the United States also loses, if it thinks it has lost militarily, because it will have lost the only opportunity to truly help El Salvador and all of Central America by encouraging the Contador group to begin dialogue and negotiations that can lead to lasting regional peace.

There is much to say about the people against whom all of our military aid is being directed. When they quietly accepted their hunger, poverty, and unemployment, they were accused of being a bunch of lazy, shiftless, grumbling beggars who threw all the blame for their banana (coffee) republic's problems on the United States. But when they do something about their condition, they are accused of being communist agents and Soviet-trained terrorists, a lurking threat to the national security in our own backyard. Yes, there are Marxists among "them" and Christian democrats, social democrats, students, engineers, doctors, peasant farmers, trade unionists, laborers, teachers, and sympathetic clergy too. But even if Marx, Sandino, and Castro had never lived, there would be a revolution in El Salvador today, because the war springs from a blood history or military dictatorship and oligarchical control that have kept the majority of Salvadorans malnourished, illiterate, underemployed, and impoverished. When will we learn that arms from the United States are no antidote for the spread of hope?

Time is running out. The FDR has expressed a willingness to negotiate without conditions for almost two years while the signals from the United States have been "you don't have to negotiate with anyone who is trying to shoot their way into power." Have we forgotten that George Washington "shot his way into power?" Now every country in the region including Nicaragua and Cuba have expressed a willingness to negotiate while the U.S. continues to dangerously escalate and regionalize the war with the pretext of "stopping the arms flow to El Salvador." The reason the most sophisticated intelligence service in the world has not been able to document any significant flow of arms from Nicaragua to El Salvador is the same reason the U.S. trained and equipped counter-revolutionaries attacking Nicaragua from Honduras have not been able to interdict even a single rifle—because it doesn't exist. That fact was finally acknowledged recently by a senior Reagan administration official and a Salvadoran military source through the U.S. embassies in El Salvador and Nicaragua have been admitting it off the record for more than a year! It is clear from the recent comments of former Asst. Secretary of State Thomas Enders that the Reagan administration has no real interests in pursuing negotiations and will use the recently appointed Bipartisan Commission as it has the certification process as a smokescreen to pursue its military solution. The purpose of the Commission isn't to find a new policy but rather justify the present one as we see within a week of its creation the President has launched a massive military deployment, is planning to ask Congress for hundreds of millions of dollars for military aid to Central America, and wants to double the limit of the number of U.S. military advisors in El Salvador.

The American people recall a precious document which begins, "When in the course of human events, it becomes necessary . . ." and unlike President Reagan, they understand that poverty and lack of human rights no Soviet subversion are the cause of the turmoil in Central America. They also recall Vietnam and will not allow us to jeopardize our national interests by becoming involved in another endless war which divides our country, depletes our resources, and antagonizes world opinion. Congress is not listening to the American people. The American people will not be paralyzed by the threat of being called "soft on communism," nor will they respond to the oft-repeated cry of "Soviet wolf." The Congress is allowing the President to slip into another undeclared war and if it is not stopped in the by the Congress, it will once again be stopped in the streets of our nation.

---

STATEMENT BY COL. SAMUEL T. DICKENS, USAF (RET.)

EL SALVADOR "CERTIFICATION"

During the ten day period from July 8 through July 17, 1983 Colonel Samuel T. Dickens USAF (Ret.) visited El Salvador for the purpose of collecting information for analysis to determine whether that country was making sufficient progress to warrant continued economic and military assistance from the United States as provided by Public Law 97-113. (Colonel Dickens, a director of New World Dynamics, was representing a coalition of organizations known as the Central American Freedom Alliance (CAFA)).

The process by which the President of the United States must "certify" that El Salvador is making progress in certain areas in order to receive continued United States support was established by Section 728 of the International Security and Development Cooperation Act of 1981 (Public Law 97-113, approved December 28, 1981.)

Every six months the President must certify to Congress that the government of El Salvador—

"(1) is making a concerted and significant effort to comply with internationally recognized human rights;

"(2) is achieving substantial control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

"(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

"(4) is committed to the holding of free elections at an early date and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in El Salvador which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to:

(A) a renouncement of further military or paramilitary activity; and

(B) the electoral process with internationally recognized observers."

CONCLUSIONS

The government of El Salvador is making significant progress in each of the four major areas specified by Public Law 97-113 and therefore merits continued United States economic and military assistance. The Apaneca Pact set the stage for subsequent government actions which provide overwhelming evidence of officials' desires to bring about peace, economic reforms and meet internationally accepted human rights standards.

One must question the value and significance of the economic reforms which the United States is, in effect, imposing upon El Salvador. Any careful analysis will reveal that the economic reforms are inimical to United States traditions and theory which espouse private enterprise, free trade and competition. The banks have been nationalized, foreign trade is strictly controlled by the central government and private property has been confiscated. The United States' continued pressures for agrarian reform translates into additional confiscation of private property. (Phase II of the Agrarian Reform if enacted would affect properties between 100 to 500 hectares—approximately 250-1250 acres.)

No less an authority than the National Association for Private Enterprise (ANEP) states that 50 percent of the blame for El Salvadors disastrous economic status today is due to the negative policies implemented since the 1979 coup.

The Congress should undertake a careful look at policies which the United States is enforcing El Salvador to follow. Assumptions are being made about "Agrarian Reform" which do not bear close scrutiny. This "look" or formal analysis should determine whether we are offering the best opportunities for alleviating poverty in El Salvador through a free market economy and free enterprise or whether, the United States is encouraging a strong central government and socialism. All this under the guise of economic and agrarian "reforms."

INDIVIDUALS AND ORGANIZATIONS CONTACTED

During the ten day visit to El Salvador the following individuals, organizations and commissions were contacted. Various areas throughout the country were visited: The President of the Constituent Assembly: Major Roberto d'Aubuisson; The Foreign Minister: Fidel Chavez Mena; The Defense Minister: General Vides Casanova; A previous Foreign Minister: Dr. Antonio Rodriguez Porth; The President of the Peace Commission: Sr. Francisco Quiñones; The Director of ISTA (Agrarian Reform): Dr. Arturo Argueta; Air Force Commander: Colonel Rafael Bustillo; Military Commander: Colonel Rafael Bustillo; Military Commander at Zacatecoluca: Lt Col Denys Moran; The National Association for Private Enterprise (ANEP) Sr. Conrado Lepez Andreu; The Deputy Editor of Diario de Hoy (Daily Newspaper); The Human Rights Commisson: President, Monseñor Fredy Delgado; The Frente Femenino (Women's National Association); The President of the Salvadoran Cotton Cooperative: Ing. Roberto Aguilar Papini; The Military Hospital, San Salvador: Colonel (Dr.) Salvador Mejia Arce; "La Labor"—An Agrarian Reform Cooperative in Ahuachapan; A Cotton Cooperative at San Miguel; A Cotton Cooperative at La Carrera, Usulutan; Refugee Center: Santa Tecla; Refugee Center: Cojutepeque; Air Base of Ilopango.

Various individuals; representing small business, restaurant owner, small farm holdings, agrarian reform cooperative leader, junior military officers, foreign ministry diplomat, military doctors and nurses, farm workers.

* All interviews were conducted in Spanish without interpreter.

ANALYSIS AND FINDINGS

APANECA PACT

On August 3, 1982 the President of the Republic, the political party leaders and representatives of the Constituent Assembly joined together and signed a basic government platform called the Apaneca Pact. The primary purpose of the pact was to respond to the popular mandate of the March 28, 1982 elections, which would lead the country to peace, social and economic progress. The Apaneca Pact addressed several principles to be followed including, Pacification, Democratization, Human Rights, Economic Recovery, Reforms, Confidence and Security and efforts to strengthen international support.

In order to help bring about these objectives three commissions were formed: the Peace Commission, the Human Rights Commission and the Political Commission.

THE HUMAN RIGHTS COMMISSION

The Human Rights Commission was established by executive decree on December 1, 1982, beginning formal activities on January 3, 1983. Seven members make up the commission appointed by the executive. Members will serve for two years. The present commission chairman is Monseñor Fredy Delgado A. Since they undertook their duties they have received 303 formal petitions protesting human rights violations of which 126 have been successfully resolved.

Of the 303 formal petitions 99 persons have gained their release, 36 of those imprisoned for political crimes were released because of the Human Rights Commission's efforts. Twenty-seven have been ordered to trial through the judiciary system and another 19 persons have been given the protection of the Human Rights Commission.

The Human Rights Commission has undertaken an intensive educational campaign to raise the level of consciousness of Salvadorans through the press, radio, and television. The Armed Forces and community leaders attend talks on Human Rights in order for all to have a better understanding of the need to preserve standards of Human Rights during peace and war.

The Human Rights Commission has designated one delegate as a representative to the Amnesty Board.

The following information is an analysis of the Human Rights Commission report (See Attachment #1 of this report) approved by them on July 15, 1983, covering the period January 1 through June 30, 1983. This report refutes independent reports by unauthorized sources which would have one believe that the El Salvadoren government bears primary responsibility for the killings taking place in that beleaguered country.

Chart I.—Take the figure of 3,421 which includes combat casualties (dead and wounded), homicides and murders. Now refer to CHART IV. Of the total of 3,421 deaths and casualties the FMLN (guerrillas) accept a total of 1,644 casualties. In turn the El Salvadoran Armed Forces accept losses of 813. These combat casualties total 2,457. When combat casualties (2,457) are subtracted from total deaths in El Salvador during the first six months of 1983 we have a difference of 964. It is this total which should have closer scrutiny. The 964 deaths would appear to be civilian rights.

The Human Rights Commission analysis concludes:

Civilian deaths by terrorist acts	222
Civilian deaths thru military operations	23
Civilian deaths by unidentified persons	676
Deaths attributed to unknown organizations	43
Total	964

The Human Rights Commission charges the terrorists (guerrillas) with 222 civilian deaths, the military with 23 deaths and to unknowns, 719 deaths. Presumably the latter, 719, are murders having nothing to do with the war, or guerrilla activities. What most analysts are not appreciating when analyzing deaths is that the country is engaged in a total guerrilla war. These analysts make the false assumption that the guerrilla war only involves combatants in the mountains, on the slopes of volcanos and by various sized organized military units. To make this assumption is to ignore the realities of guerrilla war which in fact has the enemy operating in every part of the country, in the cities, and infiltrating every sector of government and the economy.

Discussions with key government officials confirms their desire to eliminate human rights abuses. They recognize the importance of continued public support by Salvadoran citizens evidenced by the over 80 percent of the electorate participation in the March 28, 1982 elections. They do not want to alienate that support. Additionally they are fully aware of the importance of international acceptance of their government and the importance of continued United States support, economic and military, to ensure their survival. Now see Chart III.

An analysis of the 137 kidnappings by departments (states) where they took place is revealing. The most kidnappings (42) took place in the department of Chalatenango, a major combat area. Second in kidnappings was San Salvador with (24). Other major areas where kidnappings have taken place are San Vicente (10), Usulutan (14), and Morazan (15), all major combat areas. This closely ties the kidnappings to the areas where most of the fighting takes place. Communist guerrillas effectively use kidnapping as a means to control small towns and villages through intimidation, removing leaders; mayors, teachers and other authority figures. Chart II bears this out identifying terrorists (guerrillas) with (96) of the kidnappings for the period January 1 through June 30, 1983. Bishop Pedro Aparacio, of El Salvador, reported guerrilla recruitment through kidnappings in the smaller towns threatening the youths with the murder of family members if they escaped.

Chart II lists 196 disappearances during this six months period. The bulk (149) are charged to unidentified people. It is difficult to guess how many of these disappearances result in deaths. We must assume a certain percentage have fled the country with many having reached the United States as illegal aliens. (Figures vary from 300,000-500,000 for illegal Salvadorans now living in the United States.)

Terrorist acts. International press and television has paid insufficient attention to the destruction waged by the guerrillas against El Salvador's economy which is a direct attack upon the people. This destruction is revealing. As the elections proved the people did not support the guerrilla movement the terrorist actions by the guerrillas clearly shows their acceptance of their failure to win over the nation's population and so have set about to destroy the economy. This destruction, waged against the people themselves, directly and adversely influences their daily lives, their ability to work and receive wages and forces a deterioriation of everyone's standard of living and quality of life.

These acts of terrorism are direct against the electrical power system, the telephone system, roads, railroads, residences, government facilities, construction companies, commercial activities, banks, farms, animals, vehicles and include the taking and sacking of towns and villages.

A flight over the eastern part of the country reveals the destruction to the electrical grid system with the scores of high tension towers lying on their sides, resulting from dynamite explosions. The eastern departments were without electricity 200 days last year with the resulting deterioriation of productivity of all commercial activities.

There were 355 attacks on the electrical grid system of the country involving the destruction of power distribution centers, high tension towers, posts, transformers and other line cuts. The telecommunications system suffered 71 attacks against telephone lines, grid systems and line cuts. There were 180 attacks against the transportation system. This involved the dynamiting, machinegunning, setting on fire of buses, private cars, farm workers transportation, railroad cars, trucks and commerical vehicles. There were 17 attacks against bridges, roads, railroad bridges and railroad lines. The government suffered 83 attacks by fire, machinegunning and dynamite directed against officers, court houses, schools and the judiciary system. There were 975 vehicle thefts during this sixth month period. There were 25 attacks against the agricultural activities involving damage to fields of sugar cane, cotton and coffee. El Salvador's economy depends on the export of these three crops which are directly affected as well by power outages, vehicle destruction, road and railroad outs as well as telephone outages.

Charts V through XIII should be carefully analyzed to obtain an evaluation of the total war being waged by the guerrillas against the people and the government of El Salvador. Such as evaluation is strong evidence of a war being waged by 6,000-8,000 guerrillas against a people, unsupported by any significant element of the population.

An effective campaign against the government of El Salvador has been waged by international communism attempting to portray it as a cruel, ruthless and bloody dictatorship. If this campaign succeeds, and results in the denial of continued United States economic and military support, the people of El Salvador will be the loser. If this occurs the Free World will have been dealt a significant blow and the repercussions will be severe for the rest of the Caribbean Basin and the United States.

THE AMNESTY BOARD

The Amnesty Board has been created to authorize amnesty to those who have taken up arms against the government now wishing to surrender, those who have been processed or sentenced for political crimes, those who have been sentenced for politically motivated crimes for terms of less than four years and served six months in prison.

The Amnesty Board is composed of three members and was created by Decree No. 210 of the Constitutent Assembly on May 4, 1983. It was expected to be in existence for 60 days however, its life was extended an additional 30 days into the first few days of August, 1983.

On July 12, 1983 the Amnesty Board reported the following information: From May 21 through July 12, 1983 a total of 540 individuals convicted of political crimes were granted amnesty.

Of those bearing arms 182 voluntarily presented themselves to the government seeking amnesty. (135 were men and 47 women.)

Total: 722 have taken advantage of the amnesty program.

Among those granted amnesty provisions were made for those interested in farming to be granted land, grain and credit. Forty families have taken advantage of this offer.

An immigration program was established for individuals desiring to leave El Salvador. Canada has received 139, of which 75 had been granted amnesty. Australia has received 70 people and Belgium 5 families.

THE PEACE COMMISSION

The Peace Commission has the objective of incorporating all the political and social sectors into the democratic process and in peace. The Commission on May 30, 1983 made a call to all sectors and in particular the FDR (Frente Democratico Revolucionario) to initiate a dialogue leading to their participation in democratic, political life in El Salvador. The Commission reiterated its belief that a democratic and political solution was the only method to achieve an answer to violence.

AGRARIAN REFORM

The Salvadoran Agrarian Reform Institute (ISTA—Instituto Salvadoreño de Transformacion Agraria) has the responsibility of administering the cooperatives created through the expropriation of properties greater than 500 hectares. (Approximately 1,250 acres.)

The Agrarian Reform began with the Armed Forces proclamation of October 15, 1979, in which, among various points, it was stated that measures would be adopted to make an equitable distribution of the nation's wealth.

On March 6, 1980 the Army physically took possession, at the point of the gun and without formal notice, all properties which exceeded 500 hectares. In most cases owners were not allowed to remove any of their personal possessions including clothes, books, furniture and all private property in their living quarters. This included automobiles and private aircraft, with limited exceptions. Though the owners were by law authorized to retain 100 hectares for their own development that authority has only recently come into play. The owner does not select the 100 hectares as the government makes this decision often resulting in the owner being granted the least productive and fertile property. In most cases the private owners have had no access to their private homes on the expropriated property.

In order to understand the impact and significance of Phase I of the agrarian reform one should study the report, Agrarian Reform In El Salvador, by Checchi and Company, 1730 Rhode Island Ave., N.W., Washington, D.C., 20036, published January, 1983 which was commissioned by the Agency for International Development (AID) of the United States government. Only reading the summary will not provide sufficient understanding of the disastrous effect that implementing agrarian reform has had on El Salvador. A thorough study of the report should be made.

The United States Congress through the process of "certification" is requiring that El Salvador proceed with certain "reforms" which include agrarian reform, nationalized banking and foreign trade. These "reforms" were imposed by a revolutionary government and are being continued by the present government under the tutelage of the Provisional President, Alvaro Magana. Further evidence of continued efforts to ensure the agrarian reform process can be seen in provisions of the new Constitution which is being reviewed for approval by the Constituent Assembly.

Phase III of agrarian reform is commonly known as the "land to the tiller" program as people working land which is less than 100 hectares in size are encouraged to seek title to that land, subsequently expropriated from rightful owners.

Phase II of agrarian reform has not been implemented. It would expropriate all property between 100 and 500 hectares in size. During my July 1983 visit to El Salvador the possibility of invoking Phase II was being widely discussed by the press and the people. The director of ISTA (responsible for implementing Phase I of the Agrarian

reform) told me that it would be his responsibility to implement Phase II if it were so decreed. He added that if this were the case he would resign his office as there were now insufficient monies available to implement fully and successfully Phase I of the reforms, so how was there hope in proceeding with Phase II?

During the second week of July a visit was made to one of the estates exceeding 500 hectares which had been expropriated by the government by force of arms on March 6, 1980. The estate known as "La Labor" is in the department (State) of Ahuachapan, only sixteen miles from the Guatemala border.

There I met with approximately 180 farm workers and families in a coffee warehouse. For two hours I listened to the complaints of men, women, young and old. One after another an individual would stand in front of the group and tell his story of insufficient work, lack of pay, food and medicine. Twelve told their stories. They were now working one-third that considered normal and in fact were dividing the work of one among three so that each would have an income. Work was not available in other parts of the country. Their plea was that the land be given back to the original owners so that they could go back to work.

Several older men stated that they had been receiving a pension from the owner prior to his property being expropriated. The government was not paying this. Others spoke of how the previous owner paid medical expenses no longer available through the cooperative. Job opportunities previously available from the owner were now non-existent. The discussions continued with tears rolling down the faces of several women.

A total of 1,313 workers at "La Labor" had signed a petition asking that the owners be given back their property so that it could be properly managed and so they could be adequately paid for their work.

I visited a maintenance shop for farm equipment. The senior mechanic had been at "La Labor" for 23 years. There were over twenty pieces of motorized farm equipment in the shop with only three tractors working. The mechanics were busy "cannibalizing" parts to keep some equipment working. I asked how replacement parts were obtained and was told they required a trip to San Salvador. There the banks were supposed to have funds set aside for agrarian reform parts purchases. There were insufficient funds available to provide loans for purchase of spare parts. Centralized government control was playing havoc with what had once been the success of free enterprise.

In San Salvador I discussed with the director of ISTA the situation at "La Labor." He was well aware of the problem. He said he was doing all he could to make the agrarian reform a success but there were insufficient funds to maintain all the motorized equipment and to pay all the workers.

At "La Labor" I asked the farm workers about their "cooperative." The farm workers do not hold title and have no rights to pass on property to survivors, wife or children. There is no retirement program. The "cooperative" shares the profits among the farm workers. Management of the "cooperatives" is through ISTA and their field representatives. These agrarian reform "cooperatives" bear no resemblance to United States cooperatives where land owners join together to obtain mutual advantages through joint cooperative efforts.

In Ahuachapan department on June 1, 1982 3,298 farm workers on 13 different agrarian reform "cooperatives" signed petitions to the constituent Assembly complaining about the adverse effects on farm workers since the property seizures by ISTA and the Armed Forces. This petition related that the property seizure had created great insecurity and high unemployment. Produce delivered to market was not immediately paid for by the government.

This same June 1982 petition stated that if the farm workers were to be given the property then the previous owners should be paid as the workers were unhappy to benefit from property taken from others. The farm workers asked for major efforts to reopen sugar and coffee mills in Ahuachapan. They reiterated the need for early payment by financial institutions and those commercializing the sale of produce as these delays resulted in increased interests on their debts and unemployment. They asked for urgent consideration for their problems affecting families and causing a feeling of desperation.

Later I flew to the eastern part of the country to visit with the Salvadoran Cotton Cooperative. This cooperative represents independent groups owning their own property banding together for joint ventures. Included in this group as association members were the so called "cooperatives" created by the agrarian reform decree. The President of "Cooperativa Algodonera Salvadorena, Ltda." took me through the facilities there at San Miguel as well as at La Carrera in the department of Usulutan.

Cotton production was down for two primary reasons; terrorist guerrillas with their destruction and the agrarian reform. International credit was sorely lacking.

A COMPARISON OF RECENT YIELDS WITH THE 1978-79 HARVEST AS A DATA BASE

Raw cotton for 1980-81 was 59.05 percent of base year.

Raw cotton for 1981-82 was 54.39 percent of base year.

Cotton production for 1980-81 was 63.33 percent of base year.

Cotton production for 1981-82 was 63.82 percent of base year.

Profits were down in 1980-81 by 68.29 percent of base year.

Profits were down in 1981-82 by 49.61 percent of base year.

Production by cotton properties affected by "agrarian reform" was 8 percent less than the unconfiscated properties. 41.76 percent of the total properties associated with the Cooperative Algodonera Salvadorena were properties confiscated by the agrarian reform decree.

During 1982 the eastern departments were without electricity for 200 days due to guerrilla actions. Guerrillas additionally destroyed cotton fields, warehouses, and railroad cars loaded with cotton.

Asociacion Nacional de la Empresa Privada (ANEP)—National Association of Private Enterprise.

I met in executive session with ANEP leaders who represent 31 different groups covering all privately owned sectors of the economy. They stated that the threat of instituting the second phase of the agrarian reform should be lifted as owners were not working their property. As long as this threat continued production would be down, dramatically affecting coffee production, a major source of foreign exchange. (Phase II would confiscate properties between 100-500 hectares in size.)

Phase I agrarian reform confiscations of property over 500 hectares have not been properly compensated for. Owners have been receiving a maximum of 2 percent of land value in cash. The difference has been handled with bonds having 3, 5 and 20 years for redemption. Many considered these worthless. The government used a tax base for the period 1976-77 without consideration of any real improvements to property during the intervening period.

During the confiscation process of Phase I there were 100 cases of property seizures which were less than the required 500 hectares. Special government decrees maintained government ownership of these properties rather than returning them to the owners. They too have been inadequately compensated for the loss of their properties. (Government data base for property ownership was taken from the year 1970.)

When asked who was pressuring government to institute Phase II of the Agrarian Reform (confiscation of properties between 100-500 hectares) I was told the American Institute for Free Labor Development (AFL-CIO).

ANEP officials stated that the nationalized banks were now a government monopoly, in the hands of a few with no competition. Interest rates were higher and the government controlled 100 percent of the actions. The banks were now attempting to sell bonds representing 49 percent of assets. 20 percent of these were available for sale to bank employees and 29 percent to the public. Public newspaper notices of offerings were getting few takers. The public had little confidence since the banks had been taken over by the military, intervening with armored cars in a simultaneous takeover of all banks. For three years three people have been providing the provisional directorship of the banks. These managers have no experience in economic analysis. As there is no competition between the banks, preference for credits have been directed to government monopolies, such as the agrarian reform. Bank loans to the private sector have been greatly affected by the lack of bank competition and the direction of credits to government agencies. Bank loan availability has been sharply curtailed.

These ANEP officials requested that United States economic assistance be channeled to the private sector to encourage the free market economy and private business.

ARMED FORCES

The new Defense Minister, Carlos Eugenio Vides Casanova, takes pride in the initiatives being taken by the army over the guerrillas. He hopes to keep the guerrillas on the defensive while providing protection to civilians in those areas cleared of guerrillas. General Vides Casanova spoke proudly of extensive civic actions underway in bridge and road reconstruction, rebuilding of clinics and schools while providing protection to farm workers and public transportation.

A visit to a local commander at Zacatecoluca confirmed the enthusiasm for civic action and the zeal to secure the area for farm workers to work their land. This Lieutenant Colonel told of his efforts to coordinate army support with local mayors and other town leadership to gain civilian confidence in army supportive actions.

MILITARY HOSPITAL

A visit to the military hospital confirmed the propaganda success of the communists in their disinformation program designed to discredit El Salvador in the United States and Europe. There was no evidence of any international support by way of assistance. Some foreign equipment is being made

available but the military sadly lack adequate medicines, equipment and supplies.

The hospital was crowded with over 330 patients. Passageways were full of beds with patients. Expansion of hospital facilities was not keeping pace with requirements.

The hospital commander informed me that there was a shortage of doctors. Paramedical training being conducted by a United States military medical team would help alleviate suffering of combat wounded in war areas. However at this time doctors were required to move to forward combat areas to treat wounded despite inadequate facilities and shortage of medical supplies and equipment in these areas. There were insufficient helicopters to perform needed tasks. The fourteen army helicopters were being utilized for troop movement, supply deliveries and wounded evacuation.

The hospital commander told me there were infrequent visits from international groups inspecting the hospital. Each promised assistance from their organizations without any subsequent response.

REFUGEE CENTERS

Two refugee centers were visited. One at Santa Tecla just west of the capital city of San Salvador. The other at Cojutepeque to the east on the Pan American Highway.

Santa Tecla has been operating for over three years. There are over 800 refugees there. A number of the men have found work in the surrounding urban area and a few are engaged in minor work programs creating small profits for basic food necessities. Refugees at Santa Tecla come from two areas in Morazan department and had been moved out of these areas for their own protection.

The Cojutepeque refugee center had been operating a month and existed because of the exodus of refugees fleeing fighting, primarily from the Suchitoto town area. This town has been taken by the guerrilla, retaken by the army and then been involved in renewed fighting. These civilians had not been displaced by the army for their protection but rather were fleeing the guerrillas.

Young workers, representing the Green Cross, were painstakingly reporting names of individuals at the Cojutepeque refugee center. Again there was no evidence of international support for these several hundred refugees and the Green Cross was the only representative at both refugee camps visited.

The lack of concern by the international community for the tribulations being endured by the Salvadoran people is testimony to the effectiveness of communist propaganda. El Salvador has been made an outcast nation without justification.

ANOTHER VIEW OF AGRARIAN REFORM

My visit to the local Army commander at Zacatecoluca was with two men who owned farming property in nearby department San Vicente. For some time this area near the slopes of the San Vicente volcano has been terrorized by guerrillas. In the past the army has not been able to provide sufficient force to maintain control so that the guerrillas have always been able to return.

These two men own property less than 500 hectares in size and thus not confiscated under Phase I of the Agrarian reform. They had been forced to leave because of guerrilla actions. The ambitious and confident Lieutenant Colonel commanding army forces in Zacatecoluca proudly spoke of his civic action programs, the mutual cooperation between army units, his headquarters and civilian authorities. He carefully outlined his activities and efforts to create an atmosphere of confidence in the Army in their ability to keep the guerrillas from their destructive raids of the farm lands.

The two farm owners and I drove back to San Salvador with considerable optimism. The two seemed eager to accept the Colonel's offer to come back and work their property under the army's protection. Shortly that optimism collapsed like a popped balloon.

In San Salvador we met with several Salvadoran men in a private home. The two men who had accompanied me to the army headquarters in Zacatecoluca told of their optimism and their confidence in the Army colonel. Immediately one of the men present raised his voice in anger. He pounded the table with his fist and said, "Trust the army! How can we? The army took our property away at the point of a gun in 1980, and now you say trust them and go back to work our farms? Don't you remember what Morales Ehrlich (previous director of ISTA's Agrarian Reform organization under ex-president Duarte) told us when we were all assembled that day? That we should all work our properties so that when they were expropriated the transition would be that much smoother? Do they think we're crazy? Maybe this army colonel is a good man, but how long is he going to be there? Who's going to replace him? And what about the elections? If the Christian Democrats win they will expropriate all our property! Do they just want us to get the fields back in production so that they can confiscate them from us?"

That tells the story. The greatest threat to unity in the country is distrust. And yet a distrust for very valid reasons. What most Americans don't realize is that the country is in a guerrilla war, without frontiers. The war is not just being fought in the mountains, in the forests, on the slopes of the volcanos and among armed forces, but by individuals. There is a guerrilla leadership that operates from the cities, with intelligence networks, clandestine, propaganda and psychological operations.

In El Salvador trust and confidence is given to those you know and know well. Occasionally someone you once had confidence in is identified as a guerrilla leader. A school friend not seen for two years has his house raided; it is an arms cache, a "safe" house and full of communist propaganda literature. The leader of the Miami kidnapping of Mrs. Roberto Quinones turns out to be an old friend, one had not seen for several years. The fight is ideological.

TABLE I.—VIOLATIONS OF PERSONAL RIGHTS AND GUARANTEES JANUARY 1 TO JUNE 30, 1983

		Percent
Injuries and aggressions	134	3.39
Coercions, threats and extortion	53	1.34
Pillage and theft	156	3.95
Violations against home and work place	45	1.14
Kidnappings	137	3.47

HOUSE OF REPRESENTATIVES—*Wednesday, August 17, 1983*

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Pursuant to the order of the House on August 3, 1983, the following reports were filed on August 9, 1983]

Mr. DINGELL: Committee on Energy and Commerce. H.R. 555. A bill to amend the Federal Power Act to limit the recovery by public utilities of certain costs of construction work in progress through rate increases; with an amendment (Rept. No. 98-350). Referred to the Committee of the Whole House on the State of the Union.

Mr. DINGELL: Committee on Energy and Commerce, H.R. 3244. A bill on amend the Energy Policy and Conservation Act to eliminate preemption of a State's authority to establish or enforce any energy efficiency standard or similar requirement if a Federal energy efficiency standard has not been established (Rept. No. 98-351). Referred to the Committee of the Whole House on the State of the Union.

EXTENSIONS OF REMARKS

INDUSTRIAL POLICY: THE WRONG ECONOMIC PRESCRIPTION

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. LUNGREN. Mr. Speaker, in recent months there has been increased discussion among Members of Congress, economists, and academicians concerning a national industrial policy.

Many industrial policy advocates paint a black or white picture. They suggest that either the United States can adopt a comprehensive, coordinated strategy in our Government policymaking so that our economy can better compete in the international marketplace, or if we do not enact such a program continued economic decline lies in store.

At first glance, it would seem difficult to oppose any concept which attempts to better coordinate Government policy. I became particularly interested in this issue because a proposal such as this could have significant impact on one of the largest trading complexes in the country (namely, the Port of Long Beach and the Port of Los Angeles) and the many businesses which it is my privilege to represent in my district. I also wanted to see if a so-called industrial policy program was the best means by which we could best improve the ability of our economy to compete and produce.

Because of the many unanswered questions over this issue, I recently had the opportunity as a member of the Joint Economic Committee to participate in a series of hearings on this subject. The two hearings which I chaired explored, first, "The Concept of Industrial Policy" and, second, "Japanese Industrial Policy: Lessons for America," looking at many of the real reasons behind Japan's economic success.

After studying this issue extensively for sometime now, I must express grave reservations over the industrial policy bills which are being considered and have been introduced in the Congress.

Mr. Speaker, because of this, I would like to express some of the primary reasons why I believe a national industrial policy would inhibit rather than promote U.S. economic growth and competitiveness abroad. To adopt such a program, I fear, would simply be the wrong economic course for our country to follow.

THE BURDEN OF PROOF RESTS ON THE ADVOCATES

First, the point must be stressed that there is a heavy burden of proof which rests on the proponents of industrial policy to show that the capacity for a healthy economy or our country's ability to compete internationally necessarily hinges on some governmentally established industrial policy board. To date, that burden of proof has not been met to any significant degree.

The question being asked in the debate on this issue is whether the United States should have a comprehensive industrial policy. The heart of this question centers on what the proper role of Government in the economy should be.

INCREASED INTERVENTION WOULD RESULT

Most supporters of industrial policy state that their primary objective is to coordinate Government policy. However, upon further evaluation of their proposals, one finds that industrial policy represents a dramatic, even revolutionary, social, political, and economic change in the basic functions of Government.

While many advocates will stress the need for greater cooperation among Government, labor, and business, virtually every proposal which has been advanced would simply result in greater intervention in the economy by the Government. Such a plan would typically require that the company or industry give up some right or meet some conditions in exchange for Government support or assistance. Those who support this quid pro quo concept, must show that increased intervention above and beyond the many smaller interventions the Government has made in the past necessarily improves the health of the economy.

Before our Government adopts a radical change, it must be shown beyond a shadow of a doubt that an industrial policy board will truly address the underlying problems it proposes to resolve.

Instead of looking at our already existing institutions, industrial policy supporters want to create more Government-sponsored and/or -dominated institutions. I contend that the essential positions and institutions are already in place to do a better economic job than has been done in recent years. Many believe that the Washington complex has already become too big of a bureaucracy. Why will more or bigger mean better?

INCREASED CENTRALIZATION IN A DECENTRALIZING ECONOMY

Second, I have concern that enacting an industrial policy would centralize the decisionmaking process in Government at a time when the economy and country are moving toward increased decentralization.

As John Naisbitt, author of Megatrends and a recent witness before the Joint Economic Committee, has written:

> Centralized structures are crumbling all across America. But our society is not falling apart. Far from it. The people of this country are rebuilding America from the bottom up into a stronger, more balanced, more diverse society * * * Americans are spreading out of small towns and rural areas and leaving the old industrial cities as decaying monuments to a past civilization. As we decentralize, we diversify and tend to stress our differences instead of our similarities.

A national industrial policy would be going against the natural shifts and adjustments toward decentralization that are currently occurring.

POLITICIZATION OF DECISIONMAKING

Third, I believe that a politicization in a national industrial policy would occur. Instead of making economic policy decisions based upon economic merit, political choices would repeatedly prevail.

In reviewing some of the past decisions made in Washington one does not need a crystal ball to conclude that a politicization of the proposed process would inevitably result.

For example, in 1951 the Senate Banking and Currency Committee investigated the Reconstruction Finance Corporation, which, incidentally, is very similar to the Industrial Development Bank being proposed in many of the industrial policy measures. Senator Fulbright, then chairman of the Senate Banking Subcommittee on Reconstruction Finance Corporation, stated that—

> There's been a large number of instances in which the board of directors of the Reconstruction Finance Corporation (RFC) has approved the making of loans over the adverse advice of the corporation's most experienced examiners and reviewing officials, notwithstanding the absence of compelling reasons for doing so and the presence of convincing reasons for not doing so.

According to the Senate report, the RFC "thrusts money on the proprietors of roadside snake farms, cultivators of cactus plants for sale in dime stores, dental clinics, paperboard makers, * * * a rainbow trout factory, and some very devious fellows who

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

wanted to be concessionaires for the roulette room in a Nevada hotel."

A more recent example of politics overcoming economic merit was the recent passage of the so-called jobs bill. This was the measure which was supposed to help address the problems of millions of unemployed Americans. Instead of targeting the assistance to those areas of the country with the highest levels of unemployment, much of the Government support appears to have gone to the congressional districts of the Members whose committee happened to have jurisdiction over the bill. Indeed, $33 million was appropriated and obligated for a highway widening project in the House committee chairman's district. That fact is certainly not a criticism of any Member; rather, it is a criticism of the system which promotes such results. No wonder a July 9 editorial in the New York Times stated that "Congress does better at creating jobs programs than creating jobs."

Little evidence has been brought forth by industrial policy supporters to show that politics, not reason, will prevail in the decisionmaking by an industrial board or Industrial Development Bank. Senator WILLIAM PROXMIRE perhaps stated it best when he wrote:

> Money will go where the political power is; it will go where unions are mobilized, where mayors and governors, representatives and senators have the power to push it. Anybody who thinks that the government resources will be allocated on the basis of merit hasn't been in Washington very long.

PICKING WINNERS AND LOSERS IS INEVITABLE

Fourth, most industrial policy advocates claim that industrial boards would only offer suggestions for consideration by the Congress, but it seems to me the inevitable result would be the picking of winners, or picking of losers, or picking winners and losers. Despite the good intention of trying to achieve greater cooperation among the major economic actors, the process of determining which industries to support or where to allocate capital is, in effect, deciding which groups will benefit at the expense of other groups.

This is perhaps the key point: Government cannot create real credit or capital any more than it can create wealth. It can only reallocate already existing credit, capital, or wealth.

Moreover, I seriously question the ability of any board of government bureaucrats to make such predictions as to winners or losers. Who, for example, in the Government after World War II could have foreseen that research with grains of sand would lead to the development of the high tech industry as the industry of economic growth and new jobs in the near future?

Dr. Robert Noyce, cofounder of Fairchild Semiconductor and Intel Corp. and a National Medal of Science recipient, told the Joint Economic Committee how difficult it is to pick winners and losers as an active participant in the marketplace, not to mention the arduous task that would confront some government panel. He testified:

> Since I have spent most of my life in entrepreneurial high technology business, I should be better than most in picking winners and losers. Yet I advised my wife a few years ago not to invest in the local start up which has turned out to be the most successful in American Industrial History to date—Apple Computer * * *. I'm fortunate that my wife, like most, did not take my advice.

If anything, experience shows that the Government probably has a better record picking losers than it does winners.

REPRESENTATION ON THE INDUSTRIAL BOARD

Fifth, while the intent of an industrial policy would be to reach consensus decisions through cooperation, I am also concerned that in attempting to do so they would leave many important economic actors completely out of the picture. Most proposals would allow big business, big labor, big government to serve on and dominate some industrial board.

Many of the so-called new sunrise industries have expressed concern to me that under an industrial policy they would not be on an equal footing with some of the more traditional industries in presenting their views in Washington.

Even if room could be made to ensure the representation of all involved, it is in fact the larger companies and entities which are best prepared to use their own bureaucracies to deal with the Government bureaucracies. This would leave smaller firms at a competitive disadvantage.

Since small businesses—which comprise more than 95 percent of the total number of businesses in the United States—supply more than 80 percent of all new employment, almost 40 percent of our gross national product, as well as half of all major innovations and new technologies, one must seriously question the wisdom of creating a centralized, national industrial board.

INDUSTRIAL DEVELOPMENT BANK WILL DISTORT THE ECONOMY

Sixth, my strongest objection concerns a proposed industrial development bank board to directly reallocate credit and capital. In addition to the arguments I raised earlier concerning the politicization of the decisionmaking process and the inability to select winners and losers, I fear that such a bank would unnecessarily distort adjustments occurring within the economy.

The important point to be reiterated here is that such a board would not be creating credit, but rather allocating credit which might otherwise have gone to other growing sectors of the economy.

This is the experience which occurred in Korea. The government there directed the credit in the country to certain selected industries. While the chosen industries were successful to a limited degree, the success was not achieved without costs being imposed on the overall Korean economy. For all intents and purposes the nontargeted industries had an unlegislated tax imposed on them since it was more difficult for them to obtain capital.

Mr. Kim Kihwan, of the Korea Development Institute in Seoul, has written that—

> The basic message from this experience is that excessive intervention in the market creates inefficiencies which eventually hurt economic performance. By creating a deep and prolonged gap between the real and the effective cost of capital in certain industries and by discriminating excessively among industries, the policies contributed to both a slowdown in export growth and adverse developments in equity and income distribution. . . . The policy of extending preferential access to credit and treatment in taxation to strategic industries is being phased out. In its place the government is moving toward an incentive system which is neutral with regard to firms and industries and which will allow the effective cost of capital to more accurately reflect the true cost.

Since capital is not being created within the economy, the effect of allocating credit by the Reconstruction Finance Corporation would target resources to some at the expense of others in the economy. This is analogous to a balloon or waterbed, which when depressed pushes outward on the opposite side while the total amount of air or water has remained constant. The point is that a greater cost on the economy is incurred by politically targeting resources to certain sectors over other sectors rather than allowing the cumulative effects of individual decisions in the marketplace to prevail.

WE MUST STRESS THE ECONOMIC FUNDAMENTALS

Because I do not believe that the burden of proof that an industrial policy is needed can be met, government policy should instead concentrate on a return to the fundamentals. We do not need a national industrial policy to stress the basics.

An editorial in the Wall Street Journal put it best:

> The only industrial policy we need is one that offers the maximum possibility for individual decision makers to apply their initiative and imagination, take their risks and reap the rewards when their judgments are correct. As a group they will be right far more often than government bureaucrats not subject to the disciplines and incentives of the market.

Instead of allocating credit within the economy or targeting specific in-

dustries, we should focus on legislation to increase the amount of savings, research and development, incentives to work, invest and produce, and improve the quality of education our students receive. We should concentrate on promoting free trade throughout the world and U.S. competitiveness in exports. The Government policy objective should be the development of sound fiscal and monetary policies that avoid unnecessary shifts in response to every change in the economy. I also believe that the Government has a valuable role to play in encouraging worker retraining programs to assist with the transitions that are taking place within the economy.

But to achieve these objectives, a return to the fundamentals rather than the creation of a national industrial policy board is the key for establishing the foundation for increased jobs and sustained economic growth. That in the end should be the aim of our policies.

THE BEST AND THE BRIGHTEST ARE NOT HERE IN WASHINGTON

Mr. Speaker, there are many other points I could raise against the consideration of an industrial policy, however, if there is anything I believe we should have learned from our experience in Vietnam, it is that the best and the brightest have not necessarily been proven to be in Washington. I am especially not convinced that a panel of bureaucrats can or should make decisions that have been traditionally made individually by American consumers, workers, investors and businesspeople.

Those who advocate an industrial policy have an overwhelming burden of proof to carry in order to show that an industrial policy is needed to increase jobs and improve economic growth.●

THE DAY OF SOVIET SHAME

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. GILMAN. Mr. Speaker, it was 15 years ago, on August 21, 1968, that over half a million Soviet and Warsaw Pact troops invaded the sovereign state of Czechoslovakia. This flagrant violation of international law, the "Day of Soviet Shame" was the final episode in what had been a moderating period for the Soviet-dominated state.

Today I urge my colleagues to never forget the plight of Czechoslovakia, whose people have always been steadfast friends of our Nation. The many Czech, Slovak, and Subcarpatho-Ruthenian descendants living in the United States have contributed greatly to the continued growth of our country; they are amongst this Nation's most loyal citizens.

The people of Czechoslovakia have been enslaved by the illegitimate government that took power 15 years ago, firmly entrenched in the blind ideology of the Soviet Union. The continued occupation of that country is a crime against the right to determine one's goals and destiny. Czechoslovakia has been denied this right, its people enslaved by the arm of Soviet domination and paranoia.

Mr. Speaker, I ask that we renew our resolve against Soviet domination in Czechoslovakia. The brutal silencing of this freedom loving people is a constant reminder of the Soviet Union's flagrant violation of international law.

On this, the anniversary of the Soviet invasion of Czechoslovakia 15 years ago, I ask that my colleagues join me in decrying the continued Soviet military presence in that nation. We must never forget the courageous men and women of Czechoslovakia, as we are their only hope.●

DISINVESTMENT STUDY

HON. CHARLES WILSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. WILSON. Mr. Speaker, the idea of portfolio disinvestment of holdings in U.S. firms doing business in South Africa has beguiled State and municipal assemblies and university trustees over the past year. It is seen by its proponents as a way to damage the economic prospects of that country, and cause it, thereby, to alter its domestic policies. It is also seen, somewhat mysteriously, as a benefit to the black population of South Africa. However well meaning these initiatives are, their impact on South African black employment certainly promises to be negative, and their cost to the pension and other trust funds affected is definitely so—as indicated by such observations as those hereto appended.

Mr. Speaker, another point missed by these initiatives is the leadership role played by U.S. firms in improving employment, health, and educational opportunities for nonwhites in South Africa. In the past few years U.S. firms have invested some $50 million toward these objectives.

Mr. Speaker, it is both natural and proper for Americans to seek measures to bring justice to any part of the world where injustice obtains. But I would hope that this particular expedient has run its course, before it does any further damage to our own society as well as the people we are trying to help in South Africa.

I submit the following articles to be printed in the RECORD.

[From Pensions & Investment Age, June 13, 1983]

SOUTH AFRICA INVESTMENT STUDY

HIGHER RISKS, LESS DIVERSITY SEEN IN DIVESTED PORTFOLIOS

COLUMBUS, OHIO.—Divesting the stock of companies doing business in or with South Africa could have "Significant consequences" for a pension fund, an Ohio group states.

According to a report by the Ohio Retirement Study Commission, higher risks and less diversification could result from total divestiture.

But the study also states "it is debatable whether divesting and excluding 'South African investments' achieves anything.

"There is . . . somewhat more support for the proposition . . . supporting a policy which pressures American companies to set a good example in their South African operations . . . ."

The study was conducted by the commission at the request of the Ohio Legislature in response to two bills that would affect portions of the five state public pension funds. The funds have assets totaling more than $11 billion.

Both bills would prohibit investment in American corporations that have any business relationship with South Africa or investments located in South Africa.

One bill adds an additional prohibition against investing in any bank or building and loan association that makes loans to either the South African government, South African businesses or a subsidiary or affiliate of a U.S. company operating in South Africa, according to the study.

Both bills are broadly drawn and the aim is the same—to help institute an economic boycott against South Africa, the study adds.

The commission raises—and attempts to answer—four questions about the restriction of pension fund investments in U.S. companies with South African business operations:

Would a restrictive investment strategy result in a lower rate of return on investments, thus jeopardizing future pension benefits?

Would the use of restrictive investment criteria violate the legal and fiduciary responsibilities of the pension fund trustees?

Would such a strategy, in the aggregate, influence American corporate policy in this area?

Would the strategy influence the South African government in the area of race relations?

The commission said that while the evidence is not conclusive that lower returns would result, higher risk and lower diversification might indeed result. However it said that as long as other investment opportunities offer equal return potential, and there are no diversification problems, South Africa related companies could be excluded without violating the trustees' responsibilities.

The study added it was debatable whether such a strategy would affect policies directly because South Africa is not overly dependent on U.S. investments.

Although few public pension funds have adopted restrictive investment strategies dealing with South Africa, those that have fall into three categories, according to the study.

Some funds have opted for a total divestment/exclusion portfolio strategy; a second group has followed a "selective divestment/exclusion" strategy where a set of criteria

are used in a company-by-company approach; and still others have opted for a "concerned or active shareholder" strategy. This last approach enables the investor to become an active participant in supporting various shareholder resolutions on South African issues as they relate to U.S. companies.

The commission study suggests adopting either the second or third strategies.

If the Ohio Legislature approved a bill requiring total divestment of the five Ohio funds, 15% to 20% of the combined assets, about $1.98 billion, would be affected, according to 1980 data used in the report.

The study asserts a policy of total divestiture could have "significant consequences and might result in lowered returns, higher risks and less diversification."

However, should the second option be adopted—following a very selective divestment/exclusion policy, only 1% to 2% of the combined assets might be affected, depending on the policy's wording.

If the third option were adopted, there would be no effect on the Ohio funds, the study said.

Oddly enough, Ohio laws already contain language encouraging investment in Ohio-based companies. The Commission said that 4%, or $253 million, of the Ohio State Teachers Retirement System assets was in "Ohio companies" that do business in South Africa. Total investments by the system in companies doing business in South Africa were $1.3 billion—21%—as of Jan. 1.

The commission also studied the cost of adopting each policy.

Three areas in pension fund management were found to be costly when pursuing a policy of restricted investments.

The first and most important cost would be that the portfolio becomes less attractive in terms of return, risk and diversification, according to the commission.

Second, if a major divestment or exclusion strategy is adopted, large transaction costs would result.

Using transaction cost statistics taken from a State of California Retirement System's study, the commission calculated a minimum transaction cost of between $30 million and $40 million would ensue to the Ohio funds as they stood in 1980.

Another cost to the Ohio funds would be the staff time required to institute and maintain the restrictive investment policy.

[From Pensions & Investment Age, June 13, 1983]

DIVESTMENT: INFORM THE TAXPAYERS

Once again, the issue of investing in companies doing business in or with South Africa is heating up. As reported elsewhere in this issue, 22 states and eight local governments are confronted with legislation requiring their pension funds to divest themselves of the stocks of companies with South African connections.

Those pushing such legislation are attempting to make a political statement of their revulsion at the South African policies of apartheid.

Those opposing the legislation are concerned about the impact of divestiture on the investment returns earned by the public employee pension funds and, ultimately, on the taxpayers who, in most cases, have not been consulted about the proposed restrictions.

Proponents argue that the divestiture would have no impact on the investment returns, and often refer to limited studies in which investment returns actually have been improved by such divestiture.

Opponents argue in response that the cases cited by proponents deal with only small funds, not with funds investing billions of dollars and that the studies have not considered the relative risk of the South Africa-free portfolios.

Closer examination of one example by Prof. Roy Schotland of Georgetown University Law School showed the South Africa-free portfolio was 16% riskier than the portfolio free to invest in South Africa, yet provided investment returns only 3% greater.

That is, in this instance, the risk-adjusted returns of the portfolio prohibited from South Africa-related stocks was significantly lower.

In addition, as Prof. Schotland and others point out, the restricted portfolios are necessarily less liquid, causing problems for the billion-dollar state and local government pension plans.

Thus, long-term investment returns are likely to be lower, means higher taxes or lower benefits.

The problem with such restrictive legislation is that political activists are attempting to use public monies to make statements. Others might oppose apartheid, but believe that divesting funds of the stocks of companies doing business in South Africa is a useless gesture.

Before such restrictions are placed on any public pension fund, there at least should be full public discussion of the potential costs of such restrictions to the taxpayers and beneficiaries, and then there should be a referendum.

Only if the taxpayers are fully informed that such a restriction might increase their taxes or might reduce future benefits for the beneficiaries, and then vote in favor of it, should such a restriction be imposed.

[From the Boston Herald, May 25, 1983]

WE HURT OURSELVES

Punching oneself in the mouth in order to make a protest against the brutality of a bully in another corner of the world sounds pretty stupid. Right?

Well, don't laugh too soon. We're doing just that here in Massachusetts. So far it has cost us $14.4 million worth of pain without even bruising the bully, and it could cost us even more in the very near future.

We're saddled with a public pension system that is so deep in the hole financially that it is just about out of sight—and it's getting deeper every day. Yet four months ago our state government, as a means of showing its opposition to the repressive racial policies of South Africa, chose to unload its stock holdings in firms doing business with that nation. In doing so we took a loss that came straight out of the pension funds for teachers and state employees which were used to make those investments. Now that Governor Michael S. Dukakis has approved a similar "divestiture" law covering our investments in companies with business links to Northern Ireland, our losses will in all likelihood mount.

The apartheid in South Africa, injustices committed on both sides in Ulster, are all abhorrent to the majority of Massachusetts residents.

But what are these measures achieving? Are there blacks in South Africa liberated today because of the sacrifices of the Commonwealth of Massachusetts? Are the two sides in Ulster closer to peace because of the gestures of the Dukakis administration?

What confuses us in all this is the fractured logic that has been employed in high places.

Sure, the South African regime is not run by a bunch of nice, humane guys.

But maybe Mr. Dukakis should check out some of the other nations who are pumping millions of dollars of imports into this country.

The Saudis, for instance. Next time Mr. Dukakis fills up his gas tank he might remember that the sheikhs sitting on all that oil treat women about as well as many of his electors treat their household pets.

And India. We guess Mrs. Gandhi would be invited to the State House if she showed up in town. Yet the manner in which her nation has abused and dispossessed The Untouchables is one of the most shocking in history.

And what about the Soviets and how they have treated the Ukrainians, the Tadziks the Uzbeks? Any Dukakis plans for a ban on business with them?

The list goes on, but it would be laboring the point.

Divestiture is futile. Like a self-inflicted punch on the nose, the only pain we'll notice is our own.●

SALUTE TO MARGARET S. PLUMMER

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. MILLER of California. Mr. Speaker, on August 10, 1983, Mrs. Margaret S. Plummer of Martinez, Calif., will be honored for her service in the National Weather Service's Cooperative Weather Observer program. I am pleased to have this opportunity to salute Mrs. Plummer and want to share her contribution with my colleagues in the House of Representatives.

The Commerce Department's National Oceanic and Atmospheric Administration recently paid tribute to Mrs. Plummer's more than 31 years of continuous and exceptional service as a volunteer in the field of meteorological observations by awarding her the John Campanious Holm Award. Although many of us in this Chamber may not realize the significance which this award carries, Mrs. Plummer may be duly honored to receive one of the highest awards granted by cooperative service. This award is named after Rev. John Campanious Holm, who, in 1644, took the first known weather observations in this country, without the use of instruments.

In this period of budget cutbacks and staff shortages, volunteers play an increasingly important role in maintaining vital services to the community and the Nation. With more than 12,000 of her fellow volunteers, Mrs. Plummer has helped document our Nation's climate with dependable and accurate daily records of temperature and precipitation. I join the residents

of Contra Costa County and the staff of the Commerce Department's NOAA in congratulating Mrs. Plummer and wishing her much success in the future.●

LIBRARY OF CONGRESS INCIDENT SHOWS HOW POORLY WE ARE ABLE TO DEAL WITH JAPAN—WAKARIMASEN

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. STARK. Mr. Speaker, in the past, I have expressed concern to my colleagues in Congress about the disparity of the amounts of technical information flowing from the United States to Japan and from Japan back into the United States. I have suggested that the root of this problem lies in the lack of qualified personnel in this country with the ability to translate often times important Japanese technical and scientific information into English. I began to look for a possible solution or at least a means toward improving the imbalance. It seemed to me that the most obvious course of action was to look at how those whom we are competing with have achieved so much more success in the accumulation, translation, and dissemination of worldwide technical information—namely, the Japanese.

My staff called the Japanese Embassy to obtain two Japanese laws that established the Japanese Information Center for Science and Technology, a state-run organization in that country that has as its primary purpose the collection and dissemination of foreign technical information. I thought that perhaps I might be able to use these laws as models for similar U.S. legislation. There was one problem, however: the laws given to me were printed—naturally—in their native Japanese.

Mr. Speaker, I, of course, thought this was just a minor and very temporary setback. As a Member of Congress, I have at my disposal the greatest library, resource center, and reference center in the world—the Library of Congress. Surely, I believed, they would have no difficulty translating a legal document of one of the world's most influential nations—a nation famous for its 1,000-year history of great literature and modern-day Nobel laureates. Unfortunately, the Library's translation service had no one currently on the staff fluent in legally technical Japanese and, thus, they were unable to fulfill my request, although they offered to contract the job out for $900 or $64 per page. But, they assured me that if I ever needed anything translated from such technologically powerful languages as Lithuanian or Romanian, there would be no problem. In fact, even if a major technological breakthrough were developed by a Roman writing in Latin, they could handle it. Yet, for Japanese—that insignificant language of the largest research population per capita in the world, the language of industry that is quickly eroding the premier position of U.S. industry in the automobile, steel, and electronics markets—for Japanese, there was no need for a technical translation service.

Mr. Speaker, I am not critical of the Library; perhaps they simply do not get many requests for the translations of Japanese technical documents. But I am critical of the prevailing attitude in American industry and government that believes we can afford to ignore the wealth of original and creative technical advances currently being developed in Japan.

I am sharing this story with you simply because the stark reality, no pun intended, of the situation is that unless we improve the flow of technical information from Japan into our own country by asking for more Japanese technical and scientific information, we will quickly find ourselves behind our Japanese competitors with no chance to catch up again. In the meantime, I will get these documents translated, even if it means asking the Japanese Government to do what the American legislative branch cannot—translate Japanese into English.●

PERSONAL EXPLANATION

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. ACKERMAN. Mr. Speaker, due to official business, I was unable to be present on the floor during two rollcall votes on August 4. Had I been present, I would have voted "aye" on rollcall 321, approving the journal of August 3, and "aye" on rollcall 327, approving House Resolution 299, the rule on H.R. 3391, Trade Act of 1974 Amendments.●

COMMODITY DISTRIBUTION AMENDMENTS TO H.R. 3409

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. PANETTA. Mr. Speaker, today, August 4, 1983, both the House and Senate approved amendments to H.R. 3409, the Federal Supplemental Compensation Act amendments, that would expand and extend the current Federal program to distribute Government-owned surplus commodities to needy persons and institutions such as schools, child care centers, and elderly feeding programs. As I mentioned on August 4, these amendments represent a compromise that was hastily drawn just prior to House and Senate passage. As a consequence, there may be conflicting interpretations as to what was agreed upon. As the primary House Member involved in these negotiations and in my capacity of chairman of the Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition of the Committee on Agriculture, I would like to present my understanding of what was agreed to. In general, it is my belief that where congressional intent is ambiguous or unclear, the issue should be resolved in a manner consistent with the commodity distribution bill passed by the House, H.R. 1590.

Basically, H.R. 3409 includes the most important elements of H.R. 1590, the Emergency Food Assistance and Commodity Distribution Act of 1983, that was passed by the House on June 16, 1983, by a 389 to 18 vote. The bill is not simply an extension of the commodity distribution program mandated in the jobs bill, Public Law 98-8, but represents an expansion and revision of that program. It includes various provisions and concepts taken from H.R. 1590, S. 17 (the bill passed by the Senate Committee on Agriculture, Nutrition, and Forestry), and Public Law 98-8.

The bill would mandate operation of a commodity distribution program for 2 years. It would require the Secretary of Agriculture to distribute, without charge or credit, all available price supported commodities acquired by the Commodity Credit Corporation and not committed for another use to eligible recipient agencies. While the Secretary would have discretion to determine what quantities of commodities are in excess of those needed for other commitments, his discretion would not be unlimited. The Secretary would be expected to have specific other uses in mind in order to withhold distribution of available supplies of commodities. The law requires him to "make maximum use of the Nation's agricultural abundance."

H.R. 3409 would generally continue distribution to the same recipient agencies eligible under Public Law 98-8. The list of eligible agencies in the bill is not intended to be exclusive. The Secretary and the States would have discretion to authorize participation of other agencies that generally serve the purposes of the act. The reference to the eligibility of charitable institutions, to the extend that needy persons are served, is not intended to be a strict limitation on these institutions such that only needy persons within them can be served. It is intended to limit participation to charitable institutions that serve, at least in part, needy persons.

H.R. 3409 would require that commodities generally be provided to emergency feeding centers on a priority basis. As Senator DOLE pointed out in the August 4 Senate floor debate, this would not be an exclusive priority. Traditional outlets such as schools would continue to receive their historical share of these commodities. If additional commodities are available, those serving the needy would generally have first call on them.

Under these amendments, the Secretary of Agriculture would continue to be required to pay for the costs of initial processing and packaging of commodities into forms and quantities suitable for household and institutional use, as well as the costs of transporting commodities to the States. He would be authorized to pay such costs from funds of the Commodity Credit Corporation or utilize any other funding at his disposal. The Secretary would not be permitted to utilize any of the $50 million in annual appropriations authorized under H.R. 3409 for State and local administrative costs to pay for initial processing and packaging of commodities, or transporting them to the State or local level.

The up to $50 million in annual funding authorized for State and local administrative costs is to be made available in advance upon request of eligible recipient agencies. The Secretary and the States would have discretion to assure that advance funding requests are reasonable. However, the availability of advance funding is a key element in assuring maximum effectiveness in program administration, and the Secretary should facilitate adequate advance funding for eligible agencies, up to the limits specified in this bill.

A minimum of 20 percent of the funding under this bill is to be made available to agencies that directly serve needy persons. The remainder of the funding is to be utilized by the States generally to cover the costs of storage and distribution to all eligible outlets, including both emergency feeding outlets and traditional outlets such as schools, child care centers, elderly feeding programs, and others.

The plain language of the bill governs the use of the administrative funding authorized. There is no direction in the bill, and no intention on the part of Congress, that States use storage and distribution funds provided under the authorization exclusively for costs relating to emergency feeding centers. There is no intention on the part of Congress to require States to maintain systems to account for which storage and distribution costs have been incurred in relation to emergency feeding centers and which costs have not. If it had been intended to limit the States ability to utilize the funding to cover the costs of distributing commodities to emergency agencies, it would surely have been so provided in the law. I understand this may involve a change in how administrative funding has been distributed under Public Law 98-8 and this is precisely what is intended.

I would emphasize that no administrative funding is to be provided directly to schools and other traditional outlets to cover their costs once they have received commodities. However, the States would be expected to utilize funding available to them, after the 20-percent allocation to emergency feeding programs, to generally pay the costs of storage and distribution in relation to all eligible outlets.

One additional area addressed by H.R. 3409 concerns the eligibility of persons to receive commodities through agencies that distribute to individual households. H.R. 3409 makes clear that only those persons who meet some needs test would be eligible. The determination of who is needy would be left to the States, subject to the approval of the Secretary.

I do think this is a constructive change and should help address whatever problems there may be in the displacement of commercial sales of commodities when nonneedy persons receive commodities. I would emphasize that this change would not authorize the Secretary to issue specific, uniform, eligibility requirements for this program. That determination should be left to the States. The Department may want to issue general guidance and guidelines to assist States. However, I believe it would be a serious error to limit participation in this program only to persons who are already participating in other programs, such as food stamps, supplemental security income, and aid to families with dependent children.

This commodity distribution program needs to be available for all the persons in our society who "fall through the cracks." There are many people who either are not eligible or choose not to participate in these programs, but are in great need of food assistance.

That concludes the major points I wanted to make about the contents of the bill. I would like to add a few comments about the process that led to its final passage and several provisions that were not included in the bill

Late this afternoon, August 4, 1983, I learned that the Senate intended to add commodity distribution amendments to H.R. 3409. These amendments were to be added in such a way that, as a practical matter, no conference would be possible. Since the House had already passed the unemployment compensation amendments in H.R. 3409, the Senate intended to add the commodity distribution amendments to them and immediately adjourn for the summer recess. This meant that any objection on the House side to the commodity distribution amendments would not only jeopardize that part of the bill, but also the unemployment compensation in benefits that H.R. 3409 would provide for many Americans.

When I learned of this situation, and after consulting with ranking minority member, BILL EMERSON, I attempted to gain some changes in the Senate amendments to make them more consistent with H.R. 1590. While some of these proposed changes were accepted, several important provisions were not.

Two provisions of H.R. 1590 relating to the replenishment of the food security wheat reserve were not included in the Senate amendments. Similarly, specific provisions relating to the level of commodities provided to schools and other traditional outlets and the use of administrative funding to deliver commodities to these outlets were not in the final bill. While I believe these latter concerns in relation to traditional outlets should be adequately addressed when the administration implements the law, the protections for the food security wheat reserve have been weakened.

I relate all of this history so that the many Members who have expressed interest in various aspects of this legislation will better understand why it was dealt with so summarily on August 4, 1983. While I believe that the legislation that has emerged is very worthwhile—a 2-year program has been set in place, administrative funding has been provided—I would have much preferred if several additional provisions from H.R. 1590 had been included. Unfortunately, it was not possible under the circumstances despite our best efforts.●

BETTER LIFE FOR ELDERLY IS LEGACY OF OLDER AMERICANS ACT

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. MATSUI. Mr. Speaker, the 1973 amendments to the Older Americans Act, which first became law in 1965, brought forth the concept of area agencies on aging to develop and coordinate needed services for the Nation's increasing numbers of elderly citizens.

Today, area agencies on aging have become valued institutions in America's basic social service structure. The value of that landmark legislation is demonstrated daily through the services rendered by these agencies.

I am pleased to draw to the attention of the House of Representatives the accomplishments of one such agency in particular, the Area 4 Agency on Aging in California. This agency serves over 165,000 senior citi-

zens in the counties of Nevada, Placer, Sacramento, Sierra, Sutter, Yolo and Yuba.

The increased awareness we have today of the problems of the elderly had been long in coming. Thanks to the historic work of the Johnson administration and the Congresses of the 1960's, America began to take note of the financial and emotional hardships suffered by many of our elderly in a turbulent, youth-oriented society.

Mr. Speaker, while our Nation has become more aware of not only the problems of the elderly, but also of the real contributions of the elderly, we are still a long way from realizing the dream of secure, dignified retirement for all our citizens. But we have made progress, and the area agencies under the Older Americans Act are part of that progress.

The Area 4 Agency on Aging provides and oversees many services to the community, such as general information and referral services, transportation, health screening and education, in-home services (such as assisting in household repairs to enable the elderly to live independently in their homes), legal services, meal delivery, nursing home assistance and companion programs.

On the occasion of an open house September 1 sponsored by the Area 4 Agency on Aging of California, I wish to commend this organization on its valuable service to the elderly and the community as a whole.●

VOTER INTEREST AND PARTICIPATION ACT OF 1983

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. CORCORAN. Mr. Speaker, for nearly 200 years, the American two-party system has functioned well. At the present time, though, it is threatened by changes in law and practice. In order to preserve and shore up our historical two-party system, on May 11 I introduced legislation that would allow the Democratic and Republican parties to return to their former strength in the electoral process. Prompt enactment of this legislation, H.R. 2976, the Voter Interest and Participation Act of 1983, will help the American people have additional confidence that their governmental system is responsive to their needs. By moving on my bill now, Congress can substantially improve the climate for political parties prior to the next election.

Let me review some of the developments that have made this legislation necessary. Our two-party system is almost unique in the world today. In countries with a parliamentary form of government, there tends to be a large variety of parties competing for office. Canada's four parties, Britain's three parties, and the multiparty system of Western Europe are examples of this. Multiparty systems survive in parliamentary systems because there is generally control of the executive branch by the Parliament. Often, governments rise or fall on coalitions. Frequent votes of confidence occur to insure that such governments remain true to the wishes of the voters.

One-party states exist in a variety of forms, expecially in the developing world and Moscow's orbit. They argue that elections, or at least competitive elections, destabilize the government. A kind of corporate responsiveness is credited to such systems by their creators.

I would like to emphasize that there is nothing magical about a two-party system. As I have noted, two-party systems are the exception, rather that the rule in today's world. But the two-party system has served the United States very well until very recently. In the past 10 years, assaults on our two-party system in law and practice have weakened our two great political parties. The result is that the American people have less and less confidence that our political parties can form the basis for governing. These threats to such valuable institutions and symbols of our Republic must be ended. My legislation would effectively improve the ability of the Democratic and Republican Parties to lead our electoral system once again.

What threats have developed to the two parties? First, party organizations at the precinct, congressional district, State, and National levels have been weakened in the name of reform. Both parties lack their former ability to nominate candidates for office having the support of most people from the party in a given geographic area. In place of this, candidates are almost completely free to act on their own. Typically, a candidate for office decides that he will be a candidate, organizes his own campaign, raises his own funds, develops his own strategy, and he, alone, is responsible for all of these things. Candidate selection, campaign organization, fund raising, strategy and responsibility used to have important components from the Democratic and Republican parties. By allowing or encouraging candidates to do everything or almost everything on their own, in the name of election reform, voters are given enormously difficult choices. Instead of using the position of the two political parties as reference points to evaluate candidates, voters must ascertain the gradations of candidates on their own. It is easy to say that people want to vote for "the man and not the party." But the present system weakens the traditional two parties by allowing candidates to run without the discipline of party organization and assistance.

Again in the name of election reform, political parties have been restricted in the amount of cash and inkind contributions they can give to candidates. This post-Watergate reform was institutionalized by a Supreme Court case, Buckley against Valeo, and decisions of the Federal Election Commission (FEC). Taxpayer funds make up most of the available moneys for Presidential candidates, once they qualify according to FEC guidelines. But the restriction on the assistance that can be given a candidate by the two national political parties has the result of leaving a good deal of slack to be made up by other organizations: special interest groups and political action committees (PAC's).

Neither special interest groups nor political action committees is bad. But because of their great numbers and influence, the voter is unable to demand the kind of accountability and responsiveness from such groups and committees as they formerly expected from the Republican and Democratic parties. It is even possible that the extreme costliness of congressional elections in the past 10 years has been made worse by the weakening of the two-party system in all phases of the electoral process, especially the funding of elections.

Here the role of incumbency comes into play. Special interest groups and PAC's have a very vital stake in the status quo. Whatever they find in Congress, they to seek in Congress, simply because such an arrangement is more predictable and easier to work with than a wave of new faces or leaderships election after election. By relying on funding of election from PAC's and special interest groups, incumbents in the House and Senate are insulated from the will of the American voter to an unreasonable extent. When combined with the enormous increases in the amount of perquisites available to incumbents which were enacted under the leadership of former Representative Wayne L. Hays, as chairman of the Committee on House Administration during the mid-1970's, the voters have their decisions effectively frustrated by the combination of weakened political parties and a self-serving congressional gravy train. Only by renewing the role of the two political parties can the Congress make sure that responsibility returns to the election process.

The result of the present system is to increase the number of political parties from 2 to 540. Each candidate for Congress becomes effectively a small political party, responsive to nobody except himself or herself. My legislation would reduce the relative importance of special interest groups

and PAC's by simply allowing the two political parties to have no limits on the amounts of in kind and cash assistance they can give to candidates. Because of the reporting requirements of the present law, the voters would have no trouble identifying where a candidate received support. Instead of wading through the goals and purposes of this or that special interest or political action group, the voter would have a much easier time evaluating the philosophical and issue differences between candidates for Congress. My legislation would in no way affect the existing disclosure requirements of political contributions.

My concern is that we correct a real problem, the weakening of the two-party system, rather than trying to restrict the powers of political action committees. It is obvious that PAC's developed in the post-Watergate era when a vacuum was created by the lessened powers of the Democratic and Republican parties to finance congressional elections. The Federal Election Commission's SUNPAC decision merely sought to balance the power of prolabor special interests who had traditionally assisted in the funding of congressional elections by allowing corporate employees to form PAC's. Both prolabor and probusiness political action committees have increased their influence on congressional election financing since SUNPAC, but they did not cause SUNPAC. Had the law allowed the Republican and Democratic parties to maintain their traditional funding roles, moneys raised by special interest groups and political action committees would automatically be controlled to a large extent.

To restrict political action committees without restoring the two-party system to vitality leaves only one option for the funding of congressional elections. The taxpayer would be saddled with such funding if neither political parties nor political action committees could manage the funding under the law. Obviously, taxpayer financing of congressional elections would be a logical extension of the incumbency protection measures instigated by former Congressman Hays. It would also encourage a proliferation of candidates within primaries, who would be propped up long after the voters lost interest by a tidal wave of taxpayer funds. Furthermore, nonaffiliated candidates would be encouraged to run with the backing of taxpayer funds in direct competition to candidates of the traditional two-party system, thereby further weakening the competitive position of them.

My legislation, in restoring the traditional role of the two traditional parties, would restore among voters the opportunity to evaluate and hold responsible candidates for Congress from the Democratic or Republican parties. It would tend to reduce the relative role of special interests and political action committees by allowing the bulk of congressional funding to be handled by the two parties. It would discourage taxpayer funding of elections, and the additional burden on the Federal budget, by allowing private financing through the vehicle of the traditional parties. It would diminish the chances of successful nonparty affiliated candidates as well as prevent incumbent protection which would be the natural result of taxpayer funding of congressional elections. Moreover, my legislation would restore to health a system that has worked well for nearly 200 years rather than building a Rube Goldberg system in which the voter has every right to lack confidence.

Mr. Speaker, I urge the support by our colleagues of the Voter Interest and Participation Act of 1983, H.R. 2976.●

EXPLANATION FOR MISSED VOTE

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. GILMAN. Mr. Speaker, I was unable to cast my vote on rollcall No. 299, which sought to close portions of the Department of Defense authorizations conference report (S. 675). Had I been present on August 1, 1983, I would have voted "aye."●

AMERICA'S PROGRESS TOWARD CIVIL RIGHTS REFORM

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. PATTERSON. Mr. Speaker, on Tuesday, the House voted overwhelmingly to honor the birthday of Martin Luther King. Were Dr. King here today to witness our consideration of H.R. 2230, I wonder if he would be encouraged by our progress over the past two decades in civil rights reform.

Today, when we vote on this bill to reauthorize and extend the authority of the Civil Rights Commission, I hope all of my colleagues will consider the amendment to be offered by the gentleman from California (Mr. EDWARDS). This is a compromise amendment to try to depoliticize this very important Commission.

Mr. Speaker, I urge the Members to oppose all amendments to weaken the Edwards compromise and to vote to extend the life of the Civil Rights Commission for the next 5 years. It is very important, and we owe that to our country and to Dr. King's memory.

If we look back, there is much to consider about how this legislation will affect the future direction of civil rights in the United States. When the Commission was formed in 1957, prejudice and segregation were commonplace in our society: in education, in employment, in housing, and in our minds. Not a single portion of our society was spared the markings of racial injustice. In parts of the country, drinking fountains bore the signs of discrimination. Even our institutions perpetuated prejudicial attitudes, until, by the courage of some rare and courageous individuals, we were made to recognize our folly as human beings.

In 1955, when Ms. Rosa Parks, a black seamstress in Montgomery, Ala., refused to move "to the back of the bus," she was jailed. The poignance of her act, and others like hers, touched off one of the most significant revolutions in American history. Prior to the civil rights revolution, racial prejudice and social injustice were the accepted norm. Civil rights were forceably denied, and fear kept many from challenging the power of fiat. Today, while the signs of blatant discrimination might not be as openly displayed, the subtle signs of a not-so-glorious past persist.

Just yesterday, the fairness of voting practices in the primary election of a southern State (Mississippi), were brought into the question. Were it not for the Civil Rights Commission, a fair and independent assessment of voting practices throughout our Nation would not have been made. Without the Civil Rights Commission, the Voting Rights Act would not be on the books today.

The independent, comprehensive studies and recommendations of the Civil Rights Commission have had a tremendous influence on policymaking. To mire debate about the structure of the Commission in controversy, or to make Commission members submissive to any President, whim to fire without cause, would result in the unconscionable demise of the Commission.

The debate here today must not focus on the dismal record of the Reagan administration with respect to civil rights. Rather, it must focus on the long-term integrity of the Commission. The authorization for the Commission is due to expire on September 30, but its work is far from complete. Yet somehow, there are Members of this body and of the Senate who would seek to entangle the appointments process in debate over whether to reauthorize the Commission at all. This is not the time to impose a structure on the composition of the Commission, nor is it the time

to permit the President to fire "at whim" those Commissioners who would not agree with his policies. Neither this administration, nor any future administration, should be permitted to tamper with the work of the Commission. It must remain the objective voice of our diverse citizenry, untainted by political controversy, supportive of civil rights reform, and strengthened by fairness.

August 28 will mark the 20th anniversary of the orderly assembly of over a quarter of a million people in front of the Lincoln Memorial. In the midst of this peaceful pilgrimage for civil rights, Dr. Martin Luther King spoke out. He spoke of a dream which resounds for us today. He spoke of his four children that they would "one day live in a nation where they will not be judged by the color of their skin but by the content of their character."

Dr. King's dream was once considered fantastic. Today, with pride, we can boast that in many ways it has become reality. The Civil Rights Commission has greatly affected this change. It has forced us to look at our society, examine our institutions, and reform our laws. It must remain the independent appraiser of equal protection under law for Dr. King's children and for generations to come. Let us preserve the effectiveness of the Civil Rights Commission through passage of the Edwards amendment.●

HOUSE CONCURRENT RESOLUTION 154—CONCURRENT RESOLUTION TO COMMEND DR. ALICE RIVLIN

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. SOLARZ. Mr. Speaker, I rise to pay a much deserved tribute to Dr. Alice Rivlin upon her retirement as Director of the Congressional Budget Office.

As a member of the Budget Committee, it has been my pleasure to work closely with Alice Rivlin for the last 5 years. I have been consistently impressed by the high standards of professionalism and nonpartisanship she brought to CBO and by her readiness to respond frankly to questions even when her answers were unpopular.

Alice is the only Director that CBO has ever had. She built, from scratch, an organization which has become an indispensable part of Congress. In addition to its timely and objective forecasts, its examinations of Federal fiscal priorities, and its options for reducing the deficit, CBO has sent to Congress welcome analyses of pressing issues. We simply could not do without CBO.

I will miss having Alice Rivlin at the helm of CBO. She leaves us, however, knowing that she has well served the Congress and the American people. The esteem in which CBO is held is her monument.

I would like to thank Alice Rivlin for her wise counsel during her tenure at CBO and to wish her well in her endeavors at the Brookings Institution. I am glad that she will remain close by because I am sure that, as we proceed to address the severe economic problems facing the Nation, we will need her wisdom and insight.

I wish her the very best of luck in the next chapter of her distinguished career.●

A TRIBUTE TO KURT WEISHAUPT

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. ACKERMAN. Mr. Speaker, once upon a time, in a land far away, in a lifetime almost forgotten, the world had gone mad. Persecution, violence, upheaval, torture, destruction, death—it was a nightmare beyond what language can describe. That tempestuous period of history, however, drove Kurt Weishaupt and his lovely bride Trude to the shores of America.

He came here, not with his hands open, but with his arms outstretched. He came here, not bitter, as he had every right to be, and not morbid, as one might have expected. His world was destroyed, but he came here with hopes, and dreams, and aspirations. He came here with a yearning to live in peace, untouched by prejudice, and with a desire to build a strong, loving family.

And that he did, Mr. Speaker. He built on his hopes and his dreams, and he built a family whose love for one another knows no bounds, and whose desire to help their fellow human beings seems endless.

Recently, Kurt Weishaupt turned 70. Yet he shows no sign of slowing down, no slacking of his determination to help others less fortunate than himself. He remembers what the world was like when he was young, and he works to insure that the world will never again be so cruel.

That is why Kurt is chairman of the board of the Gift of Life program. Even in our modern age, with all our technological advances, there are many terribly sick children all over the world who are not getting the high-quality medical attention they so desperately need. Kurt and Trude, and those who work with them, give these children the Gift of Life, placing them in American hospitals where they can be properly treated, and raising funds to cover the costs of the expensive care they require. Kurt has been to Korea, for example, twice in the past 3 years, arranging treatment for over 100 sick Korean children.

The Gift of Life program is only one outlet for the energies of this great American philanthropist. Within his hometown of Flushing, he is vice president of the Boys' Club, which over the years has provided constructive recreational activities for thousands of local underprivileged youngsters. He is on the board of directors of the Flushing YMCA, and he is a new board member of Bowne House, the historic landmark in Queens which was the birthplace of freedom of religion in America. Just recently Kurt concluded a term as president of the Rotary Club of Flushing, and he serves on the board of trustees of Queens' Booth Memorial Medical Center, a busy, urban hospital which has often benefited from his philanthropic interest.

Kurt has long been involved with stamp collecting, as both a vocation and an avocation. He is vice president of the International Stamp Dealers Association and a past president of the American Stamp Dealers Association. What is a hobby for others, however, is just another way to contribute for him. He is a founding member of Philatelic Hobbies for the Wounded. Since 1948, he has been chairman of the March of Dimes stamp and coin division, and since 1952, he has been cochairman of the United Jewish Appeal stamp and coin division.

Mr. Speaker, one can only imagine the awe and joy with which Trude and Kurt must have first stepped upon this great land of ours, how grateful they must have left. The irony, however, is that it is America, although unknowing at the time, that should have been grateful; for Kurt and Trude, who came from far away, with nothing but their self respect, had actually adopted us.

They have reinforced the values upon which this great Nation was built; they have retaught us the real meaning of humanity, of brotherhood, and of decency. The nightmare and the tragedy that drove them from a world so far away on a journey filled with fear and trepidation ended on the day that Kurt and Trude breathed free air. At the time, Mr. Speaker, that day meant little to anyone except the Weishaupts. We know now that, though unheralded at that time, it was indeed a truly great day for the United States of America.

Kurt and Trude Weishaupt are the absolute embodiment of the American way, the American dream. They serve as an inspiration to all of us, each and every day, teaching us what humanitarianism is all about. Surely, hundreds of Americans, myself included,

as well as countless others all over this globe, have found their lives enriched simply by knowing Kurt and Trude Weishaupt.

Mr. Speaker, I know that you and all of our colleagues in the Congress of the United States will join me in wishing happy birthday to this great American, to this great humanitarian, and in wishing him and his lovely wife many, many, many more years of productivity, satisfaction, love, and joy.●

AUGUST 21: A DAY CZECHOSLOVAKIA WILL REMEMBER

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. LIPINSKI. Mr. Speaker, August 21 is an important day for Czechoslovakian people all over the world. On this day in 1968, the armed forces of the Soviet Union invaded the defenseless nation of Czechoslovakia and stamped out the Czechoslovakian people's movement toward freedom. Fifteen years later, we commemorate that fateful day, and take note that the freedoms which we today enjoy in the United States must constantly be defended.

The invasion by Soviet and Eastern European troops was swift and decisive. Over 650,000 troops swept across the Czechoslovakian land and seized key state, party, and legislative officials. Reform leaders were taken to Moscow for interrogation. Martial law was declared. There was some passive resistance, such as the clandestine radio stations that broadcast all over the country, but the Czechoslovakian epithets were no match for the Soviet tanks. Czechoslovakia's brief encounter with the basic freedoms that are enjoyed in the West was quickly and violently ended.

What we commemorate on August 21 is not only the subjugation of one people by another, but the basic struggle for rights and freedoms that goes on daily around the world. Hungary in the 1950's, Czechoslovakia in 1968, and Poland in 1980 have all demonstrated that totalitarian governments can be installed in a country, but the desire of the people for freedom and justice cannot be eliminated.

It is no accident that the Soviet Union must rule Eastern Europe with an iron fist. The drive for freedom and dignity that resides within the people of the Eastern bloc is strong and cannot be eliminated. This determination is reflected in numerous events of the past 30 years. The various uprisings against the Communists, the passive resistance displayed by the Czechs in 1968 and Poland's continuing labor struggle are all vivid demonstrations of the will for freedom in Eastern Europe.

Today, 15 years after the Soviet invasion of Czechoslovakia, the Czech people enjoy no more freedom than they did in the 1960's, and the Soviet presence is just as pervasive. As Americans and proud citizens of the greatest democracy on Earth, it is up to us to provide a beacon of freedom for oppressed people to look toward, and an example of liberty and justice for all the world to admire. While democracy is certainly safe in our land, it is not necessarily permanent. As Thomas Jefferson said, "Eternal vigilance is the price we pay for liberty." We in this country have been blessed with a government and a people that make it possible for us to enjoy the freedoms of which our Czechoslovakian brothers can only dream. To help the oppressed people of Eastern Europe, and around the world, we should set an example of freedom and justice that everyone can follow.

It is a tribute to the strength and determination of the Czechoslovakian people that they could move toward freedom in 1968 in spite of the specter of Soviet domination. I congratulate the Denni Hlasatel newspaper and its editor, Joseph Kucera, for memorializing this anniversary and reminding us of one people's struggle for freedom. Commemoration of the August 21, 1968, invasion of Czechoslovakia reaffirms both our support for the Czechoslovakian people, and our dedication to making freedom and dignity a reality for people around the world.●

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. CORCORAN. Mr. Speaker, I was unable to be present for the rollcall vote on the Levin amendment to H.R. 2780, State and Local Fiscal Assistance Act Amendments of 1983, which occurred on Tuesday, August 2.

Had I been present, I would have voted "no."●

SHRINE TO ST. THOMAS MORE

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. ARCHER. Mr. Speaker, last month marked the commemoration of the anniversary of the death of St. Thomas More, the patron saint of lawyers and all government workers, who was led to the executioner's ax and martyrdom in London on July 6, 1535.

Sir Thomas More, during his long career in law and political life, was a Member of Parliament and was elected Speaker of the House of Commons; he also held the high office of Lord Chancellor of England and several lesser diplomatic and judicial posts. He was always a deeply religious and holy man, as evidenced by his beatification in 1886 and canonization in 1935. But in his lifetime, Thomas More was also a preeminent English and European scholar, author, lawyer, theologian, humanist, diplomat, philosopher, politician, and counsel to the King. Throughout his public and political life, moreover, he maintained constantly a devoted and active personal interest in his large family and household. In this, I believe he set an unique and enduring example for us all.

Many in Congress will be pleased to learn that we now have nearby on Capitol Hill a new statue and small shrine to St. Thomas More, located just inside St. Joseph's Church at Second and C Streets NE. The necessary renovation work to enable the statue to be displayed was completed through the generous support of the Thomas More Society of America and with the special efforts of my good friend, Rev. Msgr. John J. Murphy, S.T.L., pastor of St. Joseph's Church on Capitol Hill.

On June 22, 1983, the feast day of St. Thomas More, Monsignor Murphy celebrated a special noontime Mass in honor of Thomas More and dedicated the statue. He was assisted in the liturgy by the Rev. Robert J. Petrella, pastor of the Church of St. Thomas More in southeast Washington, by the Rev. Ladislas Orsy, S.J., of Catholic University, and by Rev. Michael J. Murray, associate pastor of St. Joseph's. The Rev. Msgr. John A. O'Connell, rector of the Cathedral of St. Thomas More in Arlington, Va., was the homilist.

On the prie-dieu or kneeler placed before the More statue in St. Joseph's, for the benefit of those with a special devotion to this saint, is a prayer composed by Hon. Howard T. Markey, chief judge of the U.S. Court of Appeals for the Federal Circuit and the founder of the Thomas More Society. It is adapted from a prayer originally written for lawyers, and reads as follows:

St. Thomas More, be our advocate and counsel before the Divine tribunal that alone is without error.

Bespeak for us the wisdom to apply the precepts of God's eternal law to the problems of our daily lives.

Intercede for us that we may emulate the sense of humor which made your heart echo with the mirth of heaven.

Pray that we may spurn false oaths and live as You did, faithful to our faith, even though by doing so we may be called upon to sacrifice our all as You sacrificed yours.

These things seek for us through the merits of Jesus Christ, Our Lord. Amen.●

DON'T PLAY "BLAME THE SCHOOLS"

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 4, 1983

● Mr. BROWN of California. Mr. Speaker, our educational system needs reform. We recognize the need for higher standards, stricter discipline, and more clearly defined goals. However, few people accept that in order to achieve meaningful, lasting reform, we must also reform the societal perception of education. Society must recognize the fundamental role of education.

Education is the foundation of society. Our educational system has given us a largely literate society. Our national preeminence in technology is largely due to the training researchers received in this educational system. Our schools provide the citizenship education vital to a representative democracy. Attempts at educational reform should recognize the basic need for education, and the myriad roles and types of training schools perform. Thomas Jefferson understood the importance of education to society: "A civilization which expects to be both ignorant and free expects that which never was and never will be."

Educational reform must also recognize that schools are strongly affected by societal changes. Through major societal changes and events of the past decades—the baby boom, technological revolutions, wars, a "drug culture," rising divorce rates, and the breakdown of the traditional family—schools persevered with amazing resiliency and continuity. Yet we see the effects of these changes in the schoolroom in lack of discipline, short attention spans, and immature children facing adult problems.

Ben Harris, a professor of educational administration at the University of Texas at Austin, wrote about these issues. Mr. Harris asks us not to play games with educational reform. He recognizes schools' strengths, and asks society's support in shaping reasonable solutions. I particularly call to your attention his recommendation that providing in-service education for teachers would produce better results than merit pay. I commend this article to my colleagues.

The article follows:

[From the Christian Science Monitor, Aug. 2, 1983]

DON'T PLAY "BLAME THE SCHOOLS"

(By Ben M. Harris)

American schools have many problems. They reflect the problems of the larger society and long decades of public neglect. But critics of many stripes seem bent upon some "quick fix" and generally fail to either diagnose or prescribe with thoughtful logic. At least three realities seem largely ignored or misrepresented by much of the current media treatment of the public education scene in this nation:

1. The public schools have many very serious problems, but they have demonstrated enormous strengths as well. Schools have accommodated to "baby booms," teacher shortages, and deteriorating facilities with stability and continuity of service to all. They have adapted their programs to accommodate slow learners, handicapped, emotionally disturbed, and a constantly changing set of social values.

In recent years, a new record was set in holding power—75 percent of all secondary-age youth were actually in school for the first time in America's history. Illiteracy has been so completely eradicated among students that new and more demanding standards called "adult competence" or "life skills" have replaced the literacy measures used throughout most of the world to reflect national progress.

2. The teachers of America's schools number approximately 2.5 million—the largest group of college graduates in any one occupational endeavor. They determine, in a large measure, what the unique contribution of the school will be to student progress, but they don't do it alone. Responsibility for the quality of education is heavily shared by parents and the larger community.

Even so, the persistent teacher shortage of the past 30 years has left its scars. The shortages were never seriously addressed by our people or our politicians. School officials were forced, decade after decade, to accept virtually all applicants with minimum qualifications. Few teachers have had anything approximating the amount or quality of professional training offered to virtually every other profession.

These failures to recruit, select, or adequately train have been compounded by the persistent refusal of boards, legislatures, and the Congress to fund in-service training programs in the face of obvious needs.

Our Johnny-come-lately critics seem utterly unaware that the youthful teaching force of the nation (average age in mid-30s) is ready and willing to upgrade its practices through retraining, in-service education, and human resource development programs. Instead these critics offer warmed-over, long discredited "merit pay" plans that would not produce needed results in any case.

3. The schools are "at risk" from persistent scapegoating and public neglect. A bit of reflection is required to recall the Rudolf Flesch mania for phonics in the 1940s, the new math panacea in the 1950s, the TV curriculum projects bypassing the classroom teacher in the '60s, and the back to basics with minimum competency testing of the 1970s. Each is an example of doomed-to-failure efforts at "school reform," foisted upon school officials by vested interest groups and unknowing, self-appointed critics. The 1980s are off to another decade of capricious, ill-conceived, politically motivated meddling in the affairs of our schools.

The parents of the nation should be aroused. Their children have become pawns in an incessant game called "blame the school." The right of each child to a curriculum that suits his or her individual needs is being abridged. The rights and responsibilities of parents to work closely with teachers and local school officials to provide an education that is supportive of family life and consistent with their aspirations for their children are being frustrated. Finally, the wisdom and technical expertise of 150,000 school administrators and supervisors and hundreds of thousands of fine experienced teachers is being literally wasted.

A new era has come upon the land and sown chaos in our schools. We cannot return to the past, but we can reaffirm the rights of students, parents, teachers, and school officials to shape locally and personally the education of each learner. We need cheerleaders, an enthusiastic crowd of supporters, a few responsible officials, some water boys, too! But too many coaches interfering with players' efforts is a sure way to lose the game.●

SENATE—*Monday, September 12, 1983*

The Senate met at 12 noon and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Sovereign Lord of history, as the curtain rises on the final act of the Senate this year, the world is in confusion: wars and near wars on many fronts threaten world peace—international relations are strained and fragile—millions in America are unemployed—millions are poor, voiceless, and afraid. As the drama unfolds in this Chamber, may it be of substance and not charade. Help each player to take seriously his role in the light of the unprecedented crises. Let business be done here which will address itself to the real issues and not to games with rules and precedents.

Father in Heaven, since we last met, the Senate has lost one of its greatest statesmen. May the memory of the legacy left us by Senator HENRY M. JACKSON, which has been verbalized by so many of his peers, motivate the Senate to its individual and corporate finest hours.

Deliver us from petty animosities, from the sacrifice of principle for political expediency. And, dear God, whatever the drama of these next weeks bring forth, let it not be comedy. In Jesus name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

DR. RICHARD C. HALVERSON

Mr. BAKER. Mr. President, may I first congratulate our distinguished Chaplain for his return to the rostrum and his opening prayer today. As Members know, he has been temporarily absent. I am happy that he is back and with us once more. We extend him our best wishes.

VETO MESSAGE ON SENATE JOINT RESOLUTION 149

Mr. BAKER. Mr. President, I have one brief matter of business to transact and then I shall yield to the distinguished Senator from Washington (Mr. GORTON).

Mr. President, there is a veto message at the desk on Senate Joint Resolution 149. I ask unanimous consent that the veto message on that measure to temporarily suspend the authority of the Secretary of Agriculture under the milk price support program be spread on the Journal and held at the desk, to be called up by the majority leader, after consultation with the minority leader.

Mr. BYRD. Mr. President, the distinguished majority leader and I have discussed this. There is no objection on this side.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have not discussed this with the minority leader, but I ask unanimous consent that the time allocated to the two leaders under the standing order be combined and to extend the time by that amount for the transaction of routine morning business, and that the time permitted to Members to speak under the order for transaction of routine morning business not limit the remarks of the majority leader and the minority leader nor the distinguished Senator from the State of Washington.

The PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, it is my duty now to yield to the distinguished Senator from Washington.

The PRESIDENT pro tempore. The Senator from Washington is recognized.

(Mr. COCHRAN assumed the chair.)

DEATH OF SENATOR HENRY M. JACKSON

Mr. GORTON. Mr. President, it is with both great sadness and a deep sense of honor that I rise to memorialize my senior colleague in the U.S. Senate, a dominant figure on the national political landscape, the leading statesman of my home State, who served its people as an elected officer for almost 45 years; and a man who was esteemed, admired, and loved by his colleagues in this body for more than 30 years, the Honorable HENRY M. JACKSON.

Today, we celebrate his life and his service. HENRY JACKSON was not a man who would have sought public eulogies or commemoration. He preferred the quiet accomplishment of legislation passed, agreements reached, and the people protected and defended. He would have regarded these as his true memorial, as indeed they are. It is, nevertheless, well to remind ourselves of the nature of this man and of the magnitude of his accomplishments, and to record them for those who did not know Senator JACKSON, that they might understand how he came to a place of such high standing in his colleagues', and his countrymen's eyes.

Born the son of Norwegian immigrants, SCOOP JACKSON's life personified the glory and unlimited opportunity of the American experience. A man who worked to put himself through school, he rose purely on the merits of his own intelligence, diligence, and caring. It is a little old fashioned today to tout the character-building aspects of hard work and self-reliance, but no one who knew HENRY JACKSON ever doubted their truth.

Shortly after finishing law school, HENRY JACKSON was elected prosecuting attorney of Snohomish County, Wash. Two years later, at 28, he was elected to the Congress, and he spent the rest of his life in this institution. His career in the Congress spanned the administrations of nine Presidents. He arrived during the New Deal era of President Franklin Roosevelt, served with distinction for a dozen years in the House of Representatives, and for more than 30 years in the Senate. During that period, HENRY JACKSON participated in virtually every great national debate of his time. Never a man to bend with prevailing political winds, his basic positions changed little over the years. His entire career is testimony to his certitude that clarity and consistency of purpose serves one's country far better than adherence to transient political trends.

For what shall we remember SCOOP JACKSON? Each Member of this body, each friend, will have his private answer to that question. But surely any public accounting of the man will recall first and foremost his deep love of country, its people, and its institutions. HENRY JACKSON was a true patriot.

While HENRY JACKSON occupied himself with the business of the whole world, he never forgot his origins. He drew his strength from the working people of Everett and the lovely farms and towering mountains of Snohomish County. He never forgot the friends of his youth.

His was a love of country born of knowledge of its people and commit-

ment to its values. HENRY JACKSON was a man with the strength to defend what he loved. His recognition that his country was not perfect never led him to doubt that it is the last, best hope of Earth, and his abiding faith in the people and principles of this Nation were a source of steadfastness and resolution to which all good people could repair during times of uncertainty.

Always a firm believer in a strong defense, even when this was not a popular position, HENRY JACKSON never forgot what he witnessed as a young Congressman just preceding and during World War II. After a visit to liberated Buchenwald, he had no illusions about the fundamental and permanent conflict between the United States and the forces of totalitarianism. He worked constantly to remind his fellow Senators and citizens of the overriding necessity to assure that America would always be strong. His straightforward love of country was an example for all of us.

That experience at Buchenwald also burned into HENRY JACKSON'S conscience an impression of the Holocaust which made him an unwavering defender of the right of the Jewish people to a homeland in an Israel strong enough to defend its independence, and the right of Jews and others everywhere to leave freely the nations which persecute them. Israel had no firmer friend.

Senator JACKSON will also be remembered for his unrelenting defense of the civil rights of other persecuted groups. During the worst of the McCarthy era, when panic and fear threatened the reputations of many decent men and women, HENRY JACKSON, then a newly elected Senator, had the courage to stand up against public panic, and to remind Americans of the real threat posed to the civil liberties of many Americans.

Senator JACKSON was a leading defender of all who are persecuted for conscience throughout the world. His activities took the form not only of speeches and reminders of the violations of human rights in the Soviet sphere, past and present, but also of legislation which translated that outrage into concrete action. SCOOP JACKSON reminded the world that the United States is heir to, and of necessity defender of, a tradition in which securing basic human rights for all people is an inseparable cornerstone of foreign policy. On issues of basic human rights, SCOOP knew that the securing of the rights of "life, liberty, and the pursuit of happiness" must remain forever a goal of the United States.

Senator JACKSON also left us a record of real achievement in protecting our environment and our natural resources. In this course, he was led by the environment in which he grew up, and by his sense that we are all the trustees for all future generations of Americans. One of his landmark achievements was the National Environmental Policy Act, passed in 1970. But this was only a part of Senator JACKSON'S legacy. In my home State, we have a beautiful national park—the North Cascades National Park—which will stand for all time as a monument to Senator HENRY JACKSON.

But SCOOP JACKSON also knew that we grow, gain strength, and provide opportunities for our people by a proper development of our resources. Irrigation and water projects along the mighty Columbia River owe a great deal to HENRY JACKSON. He brought balance and reason to debates too often inflamed by rhetoric and passion.

Balance and reason were always characteristic of Senator JACKSON. He was a curious and intellectual man with wide-ranging interests and a healthy respect for the facts. As this is visible in his legislative history, so also was it apparent in his personal style. My friend SCOOP always wanted to know more, to understand more. To solicit another reason he was constantly asking questions, not rhetorically, but from a burning desire to learn.

HENRY JACKSON'S public record is well documented. He has permanent living memorials across the Nation and around the world, in the cherished memories of all those who love liberty, and the democratic process. Senator JACKSON was a man who elevated the meaning of the word "politician."

What is not a matter of public record, but is engraved on the memories of those who knew him, was the man's great humanity. SCOOP JACKSON was never a man who allowed important responsibilities to inflate his own view of himself. He was a man impatient with pomposity, and generous with his warmth. How often, and how easily, could SCOOP JACKSON put a gathering at ease with a humorous comment, directed most frequently at himself.

HENRY JACKSON was in all things a man of the people. Although he spent a lifetime in our Nation's Capital, he did so without ever leaving the countryside of Washington State. He knew, and was known, in every town and county. Congressman AL SWIFT tells of driving with SCOOP JACKSON along the back roads near Silvana, in Snohomish County, relating the names of each of the owners of the farms and pointing with special relish to the home of a Republican farmer, who, said SCOOP, "voted for me for prosecutor."

Perhaps I may be excused for being somewhat less thrilled by that anecdote than Congressman SWIFT was.

The sense of loss in Washington State now is personal and immediate, even for many who never met SCOOP JACKSON but felt that they nevertheless knew him, and he, them.

Senator JACKSON leaves another personal legacy: A legion of men and women who worked on his staff and his campaigns over more than four decades. These men and women are scattered now across the country, around the world, and throughout the State of Washington, some in public pursuits and some in private. All were changed by their association with SCOOP; all are the larger for it.

As TOM FOLEY, now majority whip of the House, put it, "For all of us who served him, it will remain to the end of our days a matter of enormous pride."

Finally, his intimates knew him as a devoted family man. He came to marriage and family relatively late in life, and no doubt this fact heightened his appreciation of both. We, in the Senate, may have thought that SCOOP belonged to us; his family knew better. No one who attended Senator JACKSON'S funeral and listened to Anna Marie and Peter Jackson pay tribute to their father eloquently, thoughtfully, and emotionally could doubt what HENRY JACKSON meant to his children, or his pride in them.

No one who has ever basked in the sunlight of Helen Jackson's joy, strength, and peace could doubt HENRY JACKSON'S deep love for her, or hers for him.

Today, Mr. President, we pray for the country and for the Senate. But an additional special prayer must be said for his wife, Helen, his daughter, Anna Marie, and his son, Peter. The time has long since passed when SCOOP was theirs alone. We thank them for sharing him with us.

And now, Mr. President, I ask your indulgence for a few more personal remarkd. Although I first met Senator JACKSON more than 20 years ago, I came to know him well and personally only beginning with my election to this body.

Senator JACKSON was a friend, admirer, and fierce supporter of Warren Magnuson during all of Senator Magnuson's career. He chaired most of Senator Magnuson's campaigns, including his last. But within the hour of the declaration of my victory, SCOOP JACKSON called me, congratulated me warmly, and offered his guidance and support for me in this new challenge.

From that day until the day of his death, we never exchanged a harsh word. We met constantly to consider and to advance the interests of our constituents without exception, to the best of my memory, we joined in every initiative designed to promote the betterment of our State. The blood of friendship and respect was thicker than the water of partisanship.

I knew HENRY JACKSON as an example to emulate, a friend to delight in, and a wise counselor to whom to turn on ocasions too numerous to count. I

will miss his company deeply and forever.

Mr. President, it has been said that a constitutional statesman is a man of "common opinions and uncommon abilities."

We may be forever grateful to HENRY JACKSON that his compassionate but practical world view is now as prevalent as it is, for it was in large measure his uncommon abilities which helped to guide us to this point in our history as a people. It is for us now to remind ourselves and our children of the virtues of patriotism, courage, and humanity which made HENRY JACKSON so great; to rededicate ourselves to these virtues; and to give thanks that we were allowed by our Creator to be changed and enriched by his company.

Mr. President, in addition to my own remarks, I ask unanimous consent to have included in the RECORD at this point remembrances of HENRY JACKSON which have appeared recently in the press in the State of Washington.

I ask unanimous consent that an article by Richard Larsen, of the Seattle Times, dated September 4, 1983, be printed in the RECORD; an article from the Seattle Times by Ross Anderson and Carlton Smith, dated September 7, 1983, be printed in the RECORD, an article by Richard Larsen dated September 8, 1983, be printed in the RECORD; together with a second article by Mr. Larsen on that same date; and two columns by Bob Woods in the Wenatchee World be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

SCOOP—HE WORKED HARD TO TRANSFORM HIS HOPES TO REALITY

(By Richard W. Larsen)

EVERETT—A stubby, studious Norwegian kid, he grew up with the aroma of sawdust in his nostrils, plodding along his route, delivering newspapers to the small frame houses along Everett streets and down on the bustling waterfront where smoke from the sawmills blackened the sky.

He always felt especially uncomfortable at one stop along his newsboy route: That was where he quietly climbed those darkened stairs to leave the day's paper at one of Everett's more infamous whorehouses.

It was a time for the boy to begin forming some ideas about morality and government and law enforcement and politics. And he dreamed a young boy's dream of one day becoming a United States senator, maybe even president of the United States.

And he dreamed a poor kid's dream of maybe, one day, living in a great home like the mansion overlooking the Everett harbor where the town's millionaire banker, William Butler, lived.

Scoop.

His older sister, Gertrude, applied that nickname to little Henry Martin Jackson. "Scoop" was a character in the newspaper comic page of the day. The little funnypaper Scoop had a knack of getting others to do his chores for him and that, said Gert, always kidding him, was "our Henry."

Sen. Henry M. "Scoop" Jackson, 71, was pronounced dead at 9:25 p.m. Thursday at Everett's Providence Hospital.

News of his death stunned Washington state and caused reverberations in Washington, D.C., Israel, the Soviet Union and other nations.

In his lifetime, the American presidency had just barely eluded his grasp.

But as the Senate's most steadfast Cold Warrior through more than three decades, Jackson may have made as much imprint on international policies and events as any president.

Jackson would smile with pride as he described how he was viewed by leaders in the Soviet Union. "You know what they say about me," he remarked, "They say that I'm (and he here used a mock Russian accent) 'a Verrry Dendgerrous Man.' "

He was proud that his constant warnings about the Soviet Union caused him always to be, in the Russian view, one of the most dangerous of Americans. "A lot of people think I have an obsession about the Russians," he'd say. "But I don't have an obsession.

"It's just that Russia is the only country in Europe that's never known freedom. . . . During the first ABM debate . . . I pointed out that the Russian leaders were the product of the Stalin terror and that 17 million people died and they—the leaders—knew what was going on."

It's a haunting thought that Scoop Jackson would lie dead in a hospital emergency ward the same day the entire free world was reeling under the shock of what the Soviet Union had just done—shot down a defenseless airliner. The action was, Jackson said only hours before his death, a barbaric example of what he had said for decades—that the Soviet Union is a government steeped in paranoia, a system of unpredictable rulers and a world menace that requires constant vigilance.

Everett's Providence Hospital. That's where, through a chance encounter, young Henry Jackson's life would turn toward politics.

He was 12 when his mother and father (his dad was a laborer, a concrete mason) took him to Providence Hospital to have his tonsils removed. While there, he formed a friendship with an Irish kid in the adjoining bed, another 12-year-old tonsillectomy patient, John Salter.

They talked about their life ambitions and hopes. Jackson already had formed one dream. When a teacher at Longfellow School had asked students what they wanted to be when they grew up, Jackson had replied "President of the United States." Or, he added later, "a U.S. senator."

As time passed, the friendship between Jackson and Salter grew. In the wily, aggressive Salter, Jackson found a friend who would eventually develop into an effective political-campaign organizer. In the sober, stiffly straight Jackson, Salter found a man who would be an effective Mister Clean candidate.

By 1935, Jackson had finished law school at the University of Washington and, while awaiting the results of his bar exam, he took a job with Salter in a Snohomish County relief office.

"We'd go out into the rural areas to check on the welfare needs of the poor people," Jackson remembered. "You know, you could just see the humiliation in the eyes of those people, especially the older people. They'd worked hard all their lives and here they were in total poverty. . . . They hadn't failed. The institutions of government had failed them."

Jackson was understandably molded as a social liberal, a New Deal Democrat.

He was only 26 when he and Salter hatched the idea of a Jackson campaign for prosecuting attorney of Snohomish County. His sister Gertrude helped to organize it, and young friends from the relief office also pitched in. "The kids" hustled votes door-to-door around Everett and other towns.

It helped that the incumbent prosecutor, Al Swanson, was a heavy drinker and had a tarnished image. Jackson won the Democratic nomination—and the election—in a landslide. He turned into a crusading, strict-law-enforcement prosecutor and was given the nickname "Soda Pop Jackson." He was that oddity, a county politician who didn't drink booze.

In 1940 there was an open seat in Congress and "the kids"—Jackson as candidate and Salter as manager—were in action again. An opponent warned voters, "Don't send two 28-year-old kids to Congress." Salter capitalized on that, using slogans emphasizing Jackson's youth and vigor.

Helped by another Roosevelt landslide, Jackson won the 2nd District seat in Congress and Salter went with him to Washington, D.C., as his administrative assistant.

When they got off the train there, neither knew the difference between the Capitol and the White House, Salter recalled. But they would soon form one of the most effective political teams Congress ever had.

In late 1945, Jackson paid a congressional visit to Norway. There, for the first time, he encountered the Russian presence in Europe, at the dawn of the Cold War. He observed some Red Army soldiers in Oslo, repatriating Russians who had been prisoners during World War II.

"I remember how reluctant most of those Russians were to go back to Russia," he said. "They knew they'd have even less freedom there."

Through all his years in Congress, first the House, then the Senate, Jackson would be almost unchanging in his views—a social liberal on domestic issues, a stern adversary of the Soviet Union in foreign policy, a great friend of Israel, a man often viewed by many Americans, as well as Russians, as a dangerous saber-rattler.

For Jackson, that boyhood dream of becoming president of the United States would be always elusive and would bring more than one heartache.

It began in Los Angeles one summer day in 1960. John F. Kennedy had won the Democratic nomination and now the excited conjecture turned to who would be his choice for vice president.

Henry Jackson of Washington was summoned to the Kennedy suite of the Biltmore Hotel and, as he pushed through a crowd of newsmen in the hallway, there were the shouts:

"Senator! Do you want to be vice president?"

"Yes I do." Jackson replied directly, as always.

Jackson was already a well-known senator, a clean-cut, effective man, liked by his colleagues and popular with the press corps. He and Robert Kennedy had become friends during the McCarthy Committee hearings, and Robert had urged his brother to select Jackson as his running mate.

The Kennedys told him he was one of those under highest consideration, probably the top choice. Then Jackson returned to

his room at the Biltmore to await a Kennedy phone call making it official. His wait would be in vain.

In a last-minute change of mind, Kennedy decided it would be best, in the interest of protocol, to at least offer the vice-presidential nomination to the Senate majority leader, Lyndon Johnson of Texas.

To everyone's surprise, Johnson accepted.

Jackson was asked to make the announcement to the press corps that day. It was a poignant event remembered by everyone who was there.

Jackson stood before the reporters to say that "Senator Kennedy called me to advise that, after careful consideration, he had decided to place in nomination the name of Senator Lyndon Johnson for the good of the ticket. . . ."

Some Jackson workers stood with tears streaming down their faces. Reporters watched as Jackson bravely went on, hiding his own disappointment:

"No one should enter politics unless he is a good sport. I will do whatever Sens. Kennedy and Johnson want me to do. I will do everything a good sport should do."

Jackson that year was given the token post of National Democratic chairman. Johnson would become vice president.

The day after John Kennedy's assassination, a Senate colleague said to Jackson, "You know Scoop, what would be happening to you today if . . ." He broke off the sentence. Jackson had that same thought, of course as Lyndon Johnson was sworn in as president.

In 1972, two years after winning Senate re-election by a landslide, Jackson staged his own national campaign for the presidency. It would turn out to be another heartbreaking experience. America's travail over the Vietnam War had touched Jackson. As an advocate of American military strength, Jackson became a favorite target of antiwar demonstrators.

Once, to the horror of Secret Service agents protecting him, a demonstrator splattered an egg on Jackson's head.

As he campaigned from state to state, Jackson stirred little enthusiasm. His earnest but plodding speeches became the butt of some jokes: "Scoop Jackson gives a fireside speech and the fire falls asleep."

That campaign ran out of money and ended in tatters. Even so, when George McGovern easily won the Democratic nomination in 1972, Jackson was the runner-up in the convention voting. He became leader of the Democratic party's "loyal opposition" to the McGovern liberals.

Jackson admirers held "a victory party" in Miami Beach that year to salute his good showing. "I'm proud to have Scoop Jackson as a friend and I know that he'll be a force in the party in 1976," said one of the guests at that Jackson party.

The speaker was a man who had placed Jackson's name in nomination at that convention, Georgia Gov. Jimmy Carter.

In 1976 Jackson came back with a better-financed, better-organized campaign and was a front-runner for the Democratic nomination for president. He scored major victories, winning the Massachusetts and New York primaries. A victory in Pennsylvania that year would be crucial and Jackson campaigned hard there, even going down into a coal mine to shake hands.

But again, everything seemed to go wrong. As returns came into his Philadelphia hotel room election night, Jackson's body seemed to sag. "It looks pretty bad," he sighed between phone calls. He seemed, again, to be fighting back the tears.

Others in the room, though, shed tears of disappointment for Scoop. Jimmy Carter, Jackson's ally of the previous campaign, had won Pennsylvania and would go on to win the presidency.

Jackson and Helen Hardin met in a Senate elevator in January 1961. He was a notoriously shy, 49-year-old bachelor, and she was 29, the receptionist in the Senate office of a Jackson friend, Clinton Anderson of New Mexico. They were married late that year and honeymooned in Hawaii. Friends in Washington howled when they heard that Jackson had interrupted their honeymoon to attend a Navy briefing at Pearl Harbor on the communist submarine menace in the Pacific.

Helen Jackson became a model senator's wife and mother. Jackson became a devoted husband and father. But he also was a 24-hour-a-day politician and senator, a voracious reader.

Jackson had an almost magic touch with Washington voters. In 1982, two years after the voters turned out Democrat Warren Magnuson, the state's veteran senior senator, Jackson won re-election by nearly 69 percent. There were reasons: Jackson seemed as comfortable meeting with executives in the corporate board room as he was shaking hands around a labor hall.

Jackson's political style was a model for many young congressmen: Tom Foley, now majority whip in the House, graduated from the Jackson staff and patterned his successful career after Jackson's.

Jackson seemed always to be remarkably fit, following a regimen of daily swimming and avoiding those rich foods he secretly loved. "My mother used to spoil me," he once recalled. "She'd always put extra whipped cream on my dessert. I love whipped cream. I just have to avoid it." He also largely avoided alcohol.

Thursday, though, he complained that he wasn't feeling well. His face appeared tired, gray. His voice seemed tired, too, as he delivered his sharp criticisms of the Soviet action against the jetliner.

And that Everett mansion on Grand Avenue overlooking the harbor, the one owned by banker Butler, the elegant home Jackson envied as a kid?

Of course the Jacksons purchased it. It became their Washington state home where they enjoyed entertaining friends. Jackson once flashed his sparkling Scandinavian grin and, kidding his Viking ancestry of which he was so proud, revealed his pride in the home:

"Wouldn't old Mr. Butler turn over in his grave if he knew that a Democrat—the blockhead son of an immigrant Norwegian laborer—owned his big house?"

It was while he was in his bed, in that home—perhaps terribly stressed by the Soviet assault on the sensibilities of the civilized world—that Scoop Jackson's heart stopped beating.

EVERETT GATHERS TO REMEMBER

(By Ross Anderson and Carlton Smith)

EVERETT.—They came in three-piece suits or patterned polyester . . . in blazers or blue jeans . . . in Legionnaire's caps or winged eyeglasses. They came in new cars, old cars . . . on buses and on foot . . . some leaning on canes, some aboard skateboards.

Young, old or in-between, all came to remember.

Against a background of low gray clouds that scudded fitfully in from the sea, a town came to its city center last night to pay homage to the senator who, for all his international stature, never abandoned his milltown roots.

A capacity crowd of 1,500 jammed the Everett Civic Auditorium, as Sen. Henry Jackson was mourned and praised, but mostly missed in the town of his birth, his life and, finally, his death last week at the age of 71.

Another 300 or so watched solemnly via closed-circuit television in the nearby Everett High School cafeteria. Thousands more in their homes watched a live broadcast by a local station.

Jackson had walked among the most powerful people in the world, but to the people of Everett, he was just "Scoop," everyone's family friend.

"Think of it," said Rep. Al Swift, Everett's Democratic congressman. "Senator Jackson advised presidents, conferred with the great minds and worked with the most powerful leaders of the world.

"But we saw him frequently here, at home dedicating the new YMCA or meeting with local officials or chatting with old friends."

Swift's modulated voice, absent its usual dramatic animation, was one of several diverse accents that delivered eulogies. But like the others, he focused on Jackson's link with his home town.

"There are men and women who move in important circles, doers of important things who will tell you they do it for 'the people,' 'the people' of faceless abstraction," the congressman said. "People never became abstract to Scoop because he held on to his touchstone of reality, which was this state and this community.

"He thought in terms of people who he could see in his mind, real people, with faces and names and children and successes and sorrows."

The same message came from four of Jackson's old friends—Rabbi Raphael Levine, Stan Golub, Dr. Haakon Ragde and Robert M. Humphrey.

In a whimsical, homespun address, Jackson's old friend Humphrey recollected a boyhood pack trip into the Cascades.

"It was really quite a trip for six young boys. It was here that Scoop first demonstrated his ability to work with people. He always managed to get Ivan or me to do his chores. . . .

"I think it was also here that he got his love for the mountains and streams and wildlife that he fought to protect during his long life. He was an environmentalist long before it became fashionable."

Jackson's ties to Everett were matched by his charity—particularly his scholarship fund for local students, Humphrey said.

"I never knew him to take an easy dollar, or to sell out his heartfelt convictions for a campaign contribution."

The superlatives applied to Jackson ranged from "a national treasure," as Golub called him, to "the instrument of God on earth"—Rabbi Raphael Levine's description.

Ragde, who with Jackson aide Denny Miller found Jackson stricken last week from the heart ailment which killed him, spoke of his first meeting with Jackson in an ill-equipped civilian hospital in South Vietnam in 1965.

Jackson, Ragde said, was by himself, without entourage. After talking with Ragde, Jackson promised to have a large amount of medical supplies delivered to the struggling hospital. Ragde had heard those promises before, from other officials. But this time the supplies arrived, and so did offers of assistance from American military medical personnel.

Ragde spoke of the young Jackson, who as a third-term congressman in 1945 visited the Nazi concentration camp at Buchenwald, an experience he would never forget.

"He vowed to do everything in his power to help the Jews avoid another tragedy such as Buchenwald," Ragde said.

The memorial service was rescheduled from a local church at the request of Jackson's widow, who feared that Everett citizens would be unable to squeeze in beside the political elite and media who converged on the town.

And indeed, inside the auditorium and nearby cafeteria, millworkers and Shriners mingled with the state's politically powerful, including some who had clashed with Jackson and others now being mentioned as his possible successor.

But it was the people of Everett who felt they saw Jackson most clearly.

Person after person who came to the memorial service spoke of Jackson as a close family friend, remembering long-standing connections between the senator and brothers, sisters, parents and even children.

"He was a very big part of our life," said Pat Ernesto of Everett. "He sponsored our youngest daughter at the University of Washington. He was the most natural, caring person. You'd recognize it immediately.

"We weren't aware of what we really had. What we had was a real jewel. He was the sort of politician every politician should be, the kind we all want but never seem to get."

"I was born and raised in Everett," said Iris Tompkins, now of Seattle. "My mother went to school with his sister. My parents always had kind of a personal interest in Scoop. He sent Christmas cards to my mom for years.

"I feel like I lost someone in my own family."

While the service went on inside the auditorium, passersby on the streets of Everett stopped momentarily to listen as the voices of the eulogizers boomed out from a set of loudspeakers on the exterior wall of the auditorium.

In the gathering gloom of the oncoming night, the sounds reverberated off the white brick facing of Everett High School across the street, from which Jackson had graduated in 1930.

As the clouds rushed eastward, a lone woman sat motionlessly on a bench listening to the echoing speakers, her white hair blowing in the wind.

"I suppose I'm like hundreds of others," she said. "He'd been in office a long time. I knew him well. He went to high school with my sister. The last time I saw him was last fall at our 50th high school reunion. He was busy but he stopped in to give a short speech.

"You'd never hear a thing about him that wasn't good.

"He was 71, and our president is 72. He's just two months younger than I am."

The woman was silent for a time as she listened to Swift talk about Jackson.

"He drew his inspiration from the people of his state," boomed Swift's voice from the speakers, "and he let us know that we were a vital part of it."

A youth in a nylon jacket and jeans stopped on the sidewalk and jammed his hands in his pockets and cocked his head to listen.

The woman spoke again, recalling Jackson's last public appearance, in which he had angrily denounced the Soviet Union for that nation's missile attack on an unarmed Korean Air Lines jetliner. "People who saw it on television," she said, "said he was real excited about it.

"Maybe," she said after another pause, "if the blamed Russians hadn't shot down that plane, he'd still be alive."

[From the Seattle Times, Sept. 7, 1983]

SCOOP HELPED MOLD SENATE TAPESTRY, TRADITION

(By Dick Larsen)

With quiet Scandinavian perseverance, he had added so many of his own strong stitches to the continuous tapestry of history and tradition that is the United States Senate.

So the powers of today's Senate came today to say farewell to him.

Sen. Baker . . . Sen. Byrd . . . Sen. Kennedy . . . Sen. Goldwater. . . . It was like a roll call of the Senate.

There's a policy that, because of security worries in a turbulent world, because of fears about disruption of the U.S. government if calamity were to strike, no more than 30 senators shall ever attend the same gathering outside the capital.

But, for Scoop, that was waived.

"Anyone who wants to go to Senator Jackson's funeral should do so," ruled a Senate leader, Robert Byrd of West Virginia. So 40 senators today flew into Paine Field, then were taken to the First Presbyterian Church for the funeral services for Scoop Jackson.

Perhaps no one who ever served there was more closely, lovingly wedded to the Senate. Jackson was a special creature of the U.S. Senate. And he helped create some of that which is the Senate today.

Among today's mourners were colleagues who had come to know him at diverse times through Jackson's long career in the Capitol.

Sen. Jennings Randolph of West Virginia remembers a "Young Henry" when he first arrived in Congress. (The courtly Randolph, 81, is the only man still in Congress who served during "the First Hundred Days" of Franklin Delano Roosevelt and the New Deal.)

"Young Henry," says Randolph, came to be "always very constructive. . . . He had a way of providing constructive leadership that was essential to the passage of legislation."

Through the decades Jackson was both student and teacher in the Senate.

Sen. Ted Stevens, Alaska Republican, ruefully remembers a lesson in behavior he received from Jackson soon after his arrival in the Senate.

"I'd just been there in the Senate two days," recalls Stevens. And he was participating in the Senate Interior Committee's hearings on confirmation of Republican Wally Hickel as Secretary of the Interior. Jackson was presiding as committee chairman. Brimming with partisan enthusiasm, Stevens thought he should steadily defend Hickel from unfriendly questioners.

"I was interrupting some other senator," remembers Stevens.

"And Scoop stopped me and just said to me, 'I've been very patient with you. . . .'"

That's all. Just a quiet sentence fragment.

"I understood," said Stevens: Jackson would have no breaches of committee protocol or dignity. The process would be rational, bipartisan, judicious.

When Jackson first arrived in the Senate in the early 1950s, after his workmanlike years in the House, the man from the distant Puget Sound country encountered an institution steeped in a tradition that bore the strong flavor of the Old South.

In military affairs, in committee matters, in other operations of the Senate, Richard Russell of Georgia reigned over all. Russell was familiar with Jackson's solid career in the House, especially his strong views on military defense. Russell accepted Jackson, became his friend and mentor.

It helped, too, the Jackson's homestate senior colleague, Warren Magnuson, had won acceptance of most of the old guard. At social functions, in the cloak room, at other places, Jackson moved easily with Byrd of Virginia, Ellender of Louisiana, Eastland of Mississippi, McClelland of Arkansas, Sparkman of Alabama.

Some of them were men who roused the wrath of northern liberals and invited the stings of satirists and cartoonists spoofing the elephantine old guard of the Senate. But they were politicians who nurtured the Senate's heritage and protocol and Jackson learned from them.

"Of course we often disagreed on many, many issues," Jackson would recall much later. There were those great debates over state's rights and civil rights and issues of organized labor. But when those debates quieted, the senators moved on to agreement on other issues—defense, farm programs, rural electrification, other public works.

"He was strong on national defense, which gave him the bond with the Southern people," remembers Sen. Strom Thurmond of South Carolina, a man with long service with Jackson on the Senate Armed Services Committee. Thurmond would pass through an era in which he would be a favorite hate target of social liberals, a man who would be attacked even by a few Senate colleagues.

"But Senator Jackson was always a gentleman," says Thurmond. "He was never offensive."

Those senators with the quick, sharp tongue, delivering the fiery attack on the floor of the Senate that made good copy in the newspapers back home, could pay a price.

When a senator became offensive, says Thurmond with a soft but ominous tone in his honey drawl, that senator might be taught a lesson later on. "When a close question would come up," Thurmond murmurs, "I think I've seen some senators vote the other way, just to pay off the senator who's been offensive."

There were other lessons to be learned in the Old School of the Senate, Sterling Munro, longtime Jackson administrative assistant, recalls: "I think the Southerners rejected anybody whose word wasn't good. With John Sparkman, with Lister Hill, with the others, "When they made the decision (on an issue) and said, 'I'm with you,' that's all there was."

Jackson learned that and later taught that same elemental lesson of the Senate: "When I say I'm with you, I'm with you."

Early in his House career the bachelor Jackson rented an apartment in an aging yellow apartment building near the Supreme Court. In the morning he would often walk to the House office building with another tenant of the same building, another bachelor congressman, John Kennedy of Massachusetts.

In time, with his disciplined, constant work his expanding friendships, he refusal ever to berate a colleague, Jackson became a senator with solid liaisons with Republicans and Democrats, Northerners and Southerners, liberals and conservatives.

Thus was shaped a hard-working, earnest, constant, almost bland political personality that won elections in his home state with votes from business and labor, farmers and city people, Republicans and Democrats.

"C'mon, we'll go over to the Senate dining room for lunch," Jackson would say. And there, in a room reserved for senators, senior staff and special guests, many a Washington state constituent would get a view of the Jackson style of communication.

Senators—Kennedy, Mansfield, Tower, others—would stop at Jackson's table for small talk and to be introduced to the visitor from Jackson's home state.

"We're going to have to get something going on that bill," Jackson would say. He was shaping action. A week hence, a bill would emerge from committee.

He held spontaneous meetings with fellow senators he met at the swimming pool where he worked out daily, in the cloak room, in the Senate gym or in an office-building corridor. More than one senator remembers how the Jackson arm would be draped over one's shoulder while the talk turned to the reasonable, rational solution to a legislative problem.

An arm over the shoulder, rather than a twist of the arm.

On the Redwoods National Park legislation, on the bill to authorize the Central Arizona Project, on other controversial measures that seemed to be deadlocked in committee, Jackson demonstrated endless patience-prodding, nudging, always trying to thaw the political glacier.

In a typical Jackson solution, says Munro, "Everybody got something and nobody got what they wanted."

The elderly Randoph of West Virginia was never a great power in the Senate. But, he recalls, "I stood with Scoop on many of his (homestate) issues. We pushed through the Youth Conservation Corps bill. . . ."

The 81-year-old Randolph, who now has the most Senate roll-call votes to his credit (Jackson held the record before his death), remembers his last conversation with the late senator:

"We were in the gym and talked. He said, 'Jennings, I'm so tired.'

"And I said, 'Yes, we're all tired. But I don't know why you're going to China.' And he said, 'Well, you never know. I want to find out.'

"He was constant in his attention to duty."

[From the Seattle Times, Sept. 8, 1983]

FUNERAL WAS A CELEBRATION OF SCOOP'S LIFE

(By Richard W. Larsen)

EVERETT.—"Scoop," said one of the mourner-celebrators, "would have wanted to make the arrangements, but as it turned out, he would have loved it."

It, of course, was yesterday's funeral—change that to funeral-celebration—for Sen. Henry M. Jackson, held at the First Presbyterian Church on Everett's Rockefeller Street, a street along which Jackson, as a kid, delivered newspapers.

It was a remarkable event; an impressive, mostly soleman political funeral that also contained a couple of piercing human revelations about the mortal who died last week at the age of 71.

Into the church had come the most diverse, prestigious gathering of public figures Washington state has ever seen-Vice President George Bush, Chief Justice Warren Burger, senators, congressmen, former Secretary of State Henry Kissinger, Washington's governor and ex-governors, university presidents, admirals, generals, church leaders, Protestant, Catholic, Jewish, others.

Consular officials and more.

In one of the several eulogies, the last of the Kennedy brothers, Sen. Edward M. (Ted), recalled the solace Jackson had given the Kenndy family when his brothers, Scoop's friends John and Robert, were slain.

And Kennedy, who differed so often with Jackson on some issues, had a tender recollection of the image of Jackson, the man often portrayed as a military hawk, who now lay in a flag-covered casket below the place from which Kennedy Spoke.

Jackson was a caretaker of America's security, but never, said Kennedy, did Jackson advocate financing a sound national defense establishment "by taking food from hungry children or hope from jobless workers."

But amid all those shining political luminaries and the eloquent tributes to the late senator, "the show" was stolen by Jackson's son and daughter, who provided some laughs.

And later came a sudden surge of tears—tears unintentionally caused by one of the many congressional powers who came to Everett yesterday.

Through their lives, the Jackson children have been kept mostly out of the public spotlight. But they stepped to the front of the sanctuary yesterday to share some personal memories of their dad.

Anna Marie Jackson (named for Jackson's mother, Anna, and an older sister, Marie, now deceased), is 20, a student at Stanford University, a young woman with a radiant, confident manner. She stood above her father's casket and began, "Most people knew my father as a public personality. . ."

But, she went on, as a daughter she knew him as a man "who always made time for his family, who always knew how important a father-daughter relationship is."

When her senator-dad was away on a trip, he usually telephoned. She remembered one of his nighttime calls from New York, after he'd had a busy day. To help her with a schoolwork assignment, he insisted on staying on the phone with her, she said, until she'd learned "the history of the New Deal, backwards and forwards.

"That particular call took 2½ hours."

From the "mourners" in the sanctuary came laughter: Anna Marie's remembrance, of course, was the quintessential Jackson, the incurable politican-lecturer.

And she remembered how he flew to be with her at her debutante ball: He knew, she said, it was "a special moment in my life." When they waltzed, she said, "he kept stepping on my toes." Another laugh. More pure Jackson: No one ever accused Scoop of being light on his feet.

Peter, 17, startled the crowd with his handsome bearing and his high voice. "Above all," said Peter, "I knew him as a compassionate father . . ."

Peter (named for the senator's Norwegian immigrant father) recalled how, as a 5-year-old, he'd memorized all the names of all the U.S. presidents, in order. His father, he said, "was so enormously proud." And, Peter went on, his father would stop voters on the street and force them to listen to his little son recite all the names from Washington to Nixon.

Again there was laughter in the sanctuary. The crowd could visualize Scoop Jackson standing there, keeping that poor voter captive on an Everett street corner, listening to the kid recite.

Then Peter remembered how he had studied and concluded that "Ralph Nader was right-on on nuclear energy. . . ." That got his father's attention. They'd debate, said Peter, and dad would always win.

The crowd grinned, visualizing Jackson, advocate of a rational, positive program of nuclear energy, debating his own kid.

In the front of the sanctuary was the white-haired presence of Gov. John Spellman. Suddenly, with the death of Scoop Jackson last week, Spellman had the task of naming a successor, and he knew the clock was ticking urgently on that decision.

In nearby pews sat some men who were likely appointees—former Gov. Dan Evans, sitting solemnly with his wife, and Joel Pritchard, Washington's senior Republican congressman, sitting beside his new wife. Nearby were other possible nominees to fill the Jackson vacancy.

It was a funeral, full of respect for Jackson, but it was also, inescapably, a political gathering that held a question: Who would be the successor?

Standing above the casket, Peter Jackson recalled some advice his dad gave him: "Equip yourself with the facts. Be honest. And be a good listener."

The handsome 17-year-old finished. He stepped down toward the pew where his mother and sister sat. And, watching him, some in the crowd sensed that there was a possible successor to Scoop Jackson, even though the possibility of a Peter Jackson candidacy would be years in the future.

The eulogies went on. Former Sen. Warren Magnuson stood in an aisle and, in a strong voice, paid his tribute to the man with whom he served through the decades. "God bless you, Scoop," said Maggie.

Dozens of people who'd worked for Jackson at one time or other had come to the funeral, and some of them got seats in the three back rows of the sanctuary. So many seats were reserved for senators and other high officials, the other former Jackson workers went to another room to watch it all on TV.

Beginning his eulogy, Tom Foley's body seemed to sag. He is the majority whip of the House of Representatives, a graying veteran of Congress, a man of power who could become Speaker of the House. But at this moment he was speaking as a man whose career had begun as a young, skinnny Jackson staff lawyer in the early 1960's.

"The Jackson staff, present and past, has grown rather large," said Foley, struggling for composure. He told how Jackson had a profound influence on all the secretaries, lawyers, interns, others who worked for him through the years—a tribute, considering that employees can be tough critics.

"For all of us who served him," continued Foley, his voice cracking, "it will remain to the end of our days . . ."

Choking, he stopped. He finished the sentence: ". . . a matter of enormous pride."

Tears flowed, especially across those faces in the three last pews and those faces in the other room, watching on TV. "There will never be another Jackson staff," gasped Foley. Tears flowed everywhere.

But much later, when it was all over, there were some happy memories and laughs. Jackson staffers remembered the traits of the senator, especially his compulsion to play mother hen to them and, with parental cluckings, keep them scurrying.

When leaving his office on a trip, Jackson seemed to enjoy sending secretaries, aides and others fluttering in all directions, gathering documents for his "trip file," checking on flight plans, schedule times, reminding

them of phone calls and endless other often-needless details.

"Scoop loved to have everyone scurrying around and he had to organize absolutely everything," remembers Sterling Munro, longtime administrative assistant. Once, while driving Jackson to the Munro home for dinner, Munro grinned to himself as Jackson compulsively gave him driving directions to his own home.

Everett had never seen such scurrying as yesterday's: Planeloads of senators and other high officials flying into Paine Field legions of police and Secret Service . . . bus caravans . . . TV cameras, reporters . . . aid cars . . . fluttering helicopters . . . Secret Service men with earphones . . . crackling radio communications . . . motorcycles, limousines, flashing lights . . . spectators cooing and clicking photos of Ted Kennedy and other dignitaries . . . the Chief Justice . . . flags . . . hundreds of old friends come together . . . a chorus of young voices singing of America's heritage.

So much of American government had assembled here that the airspace over Everett was sealed off.

As that former worker said, Jackson couldn't have organized a more marvelous scurrying.

KARL STOFFEL REMEMBERS PRIVATE JACKSON

(By Bob Woods)

(The following tribute to the late Senator Henry Jackson comes from Karl Stoffel, a former newspaperman, now retired and living in Leavenworth).

When a friend dies, there seems always to be that question: "I wonder if he really knew how much he was appreciated?"

It is like that with the passing of Senator Scoop, forty-year friend.

I'd like to share with you one little story about Scoop which I think tells something more than the regular political and friendly commentary.

I met Scoop when he was a 2nd District congressman in 1942, when we were just becoming immersed in World War II. I was an assistant to the late Walt Horan, newly elected 5th District congressman. Scoop was a bachelor, good looking, and very knowledgeable about the Capitol. He and his own chief assistant, Johnny Saltar, although on the opposite sides of the political fence, were tremendously helpful and many times while playing penny-ante poker they smoothed the way for a greenhorn.

But the point of the story is that as the war progressed and the manpower shortage became acute Capitol Hill became more and more deserted of eligible military and governmental workers. Even over-age congressmen were besieging the Army and Navy for commissions or for opportunities to serve.

Congressman Scoop Jackson was different. He very quietly straightened out his affairs, turned over the representative correspondence and chores to John Salter, and joined the Army, not as a commissioned officer but as a buck private.

Who knows what sort of military career Scoop might have had? He didn't get the chance. After a short while in jungle warfare training in and around Florida, and with dozens of his Capitol Hill co-horts gone and leaving, President Roosevelt called an end to it. He recalled Scoop and others to civilian duty. In other words, Scoop Jackson's G.I. duties were summarily ended by presidential edict.

I was flying home to check with my own draft board (and believe me to get on a transcontinental airline at that time was something else), when I was displaced in Cincinnati by some brass-wearing VIP and told to wait for another flight.

Sitting around in the rather barren airport waiting room on wooden benches were half a dozen other lesser important travelers. Among them, dressed in Army fatigues with a duffel bag by his side was Congressman (Private) Scoop Jackson. He'd taken a "bump" along with others and was waiting his turn to get on another flight. He was going home before going back to his Capitol Hill desk and civilian duties. We eventually flew together back to Washington State.

Many times afterward, I reminded Scoop of his passing up VIP status and his only reply was the famous half smile. He was a very fine, very human sort of a man and I'm happy to have had the opportunity to know him as a friend and senator.

SENATOR JACKSON RETIRED BY DEATH

(By Bob Woods)

Those were the two big jolts in the news this week—the horrifying gunning down of an unarmed passenger jet by Russia, and the unexpected death of Senator Henry M. Jackson of Washington.

They were completely unrelated, of course. Yet there was a certain symbolism. Senator Jackson has long been one of the nation's most prominent cold war warriors, preaching the perfidy of the Soviets, warning of the barbarism of their policies, maintaining that they could only be trusted to be untrustworthy.

On the day before his death, the Russians seemed to have fulfilled all his expectations.

But Senator Jackson's epitaph will extend far beyond his perceptions of Russia.

Jackson was a seat mate of Senator Warren Magnuson for most of his 40 years in Congress. During the time, Magnuson was known as the "politician" of the two and Jackson as the "statesman." This was exemplified by Jackson's run for the presidency, not once, but twice. He was almost selected as John Kennedy's vice presidential running mate, but political expediency gave the choice and eventually the presidency itself to Lyndon Johnson. There is little doubt Senator Jackson would have made a steady competent president.

But despite his national involvement, Senator Jackson was a careful custodian of Washington state interests. He maintained one of the finest staffs on Capitol Hill, and the members were immediately responsive to concerns of Washingtonians. He sobriquet as "the Senator for Boeing" was not a derogatory one; it was in admiration of his efforts on behalf of his state constituency. Many local projects, such as the Wenatchee Community Center, the Museum, and the regional library headquarters are examples. Senator Jackson and his staff were supportive of efforts to make the Columbia navigable to Wenatchee, and the Senator had appeared at many of the resource conferences conducted by this newspaper in Wenatchee.

Senator Jackson was a remarkably "human" person. His great memory for names made him seem like a native in his frequent appearances at civic functions in the region. But his inherent friendliness is probably best illustrated by one of his reelection campaigns. Because of his political stature and his support from business, most of the Repubicans who opposed him were non-entities. Both Senator Jackson and one of those sacrificial lambs were campaigning in Wenatchee the same day and the Senator's opponent was having difficulty making himself known. So Senator Jackson took him by the elbow and ushered him into his own rally, introducing him personally all around the room.

Senator Jackson's support for a strong military gained him the reputation as a hawk in diplomatic maneuvering, but he seemed to have toned down his rhetoric in recent years. Perhaps it was symbolic that his reaction to the attack on the South Korean airliner was restrained. He warned against a direct response from the U.S. by either military show of force or a trade embargo. The Senator seemed to be saying, "It was a barbaric act. But let's wait until we have a full explanation before going off the deep end."

For so many years this state's political fortunes have been intertwined with the careers of Democratic Senators Magnuson and Jackson. Senator Magnuson, in his 70s, was retired by the voters at the last election. Now Senator Jackson, at 71, is suddenly gone. Perhaps it's an indication that elected officials should observe a proper retirement age the same as those outside public office.

The political wheel of fortune has turned full cycle. After nearly four decades this state's senate seats will be held by Republicans—at least until the next election. The name of Dan Evans will likely be most prominently mentioned as a replacement appointment for Senator Jackson. A new chapter in the political history of the state is now beginning.

Mr. GORTON. Mr. President, I have a resolution on this subject which I send to the desk and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, the resolution will be stated.

The assistant legislative clerk read as follows:

S. RES. 209

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of the Honorable Henry M. Jackson, late a Senator from the State of Washington.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate recesses today, it recess as a further mark of respect to the memory of the deceased.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 209) was agreed to.

Mr. GORTON. I thank the majority leader for yielding.

RESOLUTION PROVIDING EXPENSES FOR FUNERAL OF SENATOR HENRY M. JACKSON

Mr. BAKER. Mr. President, on behalf of Senator BYRD and myself, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

SENATE RESOLUTION 210

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred

by the committee which arranged for and attended the funeral of the Honorable Henry M. Jackson, late a Senator from the State of Washington, on vouchers to be approved by the Chairman of the Committee on Rules and Administration.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

Without objection, the resolution is agreed to.

ORDER FOR TIME ON WEDNESDAY, SEPTEMBER 14, FOR TRIBUTE TO SENATOR JACKSON

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I thank the Senator from Washington. My remarks in a moment will respond in part and inadequately to the observations of the distinguished Senator from Washington. Before I do that, Mr. President, I note that there are many Members of the Senate who wish to express their regrets, their grief, at the passing of Senator JACKSON who are not here and are necessarily absent on this first day of the Senate after the statutory August recess. I have consulted with the minority leader on this subject and I make the following unanimous-consent request.

I ask unanimous consent that the time from the expiration of the time for the transaction of routine morning business on Wednesday next for a period of 2 hours be devoted to speeches and remarks on the passing of our former colleague, Senator JACKSON.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ORDER FOR RECORD TO REMAIN OPEN UNTIL SEPTEMBER 30 FOR TRIBUTES TO SENATOR JACKSON

Mr BAKER. Mr. President, I ask unanimous consent that the RECORD remain open until the close of business on September 30, the end of this month, so that Members may insert statements and further observations and tributes to our former colleague, Senator JACKSON.

THE PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR BINDING OF EULOGIES FOR SENATOR JACKSON IN EULOGY BOOK

Mr. BAKER. Mr. President, as has been the practice in the past, I ask unanimous consent that all of the statements in respect to the passing of Senator JACKSON be gathered together and that the Joint Committee on Printing have them bound in a eulogy book as called for in title 44, section 723, of the United States Code.

THE PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR HENRY M. JACKSON

Mr. BAKER. Mr. President, I have been in the Senate for 17 years and I have known the Congress intimately for much longer, by reason of the service of members of my family and members from my great State. In the course of that experience, I have seen great Members of Congress from both parties whose service in this body and in the other body have been remarked on at length at the time of their passing. But I cannot recall many instances, Mr. President, when there has been such a genuine outpouring of emotion and such a clear and candid statement of grief expressed by so many at the passing of a Senator as is the case with HENRY M. JACKSON of Washington.

All Senators are equal and represent equally the sovereign State from which they are elected. But some, Mr. President, tower in their strength and commitment to the Union, in their conscientious dedication to equality, and certainly in their quest for excellence. Only a few, Mr. President, meet that standard, but HENRY M. JACKSON of Washington is near the top of that list, measured from the beginning of the Republic.

A man of majestic stature, of strength and conviction; a man who could stand on the Senate floor and express the conscience of the Congress and the country; a man who could change the course of debate and shape and form the policy of a great nation; a man who was humble in the face of success and congratulations and who was courageous and determined in the face of criticism and dissent; a man who knew who he was and where he was going and where he wished to take the country: that was the man we have lost, Mr. President, as a colleague and a friend.

It will be a long time, Mr. President, before someone else can fulfill the role and rise to the stature that HENRY M. JACKSON created for himself. So, may I join with our distinguished colleague from the State of Washington in expressing my regret and my sadness at the passing of SCOOP JACKSON. I join, I am sure, with every one of the Members of the Senate in wishing him farewell.

Mr. President, I ask unanimous consent that this week's poem, written by Senator COHEN in memorium to Senator JACKSON be printed at this point in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

HENRY JACKSON
(1912-1983)

O, gentle warrior,
you who hung,
a winged sentry
above your doubting
countrymen,

And warned of violence
ticking away
in the margins
of our indifference,

How, as the days
dropped into decades
did you always come
armed with but words
and wise intelligence

Knowing that the
issue of the hour
was never lost or won,
but rejoiced, unbroken,
by the battle
the hour had brung?

Suns perish, moons fade,
bodies more sublime
than we have been
taken by Time to eternity.

But you,
uncursed as Cain,
were too vigorous to die,
no, not of a bursting heart
that never once
had bothered to complain

And yet,
a square cut stone
now will mark
for all to see
the residence that
you've taken
in the village
of cold mortality.

I write these words,
toss this voweled wreath
upon your resting place
mindful, even as
I feed upon
the bitter salt
of grief,

That once,
as a boy,
I watched in
wonderment and joy
a heavenly meteor
drop to death
in a brilliant
slash of light.

So your spirit
remains with me,
burning intense and bright,
forever in my memory,

As you fall
silent now,
blazing
into
the
vastness
of
the
night.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. Mr. President, during my tenure in the Senate, I have known some great Senators and I have followed the leadership of those Senators and sought out their advice and their commonsense wisdom. The late Richard B. Russell was one such Senator. Abraham Ribicoff was another, John Pastore another. There are Senators who are today serving who fit into that mold. I will not presently name them. But HENRY "SCOOP" JACKSON was one such Senator. His knowledge with respect to various matters confronting our Nation and confronting the nations of the world was a knowledge that was recognized by Senators on both sides of the aisle and by national leaders outside the Senate and national leaders throughout the world. He had only recently completed a visit to the People's Republic of China. "SCOOP" JACKSON realized per-

haps earlier than some of the others of us, the fact that a country whose population is 1 billion people cannot be ignored and cannot remain in the shadows of invisibility.

I often sought "Scoop" JACKSON's advice, particularly with reference to national defense, energy, and the economy. "Scoop" JACKSON, like Richard Russell, had a commonsense approach to these matters. His viewpoints were well thought out and were born of strong conviction. He did not hesitate to speak his conviction. Yet he was always tolerant of the viewpoints of others, and he leaves, Mr. President, a void in this Senate that will not soon be filled. He was my friend, as he was the friend of 98 other Senators. He was extremely energetic, active, and his handiwork will always have its imprint upon some of the most important laws that have been passed by the Federal legislative branch in the past quarter of a century.

The great 19th century preacher, Phillips Brooks, once said, "A sermon is truth speaking though personality."

That statement might also describe the careers of many U.S. Senators, and Senator HENRY M. JACKSON was a good example of that ideal. Through his personality and public performance, Senator JACKSON embodies many great values and gave life to some of the most crucial issues of our times. When one thinks of strong national defense, of our commitment to Israel, or of dealing with the Soviet Union from strength, HENRY JACKSON comes to mind. When one thinks of making old age dignified and secure, of the healthy and balanced environment or an equal justice and opportunity for all Americans, HENRY JACKSON come to mind. And when one thinks of America's fulfilling her limitless potential of firm national purpose or steady and effective leadership, HENRY JACKSON comes to mind. In generations to come when men and historians look back upon this era, HENRY JACKSON's name will stand out as one of the great men of this age.

HENRY JACKSON, as I liked to call him but "Scoop" as he liked to be called and as he was best known, was a remarkably decent, moral man. He was also a realist. He did not believe that if we just let things take their own course, everything would turn out right. He realized that Western civilization itself is at stake in this modern world of dictatorships and of technology in thraldom to totalitarianism.

Back in 1945, Senator JACKSON accompanied the American forces that liberated the Buchenwald concentration camp. One can only guess at the thoughts that he must have on that occasion. But one can surmise what impact the starving survivors, the furnaces, the pile of victims, and the unbroken acres of death and agony must have had on a young Congressman who grew up in a decent Norwegian immigrant family and in the beauty and order of the State of Washington.

Whatever that impact was, Senator JACKSON had a deep sense of history and a realistic view of the future. He realized how thin the veneer of culture and civilization can be and how fragil are rights of the innocent and defenseless in a world of savage and bullies. He saw totalitarianism for what it is, and he was never afraid to point an accusing finger at Soviet terror.

Ben Wattenberg recounts that on a 1975 visit with the Russian scientist and dissident Andrei Sakharov outside Moscow, Sakharov said of HENRY JACKSON, "He is our champion."

That is how many Americans will remember Senator JACKSON as well—as a champion of a strong America, of a decent America, of a prosperous America, and of a just America. HENRY JACKSON was a thorough patriot and an extraordinary Senator who has left his mark on our century and our generation. America and the U.S. Senate are better because of Senator JACKSON's efforts and dedication and we all mourn his passing. I will miss him greatly. And may I say that Erma and I join in our expressions and feeling of deep sorrow and compassion. We join in extending those to Helen and to Anne Marie and to Peter.

The Senate is larger than all of its parts, it is larger than its 100 Members, and the Senate in my judgment is the basic foundation of the strong character of this Republic. Senator JACKSON was one who helped to give the Senate its character. Someone has said:

> Fame is a vapor, popularity an accident, riches take wings, and those who cheer today may curse tomorrow. Only one thing endures—character.

HENRY JACKSON epitomized character. And we will never forget his example.

Mr. BAKER. Mr. President, as I indicated earlier, a great number of Senators—perhaps every Senator—wish to be heard to express their grief at the loss of Senator JACKSON. Provisions have been made for a period of 2 hours in which eulogies may be stated on Wednesday, as well as the RECORD remaining open until the end of this month for the insertion of other statements and tributes.

Mr. President, I believe the documents from the Governor of the State of Washington for the appointment of a new Senator are here, as is the Senator designate.

It is the intention of the leadership to ask that the oath of office be administered to the Senator designate at approximately 1 p.m. Until that time, it is my hope that other Senators who wish to express their grief at the loss of Senator JACKSON might continue to do so.

Mr. STEVENS. Mr. President, I thank the majority leader for continuing the time for the statements concerning the passing of our good friend, Senator Scoop JACKSON.

There are four of us on the floor of the Senate who would not be here had it not been for the service of Senator JACKSON. I had the privilege of knowing Scoop JACKSON since 1950. In the early 1950's, when many of us were working on the concept of statehood for Alaska and for Hawaii, Senator JACKSON was chairman of the subcommittee that dealt with the whole subject of territorial affairs.

I will never forget—and I am sure Alaskans will never forget—the tireless energy he devoted to this cause, the type of energy he devoted to any cause of which he was supportive. But absolutely no one can argue with the flat statement that without the efforts of Senator JACKSON, neither Alaska nor Hawaii would have become a State at the time they did. It may have occurred later. It occurred when it did because of the dedication of Senator JACKSON.

As a matter of fact, Senators know how difficult it is to get through the Senate, without amendment, a bill that has come from the other body. To consider the difficulty of getting Alaska's statehood bill through the Senate, as controversial as it was, without any amendment, is mindboggling. But Scoop did it, and he did it when becoming a State meant a great deal to Alaska; and Alaska's entering into the Union has meant a great deal to the United States.

The great Prudhoe Bay oil discovery was made on land that was selected by the State of Alaska after it had become a State. The Federal Government never desired to see that land made available for exploration, and its development of the exploration was successful.

We can trace many things to Scoop's activities concerning Alaska. Consider his foresight in dealing with the Alaskan Native land claims. He also was chairman of the committee that held all the hearings and, for the first time in history, settled land claims by an act of Congress, rather than by litigation—litigation that would have taken 175 different actions. The first and only action that went to the courts took 37 years. Senator JACKSON saw that that kind of litigation would cripple a new State.

Then we saw the passage of the Trans-Alaska Pipeline Act and the enactment of the Alaska national interests lands bill, a bill, as many people know, on which I disagreed at times with Senator JACKSON. But he always was willing to listen.

He held more than 40 hearings on one Alaska lands bill alone, and took the committee to Alaska and held hearings which commenced at 6 a.m. There were so many Alaskans to be heard that it was necessary to hold hearings for days. SCOOP sat there and listened to them all. I do not recall him ever turning down an Alaskan who wanted to express a point of view on any of the hearings he conducted.

However, I would be too provincial if I stayed there. I must recount, also, the many trips I was privileged to take with Senator JACKSON and his wife, Helen, over a period of 15 years. I think SCOOP and I must have traveled at least once a year, often with our wives. I have had a relationship with Senator JACKSON that cannot be replaced, and I think that is true of many of us.

Those of us who believe in using the facilities of the Senate which are provided for maintaining our health know that SCOOP was there almost every afternoon and encouraged every one of us to do the same. As a matter of fact, he chastised us if he did not see us down there from time to time.

Last July, we stood here and had a little ceremony and exchanged some words as Senator JACKSON cast his 11,000th rollcall vote: 11,000 votes—votes he cast on each occasion on the basis of what he thought was right.

When I first came to the Senate, as an appointed Senator on the other side of the aisle, SCOOP sought me out, as we have just heard he sought out his colleague, Senator GORTON. From that time on, Senator JACKSON went out of his way to seek out newcomers to the Senate and to give them advice and to seek to get them to pursue what they wanted to pursue in the Senate and to take on the role they should take on.

I recall that one time he told me there was an old saying that new Senators should be seen and not heard. He said, "If you follow that advice, you won't be here very long."

It was a hallmark of Senator JACKSON's total service to the Nation that he believed that every one of us should be able to do the same thing that he did, and that is to continue to do what he was sent here for.

It was a marvel to me that, over so many years, he could maintain the enthusiasm he had for every issue he pursued, even through the last trip he took to China. It was an indication of the continuing interest in the relationship of our Nation to that nation, which is bound to maintain an important position in the world, with its billion people, as the distinguished Democratic leader has mentioned.

Mr. President, I ask unanimous consent to have printed in the RECORD editorials that have appeared in my State that acknowledge the friendship and dedication of Senator JACKSON to our new State, as well as a letter to the editor.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

ALASKA LOSES A FRIEND

When Sen. Henry "Scoop" Jackson looked at Alaska more than three decades ago, he saw a territory that he believed would one day make major contributions to the United States.

His foresight proved highly accurate. In those early days before statehood, he became an advocate for Alaska whose constancy never wavered.

Alaska lost a true friend when Sen. Henry "Scoop" Jackson died Thursday after a massive heart attack at his home in Everett, Wash.

Jackson, 71, served 12 years in the U.S. House and 31 years in the U.S. Senate, becoming a powerful force in U.S. politics.

His stature was such that he twice sought the Democratic presidential nominations—in 1972 and 1976—though neither try was successful. His advocacy of Alaskan interests gave us an edge that we badly needed and will sorely miss.

Both before and after statehood, Sen. Jackson was Alaska's very good friend. His support of Alaskan statehood was constant even though it wasn't a popular stand.

Sen. Jackson—along with Washington's junior senator, Warren Magnuson—helped Alaskan delegate and eventually Sen. E. L. "Bob" Bartlett on many occasions. When Bartlett died in 1968 and Gov. Walter Hickel named Ted Stevens to the Senate seat, Jackson befriended Stevens as well, and their friendship ripened over the years, despite their different party affiliations.

"Alaska will always be indebted to Scoop Jackson," Stevens said Friday. "He was floor manager of the Alaska statehood bill in 1958 and successfully guided it through the Senate without amendment. Without his efforts, in all probability we would not have become a state at that time."

Stevens added: "Scoop Jackson should be remembered by Alaskans because he freely gave of his time and talents to assist Alaska—to become a member of the union and to succeed as a new state."

Sen. Jackson was able to see the need to balance economic development with environmental protection and settlement of the land claims of Alaska's Natives.

He became a good friend to Alaskan Natives sponsoring the land claims settlement act that passed in 1971 and maintaining an active interest in implementation of the act and resolution of continuing problems.

At the same time, he saw the need to develop Alaska's natural resources and led the drive for the Trans-Alaska Pipeline Authorization Act in 1973 that paved the way for construction of the Alyeska Pipeline Service Co., oil pipeline. He also spearheaded efforts to build a natural gas transmission system from the North Slope.

As chairman of the Senate Energy and Natural Resources Committee, he chaired more than 40 committee sessions called to draft acceptable Alaska lands legislation. After four years of work, a bill was passed in 1980.

He supported a strong military presence in Alaska, recognizing our state's strategic importance. Through his seat on the Senate Armed Services Committee, he fought to maintain military strength in Alaska.

With his death Thursday, the nation has lost a powerful political leader whose perception and consistency will be hard to replace. And Alaska has lost a true friend.

[From the Anchorage Times, Sept. 4, 1983]

SENATOR HENRY JACKSON

The flags of the Anchorage Times were lowered to half-mast today as a gesture in behalf of all Alaskans who mourn the loss of Sen. Henry M. Jackson. The senator, although a statesman of international stature, never wavered in his devotion to Alaskans.

While serving 45 years in Congress, Sen. Jackson held key positions on committees that helped prepare Alaska for transition to a full-fledged state. He was also a key leader in handling the final legislation that set up the terms and timetable for statehood itself.

Without the help of Sen. Jackson, the lifestyle of all Alaskans might still be one of small-town subsistence in an isolated territory far beyond the perimeter of world economic or social concern.

Sen. Jackson was a key man in the legislative settlement of the Alaska Native land claims and in the bill providing for the national interest lands.

His leadership there was backed up by many years of association with Alaskans and their legislative needs. During the final decades of territorial status, Jackson figured on committees that helped keep the fragile economy here afloat.

He sponsored the law that refunds to Alaska 90 percent of the rent and royalty funds that accrue to the federal government here. He figured in funding the federal project to expand the Eklutna hydroelectric power plant, which for years was the backbone of the local power structure. Many of the schools, water lines, sewer systems and other infrastructure in Alaska were built after he helped convince Congress to authorize the Alaska cities to issue bonds.

Sen. Jackson did so many legislative chores for this state that he was often called "Alaska's senator." Alaska's voteless delegates to Congress, who could only make speeches, looked to him for the help and leadership they needed.

Sen. Jackson was liberal in his domestic policies but pragmatic and conservative in his international views. He was an all-out supporter of Israel, a strong national defense program and anti-communism. Indeed, his last appearance before the fatal heart attack was at a press conference called to deplore the Soviet action in shooting down an unarmed commercial airliner. He noted, in terminating the conference, that he was bothered by what he thought was a cold, telling the press "I didn't know if I would survive this, but you were very kind."

In his many years of international prominence, Sen. Jackson remained approachable, with no affection or pretentiousness. He never lost the spirit of the small-town boy, son of immigrants, who knew poverty and the commonality of man first hand.

He was one of the nation's symbols of the statesman who never loses touch with his constituents or his feeling for the well-being of the common man internationally.

[From the Juneau Empire, September 2, 1983]

SENATOR JACKSON'S DEATH A LOSS TO THE NATION

Americans—especially Alaskans—lost a champion Thursday with the tragic death of Washington Sen. Henry "Scoop" Jackson.

Sen. Jackson was stricken by a heart attack at his home in Everett, Wash.

Unfairly labeled "the last cold warrior" by some, Sen. Jackson worked long and hard to assure the U.S. maintained a strong defense, as any responsible public servant should.

For that; he is to be commended, but critics forget how he also cared about people. Social programs and the welfare of all Americans were at the top of his list of priorities during his 43 years in Congress. For example, he fought against the pollution of the environment and for many of the freedoms Americans enjoy today.

Sen. Jackson also holds a special place in the heart of Alaskans. He managed the Alaska Statehood Bill to passage in 1958 in the State, and Alaska leaders credit him with much of the progress the state has made during the last quarter of a century.

Without his efforts it is, in all probability, true that Alaska would not have become a state at that time, said his friend and colleague, Sen. Ted Stevens, R-Alaska, the Senate majority whip.

"He was deeply involved in the Alaska Land Claims Settlement Act, Alaska pipeline amendments and the Alaska Lands Act," Sen. Stevens said. "He maintained an equilibrium in dealing with us for a period of time that it is long enough that it is hard to remember."

Sen. Jackson never shied away from a political fight. His runs for the presidency in 1972 and 1976 showed him to be a tough politician and a tireless campaigner.

In spite of his many battles, the scars of more than four decades in national office did not show. He thrived on his job, although in a 1980 interview he admitted it was hard.

"But I know what I'm doing and I don't need sympathy. I don't have any use for crybabies," he told the reporter.

In an era of political puffery, Sen. Jackson was a breath of fresh air. He meant what he said, and he did what he thought was right, regardless of party and regardless of the political consequences.

Henry M. Jackson will be missed by his constituents, but not nearly as much as he will be missed by the Senate, the nation and Alaska.

[From the Anchorage Daily News, September 4, 1983]

SENATOR HENRY JACKSON, FRIEND AND STATESMAN

Sen. Henry M. "Scoop" Jackson knew Alaska nearly as well as our state's own delegation in Congress, and as a friend of long standing. He also knew, as a U.S. Senator must, how to rise to the national interest and confront the issues that concern us all.

That's why he could perform the delicate feats of legislative statecraft needed to nudge the Alaska Statehood Act through Congress in 1958. That's why he could speak forcefully for the interests of Alaska Natives in drafting and implementing the Alaska Native Claims Settlement Act—a measure that not only answered the claims of Native people in our state, but also cleared the path for construction of the trans-Alaska pipeline. That's why he could play an honest broker's role in the seven-year fight over the Alaska National Interest Lands Conservation Act—able to communicate with all sides because he had earned all sides' respect.

Scoop Jackson was a Cold War liberal—nowadays termed a "neoconservative"—who expressed the American post-war consensus for strong national defense and equally vital social services. He was a lifelong Democrat and, after 43 years of service, perhaps the last New Dealer in Congress. He split with much of his party and most other liberals over American involvement in Vietnam, and he long provided the focus in Congress for opposition to the Soviet Union and the policy of detente. He championed the causes of labor, environmentalism, civil rights, Israel, anti-communism and American minorities. He earned the respect of all sides in Congress. Senate colleagues who often disagreed with him were among the first to eulogize his service in Congress and contributions to public life.

It was ironic, perhaps, that his death Thursday evening was overshadowed by the downing of a Korean airliner by Soviet fighters near Siberia. Sen. Jackson had spent most of his career denouncing conditions in the Soviet Union and effectively battling for what he thought would keep the U.S. and the West ahead in the conflict between the superpowers. His staff on the Senate Armed Services Committee became a think tank for high-quality strategic analysis with a conservative, anti-Soviet bent • • •

[From the Ketchikan Daily News, Sept. 8, 1983]

AN HONEST, FEELING LEADER

The nation's leaders gathered in Everett, Washington Wednesday for the funeral of U.S. Senator Henry Jackson. The Washington Democrat died suddenly late last week at his home during a Congressional recess.

In all of the national publicity about Jackson—his leadership in the U.S. foreign policy, in his authorship of the environmental legislation, in his support for a strong defense—his friendship and support of Alaska is overshadowed. But Jackson, as the ranking Democrat and for many years the head of the Senate Energy and Natural Resources committee, was the floor leader in major legislation affecting Alaska. That legislation included Alaska Statehood of 1958, the Alaska Native Claims Settlement Act of 1971, and Alaska National Interest Lands Conservation Act of 1980. In all of these landmark laws Jackson understood and supported the Alaska position.

Sometimes it was difficult for Jackson to support Alaska. As a Senator from Washington state, he had to listen to his constituents in the Alaska salmon industry and other Alaska industries based in Seattle who opposed Alaska statehood. He had to arbitrate disputes between Alaskans on the native claim issues. He had to arbitrate between his environmentalist supporters and the majority of Alaskans in the land issue. Jackson always worked for a realistic compromise. Attesting to his success is the lack of complaints about the Statehood and Native Claims Acts. And the minor complaints about the Lands Act. We are sure, had Jackson lived on, he would have helped improve the Lands Act. It was typical of Jackson to work out compromises that helped people. Alaska lost a good friend. And the nation lost an honest, competent, feeling leader.

SENATOR HENRY JACKSON

DEAR EDITOR: A friend will be sorely missed.

The death of Sen. Henry "Scoop" Jackson is a tragedy for all Alaskans, but for no one more than Alaska Natives.

Scoop was a special ally to us and a special friend.

He was instrumental in the drafting and passage of the landmark Alaska Native Claims Settlement Act and subsequent amendments. He fought to ensure that the benefits we gained were not diluted by other legislation.

Scoop Jackson was the prototype of public service. His enthusiasm and skill in the American political process never detracted from his integrity, his compassion and his dedication to social, political and economic justice.

Scoop never lost sight of his primary mission: To serve the American people. Alaskans—and Alaska Natives, especially—reaped the benefits of his limitless energy. We will always remember him with great fondness and gratitude for his friendship and efforts on our behalf.

We have lost a very special man. May his memory and the fruits of his work live on.

JANIE LEASK,
President, Alaska Federation of Natives, Inc.

Mr. President, let me in closing say that we all have been involved in tragedy, we have all had the experience of realizing that death must inevitably occur, and we have lived through the aftermath of the passing of loved ones and friends.

But I can only echo my good friend, the former senior Senator from Washington, Senator Magnuson, by saying: "I never in this world thought I would ever be here without Senator JACKSON not here."

He was one who just seemed to have a life that was timeless, and he was always so young.

It was impossible even for me to realize that SCOOP had passed 70. I remember when I went to that 70's birthday party.

SCOOP will be missed here by all of us. But SCOOP will be honored by the memorials that he has left behind him and two of them are two new States.

Mr. President, I can think of nothing that would honor a man more than to have sat in Everrett, Wash. and heard the comments that were made by Anna Marie and Peter. Those of us who were there at the memorial services for SCOOP were completely awed by the statements of those two fine children, and I know that they meant a great deal to me as a father, and they had to be heard all the way to where SCOOP JACKSON is now.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the two statements to which I referred because I can think of no greater tribute to any human being than the two statements made by his children.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

FAMILY TRIBUTE: FAMILY MEMORIAL SERVICE FOR SENATOR HENRY M. JACKSON—THE FIRST PRESBYTERIAN CHURCH, EVERETT, WASH.

ANNA MARIE JACKSON

Most people knew my father as a public personality—in his official role. I, however,

knew him as a very special person—a father who always made time for his family and who knew how important a father-daughter relationship is.

He was the kind of father that would leave in the middle of one of his important meetings to take my phone call and talk to me and answer some questions that I was having trouble with in one of my political science classes.

I remember one night when Dad called me from New York, after a tiring day of speeches, while trying to recuperate from a cold. He insisted on staying right on the phone—as he said, no matter if it would take all night—until I understood the history of the New Deal backwards and forwards. That particular phone call took 2½ hours.

He was a proud father as well. This past Christmas he flew out to my debutante ball even though the Senate was in session and there was a possibility that he might miss a vote. One thing my father never wanted to do was miss a vote.

But he told me that the debutante ball was a very special moment in my life and he wanted to be a part of it.

What I recall most vividly from that evening was waltzing with Dad, and he kept stepping on my toes. He whispered in my ear and said: "Keep smiling, we make a good team."

PETER JACKSON

It's impossible to summarize how much the guidance, love and understanding of a father means to a son. And it's going to take some time to fully realize what Dad in his long, productive life means to me.

But above all, I knew him as a compassionate father, dedicated to his family.

When I was 5 years old, my Dad learned that I had memorized a list of all the presidents of the United States. He was so enormously proud of my accomplishment that he would often stop photographers and voters at random, forcing them to stand still and endure my recitation of every one of the presidents from Washington to Nixon. When it was all over he would say: "This is my son Peter and everything he does makes me proud of him."

I'll always recall our hours together Saturday mornings at the Senate gymnasium. It was our special time for relaxing, swimming and just talking. Whenever anyone came by, Dad would stop, put his hand on my shoulder and say: "This son of mine—he's pretty special, don't you think?"

Perhaps what I'll miss most is our long discussions on political and foreign policy issues. I would go to the library and thoroughly research a topic he was deeply involved with. On returning home I would quietly sit down in our library and explain to him why I thought Ralph Nader was right on nuclear energy.

Immediately his eyes would light up. There was nothing he enjoyed more than engaging in an active, lively debate. Nevertheless, no matter how much research I did, he always came up with better arguments. He told me: "Equip yourself with the facts, be honest and be a good listener, then you'll receive respect."

When I think of my Dad I'll always best remember that advice and our spirited debates. I realize that he was not only a generous, caring father, but also an experienced and skillful teacher.

The PRESIDING OFFICER. The Senator from Kentucky is recognized.

Mr. FORD. Mr. President, it is difficult for me to paint a word picture of my personal feeling in the loss of HENRY M. JACKSON, but I must make an effort, however feeble it might be.

Mr. President, high noon on September 7, 1983, in Everett, Wash., was the saddest time I had spent in the 8 years I have served in the U.S. Senate.

During that time we paid our last respects to our colleague, HENRY M. "SCOOP" JACKSON.

Mr. President, I marvel at the courage and the strength of his wife and two children.

In 1972, behind a metal building somewhere in Miami, Fla., I came to know this man and what he wanted for this country and for its future. A friendship was developed then that over time would not be dented.

He came to Kentucky when I was Governor, and he worked with me and our party. We were successful, successful because SCOOP gave of himself to help us.

We give a great deal of weight around here to the seniority system. So SCOOP was the beneficiary of his lengthy service. But his influence stemmed from considerably more than longevity. It stemmed to an even greater extent from personal and political integrity, from consistency, and from dogged courage.

Mr. President, I have lost a friend but the country and the world has lost much more.

Mr. MATHIAS. Mr. President, the leadership of the Senate has spoken eloquently today about the loss this institution has suffered by the death of the senior Senator from Washington, Senator JACKSON. In a sense, today's session has been a memorial session to Senator JACKSON. But I have come from another meeting which is also a memorial meeting for Senator JACKSON, a memorial in the most positive sense because it is evidence of the ongoing work that he accomplished.

That other meeting is, in fact, still in progress in the Department of State. It is the Bipartisan Commission on Central America, which was established by President Reagan after the proposal had been made by Senator JACKSON and myself, later joined by Representative BARNES and Representative KEMP in the other body.

I hope that the final report of the Bipartisan Commission on Central America will be worthy of the hopes that Senator JACKSON had for it. The fact that he is no longer here to participate in the work of the Commission gives me a renewed commitment to make sure that the Commission's final product should be what he wanted it to be.

In talking with him about the possibility of a commission to guide U.S. policy in Central America, I had a rare opportunity to gain an insight into the way that he thought about large public problems

In the first place, his years of experience in the Senate had made it clear to him that we were not dealing with problems in Central America which could be solved by television statements or press releases but, rather, by consistent, continuous policy which he predicted might have to extend over a period of 30 years or perhaps even 50 years.

One may have disagreed with that specific prediction, but I think it is indicative of the large way in which Senator JACKSON dealt with problems, that he was willing to look ahead for 30 or 50 years, and to try to chart a course which would bring safety, stability, and security to the Western Hemisphere.

In discussing the particular problems of Central America, he said, "You know, they call me a hawk, and maybe I am. But in this particular case," he said, "It is clear to me that military action alone will not solve the problems of Central America, that the military shield will crumble"—I remember his exact words very clearly—"the military shield will crumble if it is not supported by social and economic progress. And we must encourage social and economic progress; we must help alleviate the problems of poverty, ignorance, and disease which plague the people of Central America."

I have recounted this at some length because it seems to me that it is, in a sense, a synthesis of Senator JACKSON'S career in the Senate. He stood for a strong America. He was willing to pay the price for a strong America. He felt that a strong America was essential not only for Americans but for the freedom of the world.

In domestic matters he was concerned about poverty, disease, poor housing, and lack of education.

He was concerned about them in Central America as he was concerned about them here at home. So his humanity had a breadth and a depth which is all too rare, not only in public life but in life in general.

There is no substitute for experience. Senator JACKSON had more than four decades of experience in the U.S. Senate. That, of course, did not make him infallible, but it did make him one of those wise counselors who should be listened to, who must be listened to—not only in the committees of the Senate, not only on the floor of the Senate, but in the wider councils of the Nation. So it was that President after President sought him out, sought his advice, sought his support.

The philosopher-author, Rene Dubois, once said that each human being is unpredictable, unprecedented, and unrepeatable; each human being is unique. So, when we lose one of our colleagues, we know that he can never be replaced, that we have lost something which is unrepeatable.

The Senate will feel the loss of HENRY JACKSON in days to come, but to the extent that by redoubling our own efforts, we can in some small way compensate for this diminished body, it is the tribute that we must pay to him.

A TRIBUTE TO SENATOR HENRY M. "SCOOP" JACKSON OF THE STATE OF WASHINGTON

Mr. THURMOND. Mr. President, it is with deep sorrow that I rise today to join with my colleagues in paying tribute to my close friend, the distinguished senior Senator from the great State of Washington, Senator HENRY M. "SCOOP" JACKSON.

For nearly half a century, HENRY JACKSON ably served his State and Nation. Upon being elected to the U.S. House of Representatives in 1941, he rapidly gained a reputation as a leader who was more concerned with the well-being of the public than his own ascension in the political realm. It was this humble attitude of dedicated public service that caused him to rise to national prominence as a champion of the people.

After 11 years in the House, Washingtonians elected Scoop to the U.S. Senate, where his unceasing efforts for the common good continued. Senator JACKSON always considered it a high honor to represent the fine people of Washington State. It was his zealous desire to help others that captured the trust, faith, and affection of his own people and of many Americans.

After 30 years of service in the U.S. Senate, Senator JACKSON's diligent pursuit to serve his fellow man ended abruptly, leaving a huge void in this body which held him in such high esteem. Those of us who had the privilege of knowing and working with SCOOP JACKSON feel a tremendous sense of loss in his passing. Yet, the emptiness we feel in our hearts is conquered by the fond memories we have of him in our minds. I was honored to be among those who attended his funeral in his hometown of Everett, Wash.

Mr. President, I count myself fortunate to have known SCOOP JACKSON as a valued and trusted friend. His firm conviction on the importance of a strong national defense was similar to my own. As an advocate of peace through strength, SCOOP JACKSON knew that the only way to maintain our freedom in a world threatened by aggressive powers was through military preparedness. As members of the Senate Armed Services Committee, he and I worked closely on numerous projects involving crucial military issues, and I greatly admired his ability to exercise good judgment in every area pertaining to our Armed Forces. His commonsense approach and unswerving honesty won the respect of everyone who came in contact with him. Indeed SCOOP JACKSON never shrunk from telling it like it was.

Although he sought to serve the cause of peace and security, he was equally sensitive to the domestic needs of America. SCOOP JACKSON was a great defender of individual liberties, and was considered to be ahead of his time in many ways. He was a progressive leader who recognized the seriousness of environmental questions long before they became a popular issue. SCOOP fought diligently to protect the public's health and safety from the dangers of pollution and made great strides in helping to preserve our natural resources.

In all things, SCOOP JACKSON looked out for others. His selflessness was merely an extension of his deep faith in God. Indeed, his life reminds us that there is a moral force in the world that is far more powerful than the wealth and might of men.

SCOOP JACKSON's life personified the American character. From the earliest days of his youth, he understood well the value of opportunity and hard work. His relentless determination and commitment to excellence in all things allowed him to achieve much throughout his lifetime. SCOOP JACKSON was a product of American ideals. In the face of any conflict or tragedy, he always hoped for the best. Perhaps his secret to success was his unwavering sense of optimism and his earnest belief that good would always triumph. If SCOOP viewed something as wrong, he felt a personal challenge to make it right.

Mr. President, Senator HENRY JACKSON was, in the truest definition, a great American. This distinguished statesman was a patriot who never wavered in his dedication to the principles of peace, liberty, and freedom. He was a man who loved God, his country, and particularly his family.

My sincerest condolences go out to his beloved wife, Helen, his two children, Anna Marie and Peter, and other family members and friends during this time of bereavement. I know that they are comforted by the knowledge that SCOOP JACKSON gave his best to serve his God, his country, and his fellow man.

Mr. President, George F. Will, the renowned columnist who was a close friend of Senator JACKSON, delivered a most fitting eulogy at a memorial service for the senior Senator from Washington. I ask unanimous consent that portions of his eulogy, and another article which appeared in the Washington Post be included in the RECORD at the conclusion of my remarks.

Mr. President, at the request of the Vice President, I also ask unanimous consent that a telegram from Prime Minister Kaare Willoch of Norway regarding the passing of Senator HENRY M. JACKSON be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HE WAS THE FINEST PUBLIC SERVANT I HAVE EVER KNOWN

(By George F. Will)

Painted on the walls of the Senate reception room are portraits of the five men who were selected by a special committee, a quarter of a century ago, to constitute a kind of Senate hall of fame. the portraits are of Clay, Calhoun, Webster, La Follette and Taft. There is no more space on the walls of that room, but there is a nonfunctional door. That door should be removed, and the wall filled in, and adorned with a portrait of a sixth senator. A Senate hall of fame without Henry Martin Jackson is as unthinkable as Cooperstown without George Herman Ruth.

A silly person once said that only silly persons have heroes. But only exceptionally small persons will not pay homage to the exceptionally large persons among us. Heroes make vivid the values by which we try to live. I say, unabashedly, and with many others: Henry Jackson was my hero.

Because he was magnificently uninterested in the cosmetics of politics, dull persons considered him unexciting. But discerning persons by the millions recognized that his kind of character is as exciting as it is rare. Persons who, under the pressure of fashion, are as flexible as fly rods found Jackson incomprehensible. They came to the absurd conclusion that he had departed from the liberal tradition.

He was a pioneer of environmentalism. He was the preeminent champion of civil rights. He fought for the full domestic agenda and authorized legislation that put teeth into U.S. pronouncements on behalf of Jews and others persecuted by the Soviet regime. And if Jackson's proposals for substantial force reductions had been adopted, we might have had arms limitation agreements that actually limit arms.

The ironic truth is that Jackson was one of those persons—Felix Frankfurter was another—whose constancy was mistaken for change. He never wavered from his party's traditional belief that there is no incompatibility between government with a caring face at home and government with a stern face toward adversaries.

Jackson was an anchor against weariness, wishful thinking and apostasy in his party, and his country. He nurtured in this republic something without which no republic can long endure: a sense that problems are tractable. To be in his presence was to experience the wholesome infection of a reviving spirit. This was especially remarkable because he, more than any contemporary, looked unblinkingly at, and spoke uncomfortingly about, the terrors of our time. He taught less clear-sighted, less brave persons how to combine realism and serenity.

He missed the ultimate prize of our politics, perhaps because he lacked the crackling temperament that marks persons who burn on the surface with a hard, gem-like flame. If his political metabolism seemed uncommonly calm, that is because he had the patience of a mature politician—a gift of planning, thirst for detail and a sense of ripeness in issues. He had a flame, but he had depth in which he kept it.

In committees and on the Senate floor, he was a cannon loaded to the muzzle with knowledge born of diligence. His unrivaled effectiveness was a rebuke to the less industrious and a refutation of the theory that in politics fancy footwork is necessary and sufficient.

A legislature is a face-to-face society, where character and moral force tell. What Jackson did in committees and on the floor was awesome. But it was only a small fraction of the work he did during four decades of 18-hour days, working with one member after another, one member at a time, building coalitions of common sense.

I remember a day, nearly a decade ago, when I went panting along in the wake of Jackson on a campaign swing from Washington to Philadelphia to Shreveport and back. When I was decanted from the little plane after midnight, I was a broken shell of my former self. Henry Jackson, twice my age and fresh as a tulip, bounded off into the night.

His legendary energy flowed as much from his spirit as from his physiology. His biography is an essay on the sources of American vitality. He was the son of immigrants, and of the American West. He had the stamina of parents who crossed an ocean and then a continent, and he had the optimism of his region.

For longer than I have been alive, Congress has been embellished by his presence. And for longer than I live, public life shall be enriched by the radiating force of his character. Why? Consider.

If you wonder who real leaders are, find out who has real followers. By real followers I mean persons who follow a leader onto a path of life, who adopt careers where they navigate by stars he has taught them to see. The social geology of this city is layer upon layer of persons pulled into public life by the example of lives worth emulating. Today, in numerous public offices, and in law and journalism, there is a thick layer of Henry Jackson's men and women.

There are those, and they are legion, who call themselves "Jackson Democrats." I can say with absolute authority that there is such a thing as a "Jackson Republican."

Henry Jackson mastered the delicate balance of democracy, the art of being a servant to a vast public without being servile to any part of it. He was the finest public servant I have known.

BUSH AND SENATORS PAY FINAL TRIBUTE TO JACKSON

[From the Washington Post, Sept. 8, 1983]

EVERETT, WASH., Sept. 7—With almost two thirds of the Senate paying final tribute, Henry M. Jackson was buried today in the home town where he delivered the local newspaper as a boy and began his political career as a prosecuting attorney.

Vice President Bush, Chief Justice Warren E. Burger, former secretary of state Henry A. Kissinger and about 60 of Jackson's Senate colleagues were among the thousand dignitaries who attended the service at the First Presbyterian Church.

Former senator Warren G. Magnuson, who lost his seat in the 1980 election, welcomed the senators to the state on "this sad occasion."

Magnuson stood across the church from Jackson's flag-draped casket and said: "We served together in the House and the Senate almost half-a-century. We worked as a team shoulder to shoulder. Now that team is dissolved."

Magnuson, Sens. Edward M. Kennedy (D-Mass.) and Daniel Patrick Moynihan (D-N.Y.) and Rep. Thomas S. Foley eulogized Jackson as a man of compassion and a man of the people.

Jackson's children, Anna Marie, 20, and Peter, 17, also gave brief eulogies.

Anna Marie, a student at Stanford University, described how her father helped her with her political science classes.

"I remember one day when he called me from New York," she said. "He insisted on staying on the phone until I understood the history of the New Deal backwards and forwards. That phone call took 2½ hours."

Peter, a high school senior, recalled how his father was "so enormously proud" that as a five-year-old he had memorized the names of all the presidents. He said Jackson frequently stopped voters and other friends and had them listen while the lad recited the names.

Foley, who worked as an aide to Jackson before his election to Congress in 1964, said Jackson was more than a boss.

"He was to his staff a teacher. He taught by example," Foley's voice wavered as he spoke and at one point he paused, saying: "I guess you're never too old to shed a tear for an old friend."

Jackson, 71, died last Thursday of a heart attack at his home here. He was serving his sixth term in the Senate at the time of his death.

Gov. John Spellman, a Republican who must appoint Jackson's successor refused to discuss the subject until after the funeral. Republican sources says he is expected to name former governor Dan Evans on Thursday.

An opinion issued by state Attorney General Ken Eikenberry said that an election must be held Nov. 8 for the seat; the term runs until 1988. Eikenberry also said no primary election is necessary, setting off a scramble and presumably giving the new incumbent a significant edge if several Democrats challenge him and split the Democratic vote.

Mr. GEORGE BUSH,
President of the Senate of the United States of America, U.S. Senate, Washington, D.C.

Please accept my deepfelt condolences on the sad occasion of the passing away of Senator Henry M. Jackson. The Senator will be remembered by Norwegians as a distinguished politician and friend of Norway. Please convey my condolences to the bereaved family.

KAARE WILLOCH,
Prime Minister of Norway.

RESOLUTION OF THE NATIONAL BIPARTISAN COMMISSION ON CENTRAL AMERICA

The Secretary of the Senate submitted for the RECORD the following resolution of the National Bipartisan Commission on Central America, together with the letter of transmittal from Dr. Henry A. Kissinger, Chairman, dated September 8, 1983:

THE NATIONAL BIPARTISAN
COMMISSION ON CENTRAL AMERICA,
Washington, D.C., Sept. 8, 1983.

Hon. WILLIAM FRYE HILDENBRAND,
Secretary, U.S. Senate, Washington, D.C.

DEAR MR. HILDENBRAND: On September 7, 1983, the National Bipartisan Commission on Central America unanimously adopted a resolution dedicating its meeting to the memory of Senator Henry M. Jackson. In accordance with that resolution, I am forwarding a copy to you with the request that it be made part of the Congressional Record, Proceedings and Debates of the 98th Congress.

Sincerely,

HENRY A. KISSINGER.

Enclosure: September 7, 1983 Resolution.

RESOLUTION OF THE NATIONAL BIPARTISAN COMMISSION ON CENTRAL AMERICA

[ADOPTED SEPTEMBER 7, 1983]

Whereas, Henry M. Jackson, a Senator from the State of Washington, has met his untimely death on Thursday, September 1, 1983, and;

Whereas, he served his country with great dedication and with unexcelled legislative skills, leaving his imprint in such diverse areas as National Security, Energy, and the Environment, and;

Whereas, his private and public life were beyond reproach; who was sincere and equitable; honest and honorable; respected and warm; and;

Whereas, he conceived the idea of a Bipartisan Commission on Central America, and;

Whereas, he was a valued Senior Counselor on the National Bipartisan Commission on Central America, and;

Whereas, we dedicate this meeting in memory of our colleague and Friend, Senator Henry M. Jackson of Washington: Now, therefore be it

Resolved, that this commission, when it adjourns today, do so in the name and on behalf of the Members of the National Bipartisan Commission on Central America, with deep and sincere regret and in respect to the memory of Henry M. Jackson; and be it further

Resolved, that the Chairman of the National Bipartisan Commission on Central America forward a copy of this Resolution to Mrs. Jackson, the widow of Senator Henry M. Jackson; and also that a copy be forwarded to the Secretary of the United States Senate with a request that this Resolution be made part of the *Congressional Record*, Proceedings and Debates of the 98th Congress.

Resolved, this Seventh day of September, 1983.

HENRY A. KISSINGER,
Chairman.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, for a variety of reasons we need now to interrupt this in order to administer the oath of office to the Senator-designate. I have indicated to other Senators who are not here that there will be the briefest of quorum calls as a signal that the ceremony was about to occur.

So, the quorum call I am about to suggest will last only a moment, but I now suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, if we could have order in the Senate, I intend to propound a unanimous-consent request and then proceed.

The PRESIDENT pro tempore (Mr. THURMOND). The Senate will come to order.

Those standing will be seated.

That applies to staff members standing right back here. Do not take so long.

Mr. BAKER. Mr. President, first may I congratulate the distinguished President pro tempore for his diligence in obtaining and keeping order in the Senate? I admire the style.

Mr. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. BYRD. Mr. President, I compliment the President pro tempore. He is following out the rules of the Senate and he is maintaining order without a point having been raised from the Senate floor. That is always the duty of the Chair, and I compliment him. I have not heard such firmness from the Chair in quite a long time.

Mr. BAKER. And it is refreshing indeed.

The PRESIDENT pro tempore. I might say that there are still some staff members standing back here who will be seated on both sides. Either be seated or leave the floor.

The majority leader may now proceed.

Mr. BAKER. I thank the Chair.

Mr. President, I ask unanimous consent that the ceremony of induction of the Senator-designate not appear in the RECORD as an interruption of the statements in respect to the passing of Senator HENRY JACKSON.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ADMINISTRATION OF OATH TO DANIEL J. EVANS, SENATOR FROM WASHINGTON

Mr. BAKER. Now, Mr. President, I believe there is at the desk a letter of appointment and designation from the Governor of the State of Washington to fill the vacancy occasioned by the death of the late Senator JACKSON.

I ask that the Chair now proceed in obedience to that appointment under the Rules of the Senate.

The PRESIDENT pro tempore. The Chair lays before the Senate the certificate of appointment of Daniel J. Evans of the State of Washington.

Without objection, it will be placed on file and the certificate of appointment will be deemed to have been read.

The certificate of appointment is as follows:

STATE OF WASHINGTON,
OFFICE OF THE GOVERNOR,
Olympia, Wash., Sept. 8, 1983.

Mr. WILLIAM F. HILDENBRAND,
Secretary, U.S. Senate, Washington, D.C.

DEAR MR. HILDENBRAND: Enclosed is the Certificate of Apppointment for the Honorable Daniel J. Evans to fill the vacancy caused by the death of the Honorable Henry Jackson.

Pursuant to your letter of September 2, 1983, this Certificate should be in conformance with the resolution adopted by the United States Senate on July 17, 1961.

If there are any questions, please do not hesitate to call on me.

With best wishes,

Sincerely,

JOHN SPELLMAN,
Governor.

Enclosure.

CERTIFICATE OF APPOINTMENT

TO THE PRESIDENT OF THE SENATE OF THE UNITED STATES: This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the State of Washington, I, John Spellman, the Governor of said State, do hereby appoint Daniel J. Evans a Senator from said State to represent the State of Washington in the Senate of the United States until the vacancy therein, caused by the death of the Honorable Henry M. Jackson, is filled by election as provided by law.

Witness: His excellency our Governor John Spellman, and our seal hereto affixed at Olympia, Washington, this 8th day of September, in the year of our Lord 1983.

By the Governor:

JOHN SPELLMAN,
Governor.
RALPH MUNRO,
Secretary of State.

The PRESIDENT pro tempore. If the Senator-designate will present himself at the desk, the Chair will administer the oath of office required by the Constitution and prescribed by law.

Mr. EVANS of Washington, escorted by Mr. GORTON of Washington, advanced to the desk of the President pro tempore; the oath prescribed by law was administered to him by the President pro tempore; and he subscribed to the oath in the official Oath Book.

[Applause, Senators rising.]

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I know that Members wish to greet our new colleague, but there is other business to be transacted, and I am sure he and others would join in wishing us to proceed at this time.

Mr. President, I ask unanimous consent that the two measures I am about to ask the Senate to address now appear in the RECORD in sequence after the conclusion of all of the statements with respect to Senator JACKSON that may be offered today.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ELECTION OF LARRY E. SMITH AS SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE

Mr. BAKER. Mr. President, it is my sad duty to report, as Members perhaps already know, that today is the last day of service of our distinguished Sergeant at Arms, Hon. Howard Liebengood. He is leaving us to take a position in the private sector of our Nation's economy, and we wish him well. But it is necessary then that we elect a new Sergeant at Arms. There is a resolution at the desk, and I ask now for its immediate consideration.

The PRESIDENT pro tempore. Is there objection? If not, it is so ordered.

The clerk will report the resolution.

The legislative clerk read as follows:

Resolved, That Larry E. Smith be, and he is hereby, elected Sergeant at Arms and Doorkeeper of the Senate, beginning September 13, 1983.

The Senate proceeded to consider the resolution.

The resolution (S. Res. 211) was agreed to.

WELL-EARNED GRATITUDE

Mr. BYRD. Mr. President, I want to join the distingushed majority leader in expressing to Howard Liebengood my own appreciation for the services that he has offered me during his tenure as Sergeant at Arms, and I want to convey to Mr. Liebengood the gratitude of my Democratic colleagues for the graciousness, courtesy, and efficiency with which he has conducted the affairs of the office of Sergeant at Arms since January 1981.

In addition, I wish Mr. Liebengood every success in his new responsibilities in the private sector, and I am confident that his successor, Larry Smith, will continue to conduct the affairs of the office of Sergeant at Arms in the excellent fashion in which they have been conducted during the months that Mr. Liebengood has served in that capacity.

The change of staff command in any one of the important staff support positions in the Senate reminds us that behind all of the 100 Senators in this esteemed body are many dedicated, intelligent, and expert men and women who every day assist us in our work. An occasion such as this gives us a chance to express our thanks not only to outstanding men such as Howard Liebengood but to all of those who help us in the conduct of our elected duties as Senators and of the work of the Senate as a corporate institution. Whether in our cafeterias, in the press gallery, in police duty, in constituent services, in helping us make party policy, or in any one of humdreds of ways, we are fortunate to have high caliber staff people working for us, and we thank them for their loyalty and their hard work.

CONDEMNING THE BRUTAL BEHAVIOR OF THE GOVERNMENT OF THE UNION OF SOVIET SOCIALIST REPUBLICS FOR THE DESTRUCTION OF KOREAN AIR LINES FLIGHT 007 WITH THE LOSS OF 269 INNOCENT LIVES

Mr. BAKER. Mr. President, on another matter, on behalf of the distinguished minority leader and myself,

and on behalf of the distinguished Senator from Illinois (Mr. PERCY), the distinguished Senator from Rhode Island (Mr. PELL), the distinguished Senator from Texas (Mr. TOWER), and the distinguished Senator from Georgia (Mr. NUNN), I send a joint resolution to the desk in respect to the loss of the Korean Air Lines Flight No. 007.

Before it is reported I have a unanimous-consent request to make. Mr. President, I ask unanimous consent that after the resolution is reported it be temporarily laid aside to recur as the pending business at 12 noon on Wednesday next; that there be 2 hours of debate at that time on this resolution; that no amendments be in order; that the time for debate be equally divided between the majority and minority leaders or their designees, and that the vote occur at 2 o'clock, the provisions of rule XII, paragraph 4, being waived.

The PRESIDENT pro tempore. Is there objection?

Mr. ARMSTRONG. Mr. President, reserving the right to object——

The PRESIDENT pro tempore. The Senator from Colorado.

Mr. BAKER addressed the Chair.

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I withdraw the request.

The PRESIDENT pro tempore. The request is withdrawn.

ORDER FOR RECESS UNTIL 3 P.M.

Mr. BAKER. Mr. President, there is time for morning business, and I believe there may be other business to transact or there may be other statements to be made. Time for the transaction of routine morning business extends for 1 hour. May I say for the benefit of Senators it is the intention of the leadership to recess the Senate after the time for the transaction of routine morning business has been closed and to do so until 3 p.m. I now make that request, that at the expiration of the time for the transaction of routine morning business the Senate then stand in recess until the hour of 3 p.m. today.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

SENATE SCHEDULE

Mr. BAKER. Now, one brief word about the schedule of the Senate. May I say that as soon as morning business is closed that Radio Marti will automatically recur as the pending business. I hope we may be able to dispose of that measure today. I do not have a request for a rollcall vote on that measure, although there may be such a request.

As soon as Radio Marti is disposed of, Mr. President, the Interior appropriations bill will recur as the pending business.

I do not anticipate that we will finish that bill today. It is more likely that we will finish both Radio Marti and the Interior appropriations bill tomorrow or perhaps on Wednesday.

If possible, Mr. President, it is the hope of the leadership that we can reach the DOD authorization conference report tomorrow. I do expect a vote, of course, on that measure. The remainder of the week, Mr. President, is less clear.

On the matter of the Korean Air Lines plane, there was a request by a Senator, who is perfectly within his rights, to examine that resolution further before the unanimous-consent request is entered into. I respect that request. I have withdrawn, therefore, the unanimous-consent request. I do expect, however, to make it again later in the day.

Mr. PERCY. Mr. President, will the majority leader yield for a question?

Mr. BAKER. Yes, I yield.

Mr. PERCY. Mr. President, as the majority leader knows, we have been trying to schedule the State Department authorization, military security, and foreign aid for some time now. We both have a commitment to the Secretary of State that this would be a matter of urgent priority.

Could the leader give some idea as to when we might be prepared to have those matters debated on the floor?

Mr. BAKER. Yes. Mr. President, I am aware of the urgency of that situation. I say to the distinguished chairman of the Foreign Relations Committee that it would be my hope that he and I can consult with the Secretary of State and decide which one of those bills should come up next, and we will try to get to it either later this week or next week, if possible.

Mr. PERCY. I thank the majority leader very much.

CONDEMNING THE BRUTAL BEHAVIOR OF THE GOVERNMENT OF THE UNION OF SOVIET SOCIALIST REPUBLICS FOR THE DESTRUCTION OF KOREAN AIR LINES FLIGHT 007 WITH THE LOSS OF 269 INNOCENT LIVES

Mr. BAKER. Mr. President, I sent the resolution to the desk and it has not yet been reported. I ask that the clerk report the resolution at this time.

The PRESIDING OFFICER (Mr. WALLOP). The clerk will report the resolution.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 158) condemning the brutal behavior of the Government of the Union of Soviet Socialist Republics for the destruction of Korean Air Lines Flight 007 with the loss of 269 innocent lives.

Mr. BAKER. Mr. President, I believe it would be appropriate for the clerk to continue reading the resolution.

The PRESIDING OFFICER. The clerk will continue reading.

The legislative clerk read as follows:

S.J. RES. 158

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas, the United States joins the world community in expressing its sense of shock and outrage over the actions of the Soviet Government on August 31, 1983, which led to the destruction of Korean Air Lines flight 007 (hereinafter referred to as KAL 007) with the loss of 269 innocent lives;

Whereas, KAL 007, en route from Anchorage, Alaska to Seoul, Republic of Korea, innocently strayed into Soviet airspace on August 31, 1983;

Whereas, Soviet authorities tracked the flight of KAL 007 for more than two hours, but failed to exhaust all internationally recognized procedures to warn the aircraft of its error, to protect its passengers, and to assist in its safe landing;

Whereas, as KAL 007 was leaving, or had left, Soviet airspace, a Soviet Air Force fighter fired air-to-air missiles at and destroyed the unarmed, clearly-marked civilian airliner with innocent men, women, and children of 13 nationalities aboard;

Whereas, as a result of this barbaric action, 269 people, among them 61 of our fellow citizens lost their lives;

Whereas, the Soviet Government has refused to make known the true facts, to accept responsibility, and to apologize, for this unconscionable act;

Whereas, the Soviet Union has continued to deny access to the area where the airplane may have gone down;

Whereas, the Soviet Government has proclaimed publicly its intention to repeat this murderous act if another airliner wanders inadvertently into Soviet airspace;

Whereas, this cold-blooded attack on a commercial airliner straying off course will rank among one of the most infamous and reprehensible acts of aviation history;

Resolved, by the Senate and the House of Representatives in Congress assembled, that the United States hereby

(1) condemns this Soviet crime and calls for a full and frank explanation from the Soviet Union of its brutal behavior;

(2) extends its deepest sympathies to the families who lost loved ones and supports their rights to obtain full and just compensation from the Soviet Union;

(3) calls on the Soviet Union to assist international efforts to recover the remains of the victims;

(4) reaffirms the actions against Aeroflot and calls for an international investigation conducted by the International Civil Aviation Organization;

(5) urges the international community to demand that the Soviet Union modify its air defense procedures and practices to assure the safe passage of commercial airliners when navigational errors occur in the future;

(6) urges other nations to join with the United States in applying appropriate sanctions against Soviet civil aviation;

(7) notes that the Soviet Government's refusal to accept responsibility for this tragic event raises serious doubts among the world

community of nations over the unwillingness of the Soviet Union to behave as a responsible member of the international community;

(8) urges our allies to cooperate with the United States in implementing additional sanctions until such time as the Soviet Government apologizes unequivocally for its actions, fully compensates the families of innocent victims, and agrees to abide by internationally recognized and established procedures which are purposefully designed to prevent the occurrence of such tragedies.

Mr. BAKER. Mr. President, a part of the unanimous-consent request that I withdrew provided that further consideration of this measure would be put over until Wednesday at 12 noon and a vote would occur thereon at 2 p.m. I would like to reiterate that portion of that request and we will withhold the remainder of the request in respect to whether amendments are in order or not.

The PRESIDING OFFICER. With that understanding, is there objection? Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. BAKER. Yes.

Mr. PERCY. Mr. President, I wish to commend the joint leadership for this resolution. I am proud indeed to be a principal cosponsor of it.

Mr. BAKER. I thank the Senator.

Mr. President, there is time remaining for the transaction of routine morning business, is there not?

The PRESIDING OFFICER. There is.

H.R. 2760—RELATING TO U.S. ASSISTANCE TO NICARAGUA AND CENTRAL AMERICA

The PRESIDING OFFICER. There is a bill to be read the second time at this point.

Mr. BAKER. Mr. President, this is a bill that is at the desk under the provisions of rule XIV?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Very well.

The PRESIDING OFFICER. The clerk will read.

The legislative clerk read as follows:

A bill (H.R. 2760 to amend the Intelligence Authorization Act for fiscal year 1983 to prohibit United States support for military or paramilitary operations in Nicaragua and to authorize assistance, to be openly provided to governments of countries in Central America, to interdict the supply of military equipment from Nicaragua and Cuba to individuals, groups, organizations, or movements seeking to overthrow governments of countries in Central America.

Mr. BAKER. Mr. President, on behalf of another Senator I am requested to and I do now object to further consideration of the measure.

The PRESIDING OFFICER. The bill will go on the calendar.

Mr. BAKER. Mr. President, I believe the Senator from Maryland seeks recognition.

The PRESIDING OFFICER. The Senator from Maryland.

AUTHORIZING THE FURTHER PARTICIPATION OF U.S. ARMED FORCES IN THE MULTINATIONAL PEACEKEEPING FORCE IN LEBANON

Mr. MATHIAS. Mr. President, I have a joint resolution to send to the desk. I ask unanimous consent that the text be printed in the RECORD and that the resolution be kept at the desk until the close of business today for additional cosponsorship.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. And that at the close of business it would be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution follows:

S.J. RES. 159

Whereas the achievement of peace and stability in an independent Lebanon is an important national objective of the United States and a vital step toward a broader peace settlement in the Middle East; and

Whereas United States Armed Forces, in combination with forces from France, Italy and Great Britain have performed a constructive role in assisting the government of Lebanon in its efforts to restore the stability and prosperity of that country; and

Whereas under Article 1, Section 8 of the Constitution of the United States the Congress has the responsibility to make decisions regarding the commitment and maintenance of United States Armed Forces abroad, as recognized by the War Powers Resolution of 1973 (Public Law 93-148); and

Whereas the circumstances of the United States Armed Forces in Lebanon, beginning with the fatal attack on U.S. Marine positions on August 29 and the further exchanges of fire which have resulted in continuing U.S. casualties clearly indicate a situation of hostilities or imminent involvement in hostilities by U.S. forces, as contemplated by Section 4(a)(1) of Public Law 93-148; and

Whereas this situation requires congressional authorization to continue the presence of United States Armed Forces in a situation of hostilities or imminent involvement in hostilities for longer than 60 days, as provided in Section 5(b) of Public Law 93-148: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This joint resolution may be cited as the "Lebanon Peacekeeping Resolution."

SEC. 2. For the purpose of this authorization, the 60-day period specified in Section 5(b) of Public Law 93-148 is determined to have begun on August 31, 1983.

SEC. 3. The President is authorized to maintain United States Armed Forces in Labanon as part of a multinational peacekeeping force for a period of 120 days from the expiration of the 60-day period specified in Section 5(b) of Public Law 93-148.

Mr. MATHIAS. Mr. President, on September 29, 1982, President Reagan reported to the Congress that the U.S. Armed Forces had been returned to Lebanon to participate in the multinational peacekeeping force. In his report, he made clear that he did not expect the U.S. forces to become involved in hostilities.

After hearings by both the Foreign Relations Committee and, in the other body, the Foreign Affairs Committee, where the President's assessment was reviewed, the Congress indicated its agreement with his judgment by choosing not to exercise its prerogative under the War Powers Act of 1973 to regulate the deployment of troops and to limit their presence to 60 days.

Now, the situation has changed. The U.S. Armed Forces are clearly confronting hostilities. To ignore this change is to ignore the facts. Since August 28, fighting has regularly occurred between Lebanese armed forces and various armed factions in the vicinity of the Beirut Airport, where the U.S. contingent of the multinational force is stationed. Marine positions have come under mortar, rocket, and small arms fire, while several artillery rounds have fallen near the U.S. support vessels lying offshore. To date, 4 marines have been killed and at least 24 injured as a result of these hostilities. French forces have sustained a number of casualties. And, of course, hundreds of Lebanese have been killed or wounded.

There is no question of whether or not U.S. Armed Forces are engaged in hostilities. The facts speak for themselves. What we must decide is whether or not the continued presence of U.S. Armed Forces in Lebanon is necessary. I believe that it is, and I am introducing a joint resolution to provide the President with the authority which is required by the War Powers Act to maintain the forces in this troubled country.

The resolution gives the President 120 days from the expiration of the 60-day period specified in the War Powers Act or until February 26, 1984, before he must return to Congress for a new authorization. There is no magic in this 6-month period. It is simply an attempt to provide the President with the flexibility and a reasonable amount of time to promote a negotiated settlement in accordance with the statute law of the United States. It is the law. It is not a blank check of authority for the President for these 6 months. Should the situation on the ground change, he must obtain further authorization from Congress to expand the number or the role of the U.S. military in Lebanon. However, he may withdraw the troops at any time.

The prospects for an early peace in Lebanon are not good. Restoring central authority there will not be easy

and the probability of continuing and escalating conflict between the various political factions in the country is high. But I believe the United States has a continuing interest in building a strong united Lebanon as a part of a general Middle East settlement. I also believe that if we now precipitously withdraw our forces from that country after they have sustained casualties, the world will get the wrong message about the U.S. ability to maintain a policy under pressure.

The War Powers Act creates a special relationship between the executive and the legislative branches to promote coordination on issues of war and peace. If the President fails to abide by the act, he runs a serious risk that the American people will not support our commitment in Lebanon.

The Reagan administration needs broad national support if it is to continue to keep U.S. Marines in the multinational force. At the same time, it is incumbent upon Congress to see that the act is implemented. The current Beirut operation is the first time in the 10-year life of the War Powers Act that U.S. forces equipped for combat have been deployed in a potentially hostile environment and maintained there for more than 60 days. The success of our efforts today to safeguard both the letter and the spirit of the law will greatly affect the ability of future Congresses to carry out their constitutional responsibilities.

The purpose of the resolution I am introducing today will fulfill the constitutional responsibility of the Congress in the conduct of foreign affairs. The Founding Fathers determined that foreign policy should be the joint responsibility of the executive and the legislative branches, making the President Commander in Chief, but assigning to the Congress the issues of war and peace. The War Powers Act is designed to rationalize this fundamental division of power.

The debate which can take place in the days ahead will give Congress an opportunity to exercise its constitutional responsibility with or without the submission of a Presidental report indicating hostilities in the area of deployment. Congressional authority does not derive from such a report; it derives from the Constitution itself.

Article I, section 8 provides that it is the Congress which shall "declare War, grant Letters of Marque and Reprisal, and make Rules concerning Captures on Land and Water."

Section (8) further provides that it is the Congress which makes "rules for the government and regulation of the land and naval forces." As the Foreign Relations Committee observed in its report on the War Powers Act a decade ago, "There is no way to legislate national wisdom * * *." We can, however, provide important protection to the people of America by insuring that the collective judgment of both the Congress and the President will be brought to bear in decisions involving the use of the Armed Forces of the United States.

Mr. President, I invite all Senators to join in support of this joint resolution. I hope that it can be considered at an early date by the Committee on Foreign Relations. I see that the chairman of the committee is here. I hope that it will receive the attention of the full Senate with the sense of urgency which the situation in Lebanon requires.

Mr. PERCY. Mr. President, I wish to commend my colleague, the senior Senator from Maryland, for introducing this resolution today. Its purpose is to initiate the necessary process of review and approval under the war powers resolution for the continuation of U.S. participation in the multinational peacekeeping force in Lebanon. Because of my feeling that the 6-month time limitation included in this resolution may send a confusing signal which could trigger action that would be contrary to our own interest and the security interests of our forces in Lebanon, I have decided not to cosponsor this particular version of the resolution and have so advised Senator MATHIAS, but I do support the basic thrust and purpose of the Senator's resolution.

I have supported U.S. participation from the outset because I believe the independence of Lebanon is vital to any successful policy in the critical Middle East area. I continue to feel that we must play an active role in this effort and follow through on our commitment to assist the Government of Lebanon in conjunction with other close allies.

We recognized from the beginning of this operation that it posed significant risks of hostilities, and for that reason, I felt at the time that the President should have sought congressional authorization in initiating our military participation. On September 24 of last year, I joined with the ranking minority member of the Foreign Relations Committee, Senator PELL, in recommending to the President that he invoke the relevant section of the war powers resolution, section 4(a)(1), and thereby trigger the necessary review and decision by the Congress. I am confident that the President would have received the support of Congress at that time had he done so.

I ask unanimous consent that the text of that letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., September 24, 1982.

The PRESIDENT,
The White House.

DEAR MR. PRESIDENT: Your announcement that U.S. Marine will be returned to Beirut reflects the serious state of affairs in that city and the critical importance of restoring stability to the country and people of Lebanon. However, the uncertainties surrounding the introduction of United States Armed Forces at the present time seem much greater than during the previous Beirut operation. In particular, the objectives of the mission, the location and role of U.S. personnel, and the expected duration of their presence in Beirut are still not clear to us.

Without knowing more about the purposes and circumstances of the new Beirut operation, therefore, it is difficult to judge the assertions made by some members of your Administration that U.S. forces are not expected to become involved in hostilities. Despite the withdrawal of Palestinian fighters, the bitterness and volatility of the situation in Beirut seem only to have increased during the past few weeks, particularly in the absence of any firm indication that other foreign forces in the area will soon be departing. Therefore, it would seem to us at the present time that the circumstances surrounding this introduction of U.S. armed forces are those contemplated in Section 4(a)(1) of the War Powers Resolution, that is, "situations where imminent involvement in hostilities is clearly indicated by the circumstances". We urge that in making your required report to Congress, you do so under that section of the resolution, and not under Section 4(a)(2) which is reserved for situations in which hostilities are not a serious possibility.

We look forward to fuller consultations with you and Secretary Shultz on these matters and share your hopes for a peaceful and limited American operation in Beirut.

Sincerely,

CHARLES H. PERCY,
Chairman.

CLAIBORNE PELL,
Ranking Minority Member.

Mr. PERCY. The President, of course, made a different determination last year, believing that the risks to our forces in Lebanon were not sufficient to justify a finding—as the war powers resolution puts it—that "imminent involvement in hostilities is clearly indicated by the circumstances." His initial judgment was vindicated by events; until very recently our Marines ably performed their assignment in Lebanon without serious military exchanges. The one tragic casualty we did experience resulted from a landmine, not from an outbreak of hostilities. The Committee on Foreign Relations continued to monitor the situation carefully. On December 15, I joined with 13 other members of the committee in a second letter to the President on this issue, in which we made clear that we were not seeking a confrontation with the President on the war powers issue. However, we also made clear our expectation that formal congressional authorization would be sought before undertaking long term or expanded commitments

or extending indefinitely the present level of operations.

I ask that the full text of this letter appear in the RECORD at this time, along with the text of my floor statement of December 18 explaining it.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., December 15, 1982.

DEAR MR. PRESIDENT: As Members of the Senate Foreign Relations Committee, we have a particular concern for the situation in Lebanon and a particular responsibility under the War Powers Resolution with respect to the commitment of United States Armed Forces abroad. We are convinced that it is in the national interest of the United States to work toward a stable and independent Lebanon as part of a broader peace settlement in the Middle East. We also recognize that the current Multinational Force in Lebanon has played a constructive role in preventing further violence in and around Beirut and that the U.S. Marine component of that force has performed admirably under difficult circumstances.

In reintroducing United States Armed Forces into Lebanon on September 29, you reported under the War Powers Resolution that there was "no intention or expectation that U.S. Armed Forces will become involved in hostilities." Individual members of Congress, including members of our Committee, have disagreed with your assessment of the risks inherent in the Beirut operation and, therefore, with your interpretation of the War Powers Resolution in this case. No member has chosen to contest the issue through Congressional action at this time. Under the procedures set out in the War Powers Resolution, Congress reserves the ability to direct the removal of such forces at any time they are engaged in hostilities if it should determine that the circumstances no longer justify a U.S. military presence.

As the Beirut operation continues, and as discussions proceed regarding its possible extension or expansion, we want to ensure that the Congress has an adequate opportunity to consider the full implications of any extended commitment of U.S. forces and to fulfill its responsibilities in this area. We recognize the difficulties in developing longer-term proposals for such a multinational force until the negotiations for the departure of all foreign forces have progressed. However, we would expect Congress to be involved at the earliest possible stage in the development of such proposals and that formal Congressional authorization would be sought before undertaking long-term or expanded commitments or extending indefinitely the present level of operations.

In the longer term, it may be appropriate to consider more general legislation to clarify the respective roles of the President and the Congress in undertaking the commitment of U.S. armed forces to such operations. We look forward to further discussions with you and the members of your Administration in the exercise of our joint responsibilities in this area.

Sincerely.

Charles H. Percy, Richard G. Lugar, Nancy Landon Kassebaum, Paul E. Tsongas, S. I. Hayakawa, John Glenn, Charles McC. Mathias, Jr., Claiborne Pell, J. R. Biden, Jr., Larry Pressler, Edward Zorinsky; Chistopher J. Dodd, Paul Sarbanes, and Rudy Boschwitz.

U.S. TROOPS IN BEIRUT

Mr PERCY. Madam President, a force of 1,200 U.S. marines has been stationed in Beirut, Lebanon for nearly 3 months as part of a multinational effort to restore stability in the wake of the tragic events of September. To be precise, November 28 marked the 60th day of this operation by U.S. Armed Forces equipped for combat. Under the war powers resolution of 1973, 60 days marks the limit of the President's authority to maintain U.S. Armed Forces in a foreign country if they have been introduced into actual hostilities or, as the resolution says, "where imminent involvement in hostilities is clearly indicated by the circumstances." Beyond this emergency period, the resolution provides that the President must have specific authorization from Congress to continue combat operations, except for a limited extension of time if needed to insure a safe disengagement.

The authority of Congress to insist on such a role is founded on several provisions of the Constitution, including its enumerated powers to declare war, to maintain and to make rules for the Armed Forces and to provide for "the common defense." The Founding Fathers clearly intended that decisions regarding the use of force should be made jointly by the President and Congress and gave the legislative branch the authority to establish such statutory mechanisms as might be "necessary and proper" to the execution of that joint responsibility. The war powers resolution was a conscientious and constructive effort to provide a procedural framework to accomplish this objective under the changed circumstances of modern diplomacy and warfare. But the resolution is not a magic solution to the practical difficulties of interbranch collaboration, nor is it a formula for resolving all questions of constitutional authority regarding the commitment of troops abroad. The circumstances of the current Beirut operation are only the latest case in in point.

At the outset of the current operation in Beirut, the second of its kind in 2 months, I expressed my view that the risk of hostilities involving U.S. troops was serious enough to trigger the 60-day time limit of the war powers resolution. The ranking minority member of the Foreign Relations Committee, Senator CLAIBORNE PELL, joined me in advising the President to submit his report to Congress under section 4(a)(1) which includes the 60-day limitation. Our concern was, in part, to avoid a situation in which American marines were being killed in an operation which the Congress had no formal part in approving. Other Members of Congress expressed similar concerns about the serious risks of combat. I also expressed at the time my strong support for the operation itself, and emphasized the importance of our efforts to restore the authority and confidence of the central government in Lebanon.

In his report to Congress on September 29, President Reagan did not cite a particular section of the war powers resolution. He did make clear, however, that he did not consider the threshold of "imminent hostilities" as having been met. I think the President and his advisers made this determination carefully and in good faith, not simply to bypass the 60-day limit in the resolution. The situation required a difficult judgment call, a call with—as I openly acknowledged at the time—it was the President's initial responsibility to make.

Since that time, as the war powers resolution is structured, the ball has been in our court. Any Member of Congress who opposed the Beirut operation and believed that it was a situation of imminent hostilities, could take advantage of the resolution's procedure for ordering the withdrawal of U.S. forces—irrespective of the 60-day time frame—by concurrent resolution. No one has yet done so. Those Members, like myself, who support the present operation, waited to see whether our initial concerns about serious hostilities involving U.S. forces would be realized. If we had continued to believe that the operation could only be viewed as one of actual or imminent hostilities, our responsibility would have been to introduce a resolution extending the President's authority to keep the Marines in Beirut for an additional period of time. The war powers resolution provides an expedited procedure for the consideration of such a resolution and any Member of Congress can institute this process.

However, I concluded during the congressional recess, after following the situation in Lebanon carefully, that such an authorizing resolution was not called for. The President's original hope of avoiding involvement in hostilities has so far been realized. No doubt, the absence of serious hostilities involved a significant amount of good luck, but it is nevertheless a credit to the skill and restraint of all the parties involved.

Nevertheless, the absence of hostilities during the initial 60 days of the Beirut operation does not mean that Congress has no further responsibilities in the matter. If, at any time, our Marines do become engaged in hostilities, the war powers resolution provides a procedure for Congress to consider the situation and, if both the House and Senate conclude that there is inadequate justification for further U.S. involvement, to direct the withdrawal of U.S. forces by concurrent resolution. Therefore, Congress has a continuing responsibility to follow the developments in Lebanon very carefully and to consult closely with the President and his advisers regarding our future policy toward that country. The Committee on Foreign Relations on December 1 held an informative and helpful hearing with Acting Secretary of State Kenneth Dam to maintain this process, and we were further briefed on the status of negotiations by Ambassador Habib last Friday.

The responsibilities of Congress are not limited, however, to situations of actual or clearly imminent hostilities. The long-term commitment of U.S. Armed Forces abroad is a matter for joint decision by the President and the Congress. In sending U.S. marines back into Lebanon along with contingents from France and Italy, the President was responding to an obvious emergency prompted by the murder of the Lebanese President and hundreds of Palestinian civilians. Since then, our troops have performed admirably in assisting the Lebanese Government and its Armed Forces to regain control in and around the capitol and reduce the dangers of further violence there. I can testify to this as I visited with many of them just a few months ago while in Beirut.

But this mission was clearly meant to be limited in both scope and time; in fact until recently, administration officials reportedly expressed the hope that U.S. forces would be withdrawn from Lebanon by the end of the year. That objective certainly can no longer be met, and without further progress on a broader agreement involving the withdrawal of foreign forces from Lebanon, the longer term need for the presence of U.S. Armed Forces is uncertain. It may be that

as part of the withdrawal arrangement, U.S. troops will need to play a continuing role in a broader multinational peacekeeping arrangement. I think the Congresses will continue to support such a mission as part of an overall arrangement to restore prosperity and stability to that crucial part of the Middle East. It is difficult to see how a broader framework for peace in the Middle East can be accomplished without a more stable Lebanon.

However, it is also my view that the President should not undertake such a longer term commitment of U.S. forces to Lebanon without clear congressional approval. The indefinite presence of U.S. combat forces in Lebanon would amount to a major security commitment to that country by the United States, whether or not there is a prospect of actual or imminent hostilities. The establishment of such commitments is not a matter addressed by the war powers resolution as such, but it has been a subject of continuing concerns by the Congress during the postwar era and was the subject of the national commitments resolution passed by the Senate a decade ago. That resolution stated the Senate's view that the establishment of a national commitment, including the use of U.S. Armed Forces in a foreign country, should only be made by means of a treaty involving Senate approval or joint action of the House and Senate. Thus far in the Lebanon operation, Congress has not participated in either manner. Therefore, once the administration knows what longer term arrangement is possible there, I would expect it to come to Congress to explain its plans and to seek appropriate congressional approval, perhaps in the form of a joint resolution such as that passed by Congress a year ago to provide the authority and the funds for the multinational force and observers (MFO) in the Sinai. I do not think it would be appropriate on constitutional grounds, or wise on political grounds, to continue an indefinite U.S. troop presence in Lebanon without congressional approval. Congress should and will share the responsibility with the executive branch.

Madam President, as a result of concerns expressed on this point by a number of committee members, the committee agreed yesterday to send a letter to the President explaining our view that the long term or expanded commitment of U.S. Armed Forces to Lebanon should only be undertaken with the authorization of Congress. I ask unanimous consent that the text of that letter appear in the RECORD at this point.

Mr. PERCY. Some 5 months later, in reporting out the Lebanon Emergency Assistance Act, the committee wrote such a requirement into the bill. The House Foreign Affairs Committee took a similar position and our positions were sustained by the full House and Senate. On June 27, the President signed the bill into law, which included the final version of this language in section 4:

> The President shall obtain statutory authorization from the Congress with respect to any substantial expansion in the number or role in Lebanon of United States Armed Forces * * *.

That section also made clear the view of Congress that it did not change the preexisting requirements of the war powers resolution with respect to the involvement of our forces in hostile situations. This provision was, in fact, added at the suggestion of the senior Senator from Maryland, Senator MATHIAS.

Therefore, whether or not the President should decide to make a substantial adjustment in our forces in Lebanon, the standard of the war powers resolution continues to operate in relation to these forces. The outbreak of serious hostile exchanges of fire on August 29, resulting in the death of two of our marines, and the continued recurrence of such exchanges and casualties, including two more deaths, with no assurance that they can be completely halted, have brought me to the conclusion that the war powers resolution requires Congress as a whole to review the situation and to take action on a formal authorization for the U.S. presence. As the language and history of that resolution makes clear—and I have confirmed this point with Senator Javits, its principal Senate sponsor, since Senator MATHIAS and myself worked very closely with Senator Javits and Senator STENNIS as the original sponsors of the resolution at the time that debate was carried on—the Congress does not need to wait for the President to make a finding on the hostilities question before considering the matter under its own procedures. That is the purpose of the joint resolution being introduced today.

Mr. President, the focus of our attention should not be on the language of the war powers resolution, but on the stakes in Lebanon and on the policy of the United States in that area. We must review, as the people of the United States would want us to review, whether the risks to our marines there and the tragic sacrifices which some of them have already made in Lebanon, are justified by the interests of the United States and the prospects that our participation can promote those interests. In so doing, we are fulfilling one of our principal responsibilities under the Constitution: to participate in decisions regarding war and peace. Is the United States justified in risking the lives of its soldiers and committing its military resources to help restore some stability to this embattled country? The President of the United States clearly thinks so, his principal advisers clearly think so, and our allies in Britain, France, and Italy clearly think so. Because I also believe that we have an important role to play in Lebanon, I am prepared to proceed with this authorization on the assumption that the U.S. Congress will also think so in the final analysis, even though I believe it is our duty to probe and question the basis of our policy in Lebanon and not to prejudge these matters at the outset.

This is the process which the war powers resolution was intended to facilitate. It is simply a framework within which our constitutional responsibilities as Members of Congress can be exercised. As such, its authors recognized that we must work closely with the President and his advisers in making our decision. We must insure that it is a vehicle not of confrontation, but of cooperation with the President in producing an outcome which has the full support of the U.S. Government behind it.

Mr. President, I would like to say a final word on the resolution introduced today and the process we expect to follow in considering it. The procedures for such authorizations under the war powers resolution are set out in section 6. This resolution will be referred to the Committee on Foreign Relations, which will consider it along with any other joint resolutions providing authority under section 5(b) of the war powers resolution. I ask consent that the texts of sections 5(b) and 6 of the war powers resolution appear in the RECORD at this time.

There being no objection, the sections were ordered to be printed in the RECORD, as follows:

WAR POWERS RESOLUTION

Public Law 93-148 [H.J. Res. 542], 87 Stat. 555, 50 U.S.C. 1541-1548, passed over President's veto November 7, 1973

5. (b) Within sixty calendar days after a report is submitted or is required to be submitted pursuant to section 4(a)(1), whichever is earlier, the President shall terminate any use of United States Armed Forces with respect to which such report was submitted (or required to be submitted), unless the Congress (1) has declared war or has enacted a specific authorization for such use of United States Armed Forces, (2) has extended by law such sixty-day period, or (3) is physically unable to meet as a result of an armed attack upon the United States. Such sixty-day period shall be extended for not more than an additional thirty days if the President determines and certifies to the Congress in writing that unavoidable military necessity respecting the safety of United States Armed Forces requires the continued use of such armed forces in the course of bringing about a prompt removal of such forces.

CONGRESSIONAL PRIORITY PROCEDURES FOR JOINT RESOLUTION OR BILL

Sec. 6. (a) Any joint resolution or bill introduced pursuant to section 5(b) at least thirty calendar days before the expiration of the sixty-day period specified in such section shall be referred to the Committee on Foreign Affairs of the House of Representatives or the Committee on Foreign Relations of the Senate, as the case may be, and such committee shall report one such joint resolution or bill, together with its recommendations, not later than twenty-four calendar days before the expiration of the sixty-day period specified in such section, unless such House shall otherwise determine by the yeas and nays.

(b) Any joint resolution or bill so reported shall become the pending business of the House in question (in the case of the Senate the time for debate shall be equally divided between the proponents and the opponents), and shall be voted on within three

calendar days thereafter unless such House shall otherwise determine by yeas and nays.

(c) Such a joint resolution or bill passed by one House shall be referred to the committee of the other House named in subsection (a) and shall be reported out not later than fourteen calendar days before the expiration of the sixty-day period specified in section 5(b). The joint resolution or bill so reported shall become the pending business of the House in question and shall be voted on within three calendar days after it has been reported, unless such House shall otherwise determine by yeas and nays.

(d) In the case of any disagreement between the two Houses of Congress with respect to a joint resolution or bill passed by both Houses, conferees shall be promptly appointed and the committee of conference shall make and file a report with respect to such resolution or bill not later than four calendar days before the expiration of the sixty-day period specified in section 5(b). In the event the conferees are unable to agree within 48 hours, they shall report back to their respective Houses in disagreement. Notwithstanding any rule in either House concerning the printing of conference reports in the RECORD or concerning any delay in the consideration of such reports, such report shall be acted on by both Houses not later than the expiration of such sixty-day period.

Mr. PERCY. The committee must report out a resolution no later than the first week in October, which shall become the pending business in the Senate and be voted on within 3 calendar days. There are further procedures for consideration by the House and for a possible conference between the branches prior to the end of the 60-day period which began on August 31—48 hours after the events of August 29, as provided in section 5. That would be October 30 as we calculate it.

The resolution itself is a starting point. It is necessary to initiate the process of consideration and debate leading to final action by the full Congress and submission to the President. But we have not tried to foresee and foreclose all the issues and concerns of Congress in this initial formulation. We anticipate that there will be many suggested additions or adjustments to the language during the course of our consideration. In the end, we might even decide that such an authorization is not justified, that our troops should be removed or pulled back to safety. Though I doubt very much that this will be the decision of Congress in the end, we have not foreclosed that possibility by starting this process. What the introduction of this resolution is intended to insure is that the debate and the decision will take place, and within the timeframe anticipated by the war powers resolution.

Certainly, it is the procedure contemplated in the development of the war powers resolution itself, that the Congress, by its constitutional authority, must share in the responsibility with the President for this decision. For my part, I hope it will be seen by the President and by the rest of the world, as a positive step in support of our participation in the peacekeeping enterprise. It is a step I think we must take, and a step that the President and the Congress should take together.

Certainly, Senator MATHIAS has made eminently clear in his public statements today his strong feeling on this matter. I once again commend my distinguished colleague for the initiative he has taken.

Mr. MATHIAS. If the Senator will yield, I would like to thank the Senator from Illinois for his generous personal references, but more importantly for his statement of support in principle for the purpose of this resolution.

When I introduced the resolution, I said there was no magic in the 120-day period, that it just occurred to me that 6 months was a reasonable period in which we could determine whether negotiations were progressing or were not. But that is the very kind of question which it would be appropriate for the Committee on Foreign Relations to consider and for the Senate itself to consider. I welcome additional thoughts and views on that subject.

The chairman of the Foreign Relations Committee has also suggested there may be other amendments, other proposals to be included in the resolution that I would welcome. This is a corporate exercise by the Senate, the discharge of our constitutional functions. It is not a solo act.

So I am grateful that the chairman of the Committee on Foreign Relations could be here at this time and participate in this discussion.

Mr. PERCY. I thank my distinguished colleague.

DEFENDERS' DAY

Mr. MATHIAS. Mr. President, 9 days ago, on September 3, Americans celebrated the 200th anniversary of the signing of the Treaty of Paris which concluded the hostilities between the American colonies and Great Britian surrounding the Revolutionary War.

To this day, the Treaty of Paris remains the most important diplomatic document in our history. It established the United States as an independent nation. It launched us in the community of nations. And joyous celebrations of its bicentennial are entirely appropriate.

However, as Marylanders celebrated the treaty anniversary earlier this month, our feelings of delight were intermingled with more sober reflections on the fragility of peace. And for good reason.

The Treaty of Paris ostensibly assured "* * * a firm and perpetual Peace between his Britanic Majesty and the said States. * * *" And yet, within less than a generation, the United States and Great Britain were engaged in the hostilities which we know as the War of 1812.

In that war, the resolute and gallant citizens of Baltimore defended the city against the British onslaught in the Battles of North Point and Fort McHenry. Today, Marylanders are observing Old Defenders' Day to commemorate those battles which began on September 12, 1814.

Happily, in the 169 years since then, all subsequent relations with Great Britain have been fully consonant with the high hopes for perpetual peace expressed in the Treaty of Paris. But that early experience does serve to remind that peace is not secured by words on paper.

Peace is like a garden. It requires constant cultivation. It must be nurtured, and encouraged, and tended. For a garden to be beautiful, each part must be beautiful. And for peace to flourish everywhere, it cannot be neglected anywhere.

From time to time, Mr. President, in our international relations we seem to forget the precepts of good husbandry, and, unfortunately, this is one of those time. Even before the Soviet Union shot down a defenseless Korean airliner, our relations with the other superpower were languishing in disrepair. Today, with the hands of the clock on the Bulletin of Atomic Scientists at 4 minutes to midnight, the prospects for peace seem perilously fragile.

While we, and all civilized peoples, must condemn the Soviet Union for its outrageous act of brutality which resulted in the death of 269 men, women, and children, on this Defender' Day, which honors Baltimore's citizen-soldiers, it also seems appropriate to recall the advice of another citizen-soldier, one wise in the ways of cultivating peace. As the 98th Congress resumes it deliberations today, with so many pressing world problems crowding our agenda, the words of George Washington's Farewell Address to Nation commend themselves to our attention:

Observe good faith and justice towards all nations; cultivate peace and harmony with all. Religion and morality enjoin this conduct, and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt but, in the course of time and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it; can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

In the execution of such a plan, nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachment for others, should be excluded; and that, in place of them, just and amicable feelings towards all should be cultivated. The nation which indulges towards another an habitual hatred, or an habitual fondness, is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. Antipathy in one nation against another, disposes each more readily to offer insult to injury, to lay hold of slight causes of umbrage, and to be haughty and intractable when accidental or trifling occasions of dispute occur. Hence, frequent collisions, obstinate, envenomed, and bloody contests. The nation, prompted by ill will and resentment, sometimes impels to war the government, contrary to the best calculations of policy. The government sometimes participates in the national propensity, and adopts through passion what reason would reject; at other times, it makes the animosity of the nation subservient to projects of hostility, instigated by pride, ambition, and other sinister and pernicious motives. The peace often, sometimes perhaps the liberty of nations, has been the victim.

Mrs. HAWKINS addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

POPE JOHN PAUL II CONDEMNED ILLEGAL DRUGS

Mrs. HAWKINS. Mr. President, recently I had an opportunity to meet with His Holiness Pope John Paul II and to learn of his deep concern over international drug abuse.

Recently, he expressed grave concern over the increasing trafficking in illicit narcotics which now threatens the health and spiritual well-being of countless numbers of innocent human victims throughout the world, particularly the young. The Pope was deeply aware of the worldwide drug-abuse problem and expressed his conviction that it was attributable to the critical issues of spiritual and family disintegration, increased unemployment; and object poverty now prevailing in many nations.

In a recent homily at the Mass for former drug addicts to overcome drugs, the Pope delivered a condemnation of drugs and their alienating effect on society.

His condemnation came amid controversy in Italy over Socialist Health Minister Aldo Aniasi's recent announcement that he is considering legalizing marihuana and other light drugs on an experimental basis.

The Pope condemned "with all my soul" attempts to legalize the use of marihuana and other drugs that induce people to seek "artificial paradises."

Aniasi told Parliament he thought that legalizing light drugs might help the fight against hard drugs such as heroin.

But John Paul recalled that an Italian congress of Catholic doctors last year came out strongly against legalizing marihuana:

I associate myself with all my soul with the views and the anxieties expressed by the Association of Italian Catholic Doctors about the proposed law concerning the liberalization of drugs, erroneously defined as light drugs, and the freedom to administer heroin in a hospital environment.

The painful experience of some nations has shown that more permissive legislation in this field serves neither to prevent nor to re-educate.

Rather than legalizing marihuana, the Pope said, the social conditions that lead people "to seek artificial paradises" must be reformed.

John Paul continued:

We do not want to put society on trial, but we must point out that the many failures of the structure of society, such as unemployment, the housing shortage, social injustice, political opportunism, international stability, lack of preparation for marriage, the legalization of abortion and divorce, inevitably cause a sense of distrust and depression which can lead to fearsomely negative experiments.

Experts in psycho-sociology also say that one cause of the drug phenomenon is the sense of solitude and lack of communication which weighs on the noisy and alienated modern society and even on the family itself.

This is a painful fact which, together with the absence of intimacy with God makes understandable, but certainly does not justify, a flight into drugs in order to forget, to dull the senses, or indeed to deliberately start a trip of no return.

I ask unanimous consent that the Pope's homily at the Mass for former drug addicts to overcome drugs entitled "Solidarity Is Necessary" be printed in the RECORD.

There being no objection, the homily was ordered to be printed in the RECORD, as follows:

THE POPE'S HOMILY AT THE MASS FOR FORMER DRUG ADDICTS TO OVERCOME DRUGS SOLIDARITY IS NECESSARY

BELOVED SONS AND BROTHERS: You desired this eucharistic meeting with the Pope to express your faith and your devotion concretely; and I, welcoming you round the altar of the Lord, extend my most cordial greeting to you and express to you my deep gratitude. You give me, in fact, the opportunity to meet serious and committed persons, who take an active part in the anxieties and concerns of the Church and who bring experiences, sometimes dramatic and sometimes useful to help with the many hardships and necessities of modern society. Your presence, so respectful and affectionate, is a great consolation for me: you understand, in fact, the solicitude of the Vicar of Christ, who, as responsible Pastor, immersed in this 20th-century society, feels the responsibility of enlightening and guiding all men. You offer him your help, your prayer and your sincere collaboration. In areas which he cannot reach, you arrive, to relieve pain and suffering, to dispel doubts and apprehensions, to save those who, in defeat and desolation, desperately call for help! You give me confidence and hope, and therefore I thank you sincerely.

The work of recuperation and prevention of the pernicious and terrible consequences of drugs is, at the present time, not only well-deserving, but necessary: the road in which there lie the many persons wounded and stricken by the painful shocks of life, has extended to a frightening extent, and there is all the more need of good Samaritans.

In particular, starting from this eucharistic Celebration, I would like to make some concrete exhortations to you.

Psychologists and sociologists say that the first cause that drives young people and adults to the harmful experience of drug-taking is the lack of clear and convincing motivations of life. In fact, the lack of reference points, the absence of values, the conviction that nothing has a meaning and that therefore life is not worth living, the tragic and distressed feeling of being unknown wayfarers in an absurd universe, may drive some people to seek exasperated and desperate forms of escape.

The well-known French thinker, Raissa Maritain, already knew this, narrating the experiences of her youth, at the beginning of the century, when she was a student at the Sorbonne in Paris and had lost all faith: "Everything became absurd and inacceptable . . . The absence of God emptied the universe. If we must renounce finding any meaning in the word 'truth', in the distinction between good and evil, between just and unjust, it is no longer possible to live in a human way. I would not put up with such a farce—the writer says—I would have accepted a painful life, not an absurd life . . . either the justification of the world was possible, and it could not be done without knowledge of the truth; or life was not worth a moment's attention." And she concluded with dramatic realism: "This metaphysical anguish which penetrates the very sources of the desire to live, is capable of becoming complete despair and of leading to suicide" (I grandi amici, Vita e Pensiero, Milan, 1955, pp. 73-75).

They are words that make us think: men need truth; they have the absolute necessity of knowing why they live, die and suffer! Well: you know that the "truth" is Jesus Christ! He Himself said so categorically: "I am the truth!" (Jn 14:6), "I am the light of the world; he who follows me will not walk in darkness, but will have the light of life" (In 8:12). So love the truth! Bring the truth to the world! Bear witness to the truth which is Jesus, with all the doctrine revealed by Himself and taught by the Church, divinely assisted and inspired. It is the truth that saves our young people: the whole truth, enlightening and demanding, as it is! Do not be afraid of the truth and set Jesus Christ, only and always, against the many teachers of the absurd and of suspicion, who may perhaps fascinate, but who then lead inevitably to destruction.

There is a second reason, always according to the experts, which drives people to seek "artificial paradises" in the various types of drugs, and it is the social structure, which is deficient and unsatisfactory.

This is certainly a very important subject, but also a very difficult and complicated one. We are witnessing, in fact, a "lay morality" spreading and taking root in all States. This morality disregards almost entirely objective morality, the so-called "natural" morality, as well as the morality revealed by the Gospel. We do not want to indict society: we cannot but note, however, that so many shortcomings in the structure of society, such as unemployment, the lack

of houses, social injustice, political opportunism, international instability, lack of preparation for marriage, the legalization of abortion and divorce, inevitably cause a sense of loss of confidence and oppression, which may sometimes lead to experiences that are frightfully negative. We must not lose heart! In spite of the difficulties, continue to exert a good influence on society; make your active contribution also in the political and legislative field; always support with enthusiasm what must be the first and principal intention of every organism and every State: respect and love for man! What St. John wrote to the first Christians, is valid also today: "God gave us eternal life, and this life is in His Son. He who has the Son has life; he who has not the Son of God has not life" (1 Jn 5:11).

In this connection, I join with all the deep participation of my spirit in the concerns expressed by the "Association of Italian Catholic Doctors" with regard to the bill concerning the liberalization of drugs wrongly defined as "light" and the faculty of administering heroin in hospitals (XV National Congress, November 1979 at Assisi VI European Congress, May 1980, at Brussels). As the painful experience of some nations now shows, a more permissive legislation in this field does not serve either for prevention or for redemption.

Finally, experts in psychosociology say further, a cause of the phenomenon of drug taking is also the sense of loneliness and incommunicability which unfortunately, weighs upon modern society, noisy and alienated, and also upon the family itself. It is a painfully true fact which, together with absence of intimacy with God, makes one understand, but certainly not justify, seeking escape in drugs to forget, to dull one's senses, to emerge from situations that have become unbearable and oppressive, and even to begin deliberately a journey from which there is no return.

The modern world, in fact, is in great need of friendship, understanding, love and charity. So bring your charity, your love, your help with perseverance and sensitivity! It is charity that saves and becomes the way to truth! It is being realized more and more that the young person, caught up in the poisonous spirals of drugs, has an essential need to feel loved and understood in order to be redeemed and to resume the normal way of those who accept life in the perspective of eternity. But above all, be bearers and witnesses to the love and mercy of God, the friend who does not betray and who continues to love and to wait with confident hope. How true and moving are the words written by St. Teresa of the Child Jesus in her last illness: "Yes, I feel it: if I had on my conscience all the sins that can be committed, I would throw myself all the same into the arms of Jesus, my heart overcome with repentance, because I know how much He loves the prodigal son who returns to Him" (Ms. C.).

Beloved in Christ! Here is your task and your orders: bring confidence and love!

Holy Scripture tells us by the mouth of the ancient Prophet that "the righteous shall live by his faith" (Hab 2:4; Cf. Rom 1:17 ff; Gal 3:11) and Jesus exhorts us to have faith equal at least to a grain of mustard seed (Mt 17:18-19).

You, too, are committed to saving society with love and with Faith! Commend yourselves every day to the Blessed Virgin, pray to her every day with affection and trust, that she may always illuminate your thoughts and guide your steps along the ways of the world, for the relief of so many who need to meet her immaculate and motherly Heart!

And may my propitiating Blessing accompany you!

At the end of the Mass, the young people of CIS represented by means of mime the fundamental stages of their progress towards salvation from drugs. Answering a greeting addressed to him by Don Picchi, the Holy Father said among other things:

"Sometimes we embrace persons with our hands; on other occasions we find ourselves in a rather different situation, preferring to embrace persons with words. That happens at moments of reflection. And the one we are living today is a moment of reflection, of reflection on the fundamental problems of life, of human existence, of human suffering and confidence, of the hope that remains with us always and in any circumstances. At the end of this meeting I would like, then, to embrace you all with these words. I would like to embrace the young particularly, these young people who, as they have shown recently, have been able to be victorious and bear witness to how it is possible to be victorious and regain one's own humanity, freedom and the sense of "being," of being a man and of living among men. They have been able to be victorious and this is the most important thing of all the work is carried out in the Italian Centre of Solidarity and in the various world centres, particularly in the USA one and all over the world. If we are to face up to that great danger for the human person, for any man, and especially for a young man, that drugs are, we must have proofs of the possibility of being victorious. If we have the certainty that it is possible to be victorious, a certainty proved through the persons who have been victorious, then we can face up to the danger with hope.

So you, young people who have been victorious, become for others a testimony of hope, a testimony that victory is possible; you also become for society, concerned about the drugs phenomenon, a new impulse to struggle, to commit all forces, all good will: it is worth while because victory is possible. With these conclusive words I would like to embrace all those present, not only the young but also all the others who take part in the social effort against drugs, against the danger of drugs. A direct danger for humanity, for human personality. All those who, in society and in the Church, take part in the efforts to defeat drugs, are among us today, in our common prayer and also in that testimony which has completed our prayer, in a way. May they find a stimulation, an encouragement to continue. To all of you, I, as your Bishop, wish to repeat my thanks. We are really united in this concern and in this struggle. We are really united as friends, as Christians, as disciples of Christ because he is present in all those who are suffering, he is truly, really, present in every young person suffering the experiences of drug taking, sad and tragic ones. If we commit ourselves to helping these young people, we find Christ Himself in each of those we are trying to help. And so I want to thank all those who are committed, all the priests, Sisters and laymen who take part in different ways in this social, religious and apostolic effort, whom I have had the possibility and the joy of meeting today. I thank you cordially, deeply, for this meeting, and once more I say: in spirit I embrace you all as my friends, as my brothers and sisters. I thank you and say to you: continue!

Praised be Jesus Christ.

SHOULD THE SOVIET SHOOTING DOWN OF THE UNARMED KOREAN JET KILL THE NUCLEAR FREEZE?

Mr. PROXMIRE. Mr. President, the answer is NO—indeed! The criminal and cruel shooting down of the Korean jet should have one primary effect on the U.S. objectives in negotiations for a nuclear freeze. It should reinforce our determination to seek the surest possible verification of compliance by both sides to the terms of the treaty. That means we should strengthen the quintessential heart of our verification—our satellite reconnaissance system—and make it clear that any Soviet assault on our satellites would bring prompt renunciation of the treaty. It means we should also press hard for unannounced onsite inspection by either side to supplement our satellite verification and to follow-up any indication of U.S.S.R. cheating with prompt and unannounced investigation.

Some will argue that this would kill any chance of winning agreement to the treaty—that the U.S.S.R., with their paranoic reaction to incursions into their territory, as just shown by their savage attack on the unarmed Korean jet, will never agree to onsite inspection. It is feared that our insistence on onsite inspection would doom the treaty. I disagree. The Russians have hinted several times that they might agree to onsite inspections. At any rate, we should press hard for this and refuse to agree to a nuclear freeze treaty unless we get a verification agreement that will provide assurance either of Soviet compliance or of our knowledge if they fail to comply. If we can come up with a better formula for verification than satellite inspection followed up by unannounced onsite inspection, let us hear it. But let us make the verification as assured as possible.

In the long history of United States/Soviet negotiations, the Soviets have abided by those treaties which have a verification system which enables us to know if they have cheated. For instance, they have abided by the treaty banning the explosion of nuclear devices above a certain kilotonnage. But where verification and compliance provisions have been absent—as with the biological warfare treaty—they have violated the treaty, as they did with their use of chemicals causing yellow rain in Afghanistan.

We should insist on stringent, assured verification for two reasons:

First, there should now be no lingering doubt that we cannot trust the Russians. We know that a decent regard for human life will not restrain

them from violent action. We know that an international agreement, to which they subscribed, not to shoot down unarmed planes, will not dissuade them from doing so. The Korean airliner incident should dissolve any doubt. Since we can expect the Russians to violate any agreement whenever they think it is to their interest to do so, we must have verification to detect any U.S.S.R. violation. We need it so we can act in our own national security interest if and when the Russians violate the treaty;

Second, the Russians have not violated the treaties when verification and compliance features have been spelled out. So rigorous and detailed and specific verification provisions will not only enable us to protect ourselves in the event of a Russian violation; they will greatly reduce the prospect that such a Russian violation will take place.

Above all, we should press for the nuclear freeze, because the Korean airliner incident reminds us of what an unstable and dangerous world we live in. The Soviet missile that shot down the Korean unarmed airliner and killed 269 people did not come from an individual decision or from a couple of hours of panic. It came from the calculated, premeditated, carefully established policy—the law—of the Soviet Union. The Russians have carefully and deliberately decided as a matter of national policy to shoot to kill innocent and unarmed civilians who violate their airspace and refuse to land. This gross disregard for innocent human life exposes the absence in the U.S.S.R. of any humane restraints against lethal violence by the state.

Yet the U.S.S.R. is the other nuclear superpower. It is an inescapable fact of life that they have the capability to destroy civilization. How do we diminish the terrible risk that the U.S.S.R. with their disregard for the sanctity of human life will some day, with the arms race continuing to put greater and greater lethal power into the hands of both superpowers, press the nuclear button? After all, the U.S.S.R. is the nation that gave the order to shoot down the unarmed passenger airliner. Obviously there is no way of eliminating the terrible risk. But we can reduce that risk by continuing to press for a mutual, verifiable end to the arms race—a nuclear weapons freeze.

THE GENOCIDE CONVENTION IS A USEFUL TOOL OF DIPLOMACY

Mr. PROXMIRE. Mr. President, in the wake of recent violence by Armenian extremists I am reminded once again that the Genocide Convention presents a useful tool of international diplomacy.

Nothing could be worse than the making of overly optimistic or irresponsible claims about the efficacy of the Genocide Convention, but in the case of the Armenians there is cause for hope. Indeed, the vast majority of the Armenians want only international recognition for the crime that was committed against them in 1915.

Mr. President, extremists within the Armenian community have used popular indignation about crime to camouflage the indefensible nature of their own crimes. These extremists are responsible for most of the wanton violence directed against Turkish citizens and foreigners. Some within the Armenian community are sympathetic to these groups because they feel that normal channels of international diplomacy have been closed to them.

An effective Genocide Convention, possible only with U.S. adherence, would not bring back the 1.5 million Armenians who perished 68 years ago. It certainly could not be used to try any one who might have been personally involved. But the beauty of the convention, Mr. President, is that it could undercut the extremists politically, by addressing an issue which many Armenians feel has been neglected. By providing an international mechanism to help prevent future genocides, the signatories of the convention may make it easier for all nations to recognize past injustices. Perhaps for the majority of the Armenian people, whose views would otherwise be moderate, such recognition would suffice to begin a healing of the old wounds.

Mr. President, in order for the convention to be effective, the United States must be a signatory. We are the preeminant force in world politics and we also have many avenues of influence. It seems to me that the Genocide Convention presents a way to alleviate the long smouldering Armenian-Turkish feud, which has cost the international community so much. But in order to persue this course we must be a party to the convention. I am not guaranteeing my colleagues a quick-fix to the Armenian problem, nor to the question of genocide in general, but ratifying the convention is a good first step. Why do we not take that step?

ADDRESS BY THE PRESIDENT, BEFORE NATIONAL ASSOCIATION OF TOWNS AND TOWNSHIPS

Mr. PERCY. Mr. President, this morning I had the distinct pleasure of addressing the opening session of the annual National Association of Towns and Townships meeting here in Washington at the Capitol Hilton Hotel. The theme of this year's conference is "Grassroots Government—Keep It Strong."

I was quite pleased to be with the town and township officials this morning for a number of reasons including the fact that Illinois had the largest delegation in attendance at the meeting. In addition, a long time friend, George Miller, the executive director of the township officials of Illinois, is serving as president of the national association this year. George Miller has proven himself a strong and effective leader and a tremendous source of sound advice for myself and others in the Illinois congressional delegation. As one of the Founding Fathers of the National Association of Towns and Townships, George has shown through his own efforts how to keep grassroots government strong.

Probably the most important issue for town and township government this year is the future of the general revenue sharing program. I assured those assembled that scheduling the reauthorization legislation for consideration was a top priority of the Senate leadership. Senator DURENBERGER, whose subcommittee is responsible for the GRS legislation, will be honored tomorrow by the NATAT delegates for his leadership on this issue.

Finally, Mr. President, is was an honor and a privilege for me to be asked to address the National Association of Towns and Townships just prior to an address from the President of the United States, Ronald Reagan. The President grew up under township government in Illinois. He knows first hand the role towns and townships play in our federalist system of governance. As he said, "they are the cradle of democracy * * *."

The President made a forthright statement outlining his views on the proper relationship between the Federal Government and those on the State and local levels. In addition, the President reaffirmed his commitment to continuing the general revenue sharing program, which was met with a standing ovation.

I ask unanimous consent that the text of the President's remarks be printed in the RECORD in full. I urge my colleagues to review the President's speech.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

TEXT OF REMARKS BY THE PRESIDENT TO THE NATIONAL ASSOCIATION OF TOWNS AND TOWNSHIPS

It's a pleasure for me to be here with you today. Growing up as I did in Dixon Township, I know well the role towns and townships play in America. They are the cradle of democracy and, if anyone has any doubts about the vitality of American liberty, I would suggest they visit some of your town meetings. I'm sure Patrick Henry and Thomas Jefferson would feel right at home.

This gathering today is testimony to the fundamental change taking place in our country, change of which many are unaware, yet it is altering the face of America. What we are experiencing is nothing less than a renaissance of small town life. I am here to tell you that this Administration recognizes it, and that the days when your

role in our country was taken for granted are over.

Small towns and townships have always played a vital part in American life, yet, about the time of the Civil War, urban areas began to grow at a faster clip. Well, that long-standing trend, as I'm certain all of you are aware, has reversed itself. In the 1970's, some rural areas continued to lose population but, as a whole, small town America grew 50 percent faster than urban centers. Today one out of four of our citizens lives in nonmetropolitan areas, and some polls indicate that 60 percent of the American people would join them if they could find work in small towns.

The influx of people into small towns and rural areas reflects the concern of our citizens not just for material well-being, but for the quality of life. During the 1960's there were those who scoffed at small town values of family, God, and neighborhood. They said those things in which we believe are old-fashioned, and corny. Well, there's been some growing up in this country in the last few years, and people are discovering that those basic values we hold so dear are stronger than the fads that make big splashes one day and evaporate the next.

Many of the problems we face today are results of drifting away from principles that kept our country on a sound footing through most of its history. Our forefathers believed that Government should be limited and power should be decentralized. Calvin Coolidge, a President I deeply admire, put it well. "Our country," he said, "was conceived in the theory of local self-government. It has been dedicated by long practice to that wise and beneficent policy. It is the foundation principle of our system of liberty."

The American system, decentralized and based on guaranteed individual rights, served our country well, yet, in the last two decades or more, something went haywire. The people began turning to Washington with greater and greater frequency. Every problem became something of Federal concern. Worst of all, we were led to believe that Federal money came free. It's taken quite a while for us to realize that Federal money came out of the same pockets as did local and State taxes—ours.

On the other end, well-intentioned individuals thought if they were only given the power, they could right every wrong. As I say, they were well-intentioned, but there's a well-known road paved with good intentions, but no one likes where it takes you.

In the last two decades, Government expanded with the best of intentions, but we paid a steep price. By the end of the 1970's, average citizens trying to solve even the simplest problems were frustrated by a conglomeration of interlocking jurisdictions and an absence of accountability. Unelected Washington officials were making decisions that rightfully should be made by local people working and talking together. Americans felt they'd lost control of essential government services like schools, welfare, and roads.

The idealistic goals of those who centralized American Government did not change the nature of what we confronted. Supreme Court Justice Louis Brandeis once said that, "Men born to freedom are naturally alert to repel invasion of their liberty by evil-minded rulers. The greatest dangers to liberty lurk in insidious encroachment by men of zeal, well-meaning but without understanding."

In the end, the growth of Federal power complicated our problems and threatened our freedom. Nowhere was that clearer than the grants-in-aid programs. In 1960, the Federal Government had 132 categorical grant programs, costing $7 billion. Twenty years later, the number had tripled to more than 400, costing $90 billion. And it took 166 congressional committees just to keep track of this mismash of programs, including 13 programs for energy, 36 for pollution control, 66 for social services, and 90 for education.

The frustration of dealing with far away bureaucracy wasn't the only price we were paying. Between 1976 and 1981, the Federal tax take doubled, draining the private sector of money it needed for investment and the creation of new jobs. And by the time the Federal tax vacuum was done, there was little left for local and State governments.

The growth of Federal power was stagnating our economy and destroying our hopes for a better future. By 1980, inflation was running at double-digit levels for the second year straight, robbing our senior citizens of the value of their savings. The poor and middle class working people saw their real wages and their standard of living begin to shrink.

The spirit of optimism, long the hallmark of our people, turned to pessimism and cynicism. Even our leaders were throwing up their hands, claiming we were in a malaise and that our problems were unsolvable.

One should never sell the American people short. Once we put our minds to it, there is nothing Americans cannot accomplish if the Federal Government will just stand aside and get out of the way.

When I got to Washington, we faced the awesome responsibility of changing the direction of America. That's not easy and it's not painless. I'd like to take this opportunity to thank George Miller and all of you in the National Association of Towns and Townships for the support you've given over these 2½ years.

It's taken time, but I'm proud to tell you that, together, we've turned around a desperate situation; and we're never going back to the policies of tax, spend, and inflate that brought our country to the brink of economic disaster.

Together, we've brought inflation down from double digits to 2.4 percent over the last 12 months, the best record in nearly 17 years. I don't have to tell you what this means to the cost of doing business for towns and townships.

There has also been progress with interest rates, which are as important to you as they are to business. Just before I took office they were going through the roof, the prime at 21½ percent. Today, it stands at 11 percent. There will be slight fluctuations but, if the Congress acts responsibly, interest rates are going to come down even more.

And we are getting the Federal spending and taxing juggernaut under control. Spending was growing at a rate of 17 percent a year when we got here; we've cut that growth rate by nearly 40 percent. And let me say—that still isn't good enough.

There's an old saying that in levying taxes, as in shearing sheep, it's best to stop when you get to the skin. Well, by 1980, taxes were making our economy bleed. We've cut the income tax rate of the American people 25 percent across the board. And in 1985 they'll be indexed, so that never again will the Federal Government profit from inflation at your expense.

There's one part of our tax reform program of which I'm particularly proud: By raising the exemption on the inheritance tax, and by eliminating it altogether for surviving spouses, we've restored the right to American people of passing on their family farm or small business to their children.

From the start, we recognized that excessive Federal regulation was not only strangling American enterprise, but preventing you folks at the local level from doing your job. Since we took office, we've freed the business community as well as State and local government of 300 million man and woman hours of needless paperwork. This will save Americans billions of dollars and free you to handle local problems as you see best.

Returning power to levels of government closer to the people has been one of the guiding principles of this Administration. Decentralizing remains one of our utmost goals. And don't let anyone tell you that we are satisfied with what has been accomplished so far. Phase one of our Federalism program may be accomplished, but that's just phase one.

Again, with your help, we managed to get through the Congress a block grant package that consolidated 57 programs into 9 block grants that, in 1982, eliminated some 5.4 million hours of work for State and local officials and, in subsequent years, will eliminate some 5.9 million hours annually. We continued this effort with the enactment of the Job Training Partnership Act and the urban mass transportation grants program. This year we've proposed legislation that will consolidate over $22 billion of spending in 34 programs into 4 block grants. Included among these is the Rural Housing Block Grant, which will give you more control and flexibility over programs costing $850 million annually.

The biggest resistance to our efforts has been from politicians who simply do not believe that local government is competent to do the job. Their opposition seems to be based on the notion that the Federal bureaucracy has a monopoly on compassion and efficiency.

It's been said that, "A man's intelligence does not increase as he acquires power. What does increase is the difficulty in telling him that."

It is ever was true that Federal employees had greater capabilities than their local counterparts, those days are rapidly coming to an end. Today, modern technology is opening up greater and greater opportunities for State and local government. Even small towns have computer services available to them that were out of reach only a decade ago. I know your own organization is moving forward with great training and communications programs that will open up broad, new horizons at the local level.

Today, local government across the country is proving itself efficient and responsive to the will of the people. I'd like to see some of the politicans here in Washington who don't think you can do the job try to handle your responsibilities. Bart Russell tells me that, as head of a local township, you've got to be a parliamentarian, bookkeeper, business manager, ombudsman, and Government liaison expert all at the same time. Plus, you've got to do all that while keeping the hometown folks happy.

I can assure you that this Administration knows and appreciates the job you are doing. We are taking every care so that in transferring programs back to levels of Government closer to the people, you also receive the resources necessary to get the job done.

I have a dream that someday we can provide you with the revenue sources co-opted by the Federal Government, so that local money no longer has to make a round trip through Washington before you can use it back in you local area. In the meantime, you can count on us to be sensitive to current obligations. I continue to support General Revenue Sharing and will oppose any changes in the G.R.S. formula that unduly impact on towns and townships.

Of course, transferring revenue is not going to bring lasting change. Real progress will come as a result of creative approaches that harness the power of the marketplace. With this in mind, we've proposed legislation to create enterprise zones to encourage private business to locate in disadvantaged areas. One-third of the 75 zones we've suggested would be in rural areas.

There is enormous support for this concept; already 20 States have passed State enterprise zone legislation. The Senate has already passed this bill once and, although it was dropped in conference, we're confident they'll support it again. In the House, we have 181 Members—nearly a majority—who have co-sponsored the legislation. Yet, the House has failed to act, and only recently has the House leadership even agreed to hold hearings. I'd like to take this opportunity to ask you to join us in escalating our efforts to pry this legislation out of the House.

It is about time that you had a fair say in the Federal policies that affect you. I want to assure you that I continue to support strongly legislation that would provide for a member nominated by your organization to be placed on the Advisory Commission on Intergovernmental Relations.

Over the last 2½ years, we've had to make some tough decisions, and I fully appreciate that the towns and townships you represent have felt the pain of reducing the growth of Federal spending. We couldn't have gone on the way things were, and you've done more than your share. As we move forward, I have instructed my staff to be diligent that your good citizenship is not taken advantage of, and that, when it comes to budget control, towns and townships are treated equally with other segments of American society.

We must always remember that on our shoulders rests the responsibility of our country's future. In less free societites, that burden rests only on the head of state. The freedom we enjoy places that heavy burden on all of us, in and out of Government. Together, we've overcome an economic threat that could well have destroyed the America we know and love. That signs suggest we're over the hump but, as is engraved on our National Archives building, "Eternal vigilance is the price of liberty."

There is every reason for us to be confident. We are still the same people who conquered a wilderness and turned it into a dynamo of freedom and abundance. I think that today there is a greater understanding of the miracle of America, of what made her great and kept her free.

John Foster Dulles once said that, "If we are faithful to our past, we shall not have to fear our future." Together, we've proven we can do what is necessary to keep faith with those who came before.

TRIBUTE TO BRIG. GEN. THOMAS HENRY KING, FORMER PRESIDENT OF THE RESERVE OFFICERS ASSOCIATION

Mr. THURMOND. Mr. President, I rise today to pay tribute to an outstanding patriot and distinguished attorney, Brig. Gen. Thomas Henry King, of Washington, D.C., who passed away on August 23, 1983, at the age of 79. To his devoted wife, Jessie, his son, Thomas, and other family, I extend my deepest sympathy,

General King was a close and trusted friend I have had the pleasure of knowing for many years. My association with General King first began through the Reserve Officers Association (ROA) of the United States. Among his many other achievements, General King served as National President of the ROA, and I succeeded him in that office in 1954. Through our involvement with the ROA, General King and I worked on many issues concerning Reserve and national security matters.

Tom King's dedication to the men and women of the Armed Forces was an extension of his own military experience. He served his country well in the U.S. Air Force during World War II and received such honors as the Bronze Star, the Air Force Commendation Medal, and the Legion of Merit. He later transferred to the Air Force Reserve where he was promoted to the rank of general in 1961. Although he retired from Active Reserve duty in 1964, he continued to work diligently for the cause of reservists and earned the respect and admiration of many Reserve and active military personnel throughout the land.

In addition to his numerous contributions to our Armed Forces, Tom King was well known as a capable and effective lawyer. As an authority in personnel law, he was able to incorporate his legal expertise in his efforts to further veterans and reservists rights.

Mr. President, it is difficult to express the deep sense of loss that I feel in the passing of this great American. Gen. Thomas King will be missed by a large circle of friends, including myself. Another such friend is Col. John T. Carlton, the former executive director of the ROA. During the final tribute to General King, which was attended by several hundred persons and where full military honors were accorded to him, Colonel Carlton delivered a eulogy which speaks eloquently of General King's life and career. Mr. President, I ask unanimous consent that the eulogy by Colonel Carlton, and an article from the Washington Times, be included in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EULOGY TO THOMAS HENRY KING BY COL. JOHN T. CARLTON

It is an honor beyond my deserving to speak in tribute to the life of General King, a man whose exemplary character we should seek to emulate, and whose great and imdominable spirit seemed almost incredible.

Tom King was born on January 17, 1904, in Washington, where he spent his entire life, except for when he was overseas serving his country in wartime. He was a graduate of the former Washington Law School, now American University. He could be found in his law office in the Southern Building every day until a few months before he died.

Young Tom King responded to the call to Army service early in World War II, serving in France, England, and Luxembourg, where he was the senior United States Military Representative. He was given highest recognition by his own government and by Luxembourg for his service there. He had the opportunity to meet many Allied leaders, including British Prime Minister Winston Churchill whom he joined in a wreath laying ceremony at George Patton's grave. His energy, talent, and personality won him the friendship of the Luxembourg Royal Family, who invited him back as their guest several times after the war's end. After the War, he transferred to the Air Force, serving in the Reserves in the office of the Judge Advocate General where he was awarded the Air Force Commendation Medal. Upon his retirement in 1964, he was awarded the Legion of Merit. He was President of the Judge Advocate Association, and in 1975-1976 the D.C. Bar Association awarded him the U.S. Court of Claims plaque as Chairman of the Year.

Tom King was elected Judge Advocate of the Reserve Officers Association at its Denver Convention in 1948, and the following year, at Grand Rapids, he was re-elected by acclamation by delegates who had such respect for him that they brushed aside the recommendations of the nominating committee. In 1953, he was elected National President at the National Convention in Long Beach, and he worked with his successor, now Senator Strom Thurmond, to help create by law a Reserve structure in the military services which has survived all efforts to weaken or destroy it.

General King loved ROA and the many thousands of men and women who were its members. He believed in the cause of National Security and gave unstintingly of his life to that cause. From the time he came into ROA in 1947 until his death at 1:20 last Monday, August 23rd, he fought for the principles he had helped make law, seeking to protect them.

The many landmark cases for military personnel, Reserve and Regular, won for the men and women are too numerous to recite, but they will stand as a monument to him—a gifted lawyer, a patriot, a man who was respected and loved and whose career is monumental.

Almost to his dying day, General King had fought for a principle he and Senator Thurmond had gained thirty years ago—a principle in law which was the hallmark of fairplay—the requirement for Reserve Officers on military boards which decided the status, and gave them an equality never before achieved.

General King gave his services to ROA—and through ROA to his country. For nearly 40 years, he kept watch over the

legal bastion of ROA and all he did and accomplished for ROA was without compensation. His carefully constructed "Amicus Curiae" brief before the Supreme Court is a historical treatise on military principles serving as it does the policy enunciated by George Washington that every citizen owes his services to the government which gave him his freedom. The court in that case upheld the right of members of Congress to retain their Reserve Commissions, many of them justified in wartime combat.

Few members of ROA know of the many areas of ROA Tom King served. He was a progenitor of many objectives, including the construction of the Minute Man Memorial Building. It was General King also who drafted the bill giving ROA its Congressional Charter in 1950, a bill enacted over the signatures of Alben Barkley as Vice President, Sam Rayburn as Speaker of the House, and Harry Truman as President. It is probably not recorded but at the signing of this bill, President Truman commented that Tom King was one Republican he liked and respected.

It was little wonder that three years ago, the Reserve Officer Association gave General King its highest award, making him National President Emeritus, a position filled only once before—by General King's great friend whom he persuaded to be Memorial Building Fund Chairman—General Lewis B. Hershey.

In conclusion, indulge me for a brief personal comment. Tom King was my friend. He was my unpaid legal consultant and a companion of great strength. I had many early morning talks with him; because he was my friend, his advice was always objective, and sometimes it was hard. Tom loved his friends, and he always wanted to help them. And he did help them—how he did help them.

During the last two years—knowing life was closing in on him—his energy and enthusiasm continued great. Hurting inside, knowing that his twilight was upon him, he never gave up his great spirit and his cheerfulness. He asked me two years ago to write his obituary, which request honored me. Last Saturday I visited him. I put my hand in his and he gripped it. He couldn't talk to me but I felt his unconquerable spirit through his fingers.

He is now in a Greater Presence.

Here on this earth, his friends remember him only in warmth and fond recollection. God grant us the strength to emulate him.

[From the Washington Times, Aug. 24, 1983]

THOMAS HENRY KING WAS LAWYER, GENERAL

Retired Air Force Brig. Gen. Thomas Henry King, 79, a military reserve leader and an attorney here for about 40 years, died yesterday of cancer in the hospital at Andrews Air Force Base.

A former national president of the Reserve Officers Association (ROA) of the United States, Gen. King was a founder of the Interallied Confederation of Reserve Officers (CIOR), the international reserve organization in NATO. He also helped organize the ROA's European department and from 1948 to 1950 was national judge advocate of the ROA.

In 1950 he drafted the bill which was enacted to give the ROA its congressional charter.

Gen. King, who retired from the active Air Force Reserve in 1964, was a former president of the Judge Advocate Association.

A Washington native, Gen. King was a 1922 graduate of old Business High School. He received his law degree from Washington College of Law, now part of American University, in 1925.

Commissioned in the Army in 1941, Gen. King served during World War II in France, England and Luxembourg, where he was the senior American military representative in 1944-45. He received the Bronze Star and two awards from the grand duchess of Luxembourg for his service there.

His other awards included the Air Force Commendation Medal and the Legion of Merit.

Gen. King began a law practice here after the war and recently specialized in military law in the firm of King & Everhard.

Considered an authority on personnel law, especially as it affects the rights of veterans and reservists, Gen. King successfully pursued a number of landmark cases, including the case that led to the requirement for reserve officers to be on boards handling reserve cases.

Gen. King transferred to the Air Force Reserve in 1949 and was promoted to general officer rank in 1961. He retired from the active reserve in 1964, but continued to participate in affairs of the Air Force Judge Advocate Corps and the ROA.

In 1980, Gen. King was elected honorary national president emeritus of the ROA, an office held by only one other officer, the late Gen. Lewis B. Hershey.

A Mason, Gen. King was a member of the Scottish Rite, and he also belonged to the Army & Navy Club, the National Sojourners, the Military Order of the World Wars, The American Legion, the American Bar Association and the Sigma Nu Phi legal society.

He is survived by his wife, Jessie, a son, Thomas Henry Jr. of Charlotte, N.C.; and two grandchildren.

The family suggest that expressions of sympathy be in the form of contributions to the American Cancer Society.

Mrs. HAWKINS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 3 P.M.

Mr. THURMOND. Mr. President, I now move that the Senate be in recess in accordance with the order previously entered.

The motion was agreed to, and at 1:42 p.m. the Senate recessed until 3 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. MATTINGLY).

RADIO MARTI

Mr. BAKER. Mr. President, what is the pending business?

The PRESIDING OFFICER. The motion to proceed to the consideration of S. 602. The Senate is under cloture.

Mr. BAKER. I thank the Chair.

Mr. President, one of the Senators who has been involved in this matter is not here at this moment. He is expected shortly. The only reason I make this statement is to say that I hope we will not get a final conclusion of this matter until he arrives. That is perhaps as lavish a piece of optimism as I will indulge in today.

I urge Senators to make their statements as they may wish to do so. After all Senators who are principally interested in this matter are on deck, we can see how we will proceed from there.

Mrs. HAWKINS. Mr. President, I rise in support of S. 602, a bill to establish a radio station for broadcasting objective radio programing to the Cuban people. Radio Marti represents a peaceful solution to an important foreign policy concern. It will allow us to introduce a measure of accountability into the totalitarian Castro regime. It will allow us to introduce a measure of truth into the propoganda widespread in Cuba—an action consistent with our own highly held principles of freedom of speech, and freedom of press.

Mr. President, through the ages the spoken word has had a profound effect on men and nations.

In modern times, entire nations have been swayed by the spoken word.

The people of Italy were mesmerized by the oratory of Benito Mussolini. His radio propaganda machine took up his cry and Italy blindly followed the Duce to dismal defeat.

Adolf Hitler and Joseph Goebbels were masters of the persuasive power of the spoken word. These mad men, along with their cronies were able to turn an honest, peace-loving nation into a hypnotized horde of modern day savages. A God-fearing nation was made to believe that they, the pure Aryans, the chosen nation led by the Führer, were to lead the world into a 1,000 years of peace and prosperity, but instead they stained the world with its own blood.

The Second World War with all the atrocities was not a bad dream. We stood idly by while Nazi Germany deceived millions through radio propaganda.

When a government has control of radio and TV, the impossible can happen. How can people be so easily deceived? History accurately records the power of the spoken word. Modern history has shown the power radio had over the minds and actions of man.

Radio can be a power for peace or destruction. In a revolution, the radio and TV stations are the prime targets.

Control of the airwaves is a sure way of controlling the minds and actions of men.

Thank God for a free America, a country where we can hear the truth.

This great Nation has been built upon the principle of free speech, free radio, the right to hear many sides of a question. We often take this for granted. Will we deny this privilege and right to our Cuban neighbors?

For 25 years, our neighbors and past allies, the honest, freedom-loving people of Cuba, have been denied this freedom.

For 25 years, Castro and his henchmen, supported by the Russians, have kept the Cuban people from hearing the truth.

For 25 years, the Cuban people have been subjected to a tirade of lies and hate-filled misinformation about their Western Hemishpere friends.

For 25 years, we have stood by and watched our friends become our enemies.

Have we been negligent in using the free airwaves to beam the other side of the story to them?

Have our friends in Cuba been given a chance of hearing the truth? I believe we have watched the Communists snatch the initiative from us in the battle of the airwaves.

The Communists know and understand that international broadcasting is the single most important communications medium for reaching millions of people.

In the Western Hemisphere, the Soviets broadcast 322 hours of program per week of which 108½ hours are in English. The U.S.S.R. also broadcasts to Latin America in Creole, French, Esperanto, Spanish, Portuguese, Quechua, and other languages. The People's Republic of China broadcasts 123 hours a week to this hemisphere. Seven additional East European countries offer an additional 257 hours to Latin America plus 200 hours further per week for North America.

Cuba broadcasts 275 hours of programs per week to North America and the Caribbean of which 38 hours are broadcast by La Voz de Cuba over two medium wave (AM) transmitters. The best way a totalitarian state has of retaining control of its people is to manipulate the media. Control over newspapers, TV, and radio is the key to the totalitarian government's power. If the people have little or no access to information other than government propaganda, they then can have no basis for dissent.

This is the significance of Radio Marti. Radio Marti would, for the first time in many years time, provide the people of Cuba with an alternative to government-censored news.

For decades, the United States has provided the people of Eastern Europe and the Soviet Union with an alternative to government propaganda. Radio Marti would provide this same service for the people of Cuba.

Radio Marti will supply the Cuban people with information they cannot get through the government-censored news media. It will encourage the Cubans to draw their own conclusions.

Radio Marti is an essential element to a strong and free Cuba. Economic and political stability, social progress, and acceptance of human rights is essential to the peace and prosperity of the peoples of Cuba, the Caribbean, and the Western Hemisphere. Radio Marti can be a powerful force in helping to create this way of life.

Radio Marti is not intended to incite rebellion or to encourage the Cubans to migrate to the United States. It will merely report as objectively as possible on events in Cuba, Cuban Government actions abroad, and the impact of these on the Cuban people. As a part of its programing Radio Marti will also broadcast to the Cuban people music, cultural events, and sports. I do not believe that Radio Marti will result in another Mariel boatlift. In the first place, Mariel was a diplomatic disaster for Castro. It showed the whole world the unpopularity of his regime.

In the second place, we have made it clear that we could consider another Mariel boatlift as a hostile act. The administration has drafted a contingency plan to deal with such emergencies in the future. Cuba will not be able to relieve the frustrations of its people by forcibly increasing the Cuban dispora here.

Domestic broadcasters have raised concerns about broadcasting to Cuba and we have tried to be sensitive to these concerns. We have not been insensitive to the concerns expressed by domestic broadcasters.

We have not, however, been insensitive to the concerns expressed by domestic broadcasters. The legislation before the Senate today has been modified from that introduced in the last Congress to incorporate four out of the five recommendations suggested by Edward O. Fritts, president of the National Association of Broadcasters, designed to minimize potential problems with Cuban interference. Fritts recommended: First, put Radio Marti at either end of the AM band outside of commercial frequencies—this bill permits this, second, operate Radio Marti on shortwave—this bill permits this, third, permit Government leasing of airtime on existing commercial AM stations for Radio Marti—this bill permits this, and fourth, allow Radio Marti to share the frequency now used by the Voice of America at its marathon station—this bill permits this.

The only NAB recommendation not accepted involved expanding the operating hours and mandate of the Voice of America to include the kind of programing envisioned for Radio Marti.

This recommendation was unacceptable because the purposes of the VOA and Radio Marti are different and should not be mixed. The VOA broadcasts news and programing about the United States to foreign countries. Radio Marti, like Radio Free Europe and Radio Liberty, will act as a surrogate home station and broadcast news and information about Cuba to the Cuban people. For 30 years the fundamental differences in these approaches have been recognized by keeping the operation of the VOA distinct from the other surrogate home stations, Radio Free Europe, and Radio Liberty. I firmly believe this practice should be continued and Radio Marti kept distinct from the VOA.

Radio Marti currently as 35 cosponsors; it has bipartisan support. It was passed out of the House Foreign Affairs Committee by a voice vote and in the Senate Foreign Relations Committee by a 13-to-4 margin. In addition, it has the support of the AFL-CIO and, needless to say, President Reagan. It is a good bill and a peaceful means of dealing with Cuba.

Mr. President, I have a letter addressed to me from Norman Luxenburg, professor at the University of Iowa. I shall read this letter from Mr. Luxenburg.

JULY 22, 1983.

Hon. PAULA HAWKINS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HAWKINS: I am writing to urge you to support the funding of Radio Marti.

As a specialist in Soviet Studies I am quite familiar with Radio Free Europe and Radio Liberty. This type of radio broadcast to the people of Cuba would be a very appropriate counteraction to Castro's effective use of very crude, incorrect, anti-American propaganda "facts".

A station broadcasting true, non-propaganda information to Cuba would either force him to modify his statements or appear ridiculous.

According to the Department of Commerce's Foreign Broadcast Information Service Daily Report of June 27, 1983, 14 representatives of U.S. independent broadcasting stations recently visited Havana. While there, they met with the Cuban Vice Foreign Minister, Ricardo Alarcon de Quesada. He told the group of "the attacks being endured by Cuba as a result of the U.S. Government's policies and the Cuban people's efforts aimed at emerging from underdevelopment." The broadcasters visited the country to "learn firsthand about the revolution's gains, as well as to exchange experiences in the field of radio broadcasting."

It is U.S. broadcasters who have been actively campaigning against Radio Marti. It is interesting that they are talking with Castro's people, rather than with their own.

Again, I urge you to support this most important legislation.

Sincerely,

NORMAN LUXENBURG,
Professor.

He attacks several newspaper clippings from several newspapers, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

ASSESSING CASTRO'S "SUCCESS"

(By Norman Luxenburg)

On Jan. 1, it will be 23 years since Fidel Castro entered Havana in triumph and began changing Cuban society and Cuban life.

In assessing Castro's achievements since he assumed power in 1959, there has been a tendency to assume that pre-Castro Cuba was a typical underdeveloped nation.

Thus, for example, one columnist writing on the front page of the Wall Street Journal of Nov. 16, stated, "The average Cuban lives very well these days by Third World standards." The writer goes on to state that this fact has made Castro popular with the Cuban people.

However, pre-Castro Cuba was most definitely not a typical Third World nation in the commonly accepted sense. Neither was it a typical Caribbean nation. By whatever measure used, whether it is the number of students in higher and secondary education, the number of physicians per capita, the infant mortality rate, the per capita gross national product, the per capita number of telephones, television sets, cars, etc., the Cuba of the late 1950s was far ahead of any other nation in the Caribbean and Third World.

Newsweek magazine, May 23, 1980, states, "The most notable achievement (of Castroism) is the infant mortality rate . . ." Time magazine, March 11, 1978, pointed to the low Cuban infant mortality rate as a great achievement of Castroism. Juan de Onis of the New York Times in an article last December implied the same. The German mass circulation illustrated weekly Stern of Feb. 21, 1980, stated that the infant mortality rate during the Castro regime had been reduced from 60 per 1,000 to 23 per 1,000.

However, the Cuban infant mortality rate before Castro was not 60 per 1,000 but 32 per 1,000. This Cuban infant mortality rate of 32 per 1,000 when Castro took over in 1959 was already one of the best in the world, better than that of even Germany, Italy and Spain. The Cuban rate compared with about 100 infant deaths per 1,000 births in countries such as Brazil, Colombia, Guatemala and Peru.

This Cuban infant death rate had been reduced in the 20 pre-Castro years from 99 to 1,000 to 32.

Factual errors in reports about Cuba abound, apparently because many persons accept without checking further the statistics given them from questionable sources. Thus, Stern states, "The average life expectancy (under Castro) has risen from 58 . . ." In actual fact, life expectancey in pre-Castro Cuba was 62 not 58. This Cuban 62 compared with 55 in Latin America as a whole. (Source: U.N. World Population Trends and Policies, 1972.)

It is not merely the popular journals that make such errors.

In 1977, a U.S. House of Representatives committee headed by Rep. John Bingham of New York visited Cuba and, apparently impressed by talks with Cuban officials, published its official report on May 23, 1977, which states that before Castro there were "187,000 students" in Cuba and that the literacy rate under Castro had risen from 25 percent to 99 percent.

If one accepts without question such outlandish figures, as the committee apparently did, it becomes very easy to excuse almost all excesses and inadequacies of the Castro regime and to ascribe many undeserved virtues to it.

However, in pre-Castro Cuba there were not 187,000 students, but about one million. The literacy rate was not 25 percent but 78 percent (Source: Britannica, 1959 article on Cuba. U.N. Statistical Yearbook, 1960, 1962.)

In the pre-Castro period Cuba had a favorable balance of trade plus a steady "hidden" income from tourism. Today the nation is operating at a deficit, kept afloat only because the Soviets sell Cuba petroleum at below market prices and buy sugar at inflated prices.

Cuban capital was increasing rapidly in the pre-Castro period and instead of foreign capital gaining a greater hold on the Cuban economy, Cuban capital was acquiring control of enterprises formerly held by North Americans and other outsiders. This is especially true for the sugar mills and sugar industry which between the 1930s and 1950s had, for the most part, passed under Cuban ownership.

These are some of the important facts that have to be considered before any realistic assessment of Castroism can be made.

[From the Indianapolis News, June 12, 1982]

THE TRUTH ABOUT EXPLOITATION

(By Norman Luxenburg)

A major Communist theme in Third World Nations and elsewhere, is that United States exploitation is largely responsible for the poverty of underdeveloped nations.

Fidel Castro, in a marathon address to the United Nations and in numerous other statements, has emphasized this point, accusing the commercial interests of having continually mined the wealth out of a poor, underdeveloped Cuba.

Unfortunately, these types of arguments have been accepted without analysis in a number of intellectual circles, and they have a certain appeal to some idealists in this country to whom it appears to be a mark of objective thinking to repeat unfounded criticisms of the United States.

In refuting these types of charges, it should, least of all, be realized that most of the impoverished nations were extremely poor long before they had any significant contact or relations with the United States.

This nation has not used its military or economic might to take unfair economic advantage. Indeed, no nations were more completely dominated by the United States than a prostrate Germany and Japan after World War II. These over-populated, mineral poor, war ravished countries were occupied by the United States. Virtually all officials there had to be cleared by American authorities.

What was the result?

Permanent poverty? American economic domination? American stifling of economic initiative?

Nonsense! The economies of these nations have been bringing in continued trade surpluses and they have had increasing capital to invest abroad, including in the United States itself.

The interesting thing, however, is that the same phenomenon which took place recently in Japan and Germany was occurring in Cuba in the pre-Castro period.

Instead of Cuba's coming more under the control of Yanqui and foreign capital, the exact opposite was the case. British investments which had been quite extensive in the 1920s, especially in railroads, had dwindled to virtually nothing, less than half a million dollars, by the 1950s!

U.S. investments in Cuba which had been above $1 billion back in the 1920s were down to $861 million in 1958. Cuban capital had increasingly taken control of such key industries as sugar, banking, etc., which in the late 1920s and early 1930s had largely come under control of U.S. interests.

In other words, the 25-year period in which the Cuban national product and national income had multiplied, U.S. investment in Cuba had declined. This does not mean that in some important industries, especially communication and electric power, it was not considerable. It does mean however that U.S. capital was becoming a much smaller factor in overall Cuban economic life. Simply in the period 1945–57, for example, the Cuban GNP rose from $1.07 billion to $2.3 billion.

In almost every year of that period Cuba was running a favorable balance of trade. The peso was freely convertible with the dollar. Tourism, which formerly had resulted in a new outflow of capital for Cuba, had by the late 1950's become a constant and expanding source of capital net earnings for that nation.

It is long overdue to answer the strident demagogues.

UNITED STATES ALSO NEEDS FACTS ON CUBA AMERICANS, AS WELL AS CUBANS, NEED TO BE SET STRAIGHT

(By Norman Luxenborg)

Proponents of the creation of Radio Marti, which would be a semi-independent radio station broadcasting news about Cuba to the inhabitants of that island, argue that Castro presents distorted information to his people.

And they are right. The Cuban people receive from their government little accurate news about their country.

If we are concerned about disseminating the truth about Cuba, though, we should not neglect the home front. Scholars specializing in Cuba have a duty to challenge information circulating in the West. For the Western media frequently puts forward inaccuracies concerning the past and present state of affairs of Cuba.

For example, there is a tendency, assiduously furthered by Castro and his supporters, to assume that prior to Castro's accession to power in 1959 Cuba was a static, third-World nation, coming more and more under the control of large U.S. monopolies which were draining the wealth of the nation.

Again and again, reports on Cuba imply that pre-Castro Cuba was a typical, underdeveloped Caribbean nation.

Thus, a columnist writing on the front page of the *Wall Street Journal* of last Nov. 16 stated "The average Cuban lives very well these days by Third World standards." The writer went on to say that this fact has made Castro popular with the Cuban people, who are quite ready to forego political liberties because of the material benefits that have accrued to them.

However, pre-Castro Cuba was most definitely not a typical Third World nation in the commonly accepted sense. Neither was it a typical Caribbean nation. By whatever measure used, whether it is the per capita gross national product, the number of students per capita, the number of physicians per capita, the infant mortality rate, the number of television sets, phones, cars, etc., Cuba in the late 1950s was far ahead of any other nation in the Caribbean and any nation of the Third World.

Factual errors in reports about Cuba abound, apparently because many persons accept without checking further the statis-

tics given them by questionable sources. Thus, the article already mentioned states "The average life expectancy (under Castro) has risen from 58 . . ." In actuality, life expectancy in pre-Castro Cuba was 62, not 58. Cuba's 62 compare with 55 in Latin America as a whole and with an expectancy of about 45 in number of the Caribbean states. (Source: "U.N. World Population Trends and Policies," 1977 Vol. 1, Table 75.)

It is not merely the popular journals that make such errors. In 1977 a U.S. House committee, headed by Rep. Jonathan Bingham of New York, visited Cuba. Apparently impressed by talks with Cuban officials, this committee published an official report on May 23, 1977, stating that before Castro there were "187,000 students" in Cuba and that the literacy rate under Castro had risen from 25 percent to 99 percent.

If one accepts without questions such outlandlish figures as the committee apparently did, it becomes very easy to excuse almost all excesses and inadequacies of the Castro regime and to credit it with many underserved virtues.

In pre-Castro Cuba, however, there were not 187,000 students but about 1 million. The literacy rate was not 25 percent but 78 percent. (Source: Encyclopedia Britannica, 1959, article on Cuba. Also, U.N. Statistical Yearbooks, 1960, 1962, etc.)

In the pre-Castro period, Cuba had a favorable balance of trade. In addition, and extremely important as a portent for the future, the island was developing a source of "hidden income" from tourism.

Today the nation is operating at a deficit. The Soviets sell Cuba petroleum at below-market prices and buy sugar at inflated prices. In return Cuban surrogates perform some of the Soviets' difficult and dirty work in Africa and elsewhere.

Instead of foreign and United State capital gaining an ever-greater hold on the Cuban economy in the pre-Castro years, Cuban capital was increasing very rapidly and acquiring control of many enterprises once dominated by North Americans and other outsiders. This is true, for example, for both the banking and sugar industry, which between the late 1930s and the early 1950s had passed overwhelmingly into Cuban hands.

No doubt its supporters envision Radio Marti broadcasting such facts.

These facts should also be disseminated in the West, however, by scholars and journalists knowledgeable about Cuba.

PHONY FACTS GLOSS CASTROISM'S "STRIDES"

(By Norman Luxenburg)

On Jan. 1, it was 23 years since Fidel Castro entered Havana in triumph and began changing Cuban society and Cuban life. In assessments of Castro's achievements since assuming power in 1959, the tendency has been to assume that pre-Castro Cuba was a typical, underdeveloped Caribbean nation.

Thus, for example, one columnist writing on the Wall Street Journal's front page last Nov. 16 stated: "The average Cuban lives very well these days by Third World standards." The writer went on to say that this fact has made Castro popular with the Cuban people.

However, pre-Castro Cuba was most definitely not a typical Third World nation in the commonly accepted sense. It wasn't even a typical Caribbean nation. By whatever measure used—number of students in higher and secondary education, number of physicians per capita, infant mortality rate, per capita gross national product per capita number of telephones, television sets, cars, etc.—Cuba in the late 1950s was far ahead of any other nation in the Caribbean and Third World.

Since a number of articles have been extremely enthusiastic about Cuba's strides in public health, extolling in particular the supposed great advances Castro Cuba has made in reducing infant mortality, let's look first at the Cuban infant morality rate.

Newsweek magazine (May 23, 1980) stated: "The most notable achievement of (Castroism) is the infant mortality rate . . . ." Time magazine (March 11, 1978) pointed to the low Cuban infant mortality rate as a great achievement of Castroism Juan de Onis of the New York Times, in an article last December, implied the same. The German weekly, Stern (Feb. 21, 1980), said the infant mortality rate during Fidel Castro's regime had been reduced from 60 per thousand to 23 per thousand.

Actually, the pre-Castro infant mortality rate was not 60 per thousand but 32 per thousand. This rate of 32 per thousand when Castro took over in 1959 was already one of the best in the world, better even than those of Germany, Italy and Spain. Cuba's 32 compared with about 100 infant deaths per thousand births in countries had been reduced in the 20 pre-Castro years from 99 per thousand to 32.

Factual errors in reports about Cuba abound, apparently because many persons accept without checking further the statistics given them by questionable sources. Thus, Germany's magazine Stern states: "The average life expectancy (under Castro) has risen from 58. . . ." In actuality, life expectancy in pre-Castro Cuba was 62, not 58. Cuba's 62 compared with 55 in Latin America as a whole. (Source: U.N. World Population Trends and Policies, 1977, Vol. I, Table 75.)

It is not merely the popular journals that make such errors. In 1977 a U.S. House committee, headed by Rep. John Bingham of New York, visited Cuba. Apparently impressed by talks with Cuban officials, it published its official report on May 23, 1977, stating that before Castro there were "187,000 students" in Cuba and that the literacy rate under Castro had risen from 25 percent to 99 percent.

If one accepts without question such outlandish figures, as the committee apparently did, it becomes very easy to excuse almost all excesses and inadequacies of the Castro regime and to credit it with many undeserved virtues. In pre-Castro Cuba however, there were not 187,000 students but about 1 million. The literacy rate was not 25 percent but 78 percent. (Source: Encyclopedia Britannica, 1959 article on Cuba. U.N. Statistical Yearbook, 1960, 1962.)

For brevity's sake, I won't go into further detailed statistics on GNP, number of cars per capita, etc. Suffice it to say that Cuba, with 191,000 telephones in 1959, had twice as many as did Costa Rica, Nicaragua, El Salvador, the Dominican Republic, Haiti and Honduras combined. Cuba was by no means standing still in the pre-Castro years.

From fewer than 5,000 students in higher education around 1930, the total number had risen to over 55,000 by the mid 1950s. From an infant mortality rate of about 100 per thousand births in the mid 1930s, the rate had been cut to 32 per thousand by the later 1950s. The number of telephones, just in the four-year period 1955-59, had risen from 140,000 to 190,000.

In the pre-Castro period, Cuba had a favorable balance of trade plus a steady "hidden" income from tourism. Today the nation is operating at a deficit. The Soviets sell Cuba petroleum at below-market prices and buy sugar at inflated prices. In return, Cuban surrogates do the Soviets' dirty work in Africa and elsewhere.

Cuban capital, was increasing rapidly in the pre-Castro period. Instead of foreign capital gaining an ever greater hold on the Cuban economy, Cuban capital was acquiring control of enterprises formerly held by North Americans and other outsiders. This is especially true for the sugar mills and sugar industry. Between the 1930s and 1950s, these had, for the most part, passed into Cuban ownership.

[From the Plain Dealer, June 21, 1982]

U.S. EXPLOIT CUBA?

CASTRO FULL OF BEANS

(By Norman Luxenburg)

A major Communist theme in Third World nations and elsewhere is that U.S. economic exploitation is largely responsible for the poverty of underdeveloped nations.

Fidel Castro, in a marathon address to the United Nations and in numerous other statements, has emphasized this point, accusing U.S. commercial interests of having continually drained the wealth out of a poor, underdeveloped Cuba.

Unfortunately, these types of arguments have been accepted without analysis in a number of intellectual circles, and they appeal to some idealists in this country for whom it appears to be a mark of objective thinking to repeat unfounded criticisms of the United States.

In refuting such charges, it should first be realized that most of the impoverished nations were extremely poor long before they had any significant contact with the United States.

This nation has not used its military or economic might to take unfair economic advantage. Indeed, no nations were more completely dominated by the United States than prostrate Germany and Japan after World War II. These overpopulated, mineral-poor, war-ravished countries were occupied by the United States.

What was the result?

Permanent poverty? American economic domination? American stifling of economic initiative?

Nonsense! The economies of these nations have been bringing in continued trade surpluses and they have had increasing capital to invest abroad, some in the United States itself.

The same phenomenon was occurring in Cuba before Castro.

Instead of Cuba coming more under the control of Yanqui and foreign capital, the exact opposite was the case. British investments, which had been quite extensive in the 1920s, especially in railroads, had dwindled to virtually nothing, less than half a million dollars, by the 1950s!

U.S. investments in Cuba, which had been above $1 billion in the late 1920s, were down to $879 million in 1958. (Source: U.S. Office of Business Economics, Balance of Payments Stat. Supplement, 1963.) Cuban capital had increasingly taken control of such key industries as sugar, banking, etc., which in the late 1920s and early 1930s had largely come under control of U.S. interests.

In other words, in a 25-year period in which the Cuban national product and national income had multiplied, U.S. investment in Cuba had declined. This does not mean that in some important industries, es-

pecially communications and electric power, U.S. investments were not considerable. It does mean, however, that U.S. capital was becoming a much smaller factor in overall Cuban economic life. Simply in the period 1945-57, for example, the Cuban gross national product rose from $1.07 billion to $2.3 billion.

In almost every year of that period Cuba was running a favorable balance of trade. The peso was freely convertible with the dollar. Tourism, which formerly had resulted in a net outflow of capital for Cuba, had by the later 1950s become a constant and expanding source of capital net earnings for that nation.

U.S. BROADCASTERS RECEIVED BY RICARDO ALARCON

[Text] At the Foreign Ministry, Cuban Vice Foreign Minister Ricardo Alarcon de Quesada has received the group of 14 representatives of U.S. independent broadcasting stations, which has been visting our country since last Saturday to learn firsthand about the revolution's gains, as well as to exchange experiences in the field of radio broadcasting.

Alarcon explained to the visitors "the attacks being endured by Cuba as a result of the U.S. Government's policies and the Cuban people's efforts aimed at emerging from underdevelopment."

Mrs. HAWKINS. Mr. President, I also have an article written by David M. Abshire, who is our new U.S. Ambassador to NATO. He is also the brother of my banking legislative aide.

He wrote a great article entitled, "Radio Marti Opponents Might Profit From the Past."

RADIO MARTI OPPONENTS MIGHT PROFIT FROM THE PAST

(By David M. Abshire)

The unusually heated debate over the proposed Radio Marti—an independent, publicly funded radio station to broadcast to the Caribbean area, and especially to Cuba—is reminiscent of an equally intense debate over the future of European-based American radio stations in the late '60s and early '70s. Those who currently oppose the Radio Marti project might profit from a review of the debate over Radio Liberty and Radio Free Europe (RL/RFE). I think some of the opposition comes from genuine misunderstanding.

Back in the late 1960s, as part of the general storm over CIA funding of various organizations, Sen. Clifford Case proposed that RL/RFE be openly funded instead of receiving clandestine monies. I came to be deeply involved in the subsequent debate, as assistant secretary of state for congressional relations and then as the first chairman of the Board for International Broadcasting (BIB).

Case was quite right. In my view our broadcast stations should have long since been separated from the intelligence community. They are properly part of the free flow of information and the competition of ideas, not arms of American policy per se.

But at the time Case made his proposal, the mood of the Congress was so hostile to anything smacking of CIA covert operations that we judged it unlikely that we could get public funding for RL/RFE. This view was reinforced by the Katzenbach Report on CIA-funded cultural activities, which itself suggested that open funding would be difficult to obtain. I always disagreed with that view, because, properly understood, these were radio's "human rights."

We managed to get a one-year extension for the radio budget, and during the course of that year a genuinely bipartisan consensus emerged, albeit with continuing opposition from both political wings. Some liberals opposed the radio stations, calling them "cold war relics," mere propaganda operations, while some conservatives opposed them because they were insufficiently propagandistic and aggressive.

The bipartisan nature of this opposition suggested to me then—and events have and events have shown the asesment to be correct—that we were on the right track, and that the radio stations were in fact independent news-reporting organizations with their own integrity.

During the year-long debate, this was finally recognized by major cultural leaders and news organizations, and the radio stations were given public funding.

The bipartisan consensus rested upon a recognition that the people of Eastern Europe would never hear the truth about world events unless free countries transmitted it to them. In an illuminating episode, RFE broadcast information about the Polish economy that suggested the country would soon face a serious internal crisis.

This information was not available within the Soviet bloc, and Polish economists and Kremlin leaders both paid close attention to the broadcasts. Leaders high up in the Soviet hierarchy had daily summaries prepared for them, in order to study the question.

How right RFE was. This incident showed that the broadcast stations rectify disinformation the Soviets put out about our activities, and they also correct distortions of their own part of the world that appear in East Europeans media.

RF/RFE had done this even when it was funded by the CIA, since the men in charge of the radio stations had long since realized that they would only be effective if their information were accurate. Like the British Broadcasting Corp. (BBC) during World War II, RL and RFE would succeed only if they were believed if they told the truth. With the BIB Act of 1973—and the organizational changes initiated last year by Sens. Claiborne Pell (D., R.I.) and Charles Percy (R., Ill.), and Rep. Dante Fascell (D., Fla.)—it is illegal for the stations to have any involvement with the CIA.

All these considerations apply with equal force to Radio Marti, and it is disappointing to see critics raising the same false fears as were directed against RL/RFE years ago. The real target of American criticism should be the Communist countries that have reneged on promises to respect the free flow of information.

The Helsinki Final Act—duly signed by the Soviet Union and its satellites in Eastern Europe—recognized the "expansion in the dissemination of information broadcast by radio," and expressed "hope for the continuation of this process." While not as enthusiastic as the language in the United Nations Charter, this nonetheless constituted a commitment to open broadcasting, a commitment that has been more honored in the breach than in observance. All-out jamming of Western broadcasts was resumed by the Warsaw Pact countries in 1980, and these same countries urged that jamming be legalized at the ITU Conference in Nairobi in 1982.

Like the Warsaw Pact countries, Cuba does not want accurate information flowing to its citizens; like those other Communist nations, Cuba wishes to control its internal "news" and to devote a large part of its budget to sending disinformation to the West. (Cuba today broadcasts regularly to the United States, Western Europe and Latin America.)

It is in our interests for the Cuban people to know what is going on, both within and outside their island. Over time, this is in the interest of peace.

Radio Marti will function under the guidance of the Board for International Broadcasting, an organization that has demonstrated its integrity and coherence for over a decade. The same high standards that have been maintained by RL/RFE will be set for Radio Marti. Such a program is consistent with our national interests, the interests of the Western world, and with the U.N. Charter and Helsinki Agreement on the free flow of information and ideas.

And that is the end of the article by David Abshire.

Mr. President, it has been nearly 2 years since President Reagan first submitted legislation to create Radio Marti. Still the radio broadcasts to Cuba are not on the air.

That delay should be ended soon.

We are here today after skirmishing on this most vital foreign policy issue. The President this last Saturday spoke loud and clear in his radio broadcast reiterating his strong support for Speak the Truth.

St. John said:

Know the truth and the truth shall make you free.

President Reagan understands this. This Senator from Florida understands this. A great number of Senators in this body understand this.

I believe that, after we have seen firsthand, all citizens in this free country who too often do not treasure freedom of the press, and freedom of speech, and free airwaves as much as we should can now see for ourselves how the Soviet leadership dismisses the truth, and how the Soviet people are denied the truth, and why Castro, like his Soviet masters, needs to keep the truth from his people.

In order to maintain his Communist dictatorship many miles away from Russia, but only 90 miles away from Florida, Castro has to keep his people in darkness. He fears the truth.

I finally believe, Mr. President, that President Reagan is right, that Radio Marti is an initiative that should have been implemented long ago.

I placed articles on every Senator's desk this morning, a well-documented article in the Miami Herald of Sunday, September 11, 1983, showing where Cuba trains guerrillas at a covert military base on the island of Cuba.

Mr. President, last Thursday I took a trip to the Guantanamo Naval Base in Cuba. It is probably one of our most strategically located bases in the Western Hemisphere. Sixty percent of our imported oil flows through the region it guards, and it is surrounded by a

Cuba armed to the teeth. The base is surrounded by Castro's Cuba. We have a small chainlink fence that is merely a boundary marker. Castro has four high, reinforced barbed-wire fences 20 or 30 feet apart. And the land in between each of those fences Castro erected is mined. No one dares to go through our small boundary fence to the other side into Cuba. They would be shot.

When you look over that series of fences that Castro has erected to keep his people in, you can see why he does not want to let anybody know the truth or hear the truth. As I have said before, Cuban mothers do not know their sons have been trained and sent to Angola. Many do not know that their sons have been killed because they are buried elsewhere. The Cuban families know very little about the truth. That is why we believe there is a great need to spread the truth in a peaceful manner as proposed by President Reagan.

As we watch the Soviets cover up, lie, maneuver and contradict each other over the Korean aircraft, we see that Soviet style and we know the Cuban people also do not know the truth. Recently we have seen helpless citizens from many countries who bought a commercial ticket on a commercial aircraft shot out of the skies and then have the Soviets lie about it and spread propaganda about it until we had about 50 stories on it. I can see clearer now than ever before why the President asked for more money for Radio Free Europe and Radio Liberty and why he included in his Saturday address call for Radio Marti.

I hope my colleagues will put aside their parochial interests that are bounded by an imaginary line that divides Florida from Georgia, Georgia from North Carolina and South Carolina, and on up the line to New York and out to the beautiful Middle West where I recently conducted a hearing on drugs. I hope my colleagues will set aside those parochial interests of the broadcasters who still want the other two or three pieces of the pie even though we had negotiated and negotiated and negotiated for 15 months.

I hope the Soviet-Korean Air Line incident along with the article on Cuban terrorist camps that I have placed on everyone's desk will raise our awareness that we have of the Soviet satellite 90 miles from our shores. Indeed it is not our back yard like Latin America. This is our back porch. It is most important that each of us pauses and deliberates on this most important freedom initiative that we have embarked upon since I have joined the Senate, and I urge my colleagues to support the President's initiative and my bill S. 602 in spreading the truth to the country and people.

Mr. President, I ask unanimous consent that articles and editorials in support of radio broadcasting to Cuba, as well as a Heritage Foundation issue bulletin, entitled "Radio Marti: Getting the Truth to Cuba," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Times, June 8, 1983]

NEW WAVES FOR CUBA?

When Fidel speaks, millions listen, including some who should know better. Fidel's topic now is Radio Marti, an American station which, if it ever becomes a reality, would broadcast news into Cuba in the fashion of Radio Free Europe. He decries it with ululations strong, and he fights it with threats.

Fidel has had his effect. But he will, we hope, today see the Senate Foreign Relations Committee approve Radio Marti, and see the House committee do the same later this week.

How he has fought Radio Marti! Castro promises he'll interfere with commercial U.S. broadcasts should Radio Marti come to life. Hearing this, the National Association of Broadcasters cried for mercy, and last year wrote the Senate to insist that if Castro carries through with his threat, the government of the United States should pay compensation to the affected stations. The bill was killed.

But Castro continued to interfere with American broadcasts, as he has done for the last 15 years. In August of 1981, American engineers showed the Cubans how they could provide better radio service within their confines while resolving the interference problems they were causing in the U.S. and other neighboring countries. They declined to make any changes. The message: We would rather go on interfering with American broadcasts than improve our own broadcast capabilities. The prospect: the interference will continue.

The whole affair is perhaps most significant as evidence of Castro's feelings of vulnerability to ideological challenge. The swaggering Cuban has been in power now for some 24 years. Half of Cuba's population is under 25, and besides some programming from the Voice of America (the VOA broadcasts 85½ hours a week in our hemisphere; Cuba broadcasts 275) the voice of Fidel is pretty much all they've ever heard.

Lord knows what ideas Radio Marti could beam into such young minds. It could even bring about the deflowering of the Castro mystique. It could create mutinous moods that might be a problem for those who administer things out on the Isle of Pines.

Since last year's defeat, the administration has done much to make Radio Marti more attractive to both broadcaster and taxpayer. The expenditure request is down 40 percent; four of five NAB requests have been adopted, with only their suggestion that the VOA handle Marti programming declined for reasons of impossibility. The administration has also pledged to help maintain the integrity of American transmissions.

The administration has made concessions enough. In spite of the quaking broadcasters, the congressional committees should nod, and give the Cuban people a chance to find out that there's more than one world view and more than one way of life possible in the Western Hemisphere.

[From the Washington Post, May 20, 1983]

STATIC FROM CUBA

Radio Marti is back: the Reagan administration's proposal for a new official station broadcasting just to Cuba—the Voice of America covers Latin America as a whole. At the time the proposal was derailed (mostly for extraneous considerations) last year, it seemed a good way to expand the listening choices of Cubans, as long as the broadcast would serve the purposes of information, not destabilization. It still seems a good idea, but there's static on the line.

For some 15 years, Fidel Castro's prodigal domestic and international broadcasts, sent out without use of directional antennas, have interfered with domestic broadcasts in the United States and in the Caribbean and Central America. Notwithstanding widespread complaints, Cuba arrogantly announced now plans to expand greatly the power—and interference potential—of its transmitters.

In the Carter period, efforts were finally launched to work out a solution. But when Radio Marti was announced, the Cubans, seeing it as hostile and provocative, rebuffed negotiations in the American-favored format. They have since ignored decisions of the regional body that allocates frequencies.

Fidel Castro is a practicing radio outlaw. But in his capacity to interfere with American stations, he wields a weapon for which the United States has yet to find a suitable defense. He threatens now to answer Radio Marti with more interference. During congressional hearings on the new radio, he brought his intent home to American broadcasters by jamming some 20 American commercial stations with the Voice of Cuba.

American stations, speaking through the National Association of Broadcasters, are aware that Cuba is using them in its fight against Radio Marti. They squirm in the role. But notwithstanding occasional mutters about "taking out" the offending Cuban transmitters, the American government has not done much about interference in the past. The record makes broadcasters wonder what help they will get if Radio Marti comes on the air.

Actually, American officials have taken some practical steps, agreeing, for instance, to have Radio Marti share the AM frequency already used for 20 years by the Voice of America. The Radio Marti legislation offers limited funds to compensate broadcasters for expenses incurred in mitigating Cuban interference.

The broadcasters did not create the conditions that make Cuban-American issues so hard to resolve. They are entitled to expect their legitimate commercial interests to be respected. Fortunately, patrons of Radio Marti, displeased by the NAB's effective lobbying, appear to be trying to meet the broadcasters halfway.

[From the Miami Herald, June 16, 1983]

TURN ON NOW TO RADIO MARTI

(By Bob Packwood)

We can wait no longer for Radio Marti—a radio station designed to bring update, uncensored news to the Cuban people. For more than 20 years, the Cuban people have received a steady flow of censored news that does not tell them the full scope of their government's activities at home and abroad. I believe it is time the Cuban people be allowed to hear the truth about their government's actions and that the Castro regime be held accountable for them.

There is currently pending in Congress a bill to establish Radio Marti. Last year a similar bill passed the House of Representatives by a 2-to-1 margin, and was favorably reported out of the Senate Foreign Relations Committee. Time constraints at the end of last year prevented the full Senate from considering Radio Marti legislation. I have joined several of my colleagues again this year in sponsoring the Radio Marti bill. I continue to find the arguments supporting radio broadcasting to Cuba compelling.

The Cuban economy is failing. Soviet aid—almost $4 billion in 1982—is more than one quarter of Cuba's GNP. Indeed, the collapse of the Cuban economy has been prevented only by over $13 billion in Soviet aid over the last decade. And yet, day after day the Cuban people face unacceptable conditions—rationed food, rationed clothing, and deteriorating housing. There has been no improvement in the real income earned by the average Cuban since 1959.

The Cuban people certainly know, from their own experiences, about the serious economic problems facing their country. What they don't know is that at the same time they are forced to live with these conditions, their government is supporting 40,000 soldiers in Africa, 2,000 military and security personnel in Nicaragua, and many thousands more Cubans who are abroad on various "international" missions, most of them military.

The Cuban people are deliberately kept ignorant of the Cuban government's foreign adventures. They have no way to hold their government accountable for devoting such a large portion of the country's resources to military missions abroad.

Cubans have a need, and a right, to know what the Castro regime's activities are costing them—in terms of their own economy and in terms of international statute.

Radio Marti will accomplish this goal. It will break the government's absolute control over the dissemination of information and be an important addition to sporadic U.S. and Voice of America broadcasts to Cuba.

At this time, there is not one U.S. commercial broadcast directed specifically at the Cuban people. And it is important to remember that Radio Marti will be aimed at the Cuban people, not at the Cuban government.

Radio Marti will serve the same vital role that Radio Free Europe and Radio Liberty serve in broadcasting to the Soviet bloc in Europe. The operation of these radio networks is an integral part of U.S. foreign policy serving, in particular, our interest in promoting the free flow of information and ideas. For tens of millions of East Europeans, the most reliable information about their country comes from the outside world. There is no comparable source of news for those living in Cuba.

The Communist-bloc countries certainly understand the importance of radio broadcasting. The Soviets broadcast 322 hours of program each week in this hemisphere alone. The People's Republic of China broadcasts 123 hours to this hemisphere.

In addition, seven East European countries broadcast about 250 hours to Latin America and another 200 hours to North America. Cuba also does its share with 257 hours of broadcasting each week to North America and the Caribbean.

It is obvious that these countries understand that international radio broadcasting is the best way to communicate with millions of people. Their hundreds of hours of weekly broadcasting is testimony to this understanding. And yet these same countries refuse to grant their own people the right to listen to foreign broadcasts without interference. Fidel Castro has made it clear that he does not like the idea of Radio Free Europe-type broadcasting to Cuba.

Even with the establishment of Radio Marti, the United States will remain far behind the Soviet Union and Cuba in the amount of resources and time devoted to international radio broadcasts. I think it is essential that we meet this challenge and provide for the creation of this new voice of truth for the Cuban people.

[From the Wall Street Journal, June 7, 1983]

RADIO MARTI, AGAIN

The Reagan administration wants to set up a new radio station, Radio Marti, to beam a little political truth into the information-starved island of Fidel Castro's Cuba. The project does not involve huge sums of money. It would cost no bullets, no helicopters, no American blood. You would think it sure-fire. But Radio Marti is literally struggling to be born.

Last year doves protested against the radio bill on the grounds that it would needlessly provoke Mr. Castro. American broadcasters said they feared that the bearded bully would retaliate by interfering with American stations. Sen. Edward Zorinsky killed the bill with a filibuster.

This year the bill makes concessions to the broadcasters. It says Radio Marti can broadcast on frequencies that make Cuban interference less likely. It earmarks money for the broadcasters to use if Cuban skulldugery forces them to buy new equipment. The opponents are still not satisfied. Now they say we should leave the job of Cuban broadcasts to the already existing Voice of America.

But VOA, a general news station, cannot do this kind of specialized job. Radio Marti can. The committees voting on the bill tomorrow should stop looking for ways to squirm out from under this issue. We cannot make our foreign policy out of fear that Fidel Castro will be miffed and try to make our lives uncomfortable.

[From the Miami Herald, June 13, 1983]

TUNE RADIO MARTI

It's been nearly two years since President Reagan first submittted legislation to create Radio Marti. Still, the radio broadcasts to Cuba are not on the air. That delay should be ended soon.

Congress has debated and fretted over how best—or even whether—to beam news, commentary, and entertainment to Cuba. The debates and ensuing controversy about Radio Marti are indicative of the idea's inherent duality; the Radio Marti concept is like the proverbial double-edged sword, which can cut for good or ill.

Thus, Congress's robust debate and the direction that's become apparent in it are encouraging. Radio Marti proposals were approved last week in the Senate and House Foreign Affairs committees. Further discussions are planned.

The House version of the measure includes amendments aimed at ensuring that Radio Marti, if approved, will broadcast objective reports and follow accepted standards of U.S. journalism. Accomplish that, and Radio Marti will cut for the good.

A major strength of a free society is the freedom of individuals to make decisions and choices on the basis of objective information. Propaganda, whether directed by Communists or anti-Communists, is transparently shallow. It attempts to manipulate minds by manipulating information. Thus it courts eventual rejection and ridicule when the distortions are exposed.

The United States need not engage in such tactics. Radio Marti is needed. It must follow the objective standards set by operations such as the Voice of America, Radio Free Europe, and others. There is no better way to deliver this nation's message to Cuba or to the rest of the world.

CASTRO'S MOST SUCCESSFUL LIE IS FINALLY BEING UNMASKED

In the 24 years since Fidel Castro led his "bearded ones" into a wildly welcoming Havana that had been frantically vacated by Cuban dictator Fulgencio Batista and his followers, many myths have died.

Castro himself put to death his pledges of establishing democracy, guaranteeing the rights of workers and of the press and restoring the Cuban constitution, even as his firing squads were working overtime in the bloodbath that followed victory.

The pledge of his provisional government that American investments in Cuba would be fully guaranteed took longer to die but it also went to the wall early in Castro's dictatorship.

The myth that has shown amazing longevity is the one holding that Castro was an idealistic agrarian reformer, with no Communist ties and no thought of alliance with the Soviets, until the United States pushed him into the arms of the Communists with its unfriendly actions.

That lie was carefully fostered by Castro and bought by many in the United States, both in and out of the media.

The late swashbuckling actor Errol Flynn came back to the United States from Cuba sporting a superficial leg wound that he claimed came from a soldier of Batista's army while Flynn was in the mountains with Castro's forces.

"I can guarantee," Flynn said, "he (Castro) is not a Communist. I'm sure of it. He is a pure idealist and there aren't many left."

Unfortunately, there was one less pure idealist than even Flynn thought there was. Castro had been a Communist for years.

It was not until Castro took power that he proved he was everything his admirers in the United States said he was not. And by then, it didn't seem to matter too much because Batista was the unattractive alternative.

Journalists who covered Castro's revolution met in Coral Gables Saturday to say they had misread Castro's goals and political leanings in those days.

Former Time magazine correspondent Jay Mallin said: "We put him where he is. He was a figment of our imagination."

Former Associated Press Havana Bureau Chief Sam Summerlin said: "And now we are living it down."

Wall Street Journal Vice President Ed Cony, who was then a correspondent for the paper, was unable to attend the gathering but wrote a letter in which he recalled a talk with a conservative businessman in New York who said Castro must be a Communist.

"I kept insisting that he couldn't be, explaining that he was just too unpredictable, too wild, too undisciplined to ever be a member of the party," Cony wrote.

"The next day, I picked up the New York Times to discover that Castro was announcing to the world that he'd been a Communist for several years. That says it all as to how much I really knew about what was going on in Cuba."

Aside from setting the record straight and learning from past mistakes, the entire episode is academic now. Russia openly arms and feeds Cuba and Cubans are ordered by Castro to go to war and die as surrogates of the Soviets.

But at least it is time to lay to rest a myth that has tenaciously survived despite all the evidence to the contrary.

[From the Heritage Foundation Issue Bulletin, May 20, 1983]

RADIO MARTI: GETTING THE TRUTH TO CUBA

(Prepared for the Heritage Foundation by Luis A. Luna)

INTRODUCTION

The Reagan Administration has proposed that the United States establish a radio station to broadcast news to the people of Cuba. This so-called Radio Marti would break the information blockade that Fidel Castro has imposed on Cuba's citizens. It would get the truth to Cubans, letting them know the full extent, and cost, of Castro's activities at home and abroad.

The concept is not new. For years, Radio Free Europe has broadcast into Eastern Europe, as Radio Liberty has into the Soviet Union. Both tell their listeners living behind the Iron Curtain about events in, and concerning, their homelands.

Plans for Radio Marti have generated opposition from American broadcasters because Castro has threatened to retaliate by jamming on U.S. stations. Cuban jamming capabilities, however, are limited and costly. They could block broadcasts from other countries in the region with whom Cuba is trying to maintain good relations. Furthermore, American stations have the technology to overcome such interference.

The Administration's foreign policy critics also attack the plan. They call it provocative and suggest instead that the U.S. negotiate with Cuba for better relations. But Castro himself is the biggest obstacle to improved U.S.-Cuban relations. Moreover, Cuba for years has transmitted radio programs, laden with propaganda and anti-American rhetoric, into the United States and Latin America. Radio Marti, by contrast, would consist solely of news and entertainment; it would be prohibited from broadcasting propaganda. Establishment of Radio Marti would not preclude American negotiations with Cuba.

Radio Marti represents a peaceful, effective, and inexpensive foreign policy tool for U.S. efforts to deal with Fidel Castro's destabilizing activities. It can give the Cuban people the news and information about their own country and its activities that is currently denied them. It thereby may divert Castro's energies from creating instability abroad and focus his attention on problems closer to home.

BACKGROUND

The Reagan Administration repeatedly has sought ways to blunt Fidel Castro's adventurism. Since his takeover in 1959, Castro has vowed to export his revolution; in recent years, direct Cuban involvement in African, Central American, and South American affairs has grown ominously. For instance, Cuba has supplied proxy troops for the Soviet Union in Ethiopia and Angola. It has also trained and armed rebels in Nicaragua, Colombia, and El Salvador, to name just three trouble spots.

Castro's efforts at subversion, though, are not limited to the battlefield. Whenever he can drive a wedge between the U.S. and its neighbors, he does so.

A dramatic case in point occurred during the Falklands/Malvinas crisis. Cuba's relations with Argentina's right-wing military government had never been good. But when the U.S. announced it would side with Great Britain in the conflict, Cuba suddenly became Argentina's best friend. Cuban propaganda carried relentless denunciations of the United States and praise for the Argentine struggle to defeat what Cuba termed "imperialist actions." Cuban delegates to the Organization of American States and to the United Nations pointedly supported Argentina's side in the dispute. Just this year, Fidel Castro endorsed a resolution of support for Argentina at the Non-Aligned Nation's conference in New Delhi.

Cubans are kept in the dark about their country's extensive destabilization efforts around the globe. They have not enjoyed a free flow of information for the nearly quarter-century that they have lived under communism. Cuba's mass media is strictly controlled by the government. The estimated 130 radio stations, three TV channels, and magazines and newspapers in Cuba give the public only the information that fits into the Communist Party line.

Not only do Cubans receive sketchy news about foreign affairs, they are told little about domestic events. They do not know, for instance, the full extent of Castro's vast political prison system and systematic violation of human rights, or about acts of industrial and agricultural sabotage committed by disillusioned workers, or of the Soviet Union's $3 billion annual subsidy to keep the Cuban economy afloat. The Cuban people get information about events within their own country through official propaganda and by word of mouth, both unreliable.

In 1980, candidate Ronald Reagan's advisers suggested that the United States break this information blockade and enable Cubans to know what their government was doing at home and abroad. The idea was to direct Castro's attention away from international adventurism and toward domestic problems. They recommended a radio station devoted exclusively to the task.

After his election, Reagan endorsed the concept of such a radio station. The Presidential Commission on Broadcasting to Cuba was established in September 1981 to study its feasibility.[1] The panel's favorable report led to the drafting of plans for direct U.S. radio broadcasts to Cuba.

As originally envisioned, the new station would be named after Jose Marti, a 19th century Cuban patriot. It would beam programs of news, music, and sports to Cuba fourteen hours daily. The entire operation would be run by the Board for International Broadcasting, the same federal agency operating Radio Free Europe and Radio Liberty.

BROADCASTERS' OBJECTIONS

Plans for Radio Marti drew immediate fire from U.S. broadcasters. They expressed concern over threats by Castro that he would jam Radio Marti, fearing the effect of such action on American radio stations. They ignored, however, the fact that Cuban radio transmissions already interfere with U.S. stations, particularly in Florida. Cuba also has broadcast on frequencies and at signal strengths that violate international agreements. It has done so for years, long before plans for Radio Marti were announced. In addition, Castro revealed plans in 1979 for two Cuban AM "superstations" of 500,000 watts each, ten times the maximum power allowed to American stations. Such superstations could substantially disrupt radio signals throughout the U.S.

Castro apparently has played on American broadcasters' fears of radio interference. On August 30, 1982, in a display of radio muscle-flexing, Cuba broadcast four hours of programming at extremely high power over five AM radio frequencies. Twenty-two U.S. radio stations using those same frequencies encountered some interference with their broadcasts.[2]

The potential impact of Castro's threat, however, is overstated. Jamming has limitations and even drawbacks for Cuba. It requires transmitting high-power signals on the same wavelength as the targeted station in order to disrupt incoming signals. These can be simply noise and static to garble the offending broadcasts or "counterbroadcasting" that drowns out the incoming signals by sheer power. Sustained jamming and counterbroadcasting, though, require quantities of electricity, which could tax severely Cuba's limited and expensive power-generating capabilities. Moreover, counterbroadcasting affects not only U.S. radio stations but also those of neighboring Central and South American countries with which Castro wants to maintain good relations. Already, Mexico, Venezuela, and Colombia, among others, have voiced concern over current and potential Cuban radio interference.

Jamming does not always work. The Soviet Union and its East European satellites have tried to block Western radio transmissions for years, but with only limited success. During the height of the martial law crackdown in Poland, for instance, Polish authorities sought to jam radio transmissions from the West. But by one account, an estimated 60 to 90 percent of Poles could still hear Radio Free Europe—despite the jamming effort.[3]

Even if Castro decides that the cost, effort, and consequences of jamming are worth it, U.S. broadcasters can overcome Cuban radio interference. Transmitter power can be stepped up, and the radio beam can be focused to reach target audiences with greater precision. Moreover, early plans calling for Radio Marti to use AM frequencies that are also used by other U.S. radio stations have been modified, so that Cuban attempts to block Radio Marti would not necessarily interfere with American commercial broadcasts.

With or without Radio Marti, though, rogue Cuban radio transmissions could remain a problem for American broadcasters. Eliminating Radio Marti is not the answer. The problem will be solved only when Cuba abides by international broadcasting rules and standards.

FOREIGN POLICY CONSIDERATIONS

Opponents of the Administration's foreign policy have argued that President Reagan seeks confrontation, rather than negotiations, with Cuba. They point to Radio Marti as proof of this, seeing it as an effort to provoke Castro.

---

[1] Executive Order 12323, September 22, 1981.

[2] "Cuban Radio War?" Washington Post, September 1, 1982, p. B-6.

[3] "Poland Censures Old Annoyer: Radio Free Europe," New York Times, May 11, 1982, p. A-2.

Yet Cuba and other Communist countries long have used radio broadcasts to further their policies. Cuba transmits some 280 hours of programs to North America and the Caribbean each week. This is in addition to the more than 130 hours a week of Soviet broadcasts into the region, as well as broadcasts from East Germany, mainland China, and other Communist bloc countries into this Hemisphere.[4]

Cuba's own radio broadcasts have not stopped the U.S. from trying to negotiate with Castro, just as Radio Marti alone would not preclude efforts to improve relations with Cuba. Rather, Castro has been the main obstacle to negotiations. He repeatedly has rejected both open and secret overtures for better relations. In addition, he refuses to discuss the issues of greatest concern to the United States: the Cuban military presence in Africa, his support of guerrillas in Central America, his complicity with drug smuggling into the U.S., and immigration matters. His dealings with the United States have been marked by intrasigence and defiance.

The Carter Administration, for instance, made repeated efforts to reestablish relations with Cuba. During that same period, though Castro sent more troops into Angola, dispatched forces into Ethiopia, supplied arms and training to the Sandinista guerrillas in Nicaragua, and released massive numbers of Cuban refugees through the Port of Mariel.

LEGISLATIVE HISTORY

Legislation to set up Radio Marti passed the House of Representatives on August 10, 1982, by a vote of 250 to 134. The bill cleared the Senate Foreign Relations Committee, but died in the Senate during the 97th Congress' lame duck session.

Congressional critics in both Houses expressed concern about the wisdom of the move from a foreign policy perspective. They questioned the cost of the new enterprise (an estimated $7 million to $10 million a year) and suggested the use of Voice of America facilities for broadcasting. They echoed broadcasters' concerns about potential interference with U.S. radio stations, should Cuba try to jam Radio Marti, and about the costs if American stations needed to purchase equipment to counter Cuban interference.

Some of the strongest objections to Radio Marti came from the Iowa congressional delegation. Original plans had called for Radio Marti to use a frequency of 1040 kilohertz (kHz) on the AM band, the same spot on the dial as station WHO in Des Moines. WHO is a so-called clear channel station, which means its power is boosted at night to reach much of the United States. Broadcasters there feared that Cuban jamming could block WHO's signal throughout the country.

The Radio Marti bill has been reintroduced in the 98th Congress with changes designed to address the concerns raised by the plan's opponents. The new legislation does not restrict Radio Marti to the AM band, but specifies that, should Radio Marti choose to use an AM frequency, it must use the one currently assigned to the Voice of America (1180 kHz). This would limit interference from Cuban jamming efforts to this government frequency and spare commercial broadcasts. To save money, Radio Marti would be permitted to use the VOA's broadcasting facilities as well.

The measure's supporters have called for a fund to compensate radio stations that suffer from Cuban radio interference. Legislation in the House included $5 million for that purpose, and a similar amount will be proposed in the Senate.

To address foreign policy concerns, both the House and Senate bills contain identical language requiring that broadcasts to Cuba avoid provocative or inflammatory rhetoric. The legislation specifies that Marti programs must "serve as a consistently reliable and authoritative source of accurate, objective, and comprehensive news." [5]

CONCLUSION

Radio Marti's fate should not depend on Fidel Castro's threat of radio blackmail, but rather on the station's value to American foreign policy. On this score, Radio Marti is a good investment.

Using a tested and proved concept similar to the successful Radio Liberty and Radio Free Europe, Radio Marti may divert some of Fidel Castro's energies from foreign troublemaking. At the least, the station will help Cubans understand the full extent and cost of Castro's policies. The fact that Castro seems so anxious to block Radio Marti testifies to the idea's impact and effectiveness.

Radio Marti offers the Reagan Administration a low-cost, high-yield foreign policy option. It is a peaceful means of containing Fidel Castro and his activities. Given the lives and treasure that are being spent in order to contain Castro's policies in Central America, the idea of redirecting his efforts back home has an appeal, and an urgency, that cannot be denied.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER (Mr. MATTINGLY). The Senator from Iowa.

Mr. GRASSLEY. Mr. President, a few weeks ago when we began our efforts to take up for consideration Radio Marti, three motions to recommit the bill were offered. Two of these were summarily rejected, as we now know. The third was withdrawn since it was apparent from the first two votes, the Senate was more interested in getting this over with than paying any attention to the legitimate serious flaws in this legislation.

The first motion to recommit the bill was based upon serious inconsistencies between the language in the committee report and the bill itself. Apparently the Senate is not concerned about the fact that the committee report stated that radio compensation will be available during fiscal year 1984. Yet the bill itself stated that it would not be available until fiscal year 1985. The Congressional Budget Office cost estimate was even in error.

Furthermore, based upon the assumption—and let me emphasize the word "assumption"—that this compensation section was only a simple authorization, we did not at that point even need a section 402 waiver because the bill stated the compensation is not available until fiscal year 1985. The 402(a) reporting date requirement refers to the new budget authority for the year in which it takes effect. Consequently, the time of staff and members of the Senate Budget Committee at that point was wasted.

This may not be a big issue to the Senate but you can be certain that it will disturb broadcasters who think they are entitled to compensation in fiscal year 1984 and find out that they must wait until the ensuing fiscal year, which is 1985.

Note I use the term "entitled" in referring to the mandatory payments to broadcasters. That was the basis of the second motion to recommit. Section 6 of this bill clearly established an entitlement. We would not have brought it up had we not been serious about this problem.

Before raising this issue, I first thoroughly explored this question of whether or not this appropriation was an entitlement with the American Law Division of the Congressional Research Service, and I would like to read from that publication of the Congressional Research Service, from the American Law Division, and I quote:

This is in response to the request for an analysis of section 6 of S. 602, as reported, regarding the entitlement of broadcasters to certain expenses incurred attributable to increased interference with their broadcast signal by transmission from Cuba resulting from enactment of other provisions of the bill, the Radio Broadcasting to Cuba Act. The specific question is whether section 6(b)-(f) of the bill, as reported, constitutes an "entitlement" as that term is used in the Congressional Budget Act of 1974.

Section 6(b)-(f) provides as follows:

"(b) Accordingly, the Board for International Broadcasting shall make payments to the United States radio broadcasting station licensees, upon their application for expenses which they have incurred or will incur in mitigating pursuant to special temporary authority from the F.C.C the effects of activities by the Government of Cuba which directly interfere with the transmission or reception of broadcasts by these licensees, such expenses shall be limited to the cost of equipment (replaced less depreciation) and associated technical and engineering costs.

"(c) The Board for International Broadcasting shall issue such regulations and establish such procedures for carrying out this section as the Board finds appropriate, such regulations shall be issued no later than 180 days after enactment of this act.

"(d) There are authorized to be appropriated to the Board for International Broadcasting, five million ($5,000,000) dollars for use in compensating United States radio broadcasting licensees pursuant to this section. Amounts appropriated under this section are authorized to be available until expended.

"(e) Funds appropriated for implementation of this section shall be available for a period of no more than four (4) years following the initial broadcast occurring as a result of programs described in this Act.

"(f) This section shall enter into effect October 1, 1984." (sic)

The Congressional Budget Act defines entitlement authority thusly:

[4] "Broadcasting to Cuba," National Review, July 23, 1982, p. 877.

[5] Radio Broadcasting to Cuba Act, H.R. 2453, S. 602, 98th Congress.

authority (whether temporary or permanent)—to make payments (including loans and grants), the budget authority for which is not provided for in advance by appropriation Acts, to any person or government if, under the provisions of the law containing such authority, the United States is obligated to make such payments to persons or governments who meet the requirements established by such law.

The General Accounting Office, in its definition in "A Glossary of Terms Used in the Federal Budget Process" adds that authorizations for entitlements "constitute a binding obligation on the part of the Federal Government, and eligible recipients have legal recourse if the obligation is not fulfilled. Budget authority for such payments is not necessarily provided in advance. . . ."

Although the word "entitle" is not used in section 6 of S. 602, *supra*, it does appear that broadcasters meeting the requirements specified in the section would be entitled to payment. The Board for International Broadcasting is not given discretion whether or not to make payment to particular stations. Rather, the section provides that the Board *shall* make payments upon their application if they meet certain specific requirements spelled out in the statute itself, and *shall* issue regulations and establish procedures as appropriate. It thus appears that the section establishes an entitlement as that term is defined in the Congressional Budget Act, *supra*. It appears that the plain meaning of the provision on its face, and its intent as discerned from the accompanying report, is to provide the specified compensation to all stations which meet the requirements.

Similar language has been considered to create an entitlement for Budget Act purposes. For example, on June 30, 1977 an amendment was proposed on the Senate floor providing, *inter alia*, that "grants to States for the conduct of nutrition education and information program [sic] shall be based on a rate of 50 cents for each child enrolled in schools. . . ." The purpose of this mandatory language was acknowledged by its sponsors to be to create an entitlement.

And that is from David R. Siddall, legislative attorney, American Law Division, and it is dated July 27, 1983.

Now I personally find nothing in the actions of the proponents in creating a new entitlement program as anything dilatory or frivolous. I assumed, but assumed incorrectly, that other fiscal conservatives like myself, whether proponents of this legislation or not, would deplore the prospect of creating another entitlement program. But as I go through the RECORD, many of the Senators who claim to be fiscal conservatives, and yet disregard the entitlement aspects of this bill, during the last time this issue was up for discussion, voted against the motion to recommit so that this language could be properly corrected and so that this language would not serve the end result of being an entitlement.

And, as a fiscal conservative, I found no less appealing the possibility of creating "backdoor authority" with section 12 of the legislation which allowed other agencies to "sell, loan, lease, or grant property" to and "perform administrative and technical support services" for the Board of International Broadcasting in implementing Radio Marti.

There is no way that I can see that we have a realistic idea of how much staff time and resources of other agencies will be utilized through this backdoor approach to augment direct appropriations for Radio Marti. And I think these are very important issues for those of us who pride ourselves in watching how taxpayers' money is expended as we consider this legislation.

Now, you may want to try to dismiss the motions that have gone on during the debate on this legislation as dilatory tactics if you want, but I feel I have a responsibility to warn my colleagues, as I was trying to do when we discussed these various motions, that we ought to be very serious, absolutely serious, about the fiscal ramifications of Radio Marti. Make no mistake, this proposal should not be considered an "easy vote" in favor of one of the administration's foreign policy initiatives. I have spent a great deal of time on this issue during the past year or so, and I assure my colleagues that this is not what would be considered a "mom and apple pie" issue.

Unfortunately, few have been willing to take this issue from a fiscal standpoint as seriously as they should. Consequently, many have not even focused on this issue until just recently. Others who have been working on it have not sufficiently addressed some of the troublesome questions that have to be answered or at least ought to be answered before we have final passage of this legislation.

Maybe extended debate is what it will take to force this body to finally sit down and listen to the various reasons, both fiscal and foreign policy, that are involved with it. I, for one, would rather not operate in this fashion, because I hope that there is enough interest in this issue to study the matter as carefully as it ought to be studied.

Unfortunately, I do not think we have caught the ears of enough of the Members of this body yet to have that serious consideration given to it.

Had anyone been listening a few weeks ago, I do not think we would have been accused, as we were at that time, of dilatory tactics. Furthermore, if anyone bothered to listen to my comments of approximately 5 weeks ago now, they would recognize that I am and have been quite sincere in my efforts to try to find solutions that will satisfy the goals of broadcasting the truth to the Cuban people and at the same time providing the most protection possible for our Nation's broadcasters, these people who are solid business people in our country, who have as much of a stake in the economy as any farmers in the State of Iowa or any other business people in any other State, including the State of Florida.

I would urge any Senator who did not listen to my comments before the recess that they take the time to read them in the RECORD of that date. I may be biased, but I think those comments were rather enlightening and may help put in a better context where we stand today in our debate over Radio Marti.

Last year's Radio Marti proposal would have placed its frequency, as Senators will remember, on 1040 kilohertz. This frequency was selected even though it was well known that Cuba was about to begin broadcasts from a new radio station on that very same frequency. What is so interesting about this is that this particular Cuban station will be broadcasting with 500 kilowatts. This is 10 times the power of any AM broadcasting station in the United States.

This Cuban station presented a problem in and of itself for any broadcaster within thousands of miles that shares that frequency. As Senators know, I have talked about it so often, it just so happens that 1040 kilohertz is a frequency used by WHO Radio in Des Moines, Iowa. If utilized at full power, this Cuban station would reduce WHO's nighttime broadcast range from 800 miles down to 35 miles. Consequently, you can understand WHO's desire to avoid some sort of special invitation to Cuba to counterbroadcast in response to the implementation of Radio Marti.

What is ironic about this whole proposal was that we were actually making it easier for Castro. With one single stroke he could kill two birds with one stone: He would be able to knock out Radio Marti and destroy WHO's broadcasting market with a simple flip of a switch. If that is not helping Castro, I ask somebody, what is going to help Castro?

I raised that point early on in the deliberations last year but it was like pulling teeth to get anyone to listen and to respond.

Early on we were all assured time and again by the administration that they did not think Cuba would retaliate with counterbroadcasts. But during the month of August last, 1982, the Voice of Cuba broadcasts severely disrupted programing for 4 hours on at least 5 AM frequencies across the country: 570 kilohertz, 670, 1040, 1160, and 1380.

Cuba suggested it acted in response to the proposed establishment of Radio Marti. So I would ask: How accurate were the administration assurances that Cuba would not retaliate?

Since then, the arguments often used by proponents of Radio Marti are that Cuba cannot sustain counterbroadcasting efforts for it would be too expensive and that we have alternatives to effectively counter these broadcasts. Of course, the most arous-

ing and thus most appealing argument is that we must not let threats from Castro dictate our foreign policy. I guess as one who does not like Castro, I can chime in with those people who do not want to allow Castro to dictate our foreign policy.

But this argument really strikes a chord with saber rattlers. I frankly do not know who was really suggesting that we should allow Castro to dictate our foreign policy. That really is not the question. The real question is: What are we doing using our broadcasters, our radio broadcasters, those solid American business people as they are, as foreign policy pawns in the first place? This is the very important question. I want to elaborate on that issue a little later.

Aside from the arguments being used to answer the questions of retaliation, a far more serious question has recently surfaced as a result of the declassification of a State Department memo from 1981 which addresses the issue of retaliation. To say that I am shocked and dismayed understates my true feelings. Let me share with my colleagues the contents of this memo.

This memo has been read before and it bears repeating again, particularly considering the fact that it has been 5 or 6 weeks since we have dealt with this issue of Radio Marti. This memo from the State Department, originally classified as confidential, has now been declassified and it speaks to the impact of Radio Marti on domestic AM broadcasting:

If the decision is made to establish a Radio Free Cuba, we believe Cuba will retaliate by increasing its current level of interference with U.S. AM broadcasting operations. Potentially, about 20 percent or 1,200 U.S. stations could be adversely affected. The broadcasting community and Members of Congress can be expected to press for reversing that decision.

Let me say parenthetically at this point for my colleagues, each of us, who spend a great deal of our time defending our constituents against the unelected bureaucracy that is so dominant in this town, we ought to welcome an opportunity to stop situations that might arise that we would have to find ourselves pressing for reversing a decision, and on that point I will quote from the same memo, because it is much easier to stop bad decisions from being made than it is to reverse those bad decisions at some time future on—future on when they detrimentally affect our constituents.

I want to continue to quote from this declassified State Department memo:

Cuban AM radio stations now cause interference to a large number of stations, primarily in the Southeast, but extending as far north as Cincinnati. If Cuba implements the inventory of stations it has submitted to this fall's AM broadcasting conference, whose mandate is to draw up a frequency assignment plan for AM stations in this hemisphere, 20 percent, or 1,200, of our AM stations, including stations in Alaska and Hawaii, will experience some reduction, if not a complete loss, of service area. We are meeting at the technical level with Cuba to find solutions for the existing and potential interference problems.

I will continue to quote:

Announcement, and certainly establishment of an RFC, Radio Free Cuba, prior to the completion of the broadcasting conference would frustrate resolution of the problems of U.S. broadcasters.

Note here that Radio Marti was announced prior to this conference in total disregard to the expression of opinion not to do that on the part of our State Department.

I will continue to quote from the State Department memo:

We believe Cuba has the capability to jam Radio Free Cuba reception through deployment of strategically placed 10 kW. transmitters. Such jamming would cause further interference to U.S. stations.

I think we all ought to be amazed at what that memo says. We ought to be amazed even today for, last year, State Department officials told us time and time again that they did not believe that Cuba would retaliate. Now, through this memo, we find that privately, these officials knew that there would be retaliation through increased interference. They knew it all the time, yet they were telling us the exact opposite.

Equally disturbing is the fact that not only did they know that Castro would likely retaliate; they fully expected it to be on a massive scale. Those are their words. That massive scale adds up to 20 percent or 1,200 of our American stations, even those as far away as Hawaii and Alaska. These are all expected to suffer from this interference. The State Department knew this all along, yet resisted every step of the way to accommodate the concerns of our broadcasters.

So, Mr. President, I think all along, we could ask, what is going on here?

To think the proponents of this proposal have the audacity to criticize broadcasters for being overly concerned. Frankly, I think the broadcasters were being overly generous in suggesting that they can support the Voice of America option that some of us have been throwing around here for the past 12 months. I shall be very interested in hearing the State Department's explanation of this memo that has been referred to previously in this debate and their past assurances. To this point we have heard nothing. I imagine they will be as creative in answering this as defense officials were when they were caught building the Radio Marti facility last year before Congress gave its approval.

I have to wonder how much more information about this proposal is being denied Congress by the bureaucracy downtown. Last year, I was also given assurances by the bureaucracy that if Cuba does retaliate, we have about 40 responses that will effectively counter this interference. I ask what these 40 responses were but was told that they were confidential and that I would need to be given a private briefing. I never did get that private briefing.

I am skeptical that any workable option really exists. If it does, why have the people downtown who have been giving us these assurances not utilized any of these 40 options for much of the past 15 years? I would be very interested in that question if I represented Florida or any of the other Southeastern States. Remember, the State Department memo stated that 1,200 stations would be affected, most of them in Florida and the Southeast United States. If I were a Senator from one of these States, I would think in terms of what to tell my constituents when all they can get on the radio is Cuban broadcasts.

The Radio Marti proposal is much like the Soviet grain embargo in that it places the burden of our foreign policy on the backs of our private sector.

Radio Marti not only abuses but co-opts our domestic frequency band and turns it into a "chessboard" for foreign policy, much like our agriculture trade was turned into a chessboard by President Carter in December 1979 and January 1980.

Our farmers and agriculture sector were singled out to suffer the burden of the Soviet grain embargo. Our broadcasting industry—its broadcasters and listeners—is what we are jeopardizing with this new foreign policy initiative.

The Soviet grain embargo cost the United States $22 billion and 310,000 jobs.

It is difficult to know for certain what the losses could amount to if we get ourselves into a radio war with Cuba, but it is interesting to note the debate during the markup of Radio Marti last year. Let me read the following. This is an exchange between the Senator from Ohio (Mr. GLENN) and Senator TSONGAS of Massachusetts with regard to the latter's amendment to require the Government to compensate broadcasters for any damage resulting from Cuban interference:

Senator TSONGAS. (This) is a very straightforward amendment. It says, look, if we do this and there is retaliation and U.S. commercial interests are hurt, that since it is a national obligation to reimburse the commercial interests.

Senator GLENN. * * * Are we placing some sort of limit on this? Because let us say that (Cuba) shift frequencies on this. We could have a thousand different stations affected. We could be into billions of dollars on this if we are not careful. Is there a limit?

Senator TSONGAS. That is exactly the point.

Interestingly, the amendment was defeated, even though a cap of $150 million had been placed on the amendment.

I do not understand why we are so anxious to implement Radio Marti under any circumstances, under any design, even though we fully recognize that our domestic broadcasters stand much to lose.

I opposed the Soviet grain embargo—not because I supported the Soviet slaughter and subjugation of innocent Afghans. I opposed it because I knew that it would hurt us far more than it could ever hurt the Soviets. The facts have shown this to be true, and the Soviets have since used this outrageous mistake and have rubbed our faces in it time and time again.

That at least was true up until the time that we signed the 5-year grain agreement just a few weeks ago. But American farmers are going to continue to suffer as a result of that grain embargo regardless of the 5-year agreement, because I suspect that we are still going to be a residual supplier of grain to the U.S.S.R.

Consider the fact that they are committing themselves to buying only 9 to 12 million metric tons when prior to the last grain embargo they were going to buy 25 million metric tons that particular year.

So we have something to fear from any sort of retaliation by Cuba to our business interests in this country, and specifically the business interests of the broadcasters of America.

But whereas I did not support the Soviet grain embargo, I have told this body many times that I support the concept of Radio Marti. Furthermore, and more importantly, our country's broadcasters will accept the risk involved with the creation of Radio Marti. All we have to do is accept some of their suggestions which will minimize the hazards that this proposal presents but at the same time assures the Cubans information proposed by this initiative. I am referring to the Voice of America option embodied in the amendment proposed by the Senator from Nebraska (Mr. ZORINSKY).

Mr. President, I reserve the remainder of my time and suggest the absence of a quorum.

● Mr. PACKWOOD. Mr. President, I rise in strong support of S. 602, the Radio Marti bill. I have long supported the establishment of a radio station to bring up-to-date, uncensored news to the Cuban people. S. 602 will achieve this goal.

We have waited a long time for Radio Marti. This issue has been discussed at length both last year and again this year. Mr. President, we can wait no longer. I hope we can pass this vital legislation at this time, and I urge my colleagues to vote in favor of this bill.

For more than 20 years, the Cuban people have received a steady flow of censored news which does not tell them the full scope of their government's activities at home and abroad. I believe it is time the Cuban people be allowed to hear the truth about their government's actions. It is time the Castro regime was held accountable for these actions.

The Cuban economy is failing. Soviet aid—almost $4 billion in 1982—is more than one-quarter of Cuba's GNP. Indeed, collapse of the Cuban economy has been prevented only by over $13 billion in Soviet aid over the last decade. And yet, day after day the Cuban people face unacceptable conditions—rationed food, rationed clothing, and deteriorating housing. There has been no improvement in the real income earned by the average Cuban since 1959.

The Cuban people certainly know, from their own experience, about the serious economic problems facing their country. What they do not know is that at the same time they are forced to live with these conditions, their government is supporting 40,000 soldiers in Africa, 2,000 military and security personnel in Nicaragua, and many thousands more Cubans who are abroad on various "international" missions, most of them military.

The Cuban people are deliberately kept ignorant of the Cuban Government's foreign adventures. They have no way to hold their government accountable for devoting such a large portion of the country's resources to military missions abroad.

Cubans have a need, and a right, to know what the Castro regime's activities are costing them—in terms of their own economy and in terms of international stature. Radio Marti will accomplish this goal. It will break the government's absolute control over the dissemination of information and be an important addition to sporadic United States and Voice of America broadcasts to Cuba.

At this time, there is not one U.S. commercial broadcast directed specifically at the Cuban people. And it is important to remember that Radio Marti will be aimed at the Cuban people, not at the Cuban Government.

Radio Marti will serve the same vital role that Radio Free Europe and Radio Liberty serve in broadcasting to the Soviet bloc in Europe. The operation of these radio networks is an integral part of U.S. foreign policy serving, in particular, our interest in promoting the free flow of information and ideas. For tens of millions of East Europeans, the most reliable information about their country comes from the outside world. There is no comparable source of news for those living in Cuba.

The Communist bloc countries certainly understand the importance of radio broadcasting. The Soviets broadcast 322 hours of program each week in this hemisphere alone. The People's Republic of China broadcasts 123 hours to this hemisphere. In addition, seven East European countries broadcast about 250 hours to Latin America and another 200 hours to North America. Cuba also does its share with 257 hours of broadcasting each week to North America and the Caribbean.

It is obvious that these countries understand that international radio broadcasting is the best way to communicate with millions of people. Their hundreds of hours of weekly broadcasting is testimony to this understanding. And yet, these same countries refuse to grant their own people the right to listen to foreign broadcasts without interference. Fidel Castro has made it clear that he does not like the idea of Radio Free Europe-type broadcasting to Cuba.

Even with the establishment of Radio Marti, the United States will remain far behind the Soviet Union and Cuba in the amount of resources and time devoted to international radio broadcasts. I think it is essential that we meet this challenge and provide for the creation of this new voice of truth for the Cuban people.●

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ABDNOR). Without objection, it is so ordered.

RESOLUTION CONDEMNING SOVIET UNION FOR KOREAN AIR LINES DISASTER

Mr. BAKER. Mr. President, earlier today, in connection with the resolution I introduced for myself, the distinguished minority leader, the chairman and ranking minority member of the Foreign Relations Committee, and the chairman and ranking minority member of the Arms Services Committee, relating to the Korean plane episode, we provided several things.

We provided, first, that the matter will be temporarily laid aside, to occur as the pending business at noon on Wednesday with 2 hours of debate. I attempted to provide that no amendments would be in order. A concern was expressed about that, very properly, by at least one Senator and perhaps others, and the proviso that no amendments would be in order was not pressed.

It leaves us in a little awkward position, because now we have a 2-hour time limitation, with an unknown number of amendments and no allocation of time. I think everyone will

agree that the best thing to do is to leave this intact—that is, it will come up at noon on Wednesday—but to remove the 2-hour time limitation, leaving the provisions in the order relating to the control of time.

I make that request.

Mr. BYRD. Mr. President, reserving the right to object, I agree with the majority leader.

I hope that, in the meantime, we will be able to work out, on our two respective sides, an agreement whereby there would be no amendments. But if there is going to be an amendment on one side, it makes it difficult for the leader on the other side.

Mr. BAKER. Mr. President, I hope we can do that.

I had honestly thought there would not be amendments. An extensive effort was made to clear the matter on both sides of the aisle here, with the House of Representatives, and with the administration, both the White House and the State Department. I had thought we had gotten close to a unanimous view of what the resolution should contain.

I have no criticism whatever of Senators who have expressed a reservation about that, and indeed they are perfectly entitled to do so. But I, too, hope we can work it out so that we can, one, have no amendments and, two, so that we will have a unanimous vote.

Mr. BYRD. Yes.

Mr. BAKER. I will work with all sides to see if that can be arranged. In the meantime, I believe this is the only fair way to deal with it.

Mr. BYRD. I think it is, and I remove my reservation.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that that resolution relating to the Korean Air Lines incident be held at the desk for the remainder of this calendar day for the purpose of receiving additional cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I may say it looks encouraging to me that we may work out the difficulties or disagreements on the Radio Marti issue. If we can, we should know that in the next little bit, and we will maybe pass that bill today. I do not have a request on my side for a rollcall. Of course, if there is a sufficient second to such a request there will be a rollcall. But I hope we can dispose of that measure on a voice vote without a rollcall.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll. The assistant legislative clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, I further ask unanimous consent that my remarks be included at an appropriate place in the RECORD along with other remarks concerning the death of Senator JACKSON.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. MATHIAS are printed earlier in today's RECORD.)

Mr. MATHIAS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HECHT). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 91-551, appoints the Senator from Tennessee (Mr. SASSER) as a member of the Board of Regents of the Smithsonian Institution, effective September 12, 1983.

APPOINTMENT BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The Chair, on behalf of the President pro tempore, pursuant to Senate Resolution 400, 94th Congress, and Senate Resolution 4, 95th Congress, appoints the Senator from Georgia (Mr. NUNN) to the Select Committee on Intelligence.

MESSAGES FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate on August 15, August 18, August 22, August 31, September 7, September 8, and September 9, 1983, received messages from the President of the United States submitting sundry nominations; which were referred to the appropriate committees.

(The nominations received on August 15, August 18, August 22, August 31, September 7, September 8, and September 9, 1983, are printed at the end of the Senate proceedings.)

DEFERRAL OF CERTAIN BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 72

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate received the following message from the President of the United States, on August 18, 1983, during the adjournment of the Senate, which; pursuant to the order of January 30, 1975, was referred jointly to the Committee on Appropriations, the Committee on the Budget, and the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report a new deferral of budget authority for the Railroad Retirement Board, totaling $165,000.

The details of the deferral are contained in the attached report.

RONALD REAGAN.

THE WHITE HOUSE, *August 18, 1983.*

VETO MESSAGE ON SENATE JOINT RESOLUTION 149—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 73

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate received the following message from the President of the United States on August 23, 1983, during the adjournment of the Senate:

To the Senate of the United States:

I am returning herewith without my approval S.J. Res. 149, "To temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States."

Current law allows the Secretary to deduct 50 cents per hundredweight from the proceeds of sale of all milk marketed, if the Commodity Credit Corporation (CCC) purchases of surplus milk are expected to exceed 5 billion pounds. This deduction program became effective April 16, 1983. Current law also authorizes the Secretary to deduct another 50 cents per hundredweight if CCC purchases of surplus milk are expected to exceed 7.5 billion pounds. Dairy farmers who reduce their milk production according to Department of Agriculture

guidelines will be entitled to refunds of this second 50 cents.

This second deduction and the refund program are scheduled to go into effect on September 1 and are expected to produce net receipts by CCC of about $60 million during September. Even with both deductions in effect, the Department of Agriculture projects that CCC purchases of milk will still exceed 16 billion pounds for the current marketing year at a net cost to taxpayers of $2.4 billion.

I cannot support S.J. Res. 149, as it would reduce by $60 million the amount of funds available to be used to defray the cost of the milk price support program and would reduce the desired downward effect upon milk production. Without the added downward pressure of the second 50-cent deduction there will be less incentive to decrease milk production.

In addition, if I signed S.J. Res. 149, there would be even greater confusion on the part of milk producers. The first deduction has been the subject of extensive litigation. Since Secretary Block has announced that the second deduction and the refund program will begin on September 1, a delay of one month would only add to the confusion and make planning by producers even more difficult.

Implementation of the deduction has already been delayed considerably. As a result, the cost savings contemplated when this provision was enacted have not materialized, further worsening the Federal deficit.

The annual cost of the dairy price support program is now over $2 billion and will continue to grow unless something is done. We cannot continue to absorb these enormous costs. The Administration's position last year, which the Congress failed to accept, called for increased flexibility to set support levels that would facilitate a more favorable supply and demand balance and reduce Federal outlays. We remain committed to an economically sound dairy industry with adequate supplies of milk and dairy products for consumers, and we will continue to work with the Congress to achieve that end. However, until Congress can act on a mutually acceptable dairy program that accomplishes the objectives stated above, we must continue to exercise without further delay what authority we have to deal with our dairy problem.

RONALD REAGAN.

THE WHITE HOUSE, *August 23, 1983.*

RECOMMENDATIONS UNDER THE FEDERAL PAY COMPARABILITY ACT OF 1970—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 74

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate received the following message from the President of the United States on August 31, 1983, during the adjournment of the Senate; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

Under the Federal Pay Comparability Act of 1970, an adjustment in Federal white collar pay will be required in October, 1983.

The Act requires that calculations be made annually of the adjustments that would be required in Federal statutory pay systems to achieve comparability with private sector pay for the same levels of work. Using the calculation methods developed in the past, my pay advisers have indicated that an average 21.51 percent increase would be required to achieve comparability as that concept is presently defined.

The Comparability Act gives me the authority to proposed an alternative adjustment in lieu of comparability on the basis of "economic conditions affecting the general welfare." Under that authority, in accordance with our economic recovery program, I am submitting to the Congress an Alternative Plan for a 3.5 percent increase in Federal white collar pay effective in January, 1984 in lieu of the 21.51 percent increase indicated under current comparability calculation methods.

Current law governing military pay increases provides that the annual increase in military pay be the same as the average Federal white collar increase. The Congress is currently considering legislation that could affect both military and civilian pay increases. If legislation is enacted, it could supersede the increase that Federal employees would otherwise receive under this Alternative Plan.

RONALD REAGAN.

THE WHITE HOUSE, *August 31, 1983.*

REPORT ON AGENCIES EXCLUDED FROM THE FEDERAL MERIT PAY SYSTEM—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 75

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate received the following message from the President of the United States on September 1, 1983, during the adjournment of the Senate; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

Supervisors and management officials in GS-13, 14, and 15 positions throughout the Federal government are covered by the Merit Pay System as required by Chapter 54, Title 5, U.S. Code, unless otherwise excluded by law.

Upon proper application from the heads of affected agencies and upon recommendation of the Director of the Office of Personnel Management, I have, pursuant to 5 U.S.C. 5401(b)(2)(B), excluded three agencies and units of agencies from coverage under the Merit Pay System.

Attached is my report describing the agencies and units of agencies to be excluded and the reasons therefor.

RONALD REAGAN.

THE WHITE HOUSE, *August 31, 1983.*

THIRD ANNUAL SYNFUELS REPORT—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE ADJOURNMENT—PM 76

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate received the following message from the President of the United States on September 8, 1983, during the adjournment of the Senate; which was referred to the Committee on Energy and Natural Resources:

To the Congress of the United States:

In accordance with Section 106 of the Energy Security Act (P.L. 96-294), I transmit herewith the third annual report on activities undertaken by the United States Synthetic Fuels Corporation and the Department of Energy to implement the development of synthetic fuels under the Defense Production Act of 1950, as amended. The report covers the period from July 1, 1982 through June 30, 1983.

RONALD REAGAN.

THE WHITE HOUSE, *September 8, 1983.*

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

NATIONAL PRODUCTIVITY AND INNOVATION ACT OF 1983 MESSAGE FROM THE PRESIDENT—PM 77

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying

11-059 O-87-25 (Pt. 17)

papers; which was referred to the Committee on the Judiciary:

To the Congress of the United States:

I am transmitting to the Congress today a legislative proposal entitled, the "National Productivity and Innovation Act of 1983." The bill would modify the Federal antitrust and intellectual property laws in ways that will enhance this country's productivity and the competitiveness of U.S. industries in international markets.

As you know, one of the most important goals of my Administration has been to revitalize the competitiveness and productivity of American industry. Tax cuts proposed by my Administration and enacted during the 97th Congress have greatly stimulated economic activity. In addition, our efforts to rationalize Federal rules and regulations have significantly enhanced the efficiency of our economy. For the first time in over a decade, there exists the foundation for a period of strong and sustained economic growth.

The ability of the United States to improve productivity and industrial competitiveness will also depend largely on our ability to create and develop new technologies. Advances in technology provide our economy with the means to produce new or improved goods and services and to produce at lower cost those goods and services already on the market. It is difficult to overstate the importance of technological development to a strong and healthy United States economy. It has been estimated that advances in scientific and technological knowledge have been responsible for almost half of the increase in this country's labor productivity over the last 50 years. New technology also creates new jobs and gives us an advantage in world markets. For example, the U.S. computer industry, which was in its infancy just a short time ago, directly provides jobs for about 830,000 Americans and is a leader in world markets.

The private and public sectors must spend a great deal of time, money, and effort to discover and develop new technologies. My Administration has moved to bolster research and development (R&D) in the public sector by proposing in our 1984 budget to increase Federal funding of R&D by 17 percent, to $47 billion. However, it is vital that our laws affecting the creation and development of new technologies properly encourage private sector R&D as well.

The Economic Recovery Tax Act of 1981 provides a 25 percent tax credit to encourage firms to invest in additional R&D. Our economic program has helped reduce inflation and interest rates and thus has lowered substantially the cost of conducting research.

The antitrust and intellectual property laws also have a very significant effect on private investment in R&D. The antitrust laws are designed to protect consumers from anticompetitive conduct. While the economy generally benefits most from vigorous competition among independent businesses, the antitrust laws recognize that in some areas, like the creation and development of technology, cooperation among producers, even competitors, can actually serve to maximize the well-being of consumers.

The intellectual property laws, for example, those dealing with patents and copyrights, also serve to promote the interests of consumers. The promise of the financial reward provided by exclusive rights to intellectual property induces individuals to compete to create and develop new and useful technologies.

After reviewing the effect of the antitrust and intellectual property laws on the creation and development of new technologies and after consultations with key members of Congress, I have concluded that the antitrust laws can be clarified in some respects and modified in other respects to stimulate significantly private sector R&D. This can be done while maintaining strong safeguards to protect the economy against collusive actions that would improperly restrict competition. The National Productivity and Innovation Act of 1983, which embodies those changes, is a package of four substantive proposals that deals with all phases of the innovation process.

Title II of the bill would ensure that the antitrust laws do not unnecessarily inhibit United States firms from pooling their resources to engage jointly in procompetitive R&D projects. Joint ventures often may be necessary to reduce the risk and cost associated with R&D. So long as the venture does not threaten to facilitate price fixing or to reduce innovation, such ventures do not violate the antitrust laws. Nevertheless, the risk remains that some courts may not fully appreciate the beneficial aspects of joint R&D. This risk is unnecessarily magnified by the fact that a successful antitrust claimant is automatically entitled to three times the damages actually suffered.

Title II would alleviate the adverse deterrent effect that this risk may have on procompetitive joint R&D ventures. This title provides that the courts may not find that a joint R&D venture violates the antitrust laws without first considering its procompetitive benefits. In addition, Title II provides that a joint R&D venture that has been fully disclosed to the Department of Justice and the Federal Trade Commission may be sued only for the actual damage caused by its conduct plus prejudgment interest. This combination of changes will encourage the formation of procompetitive joint R&D ventures. And unlike some other proposals currently before Congress, it will do so with the minimal amount of bureaucratic interference in the functioning of those ventures.

If we are to assure that our laws stimulate investment in new technologies, however, it is not enough merely to correct the adverse deterrent effect the antitrust laws may have on procompetitive joint R&D. Rather, we must also assure that the antitrust and intellectual property laws allow—indeed encourage—those who create new technologies to bring their technology to market in the most efficient manner. Only in this way can those who invest their time, money, and effort in R&D be assured of earning the maximum legitimate reward.

Titles III and IV recognize that very frequently the most efficient way to develop new technology is to license that technology to others. Licensing can enable intellectual property owners to employ the superior ability of other enterprises to market technology more quickly and at lower cost. This can be particularly important for small businesses that do not have the ability to develop all possible applications of new technologies by themselves. However, the courts have not always been sympathetic to these procompetitive benefits of licensing.

Title III would prohibit courts from finding that an intellectual property licensing arrangement violates the antitrust laws without first considering its procompetitive benefits. In addition, the title would eliminate the potential of treble damage liability under the antitrust laws for intellectual property licensing. Although those who suffer antitrust injury as a result of licensing would still be able to sue for their actual damages plus prejudgment interest, Title III would minimize the deterrence that the antitrust laws currently may have on potentially beneficial licensing of technology.

Title IV would also encourage the procompetitive licensing of intellectual property. Pursuant to this title, the courts may refuse to enforce a valid patent or copyright on the ground of misuse only after considering meaningful economic analysis.

Finally, title V will close a loophole in the patent laws that has discouraged investment in efficiency-enhancing technologies. Creation of and improvements in the process of making products can be just as important as creating and improving the product itself. Currently, if someone uses a United States process patent outside this country without the owner's consent and then imports the resulting product into the United States, the importer is not guilty of infringement. Title V of the bill would close this loophole so that owners of process patents can earn their rightful reward by

preventing the unauthorized use of their technology.

We must not delay making the necessary changes in the law to encourage the creation and development of new technology, to increase this country's productivity, and to enable our industries to compete more effectively in international markets. We must act now. I therefore urge prompt consideration and passage of this legislative proposal.

RONALD REAGAN.

THE WHITE HOUSE, *September 12, 1983.*

PRESIDENTIAL APPROVALS

A message from the President of the United States announced the he had approved and signed the following bills and joint resolutions:

On August 2, 1983:

S. 419. An act to provide that per capita payments to Indians may be made by tribal governments, and for other purposes.

On August 5, 1983:

S.J. Res. 56. Joint resolution to designate the month of August 1983 as "National Child Support Enforcement Month".

On August 8, 1983:

S.J. Res. 67. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Respiratory Therapy Week".

S. 143. An act to authorize the Twenty-nine Palms Band of Luiseno Mission Indians and the Confederated Salish and Kootenai Tribes of the Flathead Reservation to lease for 99 years certain lands held in trust.

On August 11, 1983:

S. 272. An act to improve small business access to Federal procurement information.

S. 727. An act to authorize the Secretary of the Interior to set aside certain judgment funds of the Three Affiliated Tribes of Fort Berthold Reservation in North Dakota, and for other purposes.

S. 930. An act to authorize the Smithsonian Institution to purchase land in Santa Cruz County, Ariz.

On August 23, 1983:

S. 1696. An act authorizing three additional Assistant Administrators of the Environmental Protection Agency.

S. 1797. An act to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building".

S.J. Res. 85. Joint resolution to designate September 26, 1983, as "National Historically Black Colleges Day".

S.J. Res. 98. Joint resolution to designate October 2 through October 9, 1983, as "National Housing Week".

S.J Res. 116. Joint resolution to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week".

On August 16, 1983:

S. 46. An act to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping".

MESSAGES FROM THE HOUSE RECEIVED DURING THE ADJOURNMENT

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate on August 5, 1983, during the adjournment of the Senate, received a message from the House of Representatives announcing that the House has passed the following bills and joint resolutions:

S. 1696. An act authorizing three additional Assistant Administrators of the Environmental Protection Agency;

S. 1797. An act to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building";

S.J. Res. 85. Joint resolution to designate September 26, 1983 as "National Historically Black Colleges Day";

S.J. Res. 98. Joint resolution to designate October 2 through October 9, 1983 as "National Housing Week"";

S.J. Res. 116. Joint resolution to designate the week of September 4, through September 10, 1983, as "Youth of America Week"; and

S.J. Res. 149. Joint resolution to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States.

The message also announced that the House has agreed to the following concurrent resolution:

S. Con. Res. 63. A concurrent resolution directing the Clerk of the House of Representatives to make corrections in the enrollment of the bill H.R. 3190.

The message further announced that the House agrees to the amendments of the Senate to the bill (H.R. 3409) to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State.

The message also announced that pursuant to the provisions of 22 U.S.C. 276a-1, as amended by Public Law 95-45, the Speaker appoints as members of the delegation to attend the Conference of the Interparliamentary Union, to be held in Seoul, Republic of Korea, on October 4 through October 12, 1983, the following Members on the part of the House: Mr. PEPPER, chairman, Mr. HAMILTON, vice chairman, Mr. HAWKINS, Mrs. BOGGS, Mr. LEVITAS, Mr. HALL of Ohio, Mr. SMITH of Florida, Mr. PRITCHARD, Mr. HYDE, Mr. MCGRATH, Mr. BATEMAN, and Mr. BOEHLERT.

ENROLLED BILLS SIGNED

The message further announced that the Speaker has signed the following enrolled bills:

H.R. 3329. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purposes; and

H.R. 3564. An act to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

Under the authority of the order of the Senate of August 4, 1983, the enrolled bills, were signed on August 5, 1983 during the adjournment of the Senate, by the President pro tempore (Mr. THURMOND).

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate, on August 9, 1983, during the adjournment of the Senate, received a message from the House of Representatives announcing that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 118. An act to provide for the establishment of a Commission on the Bicentennial of the Constitution.

The message also announced that the House has passed the following joint resolutions, in which it requests the concurrence of the Senate:

H.J. Res. 218. Joint resolution to designate the month of September of 1983 as "National Sewing Month"; and

H.J. Res. 295. Joint resolution to designate the week beginning August 7, 1983 as "National Correctional Officers Month".

ENROLLED BILL SIGNED

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate, on August 10, 1983, during the adjournment of the Senate, received a message from the House of Representatives announcing that the Speaker had signed the following enrolled bill:

H.R. 1646. An act to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes.

Under the authority of the order of the Senate of August 4, 1983, the enrolled bill was signed on August 10, 1983, during the adjournment of the Senate, by the President pro tempore (Mr. THURMOND).

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Under the authority of the order of the Senate of August 4, 1983, the Secretary of the Senate, on August 16, 1983, during the adjournment of the Senate, received a message from the House of Representatives announcing that the Speaker had signed the following enrolled bills and joint resolutions:

S. 46. An act to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping";

S. 1696. An act authorizing three additional Assistant Administrators of the Environmental Protection Agency;

S. 1797. An act to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building";

H.R. 1372. An act to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska;

H.R. 2895. An act to designate the Federal Building and U.S. Courthouse at 450 Golden Gate Avenue, San Francisco, Calif., as the

Phillip Burton Federal Building and U.S. Courthouse;

H.R. 3190. An act to establish an improved program for extra long staple cotton;

H.R. 3232. An act to amend title 28 of the United States Code of authorize payment of travel and transportation expenses of newly appointed special agents of the Department of Justice;

H.R. 3409. An act to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State;

H.R. 3549. An act to amend the Bankruptcy Rules with respect to providing notice;

H.R. 3677. An act to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program;

S.J. Res. 85. Joint resolution to designate September 26, 1983, as "National Historically Black Colleges Day";

S.J. Res. 98. Joint resolution to designate October 2 through October 9, 1983, as "National Housing Week";

S.J. Res. 116. Joint resolution to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week";

S.J. Res. 149. Joint resolution to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States; and

H.J. Res. 297. Joint resolution providing for the appointment of Jeannine Smith Clark as a citizen regent of the Board of Regents of the Smithsonian Institution.

Under the authority of the order of the Senate of August 4, 1983, the enrolled bills and joint resolutions were signed on August 17, 1983, during the adjournment of the Senate by the President pro tempore (Mr. THURMOND).

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary reported that on August 17, 1983, he had presented to the President of the United States the following enrolled bills and joint resolutions:

S. 46. An act to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping";

S. 1696. An act authorizing three additional Assistant Administrators of the Environmental Protection Agency;

S. 1797. An act to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building";

S.J. Res. 85. Joint resolution to designate September 26, 1983, as "National Historically Black Colleges Day";

S.J. Res. 98. Joint resolution to designate October 2 through October 9, 1983, as "National Housing Week";

S.J. Res. 116. Joint resolution to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week";

S.J. Res. 149. Joint resolution to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States; and

HOUSE MEASURES REFERRED DURING ADJOURNMENT

Under the authority of the order of the Senate of August 4, 1983, the following measures received from the House of Representatives were read twice by unanimous consent and referred as indicated:

H.J. Res. 218. Joint resolution to designate the month of September 1983 as "National Sewing Month"; to the Committee on the Judiciary.

H.J. Res. 295. Joint resolution to designate the week beginning August 7, 1983, as "National Correctional Officers Week"; to the Committee on the Judiciary.

MESSAGE FROM THE HOUSE

At 4:33 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has agreed to the following resolutions:

H. Res. 306. A resolution relative to the death of the Honorable Henry M. Jackson, a Senator from the State of Washington; and

H. Res. 307. A resolution relative to the death of the Honorable Larry McDonald, a Representative from the State of Georgia.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1588. A communication from the President of the United States transmitting, pursuant to law, a report on the deployment and mission of U.S. Armed Forces to assist the Government of Chad in dealing with Libyan aggression; to the Committee on Foreign Relations.

EC-1589. A communication from the Secretary of Energy transmitting, pursuant to law, an alternative funding plan for completing the Clinch River breeder reactor plant project; to the Committee on Appropriations.

EC-1590. A communication from the Acting Assistant Secretary of the Army for Installations, Logistics, and Financial Management transmitting, pursuant to law, a report on the commercial activities program cost study process; to the Committee on Armed Services.

EC-1591. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on the decision to convert the shelf stocking function at the Branch Commissary Store, Patuxent River, Md., to performance under contract; to the Committee on Armed Services.

EC-1592. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a proposed foreign military sale to the United Kingdom; to the Committee on Armed Services.

EC-1593. A communication from the Deputy Assistant Secretary of the Air Force for Logistics and Communications transmitting, pursuant to law, a report on a decision to study the conversion of numerous functions at various installations to performance under contract; to the Committee on Armed Services.

EC-1594. A communication from the Secretary of Defense transmitting, pursuant to law, a report on the initial civilian personnel allocations for fiscal year 1983; to the Committee on Armed Services.

EC-1595. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a proposed foreign military sale to Lebanon; to the Committee on Armed Services.

EC-1596. A communication from the Principal Deputy Assistant Secretary of the Army for Manpower and Reserve Affairs transmitting a draft of proposed legislation to increase the pay of contract physicians; to the Committee on Armed Services.

EC-1597. A communication from the Principal Deputy Assistant Secretary of the Army for Manpower and Reserve Affairs transmitting a draft of proposed legislation authorizing transportation at Government expense for dependents from Alaska and Hawaii requiring medical care not locally available; to the Committee on Armed Services.

EC-1598. A communication from the Director of the Congressional Budget Office transmitting, pursuant to law, a report reviewing DOD 1982 selected acquisition reports; to the Committee on Armed Services.

EC-1599. A communication from the President and Chairman of the Export-Import Bank of the United States transmitting, pursuant to law, the report on the operations of the Bank for fiscal year 1982; to the Committee on Banking, Housing, and Urban Affairs.

EC-1600. A communication from the Secretary of Transportation transmitting, pursuant to law, the Urban Mass Transportation Administration's second quarter report for 1983; to the Committee on Banking, Housing, and Urban Affairs.

EC-1601. A communication from the Deputy Secretary of the Treasury transmitting, pursuant to law, notification to the President pro tempore of the Senate that the medal authorized to be presented to Adm. Hyman Rickover is available for presentation; to the Committee on Banking, Housing, and Urban Affairs.

EC-1602. A communication from the Vice President of AMTRAK for Government Affairs transmitting, pursuant to law, a report on revenues and expenses of the system for April and May of 1983; to the Committee on Commerce, Science, and Transportation.

EC-1603. A communication from the Administrator of NASA transmitting, pursuant to law, a report on the proposed use of certain appropriated funds for construction of a solid rocket booster assembly and refurbishment facility at Kennedy Space Center, Fla.; to the Committee on Commerce, Science, and Transportation.

EC-1604. A communication from the Secretary of Commerce transmitting, pursuant to law, the annual report on the administration of the Marine Mammal Protection Act; to the Committee on Commerce, Science, and Transportation.

EC-1605. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of excess royalty payments to Kerr-McGee Corp.; to the Committee on Energy and Natural Resources.

EC-1606. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of excess royalty payments to Mobil Oil Corp.; to the Committee on Energy and Natural Resources.

EC-1607. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of excess royalty payments to Amoco Production Co.; to the Committee on Energy and Natural Resources.

EC-1608. A communication from the Acting Director of the Mineral Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of excess royalty payments to Conoco Inc.; to the Committee on Energy and Natural Resources.

EC-1609. A communication from the Acting Director of the Mineral Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of excess royalty payments to Shell Oil Co.; to the Committee on Energy and Natural Resources.

EC-1610. A communication from the Secretary of the Interior transmitting, pursuant to law, a list indicating the current status of completion or revision of general management plans for each unit of the National Park System; to the Committee on Energy and Natural Resources.

EC-1611. A communication from the Secretary of the Interior transmitting, pursuant to law, the 1982 Annual Report of the Office of Surface Mining; to the Committee on Energy and Natural Resources.

EC-1612. A communication from the Acting Chairman of the Nuclear Regulatory Commission transmitting, pursuant to law, the report of the nondisclosure of safeguards information by the Commission for the quarter ending June 30, 1983; to the Committee on Environment and Public Works.

EC-1613. A communication from the U.S. Trade Representative transmitting a draft of proposed legislation to implement obligations of the United States under the International Coffee Agreement of 1983; to the Committee on Finance.

EC-1614. A communication from the U.S. Trade Representative transmitting a renewal of President Reagan's request for the early enactment of legislation concerning tax deductions for expenses for advertising placed with a foreign broadcast station and directed primarily at the U.S. market; to the Committee on Finance.

EC-1615. A communication from the Secretary of the Treasury transmitting, pursuant to law, the 1981 Annual Report on the Operation and Effect of the Domestic International Sales Corporation legislation; to the Committee on Finance.

EC-1616. A communication from the Deputy Secretary of the Treasury transmitting a draft of proposed legislation to provide by statute for two Assistant Secretaries in the Department of the Treasury; to the Committee on Finance.

EC-1617. A communication from the Chairman of the U.S. International Trade Commission transmitting, pursuant to law, the Commission's report on the operation of the U.S. trade agreements program during 1982; to the Committee on Finance.

EC-1618. A communication from the Comptroller General of the United States transmitting a draft of proposed legislation to permit Federal agencies to reimburse their employees for residence sale and purchase expenses upon transfer from an overseas post to a new duty station in the United States; to the Committee on Governmental Affairs.

EC-1619. A communication from the Secretary of the Health and Human Services transmitting, pursuant to law, the fiscal year 1982 report concerning actions taken to recruit and train Indians to qualify for positions which are subject to preference under Indian preference laws; to the Committee on Governmental Affairs.

EC-1620. A communication from the Deputy Administrator of the General Services Administration transmitting, pursuant to law, a report on a proposed Presidential archival depository to be known as the Carter Presidential Library; to the Committee on Governmental Affairs.

EC-1621. A communication from the Benefits Manager of the Farm Credit Banks of Texas transmitting, pursuant to law, the report for calendar year 1982 for the Farm Credit Banks of Texas pension plan; to the Committee on Governmental Affairs.

EC-1622. A communication from the District of Columbia Auditor transmitting, pursuant to law, a follow-up report on the installation of fire alarm system and smoke detectors at the D.C. Armory; to the Committee on Governmental Affairs.

EC-1623. A communication from the Acting Secretary of Education transmitting, pursuant to law, the fiscal year 1981 report concerning the administration of title I of the impact aid program; to the Committee on Labor and Human Resources.

EC-1624. A communication from the Secretary of Health and Human Services transmitting, pursuant to law, the 1982 report concerning the national heart, blood vessel, lung, and blood diseases, and blood resources program; to the Committee on Labor and Human Resources.

EC-1625. A communication from the Executive Secretary, Office of Secretary of Defense, transmitting, pursuant to law, the October 1982 through April 1983 report on DOD procurement from small and other business firms; to the Committee on Small Business.

EC-1626. A communication from the Acting Director of the Office of Management and Budget transmitting, pursuant to law, the cumulative report on rescissions and deferrals for August 1, 1983; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Agriculture, Nutrition, and Forestry, Commerce, Science, and Transportation, Labor and Human Resources, Banking, Housing, and Urban Affairs, Energy and Natural Resources, Foreign Relations, Armed Services, Finance, and Veterans' Affairs.

EC-1627. A communication from the Chief Deputy Clerk of the U.S. Claims Court transmitting, pursuant to law, a copy of the Court's judgment order in the matter of Quechan Tribe of the Fort Yuma Reservation against the United States; to the Committee on Appropriations.

EC-1628. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a secret report on a foreign military sale to Chad; to the Committee on Armed Services.

EC-1629. A communication from the Acting Assistant Secretary of Defense (Comptroller) transmitting, pursuant to law, a secret report on certain contract award dates during September and October 1983; to the Committee on Armed Services.

EC-1630. A communication from the Acting Assistant Secretary of the Army for Installations, Logistics, and Financial Management transmitting, pursuant to law, a report on the emergency disposal of a chemical munition at Dugway Proving Ground, Utah; to the Committee on Armed Services.

EC-1631. A communication from the President and Chairman of the Export-Import Bank of the United States transmitting, pursuant to law, a report on a transaction involving U.S. exports to Italy; to the Committee on Banking, Housing, and Urban Affairs.

EC-1632. A communication from the President and Chairman of the Export-Import Bank of the United States transmitting, pursuant to law, a report on a transaction involving U.S. exports to Brazil; to the Committee on Banking, Housing, and Urban Affairs.

EC-1633. A communication from the President and Chairman of the Export-Import Bank of the United States transmitting, pursuant to law, a report on a transaction involving U.S. exports to Mexico; to the Committee on Banking, Housing, and Urban Affairs.

EC-1634. A communication from the First Vice President and Vice Chairman of the Export-Import Bank of the United States transmitting, pursuant to law, a report on a transaction involving U.S. exports to Singapore; to the Committee on Banking, Housing, and Urban Affairs.

EC-1635. A communication from the Director of the Congressional Budget Office transmitting, pursuant to law, a report entitled "The Economic and Budget Outlook: An Update"; to the Committee on the Budget.

EC-1636. A communication from the Chairman of the National Advisory Committee on Oceans and Atmosphere transmitting, pursuant to law, a report entitled "The Nation's River and Flood Forecasting and Warning Service"; to the Committee on Commerce, Science, and Transportation.

EC-1637. A communication from the Secretary of Transportation transmitting, pursuant to law, a report on the effect of airline deregulation on the level of airline safety; to the Committee on Commerce, Science, and Transportation.

EC-1638. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, applications by Arco Oil and Gas Co., Mobil Oil Corp., Shell Oil Co., Pennzoil Exploration and Production Co., and Getty Oil Co. for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1639. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, applications by Phillips Petroleum Co. and Mobil Oil Corp. for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1640. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, applications by Shell Oil Co., Mobil Oil Corp., Chevron U.S.A. Inc., and Arco Oil and Gas Co. for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1641. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, applications

by Mobil Oil Corp. and McMoRan Offshore Exploration Co. for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1642. A communication from the Acting Director of the Mineral Management Agency, Department of the Interior, transmitting, pursuant to law, applications by Shell Oil Co., Gulf Oil Corp., and Sonat Exploration Co. for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1643. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, seven applications from Shell Oil Co. for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1644. A communication from the Chairman of the Board of the Synthetic Fuels Corporation, transmitting, pursuant to law, the quarterly report of the Corporation for the period ended June 30, 1983; to the Committee on Energy and Natural Resources.

EC-1645. A communication from the Acting Assistant Secretary for Land and Water Resources, Department of the Interior, transmitting, pursuant to law, an application by the Oakdale Irrigation District, Stanislaus County, Calif., for a loan under the Small Reclamation Projects Act; to the Committee on Energy and Natural Resources.

EC-1646. A communication from the Administrator of the Environmental Protection Agency, transmitting, pursuant to law, copies of the letter of transmittal and the Agency's prospectus number EPA 83001; to the Committee on Environment and Public Works.

EC-1647. A communication from the Administrator of the Environmental Protection Agency, transmitting, pursuant to law, a report entitled "Carbon Monoxide Intrusion in Sustained-Use Vehicles"; to the Committee on Environment and Public Works.

EC-1648. A communication from the Secretary of State, transmitting, pursuant to law, a report explaining the manner in which the national interest has been served by certain payments to Poland; to the Committee on Foreign Relations.

EC-1649. A communication from the Director of the U.S. Information Agency, transmitting, pursuant to law, the 15th issue of the "Soviet Propaganda Alert"; to the Committee on Foreign Relations.

EC-1650. A communication from the Acting Assistant Secretary of State (Legislative and Intergovernmental Affairs), transmitting, for the information of the Senate, a booklet on careers in the Foreign Service; to the Committee on Foreign Relations.

EC-1651. A communication from the Fiscal Assistant Secretary of the Treasury, transmitting, pursuant to law, the report on inventory of nonpurchased foreign currencies as of March 31, 1983; to the Committee on Foreign Relations.

EC-1652. A communication from the Acting Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to August 9, 1983; to the Committee on Foreign Relations.

EC-1653. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a list of reports submitted by the General Accounting Office during July 1983; to the Committee on Governmental Affairs.

EC-1654. A communication from the General Counsel of the Department of Health and Human Services, transmitting a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1655. A communication from the General Manager of the Tennessee Valley Authority, transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1656. A communication from the Inspector General, Department of Agriculture, transmitting, pursuant to law, a copy of the "Public Notice of USDA Farmers Home Administration Rural Housing Borrowers and Rural Rental Housing Tenants Against Virginia Employment Commission Records"; to the Committee on Governmental Affairs.

EC-1657. A communication from the Acting Assistant Secretary of the Interior (Indian Affairs), transmitting, pursuant to law, a proposed plan for the use and distribution of judgment funds awarded the Tlingit and Haida Tribes before the U.S. Court of Claims; to the Select Committee on Indian Affairs.

EC-1658. A communication from the Acting Assistant Secretary of the Interior (Indian Affairs), transmitting, pursuant to law, a proposed plan for the use and distribution of judgment funds awarded to the Creek Nation before the U.S. Court of Claims; to the Select Committee on Indian Affairs.

EC-1659. A communication from the Chairman of the Board of Directors and the Excutive Director of the Pension Benefit Guarantee Corporation, transmitting, pursuant to law, the eighth annual report of the Corporation covering fiscal year 1982; to the Committee on Labor and Human Resources.

EC-1660. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, a report entitled "Farm Revenue Insurance: An Alternative Risk-Management Option for Crop Farmers"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1661. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Colorado River Basin Salinity Control Act to authorize the Secretary of Agriculture to develop and implement a coordinated agricultural program in the Colorado River Basin; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1662. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a report on a violation of the Anti-Deficiency Act in the Homeownership and Rental Housing Assistance account; to the Committee on Appropriations.

EC-1663. A communication from the Chief of the Program Liaison Division, Office of Legislative Liaison, Department of the Air Force, transmitting, pursuant to law, a report on experimental, developmental, and research contracts of $50,000 or more, by company; to the Committee on Armed Services.

EC-1664. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, a report entitled "Manpower for a 600 Ship Navy: Costs and Policy Alternatives"; to the Committee on Armed Services.

EC-1665. A communication from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion to contractor performance of various functions at various installations; to the Committee on Armed Services.

EC-1666. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report on loan, guarantee, and insurance transactions supported by Eximbank during July 1983 to Communist countries; to the Committee on Banking, Housing, and Urban Affairs.

EC-1667. A communication from the Secretary of Commerce, transmitting, pursuant to law, the final report on the activities of the Economic Development Administration, U.S. Department of Commerce under the Olympic Winter Games Authorization Act of 1976; to the Committee on Commerce, Science, and Transportation.

EC-1668. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, a report entitled "Improving the Air Traffic Control System: An Assessment of the National Airspace System Plan"; to the Committee on Commerce, Science, and Transportation.

EC-1669. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, a report entitled "Strategic and Critical Nonfuel Minerals: Problems and Policy Alternatives"; to the Committee on Commerce, Science, and Transportation.

EC-1670. A communication from the Secretary of Transportation, transmitting, pursuant to law, estimates of the cost of completing substitute highway projects and substitute transit projects for fiscal year 1984; to the Committee on Commerce, Science, and Transportation.

EC-1671. A communication from the Secretary of Energy, transmitting, pursuant to law, the quarterly report on the strategic petroleum reserve, dated August 16, 1983; to the Committee on Energy and Natural Resources.

EC-1672. A communication from the Acting Secretary of the Interior, transmitting a draft of proposed legislation to transfer to the North Slope Borough in the State of Alaska responsibility for the development and operation of the Barrow gas fields, the Walakpa gas discovery site, and to convey certain rights to the lands involved, and for other purposes; to the Committee on Energy and Natural Resources.

EC-1673. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, an application by Tenneco Oil Exploration and Production for refund of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1674. A communication from the Secretary of Energy, transmitting, pursuant to law, the annual report of the Department's industrial energy efficiency program for calendar year 1981; to the Committee on Energy and Natural Resources.

EC-1675. A communication from the Acting Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, applications by Chevron U.S.A., Inc., and CNG Producing Co. for refunds of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-1676. A communication from the General Counsel of the Department of Energy, transmitting, pursuant to law, notice of meetings related to the international energy

program; to the Committee on Energy and Natural Resources.

EC-1677. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the annual report on committees that have advised the Secretary in carrying out functions under the Social Security Act during calendar year 1982; to the Committee on Finance.

EC-1678. A communication from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to discontinue or amend certain requirements for agency reports to Congress; to the Committee on Finance.

EC-1679. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, a report entitled "Forecasting Individual Income Tax Revenues: A Technical Analysis"; to the Committee on Finance.

EC-1680. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to August 29, 1983; to the Committee on Foreign Relations.

EC-1681. A communication from the Acting Secretary of State, transmitting, pursuant to law, the semiannual report on voluntary contributions to international organizations for the period October 1982 to March 1983; to the Committee on Foreign Relations.

EC-1682. A communication from the Charge d'Affairs of the Embassy of the Union of Soviet Socialist Republics, transmitting, for the information of the Senate the official text of the U.S.S.R. Supreme Soviet's resolution on the international situation and the policy of the Soviet Union; to the Committee on Foreign Relations.

EC-1683. A communication from the President of the United States, transmitting, pursuant to law, a report concerning the presence of U.S. troops in Lebanon; to the Committee on Foreign Relations.

EC-1684. A communication from the District of Columbia Auditor, transmitting, pursuant to law, the annual report of the District of Columbia Auditor for fiscal year 1982; to the Committee on Governmental Affairs.

EC-1685. A communication from the Postal Rate Commission, transmitting, pursuant to law, the opinion and recommended decision upon further reconsideration on bulk third-class nonprofit rates; to the Committee on Governmental Affairs.

EC-1686. A communication from the Assistant Attorney General (Administration), transmitting, pursuant to law; notice of changes or establishment of certain Privacy Act systems of records; to the Committee on Governmental Affairs.

EC-1687. A communication from the Vice President (Human Resources and Administration) of the Federal Home Loan Mortgage Corporation, transmitting, pursuant to law, the annual report on the Federal Home Loan Mortgage Corporation employees' trust fund for calendar year 1982; to the Committee on Governmental Affairs.

EC-1688. A communication from the Secretary of the Railroad Retirement Board, transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1689. A communication from the Freedom of Information officer of the Environmental Protection Agency, transmitting, pursuant to law, a report on Agency activities under the Freedom of Information Act during calendar year 1982; to the Committee on the Judiciary.

EC-1690. A communication from the President of the Jewish War Veterans U.S.A. National Memorial, Inc., transmitting, pursuant to law, the audit report of the Jewish War Veterans U.S.A. National Memorial, Inc., for the year ended March 31, 1983; to the Committee on the Judiciary.

EC-1691. A communication from the Secretary of Education, transmitting, pursuant to law, final regulations, 1984-85 Pell grant family contribution schedule; student assistance general provisions; definition of an independent student; to the Committee on Labor and Human Resources.

EC-1692. A communication from the Secretary of Education, transmitting, pursuant to law, final regulations—Privacy Act; to the Committee on Labor and Human Resources.

EC-1693. A communication from the Director of ACTION, transmitting, pursuant to law, a copy of a final regulation entitled "Intergovernmental Review of ACTION programs"; to the Committee on Labor and Human Resources.

EC-1694. A communication from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to provide for limited confidential treatment of medical and prosthetic research information; to the Committee on Veterans' Affairs.

EC-1695. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Review of the Commodity Credit Corporation's Financial Statements for the Year Ended September 30, 1981"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1696. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Examination of the Panama Canal Commission's Financial Statements for the Years Ended September 30, 1982 and 1981"; to the Committee on Armed Services.

EC-1697. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics, transmitting, pursuant to law, a report on a decision to convert the custodial services, insect and rodent control, and grounds and surfaced areas functions at the Marine Corps Air Station, Kaneohe Bay, Hawaii, to the performance under contract; to the Committee on Armed Services.

EC-1698. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to allow negotiation to establish or maintain alternative sources of supply for purposes of competition; to the Committee on Armed Services.

EC-1699. A communication from the President of the Corporation for Public Broadcasting, transmitting, pursuant to law, the Corporation's 1982 annual report; to the Committee on Commerce, Science, and Transportation.

EC-1700. A communication from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend section 6 of the Colorado River Storage Act; to the Committee on Energy and Natural Resources.

EC-1701. A communication from the Secretary of Energy, transmitting, pursuant to law, the annual report for 1982 on the State energy conservation program; to the Committee on Energy and Natural Resources.

EC-1702. A communication from the Administrator of the Energy Information Administration, transmitting, pursuant to law, an advance summary of the 1982 survey of the Nation's proved reserves of crude oil, natural gas, and natural gas liquids; to the Committee on Energy and Natural Resources.

EC-1703. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a report on plans for issuing counterfeiter-resistant social security number cards made of banknote paper; to the Committee on Finance.

EC-1704. A communication from the Chairman of the Advisory Committee for Trade Negotiations, transmitting, pursuant to law, its statement on trade reorganization; to the Committee on Finance.

EC-1705. A communication from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting, pursuant to law, a report on an agreement between the American Institute in Taiwan and the Coordination Council for North American Affairs; to the Committee on Foreign Relations.

EC-1706. A communication from the Deputy Assistant Secretary of Health and Human Services (for Health Operations, and Director, Office of Management), transmitting, pursuant to law, the annual report on the financial condition of the Department's pension plan; to the Committee on Governmental Affairs.

EC-1707. A communication from the Chairman of the Securities and Exchange Commission transmitting, pursuant to law, the annual report on activities under the Government in the Sunshine Act; to the Committee on Governmental Affairs.

EC-1708. A communication from the Director of Administration, Department of Energy, transmitting, pursuant to law, a report on a new Privacy Act system of records entitled "Clinch River Breeder Reactor Plant Work Force Survey; to the Committee on Governmental Affairs.

EC-1709. A communication from the District of Columbia Auditor, transmitting, pursuant to law, the D.C. revenue report for July 1983; to the Committee on Governmental Affairs.

EC-1710. A communication from the Assistant Vice President of Amtrak for Corporate Communications, transmitting, pursuant to law, the 1982 Freedom of Information annual report; to the Committee on the Judiciary.

EC-1711. A communication from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting, pursuant to law, the text of ILO Convention No. 148; to the Committee on Labor and Human Resources.

EC-1712. A communication from the Congressional Budget Office, transmitting, pursuant to law, a report on major legislative changes in human resources programs since January 1981; to the Committee on Labor and Human Resources.

EC-1713. A communication from the Administrator of Veterans' Affairs, transmitting, pursuant to law, a report of the Advisory Committee on Former Prisoners of War; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES RECEIVED DURING ADJOURNMENT

Under the authority of the order of the Senate of August 4, 1983, the following reports of committees were submitted on September 1, 1983:

By Mr. TOWER, from the committee of conference:

Report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 675) to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Deparment of Energy for national security programs for such fiscal year, and for other purposes (Rept. No. 98-213).

By Mr. COHEN, from the Committee on Governmental Affairs:

Report to accompany the bill (S. 1001) to authorize appropriations for the Office of Federal Procurement Policy for an additional five fiscal years (Rept. No. 98-214).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute:

S. 1714: A bill to amend the Federal Trade Commission Act to provide authorization of appropriations, and for other purposes (Rept. No. 98-215).

By Mr. ROTH, from the Committee on Governmental Affairs, with amendments:

S. 1267: A bill to transfer from the Director of the Office of Management and Budget to the Administrator of General Services the responsibility for publication of the catolog of Federal domestic assistance programs, and for other purposes (Rept. No. 98-216).

By Mr. ROTH, from the Committee on Governmental Affairs:

Report to accompany the bill (S. 1625) to amend the District of Columbia Retirement Reform Act (Rept. No. 98-217).

By Mr. STEVENS, from the Committee on Governmental Affairs:

Report to accompany the bill (S. 1009) to authorize Federal physicians comparability allowances (Rept, No. 98-218).

By Mr. ROTH, from the Committee on Governmental Affairs:

Report to accompany the bill (S. 1513) to extend for 5 years the authorization of appropriations for the National Historical Publications and Records Commission (Rept. No. 98-219).

By Mr. ROTH, from the Committee on Governmental Affairs, without amendment:

S. Res. 208: A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1267; referred to the Committee on the Budget.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, with amendments:

S. 53: A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968 (Rept. No. 98-220).

By Mr. THURMOND, from the Committee on the Judiciary, with amendments:

S. 774: A bill entitled the "Freedom of Information Reform Act" (Rept. No. 98-221).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MATHIAS:

S. 1828. A bill to amend the Communications Act of 1934 to insure that the reorganization of the American Telephone & Telegraph Co. does not impair the ability of disabled persons to enjoy the affordable access to telephone services that enable them to lead self-sufficient and productive lives, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. INOUYE:

S. 1829. A bill for the relief of Mr. and Mrs. John Reginald Delaney; to the Committee on the Judiciary.

By Mrs. HAWKINS:

S. 1830. A bill to delay the effect of a Federal Communications Commission decision relating to the American Telephone & Telegraph Co.; to the Committee on Commerce, Science, and Transportation.

By Mrs. HAWKINS:

S. 1831. A bill to amend the Communications Act of 1934 to assure universal telephone service within the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BAKER (for himself, Mr. BYRD, Mr. PERCY, Mr. PELL, Mr. TOWER, Mr. NUNN, Mr. THURMOND, Mr. LUGAR, Mr. BOREN, Mr. SASSER, Mr. BINGAMAN, Mr. D'AMATO, Mr. LONG, Mr. RANDOLPH, Mr. SPECTER, Mr. KENNEDY, and Mr. DENTON):

S.J. Res. 158. A joint resolution condemning the brutal behavior of the Government of the Union of Soviet Socialist Republics for the destruction of Korean Airlines Flight 007 with the loss of 269 innocent lives; ordered held at the desk.

By Mr. MATHIAS:

S.J. Res. 159. A joint resolution to authorize the further participation of U.S. Armed Forces in the multinational peacekeeping force in Lebanon; to the Committee on Foreign Relations.

By Mr. BYRD (for himself, Mr. RANDOLPH, Mr. DODD, Mr. NUNN, Mr. MATSUNAGA, Mr. CHILES, Mr. SARBANES, Mr. DURENBERGER, Mr. BENTSEN, and Mr. HOLLINGS):

S.J Res. 160. A joint resolution to designate the week of October 17, 1983 through October 24, 1983, as "National Adult Continuing Education Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. GORTON:

S. Res. 209. A resolution relative to the death of the Honorable Henry M. Jackson, of Washington; considered and agreed to.

By Mr. BAKER (for himself and Mr. BYRD):

S. Res. 210. A resolution to provide for the payment of committee expenses involved in attending the funeral of the Honorable Henry M. Jackson; considered and agreed to.

By Mr. BAKER:

S. Res. 211. A resolution relative to the election of Larry E. Smith as Sergeant at Arms and Doorkeeper of the Senate; considered and agreed to.

By Mr. BYRD (for himself, Mr. BAKER, Mr. NUNN, and Mr. MATTINGLY):

S. Res. 212. A resolution relative to the death of the Honorable Lawrence P. McDonald of Georgia; considered and agreed to.

By Mr. HEINZ:

S. Con. Res. 66. A concurrent resolution expressing the sense of the Congress regarding the shooting down of Korean Airlines Flight 007 by the Government of the Soviet Union; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MATHIAS:

S. 1828. A bill to amend the Communications Act of 1934 to insure that the reorganization of the American Telephone & Telegraph Co. does not impair the ability of disabled persons to enjoy the affordable access to telephone services that enable them to lead self-sufficient and productive lives, and for other purposes; to the Committee on Commerce, Science, and Transportation.

PRESERVATION OF TELEPHONE SERVICE FOR DISABLED RATEPAYERS ACT

Mr. MATHIAS. Mr. President, we are a nation with an advanced case of telephonitis. We Americans use 180 million telephones to go about our daily work, arrange our family lives, and cope with unexpected events. Without telephone service, most of us could not carry on in our homes, at our jobs or anywhere else for as long as 1 day.

For disabled Americans the local Bell operating companies have historically provided specialized telephone equipment.

Although specialized terminal equipment for a few disabilities such as deaf-blindness and paralysis can be extremely expensive, for most disabilities the additional costs are more modest. Keeping disabled ratepayers on the telephone network often allows them to lead more productive and independent lives and to avoid institutionalization.

To assure that disabled ratepayers can stay on the telephone network the telephone companies have traditionally spread some of the extraordinary costs over the general ratebase. Very small contributions from other ratepayers assure affordable service for the disabled, avoiding the need for costly and inefficient governmental programs to procure and distribute specialized telephone equipment. These programs are supervised by State regulatory commissions under the authority of the Telecommunications for the Disabled Act, Public Law 97-410.

On July 15, 1983, American Telephone & Telegraph announced that

all Bell operating companies would be required to transfer their operations serving the disabled to a commercial arm of Western Electric. This transfer would limit the ability of the local companies after divestiture to meet the special needs of disabled subscribers. AT&T has indicated that it is unwilling to assume the burden of subsidizing specialized equipment out of its long-distance rate base. Indeed, it has asked the Commission to preempt State regulation of this equipment. Organizations representing the disabled claim that this violates the Telecommunications for the Disabled Act and could expose disabled Americans to unaffordable price increases.

The bill I am introducing today would preserve the status quo and give AT&T an opportunity to demostrate that specialized equipment will be affordable after divestiture. It does not specify a particular means for making equipment affordable. AT&T may subsidize equipment out of its interstate ratebase; it may establish a charitable trust; or it may allow the operating companies to continue their historic programs. The objective of this bill is to prevent an irreversible transfer of local company operations until alternative arrangements are made to assure preservation of affordable telephone service for disabled Americans.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1828

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Preservation of Telephone Service for Disabled Ratepayers Act of 1983".

SEC. 2. Section 610 of the Communications Act of 1934 is amended by adding at the end thereof the following new subsections:

"(i) Notwithstanding any order in the case *United States versus Western Electric,* Civ. A. No. 82-0192, in the District Court for the District of Columbia, no operation serving the disabled that was affiliated with a Bell operating company on the effective date of this section shall be affiliated with the American Telephone and Telegraph Company after the date of divestiture or transferred to any entity not affiliated with a Bell operating company, unless the Commission, after an opportunity for comment by any interested party, shall determine that the transfer or affiliation will not impair the ability of disabled persons to obtain specialized terminal equipment at affordable rate.

"(j) For purposes of this section only—

"(1) the term 'operation serving the disabled' means any operation (including personnel; machinery; equipment installed on the premises of customers; books of account; and real, personal, and intellectual property) dedicated to researching, developing, manufacturing, marketing, distributing, installing, or maintaining specialized terminal equipment and includes such portions of operations performing more general functions as would be necessary to enable to Bell operating companies to continue to provide specialized terminal equipment on an economical basis after divestiture; and

"(2) the term 'specialized terminal equipment' means

"(A) any device that is necessary for disabled persons to use generally available communications services (or those services that have been specially designed for their use effectively and without assistance;

"(B) any communications device that enables a person whose health must be monitored to avoid institutionalization or that enables persons to communicate in a medical emergency; or

"(C) any component, attachment, or accessory that can be used with terminal equipment to enable disabled persons to use communications services effectively and without assistance; and

"(D) includes the installation and maintenance of any such device or of specialized assemblies of such devices.".

By Mrs. HAWKINS:

S. 1830. A bill to delay the effect of a Federal Communications Commission decision relating to the American Telephone & Telegraph Co.; to the Committee on Commerce, Science, and Transportation.

S. 1831. A bill to amend the Communications Act of 1934 to assure universal telephone service within the United States, and for other purposes; to the Committee on Commerce, Science, and Transportation.

UNIVERSAL TELEPHONE SERVICE PRESERVATION LEGISLATION

● Mrs. HAWKINS. Mr. President, I rise today to introduce legislation that addresses the question of how to assure the American people of continued access to high-quality, affordable telephone service—what we in this country have come to accept as "Universal Telephone Service."

As a former State public service chairman and commissioner, I am terribly concerned that Americans are facing astronomical local telephone rate increases in the months ahead. This need not happen. Congress does have the power to head off this disaster. In recent weeks, I have drawn on my own experience and on the technical expertise of State regulators to draft a proposal that should be part of the final congressional solution to the problem. This proposal is designed to complement, rather than supplant, those that have already been introduced. I will also be introducing a shorter version that will simply reverse the FCC access charge decision and other FCC decisions that will have an effect on local telephone rates. This bill is designed to provide local ratepayers with some relief from rate increases during 1984 in the event that congressional action on a comprehensive telephone proposal cannot be completed before January 1, 1984.

At the center of this problem are the 1983 AT&T divestiture and the recent FCC decision concerning the makeup of access charges. Both the divestiture and the FCC actions are designed to free the telecommunications market, allowing greater competition, accelerated technological advances, and hopefully lower prices for long-distance and enhanced telephone service. I have serious trouble, however, with the trend at the FCC to move in a headlong fashion toward a "pure competition" approach for the telecommunications industry at the great expense of local telephone customers. The victims of this policy are that sizable portion of our population that has no use for enhanced services and volume long-distance service. These people face trouble ahead under the current FCC policies. As I said during the debate on the Cable Communications Act several weeks ago, "there is no good public policy reason to allow local telephone ratepayers to suffer unnecessarily during the transition from a monopoly-based telecommunications system to a competitive one."

Trying to guess just how high local telephone rates will rise if Congress does fail to act by January 1, 1984, is very difficult. However, the national estimates range anywhere from 100 percent to a startling 200 percent above current rates. In Florida, it is estimated that a 100-percent increase in local rates would result in a drop of telephone subscribers of a full 9 percent or 304,000 people. For those in low-income households, the drop would be closer to 20 percent or 193,000 out of 1 million. Nationwide, a 100-percent increase in local rates would drop the percentage of the national population with access to home phones from 92 percent to 83 percent. Subscriber declines of this magnitude could create classes of information rich and information poor in this country, with massive social implications.

Despite what I consider to be inequities in the FCC approach, it should be clear that this proposal does not work against progress in the telecommunications industry. I believe the industry promises to be just as competitive after Congress addresses the issue as it is now. The growing field of long-distance competitors continues to startle the Wall Street analysts with its performance featuring stock splits, innovation, and diversification. Some long-distance companies are even exploring ways to link up with local cable concerns and bypass the entire traditional telephone loop.

Many of the provisions of this bill are similar to those of other bills already introduced in the Senate.

First. The bill would reverse the FCC access charge decision and place it under a moratorium.

Second. It would establish a universal service fund to assist high-cost States that are not able to generate in-

ternally the revenues needed to keep local rates at reasonable levels.

Third. It would provide a lifeline telephone service.

Fourth. Additionally, it would call for designation of one or more long-distance carriers operating within a State's jurisdiction as long-distance carriers of last resort.

Fifth. Finally, it would call for designation of 911 as a nationwide emergency response number.

The overlying difference between this bill and others is its reduced role for the FCC in addressing this problem and the added emphasis placed on the role of State commissions in establishing and enforcing access charges, depreciation schedules, and rules relating the the provision of basic telephone instruments, among others. Federal standards are written into the bill to provide nationwide uniformity in the way these State functions are handled. This bill would enable State commissions to carefully preserve universal telephone service within each of their jurisdictions.

As reflected in my remarks during the Cable Communications Act debate, I believe that State commissions should play a vital part in the solution to this problem. The pressure to seek higher rates will continue to weigh heavily on local exchange companies. We must give State commissions the flexibility to allocate a fair share of local costs to the long-distance carriers who are seeking access to those local markets. Telephone regulation after divestiture will be terribly compex—all the more reason to have the State commissions making the tough regulatory decisions.

The possibility of skyrocketing local telephone rates in 1984 is not just an economic problem that can be measured neatly with a slide rule or a calculator. It is also a social problem. America is now said to be entering the "information age." I submit that the term "information age" will be meaningless if, because Congress fails to act, a substantial portion of our population find it impossible to afford our most basic modern tool of communication. These people face a real communications breakdown and they will become the first statistics in what will be dubbed the "information gap" unless we do our best to consider all the alternatives.

Congress must act quickly on the issue. I look forward to working with Chairman PACKWOOD and all my colleagues in a sincere attempt to reach a consensus on this issue here in the Senate.●

By Mr. BYRD (for himself, Mr. RANDOLPH, Mr. DODD, Mr. NUNN, Mr. MATSUNAGA, Mr. CHILES, Mr. SARBANES, Mr. DURENBERGER, Mr. BENTSEN, and Mr. HOLLINGS.

S.J. Res. 160. Joint resolution to designate the week of October 17, 1983, through October 24, 1983, as "National Adult Continuing Education Week"; to the Committee on the Judiciary.

NATIONAL ADULT CONTINUING EDUCATION WEEK

Mr. BYRD. Mr. President, I rise today to introduce a joint resolution to designate the week of October 17 through October 24, 1983, as National Adult Continuing Education Week. The motto of National Adult Continuing Education Week is "Education for Tomorrow's Opportunities."

I am a strong supporter of adult continuing education. Education is a lifelong process. You might say that I am a product of adult continuing education. As a Member of the U.S. Congress, I returned to school to earn my law degree in order that I might better serve my State and this honorable institution.

With the decline of our smokestack industries, changing technologies, and the attention that has been directed toward the need to upgrade our math and science programs, it has become even more apparent that adult continuing education will play an even greater role in meeting the challenges of tomorrow.

There are currently 21 million adults enrolled in a continuing education program—displaced workers learning new skills, teachers going back to school to gain understanding of new technologies, and adults returning for a high school diploma. For some adults, it is a new beginning—for others just another step on the pathway to greater knowledge. I commend these Americans for their perseverance and their courage.

I introduce this resolution to call attention to the importance of adult continuing education, and I would urge my colleagues to join as cosponsors.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S.J. RES. 160

Whereas adult continuing education is increasingly important as a means of mastering the rapidly increasing body of knowledge, enriching life through informed appreciation, enlivening personal growth, and improving skills and work performance;

Whereas adult continuing education is important to all segments of society; and

Whereas adult continuing education associations give leadership to the development and implementation of continuing education: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 17, 1983 through October 24, 1983, is designated "National Adult Continuing Education Week" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate activities to recognize the advantages to be gained from continuing education at the adult level, and to acknowledge adult educators and adult students in private and public institutions in contributing daily to the economic, civic, and cultural advancements of the Nation.

ADDITIONAL COSPONSORS

S. 174

At the request of Mr. INOUYE, the name of the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 174, a bill to amend titles XVIII and XIX of the Social Security Act to provide that pediatric nurse practitioner services shall be covered under part B of medicare and shall be a required service under medicaid.

S. 177

S. 178

At the request of Mr. INOUYE, the name of the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 178, a bill to amend title 5 of the United States Code to provide payments under Government health plans for services of nurse-midwives not performed in connection with a physician.

S. 314

At the request of Mr. GOLDWATER, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 314, a bill to encourage in-flight emergency care aboard aircraft by requiring the placement of emergency equipment, supplies, and drugs aboard aircraft and by relieving appropriate persons of liability for the provision and use of such emergency equipment, supplies, and drugs.

S. 400

At the request of Mr. MATHIAS, the name of the Senator from Arkansas (Mr. BUMPERS) was added as a cosponsor of S. 400, a bill to designate the birthday of Martin Luther King, Jr., a legal public holiday.

S. 540

At the request of Mr. GOLDWATER, the name of the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 540, a bill to amend the Public Health Service Act to establish a National Institute of Arthritis and Musculoskeletal and Skin Diseases, and for other purposes.

S. 617

At the request of Mr. GOLDWATER, the name of the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of S. 617, a bill to promote the use of energy-conserving equipment

and biofuels by the Department of Defense, and for other purposes.

S. 657

At the request of Mr. DOLE, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 657, a bill to amend the Animal Welfare Act to insure the proper treatment of laboratory animals.

S. 719

At the request of Mr. THURMOND, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 719, a bill to amend subchapter II of chapter 73 of title 10, United States Code, to eliminate the social security offset against annuities provided for under such subchapter to the extent that the social security benefits of the annuitant are based on the annuitant's own employment.

S. 880

At the request of Mr. PRESSLER, the name of the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 880, a bill to amend the Communications Act of 1934 to provide equity to daytime radio broadcasters.

S. 980

At the request of Mr. WALLOP, the name of the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 980, a bill to amend the Federal Mine Safety and Health Amendments Act of 1977 to provide that the provisions of such act shall not apply to the surface mining of stone, clay, and sand work.

S. 1296

At the request of Mr. SPECTER, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 1296, a bill to amend the Tariff Schedules of the United States to provide for rates of duty on imported roses consistent with those maintained by the European Economic Community on imports of roses from the United States and other nations.

S. 1400

At the request of Mr. PERCY, the name of the Senator from Indiana (Mr. QUAYLE) was added as a cosponsor of S. 1400, a bill to enhance the detection of motor vehicle theft and to improve the prosecution of motor vehicle theft by requiring the Secretary of Transportation to issue standards relating to the identification of vehicle parts and components, by increasing criminal penalties applicable to trafficking in stolen vehicles and parts, by curtailing the exportation of stolen motor vehicles and off-highway mobile equipment, and by establishing penalties applicable to the dismantling of vehicles for the purpose of trafficking in stolen parts, and for other purposes.

S. 1550

At the request of Mr. CHAFEE, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 1550, a bill to amend the Internal Revenue Code of 1954 to relieve international double taxation of overseas construction projects of U.S. contractors.

S. 1680

At the request of Mr. GOLDWATER, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. GRASSLEY), the Senator from Montana (Mr. BAUCUS), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of S. 1680, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1716

At the request of Mr. GRASSLEY, the name of the Senator from Georgia (Mr. NUNN) was added as a cosponsor of S. 1716, a bill to clarify the personal injury and death provisions of section 844 of title 18, United States Code, relating to arson.

S. 1728

At the request of Mr. KENNEDY, the names of the Senator from Rhode Island (Mr. PELL), the Senator from Connecticut (Mr. WEICKER), and the Senator from Vermont (Mr. STAFFORD) were added as cosponsors of S. 1728, a bill to provide for the establishment of a National Task Force on Organ Procurement and Transplant Reimbursement.

S. 1762

At the request of Mr. THURMOND, the names of the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Georgia (Mr. NUNN) were added as cosponsors of S. 1762, a bill entitled the "Comprehensive Crime Control Act of 1983."

S. 1763

At the request of Mr. THURMOND, the names of the Senator from Louisiana (Mr. JOHNSTON), the Senator from Georgia (Mr. NUNN), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of S. 1763, a bill to reform procedures for collateral review of criminal judgments, and for other purposes.

S. 1764

At the request of Mr. THURMOND, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 1764, a bill to amend title 18 to limit the application of the exclusionary rule.

S. 1821

At the request of Mr. GARN, the name of the Senator from Wisconsin (Mr. PROXMIRE) was added as a cosponsor of S. 1821, a bill to amend the Securities Act of 1933 and the Securities Exchange Act of 1934 with respect to the treatment of mortgage-backed securities, to increase the authority of the Federal Home Loan Mortgage Corporation, and for other purposes.

S. 1822

At the request of Mr. GARN, the name of the Senator from Wisconsin (Mr. PROXMIRE) was added as a cosponsor of S. 1822, a bill to amend the Internal Revenue Code of 1954 to encourage investments in mortgage-backed securities through trusts for investments in mortgages, and for other purposes.

SENATE JOINT RESOLUTION 54

At the request of Mr. NICKLES, the name of the Senator from California (Mr. WILSON) was added as a cosponsor of Senate Joint Resolution 54, A joint Resolution to authorize and request the President to designate the month of January 1984 as "National Eye Health Care Month."

SENATE JOINT RESOLUTION 55

At the request of Mr. MATHIAS, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of Senate Joint Resolution 55, a joint resolution to recognize the pause for the Pledge of Allegiance as part of National Flag Day activities.

SENATE JOINT RESOLUTION 102

At the request of Mr. SPECTER, the names of the Senator from Utah (Mr. HATCH), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of Senate Joint Resolution 102, a joint resolution to designate the week of October 16, 1983 through October 22, 1983 as "Lupus Awareness Week."

SENATE JOINT RESOLUTION 112

At the request of Mr. INOUYE, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of Senate Joint Resolution 112, a joint resolution to proclaim the month of March 1984 as National Social Work Month.

SENATE JOINT RESOLUTION 128

At the request of Mr. MOYNIHAN, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of Senate Joint Resolution 128, a joint resolution to designate the day of October 22, 1983, as "Metropolitan Opera Day."

SENATE JOINT RESOLUTION 131

At the request of Mr. DOLE, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of Senate Joint Resolution 131, a joint resolution designating "National Cystic Fibrosis Week."

SENATE JOINT RESOLUTION 134

At the request of Mr. HUDDLESTON, the names of the Senator from Arizona (Mr. GOLDWATER), the Senator from Washington (Mr. GORTON), and the Senator from Maine (Mr. MITCHELL) were added as cosponsors of Senate Joint Resolution 134, a joint resolution to provide for the designation of the week of November 27 through December 3, 1983, as "National Entomology Week."

SENATE JOINT RESOLUTION 147

At the request of Mr. WEICKER, the names of the Senator from Minnesota (Mr. DURENBERGER), the Senator from California (Mr. CRANSTON), the Senator from North Dakota (Mr. BURDICK), the Senator from North Dakota (Mr. ANDREWS), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kansas (Mr. DOLE), the Senator from Iowa (Mr. GRASSLEY), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from New Jersey (Mr. BRADLEY), the Senator from Florida (Mr. CHILES), the Senator from Arkansas (Mr. BUMPERS), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Michigan (Mr. LEVIN), the Senator from Idaho (Mr. MCCLURE), the Senator from Arkansas (Mr. PRYOR), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Michigan (Mr. RIEGLE), the Senator from Montana (Mr. MELCHER), and the Senator from Delaware (Mr. ROTH), were added as cosponsors of Senate Joint Resolution 147, a joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Rehabilitation Facilities Week."

SENATE JOINT RESOLUTION 150

At the request of Mr. PACKWOOD, the names of the Senator from Mississippi (Mr. COCHRAN), the Senator from Virginia (Mr. WARNER), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of Senate Joint Resolution 150, a joint resolution to designate August 4, 1984, as "Coast Guard Day."

SENATE JOINT RESOLUTION 155

At the request of Mr. WILSON, the names of the Senator from Florida (Mrs. HAWKINS), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from New Jersey (Mr. BRADLEY), the Senator from Florida (Mr. CHILES), the Senator from Arizona (Mr. DECONCINI), the Senator from Kansas (Mr. DOLE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Kentucky (Mr. FORD), the Senator from Ohio (Mr. GLENN), the Senator from Pennsylvania (Mr. HEINZ), the Senator from South Carolina (Mr. HOLLINGS), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Hawaii (Mr. INOUYE), the Senator from Iowa (Mr. JEPSEN), the Senator from Nevada (Mr. LAXALT), the Senator from Vermont (Mr. LEAHY), the Senator from Michigan (Mr. LEVIN), the Senator from Montana (Mr. MELCHER), the Senator from Maine (Mr. MITCHELL), the Senator from Rhode Island (Mr. PELL), the Senator from Illinois (Mr. PERCY), the Senator from South Dakota (Mr. PRESSLER), the Senator from Arkansas (Mr. PRYOR), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Michigan (Mr. RIEGLE), the Senator from Maryland (Mr. SARBANES), the Senator from Tennessee (Mr. SASSER), the Senator from Mississippi (Mr. STENNIS), the Senator from Idaho (Mr. SYMMS), and the Senator from Virginia (Mr. WARNER) were added as cosponsors of Senate Joint Resolution 155, a joint resolution designating the week beginning November 6, 1983, as "National Disabled Veteran's Week."

SENATE RESOLUTION 127

At the request of Mr. ANDREWS, the name of the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of Senate Resolution 127, a resolution to make the Select Committee on Indian Affairs a permanent committee of the Senate.

SENATE RESOLUTION 139

At the request of Mr. ZORINSKY, the names of the Senator from Alabama (Mr. HEFLIN) and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of Senate Resolution 139, a resolution disapproving the recommendation of the Study Group on Senate Practices and Procedures to abolish the Senate Committee on Veterans' Affairs.

SENATE CONCURRENT RESOLUTION 66—RELATING TO THE SHOOTING DOWN OF KOREAN AIR LINES FLIGHT 007 BY THE SOVIET UNION

Mr. HEINZ submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 66

Whereas the Government of the Soviet Union deliberately violated longstanding international conventions adhered to by the community of nations which require peaceful means of engagement between aircraft over international and sovereign airspace;

Whereas sovereignty neither requires nor permits shooting down airliners in peacetime;

Whereas the Government of the Soviet Union made no attempt to determine, or if the Soviet Government did, callously ignored the fact, that Korean Air Lines Flight 007 was a clearly marked and equipped passenger airliner;

Whereas the Government of the Soviet Union launched a calculated attack on an unarmed and undefended civilian airliner, exhibiting a shocking disregard for human life and accepted international codes of conduct; and

Whereas such disregard led to the premeditated murder of 269 citizens of the world community: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that—

(1) the community of nations should condemn the Government of the Soviet Union for the violent and tragic death of 269 innocent civilians;

(2) the Government of the Soviet Union should—

(A) acknowledge its guilt and apologize to the community of nations for its barbaric act; and

(B) accept as its absolute moral responsibility the payment of compensation to the families of the victims of its unprovoked violence;

(3) the nations of the world should unite behind the proposal of the President to deny landing and refueling privileges to Soviet civilian airliners as punishment for the deliberate act of aggression by the Government of the Soviet Union against humanity; and

(4) the nations of the world should enforce the denial of such privileges until the Government of the Soviet Union has acknowledged its guilt for the death of 269 innocent civilians, has apologized to the world community for its actions, and has agreed to compensate the families of the victims of Soviet aggression.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President with the request that he further transmit such copy to the Government of the Soviet Union.

Mr. HEINZ. Mr. President, I rise today to submit a concurrent resolution condemning the Soviet Union for its barbaric and calculated attack against an unarmed and undefended Korean airliner which resulted in the death of 269 citizens of the world community.

I recognize that my distinguished colleagues Senators BAKER, PERCY, and other leaders of the Senate will also introduce a resolution concerning the Soviet Union. I will support their effort and thereby support the President of the United States who I believe has reacted to the Soviet act of aggression in a determined and prudent mannner. It is not my intention to place any distance between myself, the President, or the Senate's able leadership. The submission of this concurrent resolution is simply an expression of my personal indignation with the human tragedy which the Soviet Union has forced the world to endure.

The attention of the civilized world has been focused on the Soviet Union's calculated attack on Korean Air Lines Flight 007, resulting in the dealth of 269 innocent civilians of the world community.

By now the details of this barbaric attack are well known to my colleagues. The Soviet Union failed to recognize international conventions adhered to be by the community of nations which require peaceful means of engagement between aircraft over international and sovereign airspace. The Soviet Union wrongly concluded that the concept of sovereignty somehow grants a nation authority to shoot down commercial airliners in peacetime.

In spite of professing a desire for world peace the Soviet's barbaric act has left the whole world wondering whether the Soviet Union really wants peace or can ever be expected to faithfully implement and adhere to arms control agreements which enhance the prospects for world peace. If basic international codes of conduct are disregarded by the Soviet Union, why should the community of nations be-

lieve that the Soviets will act any more responsibly with regard to future arms control agreements? Is the Soviet attack on a civilian airliner a precursor for future acts of Soviet aggression against the world community? Will the brutal invasion of Afghanistan be repeated against another sovereign nation? Will the Soviet Union continue to take advantage of a fluid Middle East crisis by encouraging and actively supporting the force of violence and destruction in Lebanon?

While we can speculate about future Soviet behavior we do know that the Soviet Union exhibited a shocking disregard for human life and accepted international codes of conduct in attacking an unarmed and undefended civilian airliner. We know that the Soviets have failed to acknowledge their guilt for their premeditated attack and failed to acknowledge their moral responsibility to pay reparations to the families of victims of their barbaric act.

If we hope to moderate future Soviet behavior, we must isolate the Soviets from the community of civilized nations and take actions against them which can realistically be implemented.

That is why I am today submitting a concurrent resolution condemning the Soviet Union and expressing the sense of the Congress that the Government of the Soviet Union should—first acknowledge its guilt and apologize to the community of nations for its barbaric act and then accept as its absolute moral responsibility the payment of compensation to the families of the victims of its unprovoked violence.

Nothing less than an absolute acknowledgment of guilt should be acceptable to the community of nations. Nothing less than the payment of reparations to the families of victims of international aggression has long been the principle of international law guiding relations among nations in the international community.

The resolution further calls upon the nations of the world to unite behind President Reagan's proposal to deny landing and refueling privileges to Soviet civilian airliners as punishment for the deliberate act of aggression by the Soviet Union against humanity.

Finally the resolution states that the community of nations should enforce the denial of such privileges until the Soviet Union has acknowledged its guilt for the death of 269 innocent civilians, has apologized to the world community for its actions and has agreed to compensate the families of the victims of Soviet aggression.

Mr. President, let me make it clear that I fully support the actions initiated by President Reagan. He has been tough, yet he has measured his response carefully. Rather than overreact, he has correctly allowed our negotiators in to continue their quest for peace in Geneva at the intermediate nuclear force talks and at the strategic arms reduction talks. Rather than imposing trade sanctions which would in effect solely punish U.S. industry, he has sought to effectively isolate the Soviet Union from the community of civilized nations. The President has attempted to implement actions which can be realistically taken in concert with other nations in the world community. Those who have criticized the President have failed to understand the patience and pragmatism of his approach.

AMENDMENTS SUBMITTED

DESTRUCTION OF KOREAN AIRLINES FLIGHT 007

SYMMS (AND HELMS) AMENDMENT NOS. 2127 AND 2128

(Ordered to lie on the table.)

Mr. HELMS (for Mr. SYMMS, for himself and Mr. HELMS) submitted two amendments intended to be proposed by them to the joint resolution (S.J. Res. 158) condemning the brutal behavior of the Government of the Union of Soviet Socialist Republics for the destruction of Korean Airlines flight 007 with the loss of 269 innocent lives; as follows:

Strike all after the resolving clause and insert in lieu thereof the following: That the President be urged to take the following actions:

(1) Recall the United States Ambassador to Moscow for urgent consultations;

(2) Expel all Soviet diplomats, trade and other officials except the Deputy Chief of Mission and a skeleton staff;

(3) Conduct a full scale, urgent reassessment of the complete spectrum of United States-Soviet relations, including all arms control negotiations;

(4) Reveal publicly the extent of Soviet noncompliance with existing SALT and other arms control treaties;

(5) Demand the withdrawal of all Soviet military equipment and personnel from the Western Hemisphere;

(6) Demand that the Soviets come into conformity with Article 36 of the recently promulgated Law on the State Boundaries of the Soviet Union, and Point 7 of Annex 2 of the Convention on International Civil Aviation, both of which state that intercepting aircraft should refrain from the use of weapons in all cases of interception of civil aircraft;

(7) Demand that the Soviets make a public apology, pay reparations and punitive damages as a precondition to resuming full-scale diplomatic relations;

(8) Temporarily suspend all arms control negotiations with the Soviets until they withdraw their claimed right to shoot down United States military reconnaissance aircraft needed for National Technical Means of arms control verification;

(9) Bar all credits and loan guarantees for trade with the Union of Soviet Socialist Republics and its satellites; and

(10) Bar all further high technology exports to the Soviet Union.

AMENDMENT NO. 2128

Amend the preamble so as to read:

Whereas President Reagan stated on September 3, 1983: "What can we think of a (Soviet) regime that so broadly trumpets its vision of peace and global disarmament and yet so callously and quickly commits a terrorist act that sacrifices the lives of innocent human beings? What can be said about Soviet credibility when they so fragrantly lie about such a heinous act? What can be the scope of legitimate mutual discourse with a state whose values permit such atrocities?":

SEX DISCRIMINATION IN THE UNITED STATES CODE REFORM ACT

DOLE AMENDMENT NO. 2129

(Ordered to be referred to the Committee on the Judiciary.)

Mr. DOLE submitted an amendment intended to be proposed by him to the bill (S. 501) to amend the laws of the United States to eliminate gender-based distinctions; as follows:

SECTION 1. (a) On page 5, between lines 3 and 4, insert the following:

(b) Section 6915 of title 10, United States Code, is amended—

(1) by inserting "or she" after "he" wherever it appears; and

(2) by inserting "or her" after "his" wherever it appears.

(c) Section 6964(e) of title 10, United States Code, is amended by striking out "men" and inserting in lieu thereof "persons".

(b) On page 13, between lines 14 and 15, insert the following:

AMENDMENTS RELATING TO THE ARMED FORCES

SEC. 112. (a) Section 311(a) of title 10, United States Codes, is amended—

(1) by striking out "males" and inserting in lieu thereof "persons"; and

(2) by striking out "and of female citizens of the United States who are commissioned officers of the National Guard" and inserting in lieu thereof a period.

(b) Section 520 of title 10, United States Code, as amended by section 403 of the Department of Defense Authorization Act, 1983, is amended by striking out "male" each place it appears.

(c) Section 772(c) of title 10, United States Code, is amended—

(1) by inserting "or her" after "his" in the first sentence; and

(2) by striking out the second sentence.

(d) Section 1451 of title 10, United States Code, is amended—

(1) by adding "or widower" after "widow" each place it appears; and

(2) by striking out "mother's".

(e) The Act entitled "An Act to authorize the burial in national cemeteries of the remains of certain commissioned officers of the Public Health Service," approved April 30, 1956 (70 Stat. 124) is amended by striking out "wife, widow" wherever it appears and inserting in lieu thereof "spouse, surviving spouse".

(f) Section 551(a)(A) of title 37, United States Code, is amended by striking out

"wife" and inserting in lieu thereof "spouse".

(g) Section 300(1) of the Soldier's and Sailors' Civil Relief Act of 1940 (50 U.S.C. App. 530(1)) is amended by striking out "wife" and inserting in lieu thereof "spouse".

SEC. 2. (a) Beginning on page 13, line 15, strike out all through page 32, line 3, and insert in lieu thereof the following:

TITLE II—ELIMINATION OF GENDER-BASED DISTINCTIONS UNDER THE SOCIAL SECURITY ACT AND THE RAILROAD RETIREMENT ACT

SOCIAL SECURITY ACT PROVISIONS

SEC. 201. (a) Section 213(a) of the Social Security Act is amended by striking out "(if a woman) or age 65 (if a man)".

(b) Section 215(f)(5) of such Act is amended by striking out "a man" and inserting in lieu thereof "an individual".

(c) Section 402(a)(19)(G)(iv) of such Act is amended by striking out "mother" and inserting in lieu thereof "parent", and by striking out "she".

(d) Section 1107(b) of such Act is amended by striking out "former wife divorced" each place it appears and inserting in lieu thereof in each instance "divorced spouse".

(e) Section 211(a)(5)(A) of the Social Security Act and section 1402(a)(5)(A) of the Internal Revenue Code of 1954 are each amended by striking out "shall be treated as the gross income and deductions of the husband unless the wife exercises substantially all of the management and control of such trade or business, in which case all of such gross income and deductions shall be treated as the gross income and deductions of the wife" and inserting in lieu thereof "shall be assigned to each spouse, pro rata, in accordance with the relative contribution of each".

(f) The amendments made by this section shall apply on and after the date of the enactment of this Act, and in the case of monthly benefits under title II of the Social Security Act shall only apply to benefits payable for months beginning on or after such date of enactment.

(b) On page 32, line 5, strike out "211" and insert in lieu thereof "202".

(c) On page 39, line 17, strike out "212" and insert in lieu thereof "203".

SEC. 3. (a) On page 40, line 4, strike out "Sec. 301." and insert in lieu thereof "Sec. 301. (a)".

(b) On page 41, between lines 3 and 4, insert the following:

(b) Section 5561(3)(A) of title 5, United States Code, is amended by striking out "wife" and inserting in lieu thereof "spouse".

(c) Section 8332(j)(1) of title 5, United States Code, is amended by striking out "widow" each place it appears and inserting in lieu thereof "surviving spouse".

SEC. 4. (a) On page 46, line 14, strike out "Section 11 of the Act of February 8, 1887 (24 Stat. 391, chapter 119) is hereby repealed." and insert in lieu thereof the following:

(a) Section 3 of the Act of September 21, 1959 (73 Stat. 592; 25 U.S.C. 933(c)) is amended by striking out "wife" and inserting in lieu thereof "or her spouse".

(b) Section 3(c) of the Act of September 5, 1962 (76 Stat. 429; 25 U.S.C. 973(c)) is amended by striking out "wife" and inserting in lieu thereof "or her spouse".

SEC. 5. (a) On page 49, between lines 6 and 7, insert the following:

(f) Section 2421 of title 18, United States Code, is amended—

(1) by striking out "woman or girl" each place it appears and inserting in lieu thereof "person";

(2) by inserting "himself or" before "herself" each place it appears; and

(3) by inserting "him or" before "her" each place it appears.

(g) Section 2422 of title 18, United States Code, is amended—

(1) by striking out "woman or girl" each place it appears and inserting in lieu thereof "person"; and

(2) by adding "his or" before "her" each place it appears.

(h) Section 2423 of title 18, United States Code, is amended—

(1) by striking out "woman or girl" each place it appears and inserting in lieu thereof "person";

(2) by adding "his or" before "her" each place it appears; and

(3) by adding "he or" before "she" each place it appears.

SEC. 6. (a) On page 59, line 6, strike out "Sec. 330." and insert in lieu thereof "Sec. 330. (a)".

(b) On page 59, between lines 12 and 13, insert the following:

(b) Section 1981 of the Revised Statutes (17 Stat. 15; 42 U.S.C. 1986), is amended by striking out "widow" each place it appears and inserting in lieu thereof "surviving spouse".

(c) Section 1(7) of title 49, United States Code, is amended by striking out "the widows during widowhood" and inserting in lieu thereof "the suriving spouse".

(d) Section 4 of the Act entitled "An Act to clarify the status and benefits of commissioned officers of the National Oceanic and Atmospheric Administration, and for other purposes" (84 Stat. 1863, 33 U.S.C. 857-4) is amended—

(1) in subsection (a) by striking out "enlisted men" and inserting in lieu thereof "enlisted persons"; and

(2) in subsection (c) by striking out "their widows" and inserting in lieu thereof "the surviving spouses of such members".

(e) Section 222 of the National Housing Act (12 U.S.C. 1715m), is amended—

(1) by striking out "servicemen" each place such term appears and inserting in lieu thereof "servicepersons";

(2) by striking out "serviceman" each place such term appears and inserting in lieu thereof "serviceperson"; and

(3) in subsection (g) by—

(A) striking out "surviving widow" and inserting in lieu thereof "surviving spouse";

(B) striking out "serviceman's" each place such term appears and inserting in lieu thereof "serviceperson's"; and

(C) striking out "such widow" and inserting in lieu thereof "such surviving spouse".

(f) Section 2 of the Act of July 5, 1946, commonly known as the Trademark Act of 1946 (15 U.S.C. 1052), is amended in subsection (c) by—

(1) striking out "his widow" and inserting in lieu thereof "the surviving spouse of such President"; and

(2) striking out "the widow" and inserting in lieu thereof "such surviving spouse".

(g) Section 5572 of the Revised Statutes (48 U.S.C. 1413) is amended in the first sentence by striking out "his widow, heir, executor, or administrator" and inserting in lieu thereof "the surviving spouse, heir, executor, or administrator of the discoverer".

(h) Section 5574 of the Revised Statutes (48 U.S.C. 1415) is amended in the second sentence by striking out "his widow, heir, executor, administrator, or assigns" and inserting in lieu thereof "the surviving spouse, heir, executor, administrator, or assigns of the discoverer".

(i) Section 5577 of the Revised Statutes (48 U.S.C. 1418) is amended by striking out "his widow, heir, executor, administrator, or assigns" and inserting in lieu thereof "the surviving spouse, heir, executor, administrator, or assigns of the discoverer".

SEC. 7. (a) On page 68, after line 22, add the following:

(h) Section 424 of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 934) is amended—

(1) by striking out "widow" each place it appears in the first sentence and inserting in lieu thereof "surviving spouse"; and

(2) by striking out "widow" in the second sentence and inserting in lieu thereof "or her surviving spouse".

LONGSHOREMEN AND WORKERS COMPENSATION ACT

SEC. 333. (a) Section 9(b) of the Longshoremen's and Harbor Workers Compensation Act (33 U.S.C. 909(b)), is amended by striking out "dependent".

(b) Section 9(c) of the Longshoremen's and Harbor Workers Compensation Act (33 U.S.C. 909(c)), is amended by striking out "dependent husband" and inserting in lieu thereof "widower".

(c) Section 9(c) of the Longshoremen's and Harbor Workers Compensation Act (33 U.S.C. 909(g)), is amended by striking out "wife" each place it appears and inserting in lieu thereof "spouse".

(d) Section 14(j) of the Longshoremen's and Harbor Workers Compensation Act (33 U.S.C. 914(j)), is amended by—

(1) striking out "during which he is entitled" and inserting in lieu thereof "during which he or she is entitled"; and

(2) striking out "surviving wife" and inserting in lieu thereof "surviving spouse".

● Mr. DOLE. Mr. President, several months ago; with the strong, personal support of the President, I introduced S. 501, The Sex Discrimination in the U.S. Code Reform Act As introduced, this legislation would cleanse the Federal Code of about 100 anachronistic statutory provisions which still contain substantive sex bias. Identification of these remaining code provisions was made possible though the efforts of the President's Task Force on Legal Equity for Women, as reflected in the task force's June 28, 1982 report.

Since completing the June 28 report, the task force has conducted a more comprehensive computer search of the Federal Code and has identified over 60 additional statutes which still overtly discriminate on the basis of sex. Last Thursday, the President met with his Cabinet Council on Legal Policy and approved a recommendation that 47 of these provisions be corrected.

I have pledged my support for the President's proposals and have promised to work for their swift enactment. To this end, I am filing today an amendment to S. 501 which would correct the sex-bias contained in these 47 laws. S. 501, which has been cosponsored by 38 Members of the Senate,

will be marked up by the Constitution Subcommittee of the Senate Judiciary Committee this Friday. I have written the chairman of that subcommittee, Senator HATCH, and have asked him to offer these additional changes as an amendment to S. 501 before the bill is reported.

Mr. President, it is perhaps a sign of the significant progress we have made that the vast majority of the discriminatory statutes identified by the task force are either obsolete or of extremely limited application. Most have already been corrected by court decision or agency action; the only remaining task is to get them off the books. They are offensive anachronisms, reflecting long-discredited notions about women's inferior status which have no place in the laws of a society which today overwhelmingly embraces the principle of equal rights under the law.

As important and necessary as this legislation is, it is, of course, only one small step. Of far greater importance is the more difficult task of identifying and correcting those laws, which while neutral on their face, nevertheless may result in discrimination. High poverty rates among female heads of households and older women mean that laws which may result in economic discrimination against women should be a top priority. As chairman of the Senate Finance Committee, I have held hearings on the economic inequities which face women today and the extent to which aspects of our tax laws, child support enforcement programs, and retirement income policies may bear responsibility. I have also sponsored S. 19, the Retirement Equity Act which contains a number of reforms designed to make our private pension system more fair toward women. This bill has also received the support of the administration.

Mr. President, legislation such as S. 501 and S. 19 cannot serve as alternatives to the ERA, but their enactment can bring us closer to fulfilling the promise of equality for which the ERA stands. I hope that both will be expeditiously acted upon by the Senate.●

NOTICES OF HEARINGS

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I wish to announce that the Senate Committee on Agriculture, Nutrition, and Forestry will hold a hearing on private sector initiatives to feed the poor on Wednesday, September 14.

The hearing will begin at 10 a.m. in room SR-328-A.

Anyone wishing further information should contact the Agriculture Committee staff at 224-0013.

SUBCOMMITTEE ON ENERGY CONSERVATION AND SUPPLY

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Energy Conservation and Supply to consider S. 1366, to implement the recommendations of the interim report of the Northern Mariana Islands Commission on Federal Laws and to amend the revised Organic Act of the Virgin Islands and the Organic Act of Guam, and for other purposes; and S. 1367, to repeal certain provisions of law relating to the territories and insular possessions of the United States.

The hearing will be held on Thursday, October 6, beginning at 9:30 a.m. in room SD-366 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy Conservation and Supply, U.S. Senate, Washington, D.C. 20510.

For further information regarding the hearing you may wish to contact Mr Jim Beirne of the subcommittee staff at 224-2564.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, the Senate Committee on Governmental Affairs will hold a hearing on national security decision directive 84 on Tuesday, September 13, at 10 a.m. in room SD-342 of the Dirksen Senate Office Building. For further information, please contact Mr. Steve Metalitz at 224-4161.

Mr. President, the Senate Committee on Governmental Affairs will hold a hearing on S. 121, Trade Reorganization Act, on Wednesday, September 14, at 10 a.m. in room SD-342 of the Dirksen Senate Office Building. For further information, please contact Mr. Michael Mitchell at 224-4751.

Mr. President, the Senate Committee on Governmental Affairs will hold a continuation of hearings on trade reorganization on Thursday, September 15, at 10 a.m. in room SD-342 of the Dirksen Senate Office Building. For further information, please contact Mr. Michael Mitchell at 224-4751.

Mr. President, the Senate Committee on Governmental Affairs will hold a markup on S. 121, the Trade Reorganization Act of 1983, on Wednesday, September 21, at 10 a.m. in room SD-342 of the Dirksen Senate Office Building. For further information, please contact Mr. Michael Mitchell at 224-4751.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs will hold a hearing on Friday, September 16, 1983, on S. 1694, a bill to declare that the United States holds certain lands in trust for the Las Vegas Paiute Tribe.

The hearing will be held in SD-430 and will begin at 10 a.m. For further information, please contact Paul Alexander or Pete Taylor of the committee at 224-2251.

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES

Mr. PERCY. Mr. President, the Subcommittee on Energy, Nuclear Proliferation and Government Processes, of the Committee on Governmental Affairs, along with the Committee on Foreign Relations, will hold a hearing at 10 a.m. on Thursday, September 15, 1983, in room 419 of the Dirksen Senate Office Building. The committee and subcommittee will be receiving testimony on nuclear nonproliferation.

ADDITIONAL STATEMENTS

THE SOVIET DOWNING OF KOREAN AIR LINES FLIGHT 007

● Mr. BINGAMAN. Mr. President, I have asked unanimous consent that my name be added as an original cosponsor of Senate Joint Resolution 158.

Mr. President, I want to add my voice to those of my colleagues from both parties in condemning the callous and utterly inexcusable decision by the Soviet Union to "terminate," to use the Soviets' own chilling phraseology, Korean Air Lines flight 007 and, with it, the lives of 269 innocent men, women, and children.

It is difficult for civilized people to comprehend the casual disregard for human life and international norms that is reflected in such a brutal act. Whatever the possible navigational or other errors on the part of the KAL jet's crew, absolutely nothing can ever justify shooting down an unarmed commercial airliner. Those aboard flight 007 committed no offense against the Soviet Union or its citizens and did nothing to warrant their cold-blooded execution.

This tragedy was not an accident or a mistake by low-level Soviet military personnel. As we have seen in recent days, the Soviets have been adament in their refusal to apologize, or even to admit that there is anything out of the ordinary in murdering unsuspecting air travelers. The Soviet treatment of flight 007 was almost a carbon copy of their response to another inadvertent overflight of the U.S.S.R. by a Korean passenger plane in April 1978. On that occasion, only two lives were lost. This time, the dimensions of the disaster are far greater.

History shows us that the Soviets are perfectly capable of perpetrating even greater atrocities with an equal lack of concern for innocent lives and

for world public opinion. The fate of the KAL jumbo jet should serve as a stark illustration to all people around the globe of the warped value system espoused by the Soviet Union and its leaders.

President Reagan has been quite correct in pointing out that this has not been an offense directed exclusively or even primarily against the United States. It is not an issue of bilateral Soviet-American relations as such. Rather, it is an offense committed by the Soviet Union against the entire world community, against the most fundamental concepts of international commerce and civil aviation, and against the peoples and governments of those many nations whose citizens perished in the frigid waters off Sakhalin Island.

The President has responded to this affront against humanity in a serious and responsible way. I support the actions that he has taken so far, and I stand ready to work with the administration and with my colleagues on both sides of the aisle to consider other appropriate actions on the part of the United States. Our own efforts should be closely coordinated with those of our friends and allies, since the most effective answer to the Soviet outrage must be one which cuts across national borders and reflects the virtually unanimous international shock and condemnation.

As distasteful as it may be at times like this, we must also recognize that the Soviet Union is and will continue to be a major superpower and our most serious adversary. The Soviet Union will not disappear tomorrow morning, nor abandon its seeming contempt for civilized values. While our reaction to the brutal events of September 1 must be unmistakable in its clarity and its revulsion, we must not break off efforts to reduce the threat of nuclear holocaust. No matter how great our distaste and horror at the recent barbaric display of Soviet callousness, the ultimate threat of a nuclear confrontation dictates that we must maintain a dialog with the Soviets on issues of war and peace. Dialog does not mean approval of Soviet actions. It does mean that the fate of our children and grandchildren is of overriding importance.

Nothing we do can bring back those who died aboard KAL flight 007. But nothing Foreign Minister Gromyko or Marshal Ogarkov can do will disguise the brutality and paranoia which have been revealed to the world once again as the guiding principles of Soviet policy.●

S. 499—INDUSTRIAL DEVELOPMENT BONDS

● Mr. D'AMATO. Mr. President, I recently received a letter from Mr. Robert Dormer, president of the New York State Job Development Authority (JDA). Mr. Dormer wrote to illustrate a point I have emphasized previously on the Senate floor; the absolute importance of industrial development bonds (IDB) financing to the continued success of the Small Business Administration's section 503 certified development company program.

Mr. Dormer described 11 section 503 projects initiated in New York State since January 1 of this year. These projects, all of which utilized IDB financing, have created nearly 500 new jobs. For example, an SBA loan of $500,000, combined with a $440,000 IDB issue resulted in the creation of 121 private sector jobs in the manufacture of specialty optical products in Melville, N.Y. In another instance, an SBA loan of only $76,000, combined with an IDB of the same amount, permitted SAS Industries of Riverhead to acquire land and construct a building to manufacture rubber gaskets and seals, resulting in 25 new jobs.

Without the availability of IDB financing, these projects would not have been financed and 500 jobs would have been lost. These projects are typical of the impact of the 503 program, coupled with IDB financing, on local development. IDB's represent an extremely efficient use of a Federal tax exemption for job creation and retention that would not otherwise occur.

The success of the 503 program in New York was possible only because the job development authority was able to coordinate existing New York JDA programs and the 503 program with the use of small issue IDB's. My bill, S. 499, currently before the Senate Finance Committee, will insure that IDB's will continue to be available for use in conjunction with the 503 program beyond the current September 30, 1983, sunset date.

At a time of high unemployment, it is imperative that every possible opportunity to stimulate job creation be utilized. The continued use of IDB's in conjunction with the 503 program is a most effective means of achieving the administration's stated goal, the improvement of private sector opportunities through capital formation.

Mr. President, we must act—and act quickly—to pass S. 499.●

QUEENS COUNTY CELEBRATES 300TH ANNIVERSARY

● Mr. D'AMATO. Mr. President, this year, Queens County, N.Y., takes pride in observing the 300th anniversary of its founding. The occasion truly stands out as a milestone in the history of this vital component of New York City. I join with the residents of Queens in celebrating their tricentennial by offering a special salute to this dynamic, metropolitan county which has proven, over the years, to be a valuable asset to New York State and the Nation.

The colorful history of Queens County predates its official founding by several years. The area was first explored by Europeans in 1614 and soon began to attract settlers. Although the territory was originally governed by the Dutch, English colonists were permitted to settle there, and with the surrender of Peter Stuyvesant to the Duke of York, the colonists once again found themselves under English rule. On November 1, 1683, the towns of Newtown, Flushing, and Jamaica joined with Far Rockaway, then part of Hempstead, to form Queens County.

Throughout the 18th and 19th centuries, the population and activity level of Queens increased steadily. The inlets and bays surrounding Queens early on made the area a perfect site for waterborne commerce. Nineteenth century advances in shipping and locomotive technology further enhanced Queens' position as a center of commerce and industry. This trend toward development continued and today Queens is recognized as one of the most industrially active counties in the United States.

Aviation, the county's largest industry, has made Queens the "aviation capital of the world." Kennedy and LaGuardia Airports together accommodate more than 30 million passengers a year and employ approximately 50,000 workers who earn over $1 billion annually.

Queens County's international reputation extends beyond that of gateway to New York and the United States. Flushing-Meadow Park twice played host to the World's Fair, the first time in 1939-40 and again in 1964-65. Today the gleaming Unisphere—a giant, silvery globe—serves as a visual reminder of the county's important place in international history. Queens is also proud to have been the headquarters of the United Nations from 1946 to 1950. The historic vote to create the State of Israel occurred during the U.N.'s tenure in Queens.

Leisure time activities abound in Queens for those who desire a respite from the county's active lifestyle. Several miles of beaches and 6,500 acres of parkland satisfy even the most avid lover of the outdoors. Sports enthusiasts flock to Shea Stadium year round to cheer on their favorite professional football and baseball teams. In 1978, the U.S. Open Tennis Championships moved from the historic West Side Tennis Club in Forest Hills, Queens to the brandnew U.S. Tennis Association's National Tennis Center at Flushing-Meadow Park. This modern tennis facility is also available for use by the general public.

Today, the residents of Queens are enormously proud of the county's re-

markable achievements over the past 300 years. I am honored, therefore, to offer my sincere congratulations and best wishes to the people of Queens as they observe their tricentennial anniversary. I am confident that Queens County will continue to grow and prosper in the years to come.●

TWENTIETH ANNIVERSARY OF THE FOUNDING OF WEIGHT WATCHERS

● Mr. D'AMATO. Mr. President, this year marks the 20th anniversary of the founding of Weight Watchers, the weight control organization that has helped to improve the eating habits of millions throughout the world. The anniversary is a hallmark for those concerned with public health, nutrition, and weight control.

Since the 1960's, when America began to demonstrate increasing concern with the unhealthful effects of being overweight, weight reduction programs, fad diets, and miracle weight loss plans have flooded the market. This has created a situation that made it increasingly more difficult for consumers to make rational choices concerning sensible eating patterns.

But, while thousands of panaceas have come and gone, the Weight Watchers program has withstood the test of time. Weight Watchers stands preeminent as the largest and most successful weight control organization in the world.

Its success is due to the unique and scientifically designed program it offers. Weight Watchers teaches members the skills necessary to make proper and nutritious eating a matter of habit for a lifetime. The Weight Watchers program consists of a weight loss and weight maintenance food plan, coupled with a behavior management program which provides day-by-day steps to help the overweight change their eating habits and their attitudes toward food.

Within the framework of the weekly Weight Watchers class sessions, members receive continuous positive peer group support. They are helped to gain insight into their individual behavior patterns and to learn new eating management techniques.

By helping to create a greater public awareness of the importance of sound nutrition and the maintenance of healthful weight levels, Weight Watchers has established itself as the unquestioned leader in the fields of weight control and nutrition as they relate to good health. By bringing its message to every part of our Nation, and to all parts of the globe during the past 20 years, Weight Watchers has demonstrated its unswerving commitment to our common goal of a healthier, happier world.●

SUMMARY OF AMENDMENTS TO TEMPORARY EMERGENCY FOOD ASSISTANCE ACT OF 1983

● Mr. DOLE. Mr. President, just before Congress adjourned for the August recess, the Senate and House passed H.R. 3409, which included a 2-year extension of the Temporary Emergency Food Assistance Act. Since the current commodity distribution program expires at the end of September, I was pleased that the Congress was able to act so expeditiously in insuring program continuity. Within the course of an afternoon, the administration came out in support of this legislation, as did the chairman of the Committee on Agriculture. There were also last-minute negotiations with House Members to try to work out differences, so that there would be no necessity to go to conference.

All in all, I think the major concerns of everybody who was involved in this process were resolved, and we now have a very satisfactory commodity distribution program in place for the next 2 fiscal years. This authorizing legislation provides more detailed guidelines for the program enacted under the jobs bill last March.

At this time, I would like to insert a summary of the provisions in the RECORD, as part of the legislative history. The Senator from Kansas thanks all those who supported him in this effort—33 bipartisan cosponsors, as well as the administration.

The summary follows:

SUMMARY OF THE AMENDMENTS TO THE TEMPORARY EMERGENCY FOOD ASSISTANCE ACT OF 1983

On August 4, 1983, the Senate adopted H.R. 3409, which contains provisions to amend the Federal Supplemental Compensation Act. During Senate Consideration, an amendment was adopted that added new provisions to the bill to expand and extend the Temporary Emergency Food Assistance Act of 1983 due to expire September 30, 1983. H.R. 3409, as so amended, subsequently was passed by the House of Representatives and signed into law by the President as Public law 98-92.

Public Law 98-92 clarifies the provisions of the 1983 Act and provides the Department of Agriculture with guidelines for administering the commodity distribution program under the Act.

Specifically, Public Law 98-92 amends the Act, effective October 1, 1983, to—

(1) define the term "eligible recipient agencies", as used in the Act, to mean public and nonprofit organizations (designated by a State or the Secretary of Agriculture and approved by the Secretary for participation in the program) that administer (a) activities and projects that provide emergency food assistance to needy persons, including low-income and unemployed persons, (b) school lunch programs, summer camps for children, and other child nutrition programs providing food service, (c) nutrition projects for the elderly, (d) activities and projects supported under section 4 of the Agriculture and Consumer Protection Act of 1973, (e) activities of charitable institutions, to to extent that needy persons are served, or (f) disaster relief programs;

(2) provide an additional condition that must be met before commodities held by the Commodity Credit Corporation can be made available for the commodity distribution program under the Act, to wit: the Secretary must determine that the commodities involved are in excess of quantities needed to carry out the farm price and income stabilization purposes of the Agricultural Adjustment Act of 1938, the Agricultural Act of 1949, and the Commodity Credit Corporation Charter Act;

(3) permit the Secretary to use stocks of wheat from the Food Security Wheat Reserve for the program (under existing law, the Secretary is required to use Reserve stocks of wheat in certain circumstances), and require that wheat used from the Reserve be replenished not later than December 31, 1985;

(4) allow the Secretary to use funds of the Commodity Credit Corporation to pay costs of initial processing and packaging of commodities to be distributed under the program into forms, and in quantities, suitable (as determined by the Secretary) for use in individual households or for institutional use;

(5) allow the Secretary to pay for initial processing and packaging with Corporation-owned commodities equal in value to the cost of the processing and packaging, except that wheat from the Food Security Wheat Reserve cannot be used for such purpose;

(6) require the Secretary, as expeditiously as possible, to provide the commodities made available under the program in quantities that can be used without waste to designated State agencies for subsequent distribution to eligible recipient agencies, except that the Secretary will be permitted to make commodities available directly to eligible recipient agencies and private companies that process the commodities for eligible recipient agencies;

(7) require State agencies, as expeditiously as possible, to distribute commodities received from the Secretary to eligible recipient agencies in the quantities requested by those agencies, except that, if a State agency is unable to satisfy all requests for a particular commodity, the State agency will be required to give priority in the distribution of the commodity to eligible recipient agencies providing nutrition assistance to relieve situations of emergency and distress through the provision of food to the needy, including low-income and unemployed persons;

(8) require each State agency receiving commodities for individual household use to distribute the commodities to eligible recipient agencies in the State that serve needy persons, and require each State agency, with the approval of the Secretary, to determine those persons in the State that will qualify as needy persons eligible for the commodities;

(9) require the Secretary to take precautions to ensure that (a) eligible recipient agencies will provide the commodities received under the Act to persons served by the agencies and will not diminish their normal food purchases because of the donations and (b) commodity donations under the Act will not displace commercial sales of the commodities or their products;

(10) prohibit the Secretary from making commodities available for donation under the Act in any quantity or manner that the Secretary determines might substitute for the same or any other agricultural produce that would otherwise be purchased in the market;

(11) provide that commodities provided under the Act must be distributed only in quantities that can be consumed without waste and that no eligible recipient agency can receive commodities in excess of anticipated use, based on inventory records and controls, or in excess of its ability to accept and store such commodities;

(12) authorize the appropriation of $50,000,000 for each of the 1984 and 1985 fiscal years for the Secretary to make available to the States for storage and distribution costs; and provide that not less than 20 percent of the amount appropriated in each fiscal year must be made available for providing advance payments to cover the actual costs incurred by certain agencies that provide nutrition assistance to relieve situations of emergency and distress through the provision of food to the needy, including low-income and unemployed persons, except that in no case can the payments exceed 5 percent of the value of commodities distributed by an agency;

(13) prohibit the sale or other disposition in commercial channel in any form of the commodities distributed under the Act, except those commodities provided for initial processing;

(14) require the Secretary, in administering the Act, to minimize, to the maximum extent practicable, the regulatory, recordkeeping, and paperwork requirements imposed on eligible recipient agencies;

(15) require the Secretary to estimate and publish, not later than October 1, 1983, and October 1, 1984, the types and quantities of commodities that are likely to be made available under the Act during fiscal years 1984 and 1985, respectively, even though the actual types and quantities of commodities made available might differ from the estimates;

(16) provide that determinations made by the Secretary and the facts constituting the basis for any donation of commodities under the Act, or the amount thereof, when officially determined in conformity with the applicable regulations prescribed by the Secretary, are final and conclusive and not reviewable by any other officer or agency of the Government; and

(17) provide that, except for section 207 of the Act (penalties), the Act shall terminate September 30, 1985.●

THE CLINCH RIVER FINANCING PLAN: MAKING A BAD THING WORSE

● Mr. HUMPHREY. Mr. President, on July 29, 1983, I entered a detailed critique of the proposed alternative financing plan for the Clinch River breeder reactor prepared by my staff. This analysis, entered on page S 11185, gives a detailed explanation of just how the plan is fated to go wrong.

What most people do not understand, though, is that even if the plan works as well as its proponents optimistically expect, the Government still stands to lose control over the project and at least $150 million.

In way of brief explanation, my staff has prepared a brief on the plan and what it will cost the taxpayer even in the best of all possible worlds. Mr. President, it is essential that the Senate understand that the alternative financing plan for Clinch River is no cost-sharing plan and requires the full consideration of the appropriate authorizing committees before it is brought to the Senate floor. To aid such hearings, I ask that the full text of my staff's brief be entered into the RECORD.

The brief follows:

THE CLINCH RIVER FINANCING PLAN: MAKING A BAD THING WORSE

Last December after funding for the Clinch River Breeder Reactor Project was defeated in the House and passed in the Senate by only one vote, Congress instructed the Department of Energy (DOE) to "vigorously explore proposals, including a reconsideration of the original cost-sharing arrangement, that would reduce federal budget requirements." In response, DOE asked the utilities' breeder organization—the Breeder Reactor Corporation (BRC) to devise a plan. The BRC suggestions bore no resemblence to the original cost-sharing plan (this plan, devised in 1973, required the utilities and nuclear vendors to pay for 40 percent of the project's projected cost of $700 million in exchange for free access to what would be an entirely government-owned facility). Instead, the BRC devised not a cost-sharing or reduction plan, but an alternative financing scheme. Instead of having Congress pay for the project's remaining cost ($2.5 billion, according to DOE estimates) through additional annual appropriations, the BRC recommending spreading the funding of approximately $1 billion of the project's remaining costs over 36 years.

THE PLAN

This would be accomplished in a four-part package. First, the federal government would borrow approximately $1.04 billion from private lenders promising to repay these loans through the sale of government-guaranteed bonds beginning in 1990. Here, the plan's authors admit that such borrowing would cost more than continuing to have Congress pay for all of the project through annual appropriations.

Second, the government would surrender title to the reactor and any right to revenues the plant might produce to a new joint venture (consisting of the utilities, nuclear vendors, and the federal government). This new venture would attempt to use the plant's revenues to repay the approximately $1.04 billion in government-guaranteed bonds that would begin to be sold in 1990. The plan's authors emphasize that whatever revenue shortfall there might be due to unanticipated operation and maintenance costs, fuel costs, poor reactor performance or low demand for the electricity the reactor might produce would be picked up by the federal government through additional Congressional appropriations.

Third, $150 million in equity shares in the reactor would be sold. These shares, according to the plan's authors, would be sold on the basis of the tax benefits associated with the equity shares and the bond sales, which would equal or exceed the value of the equity shares themselves.

Fourth, the utilities would complete their original 1973 pledge to contribute $257 plus interest. $150 million has already been contributed. $175 million is the estimated balance due.

This $175 million, plus the $150 million in equity shares, plus the amount borrowed from private lenders during construction that would defray the project's cost—$675 million (1.04 billion minus an estimated interest charge on the loan of $365 million) equals $1 billion. The balance needed to complete the project (by DOE's latest estimates), $1.5 billion, would come directly from Congress through a one-time obligation vote at the time the overall alternative financing plan was enacted.

PROBLEMS

If passed, this plan would please those anxious to continue federal support of the project. What short-term political relief this might buy them, however, would come at a very stiff price to the public. Indeed, even if the plan worked as well as its proponents hope:

1. It would increase the cost of completing the project at least $150 million. As the plan's authors admit, "Private borrowing is always more costly than full Government financing (through Congressional appropriations). . ." This makes double sense with Clinch River since the uncertainty associated with the project naturally forces a risk premium (some interest rate higher than straightforward Treasury issues) to be added to its financing. Here it is instructive to note that it is difficult to secure short-term industrial loans for anything less than 11 percent from private lenders but the government can borrow from the U.S. Treasury on short notice for as little as 8.4 percent. Also, if government-guaranteed Clinch bonds (to be sold beginning in 1990) carry a risk premium of only one percentage point above bona fide Treasury bonds (and they must carry some such risk premium otherwise they would not be issued separately from Treasury bonds), this would add nearly $100 million to the project's financing costs compared to what it would cost Congress simply to appropriate money for the project as it has in the past.

2. The U.S. Congress would lose its current annual appropriations oversight of the project—this through the one-time obligation vote of $1.5 billion to the project.

3. The federal government would have to surrender its rights to all the revenues the plant might produce and would have to relinquish its right to sell the plant and hold the proceeds.

4. The federal government's financial responsibility for operation cost overruns would be drastically extended. Currently, the government must operate the plant, if constructed, for only five years. Under the new plan, though, the government must redeem project stock and bond holders with project electricity sale revenues for a full 30 years. Thus, where the government now could close the plant after 5 years if the plant appeared to be losing money, under the new plan there would be tremendous inertia to keep it running even though it was running in the red.

5. Congress would have established a bad precedent creating a costly off-budget enterprise simply to avoid public disapproval of funding the project outright. Congress is now attempting to curb government lease-back arrangements and off-budget project financing. Passage of this plan, which would establish an energy development corporation with an open-ended mandate to assume the federally guaranteed financing of any unpopular energy effort, would clearly cut against honest budgeting efforts.

These negatives, of course, would only arise if the plan works as well as its proponents optimistically assume. Many things, though, could go wrong. The plutonium fuel, for example, may have to be bought from the defense program (still the only

certain source) instead of the much cheaper unidentified sources DOE continues to assume in its estimates. The plant's cost could continue to increase and the plant's completion date slip as they have for the past decade. Also, the plant's reliability may turn out to be less than required and the high demand assumed for the plant's power in the electricity saturated Southeast may not materialize.

If any of these things occur, as the General Accounting Office, the Congressional Research Service, RAND, and the Tennessee Valley Authority have predicted, there will be trouble. Indeed, last December the General Accounting Office concluded that over the plant's 30-year life these events were quite likely and could easily result in the project's operation costing nearly $3 billion more than the plant would ever make from electricity sales.

Such facts should give Congress pause. The project is dubious enough as is; the plan only compounds the costs and risks.●

SOCIAL SECURITY BENEFITS FOR THE TERMINALLY ILL

● Mr. JEPSEN. Mr. President, I am pleased to join as a cosponsor of S. 1785, legislation which would eliminate the 5-month waiting period for social security disability benefits for individuals diagnosed as terminally ill. I would also like to commend Senators SASSER and DURENBERGER for introducing S. 1785.

This legislation would enable disabled individuals who have been diagnosed as terminally ill, those who are not expected to live longer than 12 months, to receive social security disability benefits immediately upon approval of their claim. Under current law, disabled individuals must wait 5 months before receiving disability benefits.

This 5-month waiting period causes many hardships for the terminally ill. Faced with a loss of income and mounting medical expenses, disabled, terminally ill individuals are in desperate need of financial assistance. It is heartbreaking for them to find out that they cannot collect social security disability benefits immediately, but have to wait 5 months. Sadder yet, many of them never collect the benefits to which they are entitled. On the average, a person who is terminally ill and disabled will live for only 2½ months after that diagnosis.

I urge my colleagues in the Senate to give prompt and favorable consideration to this matter.●

THE KOREAN AIR LINES MASSACRE

● Mr. D'AMATO. Mr. President, I support Senate Joint Resolution 158, which addresses the gravest, most frightening event of the decade: The wanton massacre of 269 human beings by the Communist Government of the Soviet Union during the night of August 31–September 1, 1983. This criminal action, perpetrated deliberately by Soviet Air Force fighter jets against an innocent, unarmed commercial Korean Air Lines passenger aircraft, will join in infamy the atrocities of our century committed by others who have demonstrated total and brutal disregard for the value of human life.

The night of August 31, 1983, is a date the world will remember. On that date all rules of civilized human conduct were shattered, all hope that the Soviets could abide by international law was lost, and all fears that true evil could exist at the core of a modern state were confirmed. The ignominy of the deed is exceeded only by the callous and blatant lies of the U.S.S.R. immediately following the barbarous act and is compounded by the feeble attempts of the Soviets to cast blame on the United States.

It is incomprehensible to me how human beings could have performed such a cruel act against fellow human beings. It is sickening to me to hear the futile protestations of Russian diplomats blaming the United States for their own perfidy.

Mr. President, this terrible act by the Soviet Union has provided to the world a new definition of moral perversion and pseudo-diplomatic duplicity. With a unique disregard for its proven culpability, the U.S.S.R. loudly proclaimed its innocence—and the guilt of most Western powers—for nearly a week. Only 5 days following the malicious downing of the innocent airliner did they finally confess their crime. But even this grudging admission was qualified by absurd references to the responsibility of others and to unrelated activities 1,000 miles from the scene of their treacherous deed. And the reason, Mr. President? The rationale behind such a heinous act? The sole explanation for the slaughter of 269 innocent civilians, Mr. President, is that they were trespassing in Soviet airspace.

The incontrovertable facts have been made public, Mr. President. They have been presented to a shocked Security Council of the United Nations. They have been detailed in the media of all countries outside the Soviet Union and its satellites. At the United Nations, a body which in the past has appeared to be more comfortable villifying the United States, nearly all the members of the Security Council sat in stunned silence while the American Ambassador, Jeanne J. Kirkpatrick, presented the irrefutable evidence: The recorded voices of the Russian pilots while tracking, identifying, and then destroying the civilian aircraft. "The target is destroyed," the Russian fighter pilot calmly reported after firing two missiles at the unarmed plane, sending 269 civilians to a horrible death. Confronted with this incontrovertable evidence, the Soviet representative's response was predictable: By some convoluted rationale he blamed the United States.

Mr. President, the calumny of this act by the Soviet Union is appalling and the subsequent attempts by the Russians to distort and obfuscate the facts surrounding the crime have served to sicken the world. The Soviets have had the audacity to proclaim that the Korean airliner was deliberately off course and that this was the result of direction by the United States. The Soviets have also claimed that in some obscure manner the United States was using this passenger aircraft for intelligence purposes. Such allegations are absurd in the extreme. The Soviets knew at the time by visual inspection of the distinctive shape of the aircraft that it was a commercial passenger Boeing 747. They knew that the altitude of the aircraft was a routine commercial flight altitude. They knew that the aircraft was on a course parallel to established international routes, traveling in a straight line, action to be expected of a commercial international aircraft. They knew, despite their lies to the contrary, that the aircraft displayed both navigational and strobe lights, unique to commercial airliners. For the Russians to claim that they thought the aircraft was anything other than an innocent, unarmed, commercial passenger aircraft is absolutely ludicrous.

What the Russians have found out over the past 10 days, Mr. President, is that there were 269 souls aboard the ill-fated flight. There were Korean, Chinese, Japanese, Canadian, British, Australian, and American civilians on the aircraft, including a Member of the U.S. House of Representatives. In total, citizens of 13 countries were on board KAL flight 007. There were men, women, children, and infants on the flight. But they unwittingly trespassed, they were hunted, and they were, as the Soviet pilot reported, "destroyed." Two hundred sixty-nine human beings, Mr. President. Their lives were snuffed out because the aircraft on which they were traveling inadvertantly crossed into a land of paranoia, a land of lies, a land of brutality. The world has learned again that the Soviets are indeed capable of descending to the unfathomable depths of abominable behavior.

We have also learned much about the Soviets as a result of this dastardly action, Mr. President. We have learned that the Soviet Foreign Minister considers his country's borders "sacred"—obviously more sacred than human lives. We have learned that the Soviets, when confronted by the specific and damning evidence of their guilt, are capable of fanciful prevarication which, one must assume, even they do not believe. Mr. President, we have learned that the Soviets are ca-

pable of taking the most criminal, wanton act and compounding it by attempts to show that they are not responsible for the act.

Throughout these past days, since the night of August 31, the U.S. Government has reacted with remarkable restraint. Rather than responding to this violence with more violence, we and our allies have effected strong, but measured actions designed to express our horror at this act and to elicit appropriate response from the Soviets. President Reagan, in his address to the Nation and the world on September 5, presented indisputable proof of the Soviet guilt and announced the intentions of the United States. Our representatives to the United Nations presented to that body's Security Council the voices and the transcripts of the Russian pilots as they deliberately shot down the unarmed passenger jet. And our Secretary of State met with the Soviet Foreign Minister head on, for the specific purpose of demanding full inquiry and publication of the facts of the terrible event.

But the actions proposed and taken thus far have been necessarily limited in their scope. The United States is but one of 13 directly injured nations and but one of scores of offended nations. We cannot act unilaterally. We cannot effectively curtail the transfer of high technology to the Soviets if our allies continue in a business-as-usual manner.

There are, however, some actions which we can take: I have already initiated a drive to raise funds for the families of the American citizens who were executed by the Soviet missile. This fund—the Soviet Massacre Victims Assistance Fund—will provide immediate financial support for those families who have sustained a sudden, terrible loss as a result of this brutal attack.

As a member of the Commission on Security and Cooperation in Europe, popularly known as the Helsinki Commission, I have called for a special meeting of the U.S. commission members to investigate and bring to light all pertinent facts regarding this gross violation of human rights by the Soviets. I believe that this bipartisan congressional group can do much to insure that the details of the horrible event are fully exposed, and can identify measures which we can take to prevent its recurrence. Also, as a member of the Banking Committee I have initiated serious study of measures which would place stringent controls and limitations on Soviet and other Warsaw Pact nations' credit dealings with the West. At present, those countries owe Western governments and private banks roughly $86.4 billion for loans of all sorts. Direct U.S. Government control of the debts to the United States, coupled with prohibitions on further loans and comparable actions by our allies, could give us a potent weapon with wide flexibility in dealing with the Soviet Union.

Those actions which we have taken, and those which have been taken by other countries of the world, were met first with total denials, and now with fantastic allegations of United States involvement in the Soviet crime. It is only fortunate, Mr. President, that the world is not as stupid as the Soviets appear to think we are. The crude lies and improbable explanations offered by the Soviets have been rejected by the world as transparent fabrications. Their insulting rhetoric, in which the United States is condemned as responsible for a Soviet barbaric attack, has been almost universally dismissed—even by many countries virtually controlled by the Soviet Union. One need only observe the unnatural, nearly total silence on the part of those who are usually the apologists for the Soviet Union, both in this country and abroad, to realize how abysmally their efforts to shift the blame have failed. And their paranoia-tinged rationalization for shooting down an unarmed commercial aircraft has evoked horrified reaction world-wide.

Mr. President, at this point I would like to enter into the RECORD an editorial which appeared in the September 2, 1983, editions of the New York Post. Entitled "Murder in the Skies: a Lesson in Outrage," it succinctly summarizes the initial reaction to the civilized world on hearing of this terrible event.

The resolution before us today, Mr. President, expresses our horror and concern to the world in the wake of this tragic crime. We must speak out, we must join the other world powers, in the total and absolute condemnation of this terrible massacre by the Soviet Union. To do any less would be a dereliction of our duty, and an ignominous comment on this horrible, deliberate act of barbarism.

The editorial follows:

[From the New York Post, Sept. 2, 1983]

MURDER IN THE SKIES: A LESSON IN OUTRAGE

The barbaric, inhuman and totally inexcusable Soviet action in shooting down the Korean Air Lines jumbo jet with a loss of 269 people puts a clear perspective on how we should see our relations with the Soviet Union.

The interception was calculated and the decision to fire on the airline was nothing less than an act of international mass murder in the skies.

It is no excuse that the Russians are paranoid about air space near their military bases. They are paranoid about their entire territory and paranoid, too, even about the territory of countries they have seized.

The Korean plane may well have strayed off course. So what?

So do many aircraft. So do Soviet planes operating out of Cuban bases along our Eastern Seaboard. They are not shot down. They are escorted away—as are Cuban airliners which violate U.S. airspace over New York on flights to Canada.

This was no accident. This was a deliberate act committed after ample opportunity was available for consultation with the highest Soviet authorities.

The northern Pacific route into and out of Korea and Japan is highly traveled. Pan Am, Japan Air Lines, Northwest Orient and many other carriers besides Korean Air Lines fly it daily.

Nor could there have been any possibility that the eight Soviet jet fighters which followed the KAL plane could have mistaken it for a hostile aircraft. They were on to it for two and a half hours. Plenty of time to have established that it was not an "enemy" bomber.

The Soviet SU-15 which finally shot it down had it within visual observation. Indeed, the Soviet pilot identified it as a 747 passenger airliner in his radio communications with his base when he asked for authority to fire.

There are extensive internally agreed procedures for identifying foreign aircraft which intrude air defense zones. The intercepting aircraft is required to fly up to a position in front of the foreign plane and rock its wings. In addition, it flashes its navigation and landing lights at irregular intervals—meaning, "You have been intercepted, follow me."

Apparently, none of the procedures were followed.

The Russians compound the inhumanity of their action by their response to the tragedy.

A brazen statement by Tass, the official news agency, proclaims that the "unidentified plane" did not have navigation lights, did not respond to queries and did not respond to signals and warnings.

Not a word of regret. Not the slightest attempt to explain the shooting or mitigate the horror. Indeed, the Soviet statement does not even concede that the Soviet fighter shot the plane down.

Instead, we are left to accept the unstated warning that Soviet territory is inviolate, that all who approach uninvited do so at the risk of their lives. Shoot first is the Soviet philosophy and we should remember it.

From all sides come expressions of outrage and protest. There is a surfeit of proposed counter measures.

What use is a renewed U.S. grain embargo if our allies are ready, as they were over the Soviet invasion of Afghanistan, to make up the cancelled orders? What use is a trade ban if our allies are ready, as they were following the Soviet-imposed suppression of freedom in Poland, to look the other way.

Even the U.S. decision to summon the Security Council and denounce the Soviet action before what is increasingly less possible to regard as the decent opinion of mankind will achieve little. The Soviet Union will vote whatever resolution is brought out of the eventual sordid compromise.

We are not impotent. The Soviet action is a timely confirmation of all that many have long known and too many have been ready or ignore or set aside.

In the Soviet Union of Yuri Andropov, no less than of Brezhnev or of Khruschev and Stalin before them, nothing has changed. They still build walls around themselves—in the sky as much as through Berlin. They still blow up people without warning—in the open skies as much as they do when the innocent seek to cross their territory.

The Soviets do not respect international law. At a time when there are intense pressures to lower our defenses, renew cultural and scientific agreements and enter a binding arms control agreement, we should remember yesterday—and act accordingly.●

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, the minority leader, I believe, will be here shortly, but let me make preparations for the session tomorrow. To begin with, I think it is not likely now that we can complete our work on the compromise version of the Radio Marti bill in time to complete action on it this evening. I am fairly sure we will be able to do that tomorrow, and I hope we will be able to do it promptly.

Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business of not more than 10 minutes in length in which Senators may speak for not more than 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. BAKER. Mr. President, after the expiration of the time for the transaction of routine morning business on tomorrow, the Radio Marti bill will recur as the unfinished business. As I indicated earlier, I hope and expect that that measure can be worked out and taken to final passage soon after we return to the consideration of that measure.

Mr. President, it is entirely possible that the Senate will be asked to recess at some point during the morning for a special briefing. I will not take up that matter until tomorrow. However, Senators have been notified by the hotlines, I believe, in both cloakrooms that there will be a briefing by the Secretary of State in S. 407 tomorrow beginning at 10:30 a.m., and that briefing will be for Members only with no staff.

ORDER FOR RECESS FROM NOON TO 2 P.M. TOMORROW

Mr. BAKER. Mr. President, tomorrow is Tuesday. The Members on both sides of the aisle have the usual weekly requirement for a caucus on that day between the hours of 12 noon and 2 p.m. I ask unanimous consent that the Senate stand in recess tomorrow between the hours of 12 noon and 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE TOMORROW

Mr. BAKER. Mr. President, let me reiterate that I hope we can finish the Radio Marti bill in very short order tomorrow, because it would be the hope of the leadership that we can reach the Department of Defense authorization conference report tomorrow afternoon at 2 p.m. when the Senate resumes its session after the recess for the two-party caucuses. That is a privileged matter, and I understand there are no items in disagreement to accompany the conference report.

It is hoped that we can dispose of the conference report in fairly short order, but in any event Senators should be on notice that the leadership on this side presently intends to ask the Senate to turn to the construction of the DOD authorization conference report when we resume the session after the recess from noon to 2 p.m.

DEATH OF REPRESENTATIVE LAWRENCE P. McDONALD OF GEORGIA

Mr. BYRD. Mr. President, on behalf of Mr. BAKER, Mr. NUNN, Mr. MATTINGLY, and myself, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The legislative clerk read as follows:

Senate Resolution 212, relative to the death of the Honorable Lawrence P. McDonald of Georgia.

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Honorable Lawrence P. McDonald, late a Representative from the State of Georgia.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate recesses today, it recess as a further mark of respect to the memory of the deceased.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 212) was unanimously agreed to.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no further business to transact today. I inquire of the minority leader if he has any other matter he wishes to address to the Senate.

SENATOR INOUYE NAMED AS ADVISER TO NATIONAL BIPARTISAN COMMISSION ON CENTRAL AMERICA

Mr. BYRD. Mr. President, it will be my intention to write to the President of the United States today to indicate to him my selection of the distinguished senior Senator from Hawaii, Mr. DANIEL INOUYE, to fill the vacancy left by the death of the late Senator HENRY M. JACKSON on the advisory group to the National Bipartisan Commission on Central America. I will supply the majority leader as well as Mr. INOUYE with a copy of that letter.

I make this announcement for the RECORD.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I see no other Senator seeking recognition.

I move, in accordance with the previous order, and pursuant to the provisions of Senate Resolution 209 and Senate Resolution 212, as a further mark of respect to the memory of the deceased HENRY M. JACKSON, late a Senator from the State of Washington, and the deceased LAWRENCE P. McDONALD, late a Representative from the State of Georgia, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and at 5:22 p.m. the Senate recessed until tomorrow, Tuesday, September 13, 1983, at 10 a.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate, August 15, 1983, under authority of the order of the Senate of August 4, 1983:

DEPARTMENT OF TRANSPORTATION

Matthew V. Scocozza, of Tennessee, to be an Assistant Secretary of Transportation, vice Judith T. Connor, resigned.

IN THE NAVY

The following-named officer, under the provisions of title 10, United States Code, section 5150, to be Chief of Naval Research for a term of 3 years

To be chief of naval research

Rear Adm. John B. Mooney, Jr., xxx-xx-xx... xxx-.../1120, U.S. Navy.

IN THE AIR FORCE

The following-named officers for permanent promotion in the U.S. Air Force, under the appropriate provisions of chapter 36, title 10, United States Code, as amended, with dates of rank to be determined by the Secretary of the Air Force.

LINE OF THE AIR FORCE

To be major

Ackerman, Peter G.
Acosta, Gilbert
Adair, John W.
Adam, David J.
Adamcin, Peter L.
Adams, Carl L.
Adams, David J., Jr.
Adams, Hardy B., Jr.
Adams, Paul F.
Adams, Peter D.
Adams, Ross D.
Adaschik, Anthony J.
Addison, Thomas A., Jr.
Adell, James M.
Adkins, Howard E.
Adkins, Kenneth G.
Adkins, Michael R.
Admas, William H.
Agatep, Donald A.
Ahern, Robert P.
Ahlbach, James F., Jr.
Aho, Larry R.
Akers, Roy P. H.
Albert, Gary L.
Albi, Lynn J.
Aldrich, Arthur G., Jr.
Alexander, James R.
Alexander, Robert A.
Alexander, Robert C., Jr.
Alf, Donald L.
Alford, John W.
Alla, Francis V., Jr.
Allard, Terrence J.
Allen, Clayton T.
Allen, George M.
Allen, Richard K.
Alley, James A.
Allman, Stephen B.
Almond, John W., Jr.
Alonge, Sam J., Jr.
Alosi, James C., III
Alter, John W., Jr.
Alvarez, David C.
Amberg, Richard H., Jr.
Amundson, Frank B.
Anathan, Robert P.
Andersen, Stanley G.
Anderson, Charles S.
Anderson, Ernest J., Jr.
Anderson, Eugene C.
Anderson, Gary G.
Anderson, Gary L.
Anderson, George E.
Anderson, Howard B.
Anderson, Jerold F.
Anderson, Lawrence R.
Anderson, Richard B.
Anderson, Rodney C.
Anderson, Ross K., Jr.
Anderson, Terrance E.
Anderson, Walter C.
Anderson, Walter E., Jr.
Anderson, William A.
Andrews, John B.
Angerhofer, Gary E.
Anglada, Jose B. R.
Annin, Timothy E.
Anson, Bert III
Anthony, James R.
Anzalone, Thomas A.
Appicelli, Robert A.
Apter, Marc T.,
Aquilina, Fred A.
Arant, Daniel R.
Archer, Douglas W.
Archey, Warren E.
Ardell, Eric B.
Argo, John T., Jr.
Armstrong, Ronald J.
Armstrong, William C.
Arndt William D.
Arnold, Henry S.
Arnold Lance M.
Arthur, Kenneth A.
Arundale, Samuel H.
Arwood, George A.
Ashworth, David B.
Asrael, Aaron R.
Atcheson, Raymond W.
Atkinson, Oliver T., Jr.
Atkinson, Thomas C., Jr.
Auerbach, Jerome M.
Austin, Wayne R., Jr.
Avella, Joseph R.
Avera, William E.
Avery, Thomas G.
Azzi, Paul A.

Babby, Lloyd W.
Babine Arthur L., III
Bachmeyer, Gervase R.
Backus, William E. Jr.
Bacus, William R.
Badolato, Peter T.
Baer, Thomas S.
Bagshaw, Charles R.
Baier, Robert E.
Bailey, Carlyle K.
Bailey, Douglas L.
Bailey, Gerald M.
Bain, Jerry W.
Baird, Donald R.
Baird, James G., Jr.
Baker, Larry O.
Baker, Richard A.
Baker, William H.
Bakewell, Richard B.
Baldwin, Dan W., Jr.
Ball, Joseph E.
Ballance, Robert G., Jr.
Balon, Michael J.
Banda, Lionell A. W.
Bankered, John P.
Banks, Richard A.
Banner, Glen E.
Banta, John M.
Banvard, James H.
Baraldi, William J.
Baravik, Andrew W.
Barford, George
Baringer, John R.
Barker, Edward E.
Barlow, David A.
Barners, Richard C.
Barnes, Samuel E.
Barnett, Richard, T.
Barrera, Alfredo B.
Barrett, Edward L. Jr.
Barringer, Raymond E.
Barrow, Edward M., Jr.
Barry, Andrew M.
Bartolini, Bruce F.
Barton, Jon H.
Bartrum, David E.
Baskerville, James J.
Bastien, Gilbert J.
Batchellor, John K., Jr.
Bates, Donald C.
Bates, Ollie B., III
Batte, Charles D.
Bauer, Kenneth H.
Bauer, Russell C.
Baumer, Edward K.
Baumgardner, Hugh W.
Baumgardner, Walter L.
Bayley, John L.
Beacham, Richard F.
Beal, James A.
Beall, John J., Jr.
Beam, Bruce A.
Beaudry, Frederick, H.
Beavers, Ashley J.
Beck, Robert, L.
Becker, Charles J., Jr.
Becker, Richard L.
Becknel, Gerald P.
Bedford, John L.
Beeby, Gered H.
Beeler, Carroll R.
Beene, Joe F.
Beguin, Steven G.
Behnke, Richard W.
Belanger, Roland J.
Bell, Edmond V.
Bell, James D.
Bell, Lyndon R.
Bellows, Arthur N., III
Bemis, Richard S.
Benator, Barry I.
Bencze, Daniel P.
Bender, Frank J.
Bender, Robert G.
Benn, James J., III
Benner, Francis J.
Benner, William B.
Bennett, Bobby E.
Bennett, Denis F.
Bennett, Leroy E.
Bennett, William C.
Bennion, Paul A.
Benoit, George E., Jr.
Benson, David E.
Benson, Jeffrey L.
Benson, Jerome E.
Benson, Lawrence P.
Benson, Michael J.
Benton, William C., III

Aycock, Ezra K.
Bailey, Cass H.
Barner, Hendrick B.
Basiliere, James L.
Bass, George L., Jr.
Bell, Donald D.
Benson, Daniel R.
Benson, Harry C.
Beyer, Charles K.
Black, Paul L.
Blair, Richard J.
Bleicher, Sheldon J.
Blood, Joseph B., Jr.
Blough, Herbert
Boies, Lawrence R., Jr.
Borgman, Theodore J., Jr.
Boyd, Gerald E.
Brandt, Eugene M.
Brennan, Thomas V.
Byorth, John P.
Cabell, Benjamin B.
Campbell, Doyle E.
Carlson, Richard E.
Carpenter, Howard F., Jr.
Carr, John H.
Casey, John M.
Cavenar, Jesse O., Jr.
Cerda, James J.
Chambers, William N.
Chapman, James H.
Charles, Clive R.
Chatowsky, Anthony P.
Chism, Ronald G.
Christensen, Gerald R.
Christensen, Harvey E.
Chun, Clyde W.
Cole, Joe C.
Colgan, Diane L.
Crawford, Alvin H.
Crutchfield, James J.
Davies, Raymond O., Jr.
Deraps, Gordon D.
Dieckmann, Merwin R.
Dodge, Herbert S.
Downing, John E.
Duhamel, Robert R.
Dukes, William E.
Duren, Craddock P.
Ebbels, Bruce J.
Eckberg, Theodore J.
Ende, Norman
Evans, Earl F., Jr.
Everly, Robert C.
Fargason, Crayton A.
Faust, Robert B.
Fernando, Oscar V.
Fowler, Donald R.
Fowler, Glenn W.
France, Thomas D
Frary, Lynn R.
Freeman, William T.
Fulton, Lyman A.
Fulwyler, Robert L.
Garrett, Henry F. M.
Geeslin, James M., Jr.
Giuntoli, Robert L.
Gleason, Terrence H.
Goldbeck, Larry C.
Gondring, William H., III
Gordon, Dennis H.
Greene, Charles A.
Greer, Mack V.
Greer, William E.
Grimes, James A.
Grumbling, Hudson V., Jr.
Hagan, Donald J.
Hagele, Herbert C., Jr.
Hamilton, William R.
Hammer, Richard W.
Harder, David F.
Harris, Clarence M., III
Hendrix, James Z.
Hoffman, John W.
Holmstrom, Robert D.
Howery, Stephen E.
Hudson, Charles J.
Hughes, Luman H., Jr.
Hunter, Thomas W.
Huurman, Walter W., Jr.
Jackson, William B.
Janssen, Erwin T.
Jochimsen, Peter R.
Jones, George R.
Jordan, Robert E.
Kardinal, Carl G.
Kaye, Paul T.
Keeler, Clifford E.
Kelly, Thaddeus E.
Kerstein, Morris D.
Kesler, Kelvin F.
Kessler, David B.
Kindschi, George W.
Kirchner, Peter T.
Klenk, Eugene L.
Klibanoff, Edward
Kuehn, John L.
Kurtis, James T.
Lee, Charles D., Jr.
Lehwalder, Laurus W.
Leonard, John P.
Leslie, Loren H.
Leverett, Cary L.
Lewis, Robert B.
Libnoch, Joseph A.
Love, James T., Jr.
Lowsma, Henry B.
Ludwig, Karl D.
Magenheimer, Richard J.
Marlowe, Frank I.
Marnell, Daniel J.
Marshall, Charles E.
Martin, William A.
Masar, Maurice F. P.
Mathers, James M.
Mattern, Allan L.
McClain, Garvin H.
McDonald, Bruce M.
McDonald, Kenneth M.
Meador, James C., Jr.
Melton, Russell W.
Meyer, Russell
Miercort, Roger D.
Miner, James M.
Miranda, Mario Ces
Mitts, Murray G.
Mohamed, Tallat H.
Monell, William C.
Moore, Laurie W., Jr.
Mork, Gustave W.
Nail, Richard L.
Nelson, Norman D.
Nuss, Robert C.
O'Neill, Edward J.

Osius, Theodore G., Jr.
Ostroski, Joseph T.
Ozawa, Kenneth H.
Panlilio, Lugardo G.
Pare, Norman G.
Parisi, Frank
Patriquin, David A.
Pettengill, Howard W., Jr.
Pilapil, Virgilio D.
Pitlyk, Paul J.
Price, Albert C.
Proskey, Aloysius J.
Pyeatte, Jesse E.
Rankin, Robert A. M.
Rasco, Jerry L.
Real, Jack D.
Redding, Marshall S.
Reed, Ralph E.
Reeves, Charles S.
Richmond, Thomas F.
Rigor, Benjamin, M., Jr.
Riordan, Robert H.
Rivers, Leslie D.
Roberts, James G.
Rodgers, Stephan J.
Rosene, Philip G.
Sadick, Stanford P.
Sawyer, Norman M.
Scaring, William A.
Schafer, Theodore E.
Scheidt, Kenneth A.
Schibly, William J.
Schmid, William H.
Scott, Ralph H.
Sedlack, Richard E.
Skelly, John P.
Sleszynski, Raymond A.
Sokolowski, Joseph W., Jr.
Stewart, Edgar B.
Strauss, Michael B.
Sullivan, Timothy J.
Sweeney, Eugene W.
Tachovsky, Thomas
Tenney, Richard L.
Thomas, Jerry L.
Titus, Bruce M.
Tolmie, John D.
Tompkins, Albert E.
Tucker, Samuel H.
Turaids, Talvaris
Upchurch, William
Vavrin, Charles R.
Vertuno, Leonard L.
Vondoepp, Christian E.
Wachtel, Thomas L.
Wallin, John D.
Wanger, William H.
Weinshelbaum, Albert
Wellish, Carl S.
West, Alex R.
Widmann, Donald E.
Wieting, William
Williams, Ackerman C., Jr.
Wolfsen, James L.
Worsham, Bertrand R.
Yadon, Lowell G.
Zelko, James J.

SUPPLY CORPS

Acquistapace, Tuli
Allan, Ronald C.
Anderson, Rolph E.
Andris, Paul J.
Battelle, Richard L.
Bender, John H.

Bernhardt, Paul A.
Bernstein, Robert S.
Birnbaum, Leonard G.
Bolton, Thomas W.
Bonnell, Lawrence D.
Bowne, Charles J., Jr.
Brown, Thomas G.
Burstares, James S.
Campbell, Carroll J.
Carrington, John P.
Chakeres, James G.
Chastain, Joseph H.
Collins, Francis A.
Costa, Dominic P.
Crain, Richard H.
Deckert, Warren P.
Denny, Jay R.
Donohue, Patrick T.
Donovan, James Lawrence
Duncan, Dean L.
Edel, Thomas R.
Eickhoff, Roger C.

Onan, Thomas M.
Palmer, John D.
Palmer, William J.
Pinsker, Clive D.
Pizzano, William C.
Pyron, Edwin B.
Rice, Robert Creighton, Jr.
Rocque, Paul F.
Russell, Sanford H.
Schldwachter, Stephen J.
Serafini, Attilio, Jr.
Shaw, Harold M., Jr.
Sheill, Gordon W.
Six, Thomas J.
Sklar, Fred H.
Slifer, Charles A., Jr.
Soine, Jon C.
Sturms, Herschel T., Jr.
Taylor, Norman H.
Thompson, Terry C.
Trujillo, Lionel G.
Wendle, Dean R.
Wilmoth, James P., III
Wood, Oliver G., Jr.

CHAPLAIN CORPS

Adams, Edgar G.
Allen, Donald R, Jr.
Beers, Donald W.
Bollesen, Melius E.
Butenshon, Donald E.
Cook, Bobby W.
Crosland, William A., Jr.
Donovan, Herbert A., Jr.
Duke, Harvey L.
Edwards, Ted E.
Fisher, Clifford S.
Furlow, Charles M., III
Glaser, William C.
Gordon, Kenneth R.
Hampton, William R.
Hansen, Roger K.
Harrel, Francis L.
Hill, James D.
Hunt, John R.
Hutton, James B.
Jones, Robert E.
Klapperich, Owen B.
Krajewski, Walter M.
McNeely, Richard I.
McVeigh, John J.
Osborn, Roy C., Jr.
Panko, Stephen M.
Peloquin, Anthony R.
Reynolds, David D.
Rosenberger, Beryl G.
Salmon, Edward P.
Shuart, Esler L.
Sorrill, Harold W., Jr.
Stone, Daniel G.
Stough, Richard H.
Thompson, Alfred C.
Tyer, Charles L.
Volz, Walter D.
Wilson, Stanley R.
Witcher, Robert C.

CIVIL ENGINEER CORPS

Araneo, Peter J., Jr.
Barclay, Robert A.
Billsone, Donald L.
Block, Neil
Bradley, Clyde E.
Braun, Richard W.
Brewster, William L.
Bruen, Walter P., Jr.
Caswell, Richard F.
Cawley, Martin L.
Collins, Robert W.
Davis, John M.
Denny, Thomas P.
Derr, Frederick M.
Field, Richard H.
Flack, Frederick P.
Gaal, Philip L.
Gallaugher, James R.
Gannon, Francis X.
Gibson, William R.
Harris, John R.
Hathaway, Paul L., Jr.
Heine, William A., III
Helton, Ronald L.

Eng, Wellington R. L.
Ferry, Edward I.
Finagin, Willian B.
Geller, Jacob
Gironlami, John J., Jr.
Grage, Walter A.
Hall, Lawrence B.
Hallman, Robert R.
Hallprin, Arthur E.
Hardison, Samuel H.
Harrison, William S.
Hart, Charles B.
Hearon, Donald L.
Heget, Harry S., Jr.
Henry, Richard W.
Herman, Harry A., Jr.
Hohlt, William F.
Hooley, James P.
Hoover, William G.
Huffstutler, Bibb
Karaginis, Michael G.
Kasenchak, Peter
Kear, Harold J.
Ketner, Bruce A.
Kimpel, William A.
Laczynski, Stanley J.
Lanier, Thurman W.
Larsen, John S.
Last, Ronald F.
Leblanc, Patrick H.
Leonard, Lloyd F.
Levine, Lowell J.
Luckam, Thomas G.
Lund, Warner E., Jr.
Marsalek, Daniel E.
Martin, Carlton, S.
Martin, Donald W.
Martin, Paul W., Jr.
McAnear, Jon T.
McCallum, Walter E.
Miller, Frank R.
Mitchem, John C.
Moritz, Robert F., Jr.
Nickelsen, Dale C.
Niebuhr, Robert M.
Nowak, Arthur, J.
Omalley, George C.
Perroni, Joseph R.
Pezzopane, Bernard
Pickett, Charles E.
Proteau, Thomas J.
Raper, Pal S., Jr.
Reeves, George W.
Reynolds, Donald R.
Roberts, J. K.
Rollins, Laurence R.
Russell, David T.
Scholl, Jerome T.
Schubert, Frederick W. J.
Sherard, Harold T.
Shirley, Robert L.
Stende, Gregory W.
Triftshauser, Roger W.
Vanummersen, Frank, III
Vitale, Joseph S.
Vogeley, John C.
Williams, Terry C.
Wilson, Noel C., Jr.
Wingard, Charles E.
Yeargin, James C.

MEDICAL SERVICE CORPS

Basdekian, Edward A.
Boyle, Robert E.
Fisher, Benjamin
Grier, Charles P.
Harris, Jesse G., Jr.
Horrigan, David J., Jr.
Knisley, Ralph F.
Landers, Judson W., Jr.
Lindberg, David S.
McCarthy, Thomas
Powers, Kendall G.
Reich, Melvin
Strem, Bruce E.

NURSE CORPS

Barlow, Phyllis L.
Brown, Virginia M.
Kelly, Wanda J.
McColl, Evelyn Y.
Purdy, Claire H.
Young, Victoria E.

Col. Billy M. Thomas, [redacted], U.S. Army.
Col. Myrna H. Williamson, [redacted], U.S. Army.

HOUSE OF REPRESENTATIVES—*Monday, September 12, 1983*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Almighty God, we come together today in confident remembrance of Your promise of hope and the assurance of Your presence in our lives, and yet we recall with sadness the death of a Member of this assembly. We grieve at the tragic death of LARRY MCDONALD and we express our prayers for members of his family. May Your spirit of strength and purpose permeate our hearts and minds, and may Your mighty acts of history give us renewed faith in the days before us. Keep us in Your grace, O God, that justice will roll down as waters and righteousness like an everflowing stream. We pray this in Your name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
September 12, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a copy of the abstracts and results of the votes cast in the Special Election, First Congressional District, State of Illinois, held on August 23, 1983, as certified by the Canvassing Board for the City of Chicago.

The apparent winner was the Honorable Charles A. Hayes, receiving 93.7 percent of the votes cast.

With kind regards, I am
Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

SWEARING IN OF THE HONORABLE CHARLES A. HAYES OF ILLINOIS AS A MEMBER OF THE HOUSE

The SPEAKER. Will the dean of the Illinois delegation and the Illinois delegation kindly escort the newly elected Member to the well?

Mr. HAYES appeared at the bar of the House and took the oath of office.

The SPEAKER. The gentleman is a Member of the Congress, and we congratulate him.

Without objection, the Chair's administration of the oath of office to the gentleman from Illinois, Mr. Charles A. Hayes, is ratified. His certificate of election has not arrived, but there is no contest, and no question has been raised with regard to his election.

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
September 12, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: The Governor of Georgia has proclaimed a vacancy in the Seventh Congressional District of Georgia due to the death of the Honorable Larry McDonald.

Herewith transmitted is a copy of the Executive Order issued by the Governor, the Honorable Joe Frank Harris, on September 8, 1983.

With kind regards, I am,
Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

THE STATE OF GEORGIA—EXECUTIVE ORDER

By the Governor:

Whereas, a vacancy now exists in the House of Representatives of the Congress of the United States by reason of the tragic death of the Honorable Larry McDonald, the member of the House of Representatives of the Congress of the United States from the Seventh Congressional District; and

Whereas, Article I, Section II, Paragraph IV of the Constitution of the United States provides that if the Governor shall issue writs of election to fill all vacancies that may happen in the representation from any State in the Congress of United States; and

Whereas, Section 21-2-543 of the Official Code of Georgia Annotated provides that a special election to fill vacancies for members of the House of Representatives of the Congress of the United States shall take place under the authority of a writ of election issued by the Governor to the election superintendents involved for such election to fill such vacancy; and

Whereas, said Code Section further provides that said special election shall be held on a date in the writ of election issued by the Governor, which date shall not be less than thirty days after its issuance.

Now, therefore, pursuant to the authority vested in me, particularly by virtue of the provisions of Article I, Section II, Paragraph IV of the Constitution of the United States, and particularly by virtue of the provisions of Section 21-2-543 of the the Official Code of Georgia Annotated, it is hereby

Ordered: (1) That a Writ of Election to fill the vacancy in the House of Representatives of the Congress of the United States from the Seventh Congressional District be and the same is hereby issued to the election superintendents of Bartow, Catoosa, Chattooga, Cobb, Dade, Floyd and Walker Counties, pursuant to the provisions of the Constitution of the United States and laws of Georgia, and particularly Article I, Section II, Paragraph IV thereof, and Section 21-2-543 of the Official Code of Georgia Annotated.

(2) That said special election to fill the vacancy in the House of Representatives of the Congress of the United States from the Seventh Congressional District shall be held on the 18th day of October, 1983, pursuant to the Constitution of the United States and laws of the State of Georgia and particularly the provisions of the Official Code of Georgia Annotated governing the conduct of special elections.

This 8th day of September, 1983

JOE FRANK HARRIS,
Governor.

CONFERENCE REPORT ON S. 675, DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1984

Mr. PRICE submitted the following conference report and statement on the Senate bill (S. 675) to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 98-352)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 675) to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for civilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security programs for such fiscal year, and for

other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

SHORT TITLE; TABLE OF CONTENTS

SECTION 1. (a) This Act may be cited as the "Department of Defense Authorization Act, 1984".

(b) The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.

TITLE I—PROCUREMENT

Sec. 101. Authorization of appropriations, Army.
Sec. 102. Authorization of appropriations, Navy and Marine Corps.
Sec. 103. Authorization of appropriations, Air Force.
Sec. 104. Authorization of appropriations, Defense agencies.
Sec. 105. Extension of authority provided Secretary of Defense in connection with the NATO Airborne Warning and Control System (AWACS) program.
Sec. 106. Secure communications equipment and a special classified program.
Sec. 107. Limitation on Army procurement.
Sec. 108. Limitations on Navy procurement.
Sec. 109. Authorization of multiyear contracts for the B-1B aircraft; prohibition on multiyear contracts for certain equipment.
Sec. 110. Limitations and requirements with respect to the procurement and deployment of the MX missile.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Sec. 201. Authorization of appropriations.
Sec. 202. Limitations on funds for the Army.
Sec. 203. Limitations on funds for the Navy.
Sec. 204. Limitations on funds for the Air Force.
Sec. 205. Limitations on funds for the Defense agencies.
Sec. 206. Limitation on size of small mobile missile.
Sec. 207. Report on the Joint Tactical Missile System and the Joint Surveillance and Target Attack System; restriction on use of funds.
Sec. 208. Antiballistic missile defense system research.

TITLE III—OPERATION AND MAINTENANCE

Sec. 301. Authorization of appropriations.
Sec. 302. General authorization of appropriations for pay raises, fuel costs, and inflation adjustments.
Sec. 303. Prohibition of use of vessels with foreign-built major components under certain leases or service contracts.
Sec. 304. Authorization of appropriations for assistance for 1984 games of the XXIII Olympiad.
Sec. 305. Shelter for the homeless at military installations.

TITLE IV—ACTIVE FORCES

Sec. 401. Authorization of end strengths.
Sec. 402. Quality control on enlistments into the Army for fiscal year 1984.
Sec. 403. Extension of authority for the temporary promotions of certain Navy lieutenants.
Sec. 404. Limit on funds for permanent change of station (PCS) travel during fiscal year 1984.

TITLE V—RESERVE FORCES

Sec. 501. Authorization of average strengths for Selected Reserve.
Sec. 502. Authorization of end strengths for Reserves on active duty in support of the Reserves.
Sec. 503. Increase in number of certain personnel authorized to be on active duty in support of the reserve components.
Sec. 504. Clarification of status of certain members of the National Guard serving in a full-time status.

TITLE VI—CIVILIAN PERSONNEL

Sec. 601. Authorization of end strength.
Sec. 602. Civilian personnel ceilings on industrially funded activities during fiscal year 1983.

TITLE VII—MILITARY TRAINING STUDENT LOADS

Sec. 701. Authorization of training student loads.
Sec. 702. Extension of reduction in number of students required to be in a unit of the Junior Reserve Officers' Training Corps.

TITLE VIII—CIVIL DEFENSE

Sec. 801. Authorization of appropriations.
Sec. 802. Amount authorized for contributions for State personnel and administrative expenses.

TITLE IX—MILITARY COMPENSATION AND HEALTH-CARE MATTERS

PART A—PAY AND ALLOWANCES

Sec. 901. Pay increase of 4 percent for members of the uniformed services.
Sec. 902. Adjustment in basic pay of certain officers with prior enlisted and warrant officer service.
Sec. 903. Hazardous duty pay for certain toxic fuel handlers.
Sec. 904. Extension of special pay for certain aviation career officers.
Sec. 905. Hostile fire pay for members serving in areas threatening imminent danger.
Sec. 906. Freeze of variable housing allowance at fiscal year 1983 rates.
Sec. 907. Variable housing allowance for Reserves on active duty for a period of 140 days or more.
Sec. 908. Clarification of rules for payment of per diem.
Sec. 909. Clarification of allowance for transportation of motor vehicle.
Sec. 910. Transportation for dependent children attending school in the United States when the member-parent is stationed overseas.
Sec. 911. Clarification of eligibility for separation pay.
Sec. 912. Reimbursements for accommodations in place of quarters.
Sec. 913. Advance payment of travel and transportation allowances for escorts and attendants of dependents.

PART B—RETIRED PAY MATTERS

Sec. 921. Limitation on applicability of one year look-back provision.
Sec. 922. Rounding of retired pay and survivor annuities to next lower whole dollar amount.
Sec. 923. Termination of six-month rounding rule for computing retired pay.
Sec. 924. Retired pay for certain otherwise ineligible reservists.
Sec. 925. Accrual funding for military retirement system.

PART C—HEALTH-CARE MATTERS

Sec. 931. CHAMPUS provisions.
Sec. 932. Authority for increased usage of contract health care providers.
Sec. 933. Studies and demonstration projects relating to health and medical care.
Sec. 934. Medical malpractice protection for health-care personnel of the Soldiers' and Airmen's Home.
Sec. 935. Adjustments in stipend paid to recipients of Armed Forces Health Professions Scholarships.

PART D—SURVIVOR BENEFITS

Sec. 941. Clarification of survivor benefits coverage for former spouses.
Sec. 942. Extension of minimum income provision for certain widows.
Sec. 943. Clarification of continuing responsibility for funding of certain suvivors' benefits.

TITLE X—MILITARY PERSONNEL MATTERS

PART A—OFFICER PERSONNEL MANAGEMENT AND TRAINING

Sec. 1001. Temporary modification in certain general and flag officer grade limitations.
Sec. 1002. Performance of civil functions by military officers.
Sec. 1003. Modifications to Reserve Officers' Training Corps scholarship program.
Sec. 1004. Selection of persons from foreign countries to receive instruction at the service academies.
Sec. 1005. Nominations to service academies from Guam and former Canal Zone area.
Sec. 1006. Appointment of citizens of Northern Mariana Islands as commissioned officers.
Sec. 1007. Transfer of Public Health Service officers to other uniformed services.

PART B—RESERVE COMPONENT MANAGEMENT

Sec. 1011. Bonuses for enlistments, reenlistments, and voluntary extensions of service in elements of the Ready Reserve other than the Selected Reserve.
Sec. 1012. Extension of medical and dental care for reservists.
Sec. 1013. Test program on limited use of commissary stores by members of the Selected Reserve.
Sec. 1014. Grade determination for persons receiving original appointments as reserve medical officers of the Army or Air Force.
Sec. 1015. Promotion of certain reserve commissioned officers serving on active duty.
Sec. 1016. Computation of years of service for mandatory transfer of certain reservists to the Retired Reserve.
Sec. 1017. Authority to order certain retired members of reserve components to active duty.

Sec. 1018. Authority to permit retired enlisted members of regular components to be placed voluntarily in the Ready Reserve.
Sec. 1019. Validation of certain Army appointments made in grades above the grade of second lieutenant.

PART C—OTHER PERSONNEL MANAGEMENT PROVISIONS

Sec. 1021. Authority of President to suspend certain laws relating to promotion, retirement, and separation.
Sec. 1022. Authority to increase total initial term of service in the Armed Forces.
Sec. 1023. Variable terms for enlistments and reenlistments in regular components.

PART D—MISCELLANEOUS

Sec. 1031. Extension of period during which certain accumulated leave may be used.
Sec. 1032. Transportation of remains of military retirees dying in military hospitals.
Sec. 1033. Fee for veterinary services.
Sec. 1034. Extension of pilot Department of Defense educational assistance loan repayment program.

TITLE XI—NATO AND RELATED MATTERS

Sec. 1101. North Atlantic defense cooperative programs.
Sec. 1102. Report on allied contributions to the common defense.
Sec. 1103. Limitation on number of military personnel stationed in Europe.
Sec. 1104. Report on improvement of conventional forces of NATO.
Sec. 1105. Report on the nuclear posture of NATO.
Sec. 1106. Report on combat-to-support ratio of United States forces in Europe in support of NATO.
Sec. 1107. Report on United States expenditures in support of NATO.

TITLE XII—GENERAL PROVISIONS

PART A—FINANCIAL MATTERS

Sec. 1201. Transfer authority.
Sec. 1202. Long-term lease or charter of aircraft and vessels.
Sec. 1203. Independent cost estimates of major defense acquisition programs.
Sec. 1204. Requirement of authorization of appropriations for working-capital funds.
Sec. 1205. One-year extension of test program to authorize price differentials to relieve economic dislocations.
Sec. 1206. Authorization of funds for upgrading the International Coordinating Committee (COCOM) logistical support.

PART B—DEPARTMENT OF DEFENSE MANAGEMENT MATTERS

Sec. 1211. Establishment of Defense Director of Operational Test and Evaluation.
Sec. 1212. Assistant Secretaries in the Department of Defense.
Sec. 1213. Commandant of the Marine Corps to be a member of the Armed Forces Policy Council.
Sec. 1214. 5 percent across-the-board reduction in headquarters staffs.
Sec. 1215. Regulations relating to increases in prices for spare parts and replacement equipment.
Sec. 1216. Report on management of spare parts.
Sec. 1217. Authority to withhold from public disclosure certain technical data.
Sec. 1218. Use of polygraphs by the Department of Defense.
Sec. 1219. Authority to provide routine port services to naval vessels of allied countries at no cost.
Sec. 1220. Reciprocal communications support.
Sec. 1221. Two-year extension of prohibition on contracts for the performance of firefighting and security functions.
Sec. 1222. Report on cost savings under contracting out procedures.
Sec. 1223. Extension of period for transfer of defense dependents' education system to Department of Education.
Sec. 1224. Force structure changes, Air Force.

PART C—PROVISIONS RELATING TO SPECIFIC PROGRAMS

Sec. 1231. Limitation on deployment of MX missile; development of small mobile missile.
Sec. 1232. Small, mobile, single warhead ICBMs.
Sec. 1233. Limitation on procurement of binary chemical weapons.
Sec. 1234. Prohibition against using funds appropriated for the advanced technology bomber program for any other purpose.
Sec. 1235. Establishing criteria governing the test of antisatellite warheads.
Sec. 1236. Requirement for the use of competitive bidding procedures for the lease of CT-39 replacement aircraft.
Sec. 1237. Limitation on waivers of cost-recovery requirements under Arms Export Control Act.
Sec. 1238. Waiver of limitation on Foreign Military Sales Program.
Sec. 1239. F/A-18 aircraft program.
Sec. 1240. Study to re-estimate the cost of the B-1B bomber program.

PART D—MISCELLANEOUS

Sec. 1251. Endorsement of report on improved strategic communications.
Sec. 1252. Public Health Service hospitals.
Sec. 1253. Employment protection for certain nonappropriated fund instrumentality employees.
Sec. 1254. Extension of the grace period for the enforcement of the provisions relating to the failure to register and the denial of Federal educational assistance.
Sec. 1255. Impact aid authorization.
Sec. 1256. Retirement deductions from the pay of judges of the United States Court of Military Appeals.
Sec. 1257. One-year postponement for certain deposits for civil service retirement credit for military service.
Sec. 1258. Compensation for injuries incurred in the performance of duty by members of the Civil Air Patrol.
Sec. 1259. Repeal of requirement for retiree suggestion program.
Sec. 1260. Offshore drilling affecting naval operations.
Sec. 1261. Restoration of Bedford Air Force Station, Virginia.
Sec. 1262. Prohibition on purchase of certain typewriters.
Sec. 1263. Award of campaign and service medals to certain persons.
Sec. 1264. Commemorative medal for families of American personnel missing in Southeast Asia.
Sec. 1265. Name of school of medicine at the Uniformed Services University of the Health Sciences.
Sec. 1266. Acceptance of voluntary services for military museums and family support programs.
Sec. 1267. Report on proposed legislation for codification of certain provisions of law.
Sec. 1268. Technical amendments to title 10, United States Code.

TITLE I—PROCUREMENT

AUTHORIZATION OF APPROPRIATIONS, ARMY

SEC. 101. Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft, missiles, weapons and tracked combat vehicles, and ammunition and for other procurement for the Army as follows:

For aircraft, $3,331,400,000.
For missiles, $2,903,400,000.
For weapons and tracked combat vehicles, $4,734,500,000.
For ammunition, $2,147,100,000.
For other procurement, $4,836,200,000.
For Army National Guard equipment, $100,000,000.

AUTHORIZATION OF APPROPRIATIONS, NAVY AND MARINE CORPS

SEC. 102. (a) AIRCRAFT.—Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft for the Navy in the amount of $10,637,800,000.

(b) WEAPONS.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $3,903,000,000 for procurement of weapons (including missiles and torpedoes) for the Navy as follows:

For missile programs, $3,041,700,000.
For the MK-48 torpedo program, $124,600,000.
For the MK-46 torpedo program, $248,000,000.
For the MK-60 torpedo program, $105,400,000.
For the MK-30 mobile target program, $17,600,000.
For the MK-38 minimobile target program, $2,000,000.
For the antisubmarine rocket (ASROC) program, $17,300,000.
For the modification of torpedoes, $111,800,000.
For the torpedo support equipment program, $72,100,000.
For the MK-15 close-in weapons system program, $126,700,000.
For the 5-inch/54-caliber gun mount program, $16,100,000.
For the MK-75 76-millimeter gun mount program, $11,100,000.
For other weapons, $27,500,000.

The sum of the amount authorized for programs under this subsection is reduced by $18,900,000.

(c) SHIPBUILDING AND CONVERSION.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $12,045,400,000 for shipbuilding and conversion for the Navy as follows:

For the Trident submarine program, $1,759,000,000.

For the SSN-688 nuclear attack submarine program, $2,042,400,000.

For the aircraft carrier service life extension program (SLEP), $95,900,000.

For the CG-47 Aegis cruiser program, $3,397,400,000.

For the DDG-51 guided missile destroyer program, $79,000,000.

For the FFG-7 guided missile frigate program, $300,000,000.

For the battleship reactivation program, $57,700,000.

For the LSD-41 landing ship dock program, $509,000,000.

For the LHD-1 amphibious assault ship program, $1,379,700,000.

For the MCM-1 mine countermeasures ship program, $301,000,000.

For the MSH-1 minesweeper hunter program, $65,000,000.

For the TAGS ocean survey ship program, $34,500,000.

For the TAH hospital ship program, $260,000,000.

For the TAK(FBM) missile resupply ship program, $900,000.

For the TAFS combat stores ship program, $16,100,000.

For the TAO-187 fleet oiler program, $365,400,000.

For the TAKR fast logistic ship program, $246,500,000.

For the strategic sealift ready reserve program, $31,000,000.

For the LCAC landing craft air cushion program, $161,100,000.

For service craft and landing craft, $134,300,000.

For outfitting, post delivery, and cost growth, $868,700,000.

The sum of the amounts authorized for programs under this subsection is reduced by $59,200,000.

(d) OTHER.—Funds are hereby authorized to be appropriated for fiscal year 1984 for other procurement for the Navy in the amount of $4,497,600,000, of which—

(1) $681,500,000 is available only for the ship support equipment program;

(2) $1,562,800,000 is available only for the communications and electronics equipment program; and

(3) $930,300,000 is available only for the ordnance support equipment program.

(e) PROCUREMENT, MARINE CORPS.—Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement for the Marine Corps (including missiles, tracked combat vehicles, and other weapons) in the amount of $1,805,200,000.

AUTHORIZATION OF APPROPRIATIONS, AIR FORCE

SEC. 103. (a) Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement of aircraft and missiles and for other procurement for the Air Force as follows:

For aircraft, $21,282,800,000.

For missiles, $7,925,700,000.

For other procurement, $7,112,100,000.

For Air National Guard equipment, $25,000,000.

(b) Of the funds authorized to be appropriated in this section for aircraft for the Air Force, the sum of $112,100,000 is available only for contribution by the United States as its share of the cost for fiscal year 1984 of acquisition by the North Atlantic Treaty Organization of the Airborne Warning and Control System (AWACS).

(c) Of the funds authorized to be appropriated in this section for missiles for the Air Force, the sum of $459,000,000 is available for procurement of 240 missiles under the AGM-86B air-launched cruise missile program, of which $14,000,000 is available for advance procurement for such program.

AUTHORIZATION OF APPROPRIATIONS, DEFENSE AGENCIES

SEC. 104. Funds are hereby authorized to be appropriated for fiscal year 1984 for procurement by the Defense agencies in the amount of $972,700,000.

EXTENSION OF AUTHORITY PROVIDED SECRETARY OF DEFENSE IN CONNECTION WITH THE NATO AIRBORNE WARNING AND CONTROL SYSTEM (AWACS) PROGRAM

SEC. 105. Effective on October 1, 1983, section 103(a) of the Department of Defense Authorization Act, 1982 (Public Law 97-86; 95 Stat. 1100), is amended by striking out "fiscal year 1983" both places it appears and inserting in lieu thereof "fiscal year 1984".

SECURE COMMUNICATIONS EQUIPMENT AND A SPECIAL CLASSIFIED PROGRAM

SEC. 106. The Secretary of Defense is authorized to procure secure telephone communication systems, including equipment and related items, during fiscal year 1984 for the Department of Defense and other Government agencies and entities to support a national program to provide secure telephone service. Of the funds authorized to be appropriated pursuant to this title, not more than $60,000,000 may be used to provide secure telephone equipment and related items to the Department of Defense and other Government agencies and entities in support of such a national program. Equipment provided to Government agencies and entities outside the Department of Defense under the authority of this section and such related services as may be necessary may be furnished by the Secretary of Defense with or without reimbursement. In addition, of the funds authorized to be appropriated pursuant to this Act, not more than $220,000,000 is authorized for a special classified program.

LIMITATION ON ARMY PROCUREMENT

SEC. 107. The Secretary of the Army may not make a contract for the purpose of establishing a second source for production of the engine for the M-1 tank.

LIMITATIONS ON NAVY PROCUREMENT

SEC. 108. (a)(1) None of the funds appropriated pursuant to the authorization of appropriations for the strategic sealift ready reserve program under section 102(c) (Shipbuilding and Conversion for the Navy) may be obligated or expended for the acquisition of a specific vessel for that program until (A) the Secretary of the Navy has notified the Committees on Armed Services and on Appropriations of the Senate and House of Representatives of the proposed acquisition of that vessel for that program, and (B) a period of 30 days of continuous session of Congress has expired following the date on which that notice was received by those committees.

(2) For purposes of paragraph (1), the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of such 30-day period.

(b) None of the funds appropriated pursuant to any authorization of appropriations contained in this Act may be obligated or expended for the purchase of the 5-inch semiactive laser guided projectile until the Secretary of the Navy has acquired a technical data package for that projectile and has determined that such technical data package (1) does not contain proprietary data, and (2) can be used to solicit a second production source for such projectile.

AUTHORIZATION OF MULTIYEAR CONTRACTS FOR THE B-1B AIRCRAFT; PROHIBITION ON MULTIYEAR CONTRACTS FOR CERTAIN EQUIPMENT

SEC. 109. (a) Notwithstanding any other provision of law, procurement of the B-1B aircraft program may be carried out under a multiyear procurement contract in accordance with section 2306(h) of title 10, United States Code.

(b) The Department of Defense is hereby denied the authority to execute multiyear procurement contracts, as proposed in the Department's fiscal year 1984 budget request, for procurement of any of the following:

(1) AH-64 helicopter engines.

(2) F-18 aircraft engines.

(3) F-15 aircraft.

(4) KC-135 reengining (airframes).

(5) Mark 30 targets.

(6) AN/SSQ-62 DICASS sonobuoys.

LIMITATIONS AND REQUIREMENTS WITH RESPECT TO THE PROCUREMENT AND DEPLOYMENT OF THE MX MISSILE

SEC. 110. (a)(1) Funds appropriated pursuant to the authorization of appropriations in section 103 may be used to procure not more than 21 operational MX missiles for deployment.

(2) MX missiles procured with funds authorized to be appropriated by section 103 shall be deployed in existing Minuteman missile silos that are part of the 319th and 400th Strategic Missile Squadrons and supported by Francis E. Warren Air Force Base, Wyoming. The first ten MX missiles procured for deployment by the Air Force shall be placed on alert status, with appropriate security and logistics facilities in operation, not later than December 31, 1986.

(b)(1) The Secretary of the Air Force shall prepare a full draft and final environmental impact statement in accordance with all terms, conditions, and requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) on the proposed deployment and peacetime operations of MX missiles in the Minuteman silos referred to in subsection (a). The final environmental impact statement on the proposed deployment of such missiles shall be published not later than January 31, 1984.

(2) Notwithstanding any other provision of law, the Secretary of the Air Force (A) may immediately commence planning, facility and equipment designing, surveying, and other predeployment activities with respect to the MX missile, and (B) shall proceed promptly following the publication of the final environmental impact statement referred to in paragraph (1) with deployment of MX missiles in the missile silos referred to in subsection (a).

(c) This section shall be carried out in a manner consistent with the provisions of section 1231.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. (a) Funds are hereby authorized to be appropriated for fiscal year 1984 for the use of the Armed Forces for research, development, test, and evaluation in amounts as follows:

For the Army, $4,204,552,000.

For the Navy (including the Marine Corps), $7,619,409,000.

For the Air Force, $12,622,193,000.

For the Defense Agencies, $2,856,754,000, of which $50,000,000 is authorized for the activities of the Director of Test and Evaluation, Defense.

(b) In addition to the funds authorized to be appropriated in subsection (a), there are authorized to be appropriated for fiscal year 1984 such additional sums as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law for civilian employees of the Department of Defense whose compensation is provided for by funds authorized to be appropriated in subsection (a).

LIMITATIONS ON FUNDS FOR THE ARMY

SEC. 202. (a) Of the amount authorized in section 201 for the Army—

(1) $7,650,000 is available only for 75-millimeter and 90-millimeter guns for light armored vehicles;

(2) $7,000,000 is available only for neutral particle beam research as part of the ballistic missile defense advanced technology program;

(3) $15,000,000 is available only for integration (including qualification) of the Hellfire missile on the UH-60 helicopter;

(4) $50,160,000 is available only for the Joint Tactical Missile System and for selection of either the Patriot T-16 or Lance T-22 as the delivery vehicle for such system; and

(5) $12,561,000 is available only for the Mobile Protected Gun System.

(b) None of the amount appropriated pursuant to the authorization in section 201 for the Army may be used for full-scale engineering development of the Military Computer Family System until the Secretary of Defense provides to the Committees on Armed Services of the Senate and House of Representatives a plan for the introduction and integration of advanced micro-electronic computers into weapons systems.

(c) Of the funds authorized to be appropriated pursuant to this section, $20,500,000 shall be available for research and development by the Department of the Army for the Military Computer Family. The Secretary of Defense shall make offsetting reductions in lower priority computer application projects authorized in this Act.

LIMITATIONS ON FUNDS FOR THE NAVY

SEC. 203. (a) Of the amount authorized in section 201 for the Navy (including the Marine Corps)—

(1) $24,000,000 is available only for continued development of the Rankine Cycle Energy Recovery (RACER) system to ensure compatibility of the RACER system with all ships of the DDG-51 class, including the lead ship;

(2) $20,000,000 is available only for the antiradiation projectile program;

(3) $72,593,000 is available only for the Mark 92 fire control system;

(4) $10,000,000 is available only for a derivative of the Standard Missile II to be used for the Navy outer air battle mission; and

(5) $1,470,000 is available only for the evaluation of a wing-lift system for Navy utility craft.

(b)(1) None of the amount appropriated pursuant to the authorization in section 201 for the Navy may be used for full-scale engineering development of the AN/UYK-43 and AN/UYK-44 computers until the Secretary of Defense provides to the Committees on Armed Services of the Senate and House of Representatives a plan for the introduction and integration of advanced microelectronic computers into weapons systems.

(2) None of the amount appropriated pursuant to the authorization in section 201 for the Navy may be used for the Navy Mid-Infrared Advanced Chemical Laser program.

LIMITATIONS ON FUNDS FOR THE AIR FORCE

SEC. 204. (a) Of the amount authorized in section 201 for the Air Force—

(1) $60,000,000 is available for the Strategic Laser System Technology program, of which $40,000,000 is available only for the development by the Air Force Space Command of the visible/ultraviolet short wavelength laser program;

(2) not less than $22,477,000 is available for research and development of Training and Simulation Technology; and

(3) $20,000,000 is available only for the development of terminally guided and sensor-fused submunitions for the Air Force deep strike mission.

(b) None of the amount appropriated pursuant to the authorization in section 201 for the Air Force may be used for continued development of the Airborne Laser Laboratory.

LIMITATIONS ON FUNDS FOR THE DEFENSE AGENCIES

SEC. 205. (a) Of the amount authorized in section 201 for the Defense Agencies—

(1) not less than $65,000,000 is available only for research, development, test, and evaluation of free-electron and other short wavelength (excluding blue-green) lasers;

(2) $33,100,000 is available only for the particle-beam technology program, including modifications to the advanced test accelerator required for free-electron laser research; and

(3) $22,000,000 is available only for a joint Defense Advanced Research Projects Agency and Department of Energy project for research, development, test, and evaluation of third-generation defensive weapons.

(b) None of the amount appropriated pursuant to the authorization in section 201 for the Defense Agencies may be used for research, development, test, and evaluation for the program for fifth-generation artificial intelligence computers until the Secretary of Defense submits to Congress a comprehensive plan for the manner in which such program will be carried out.

LIMITATION ON SIZE OF SMALL MOBILE MISSILE

SEC. 206. None of the funds appropriated pursuant to authorizations of appropriations in section 201 for the Air Force may be obligated or expended for research, development, test, or evaluation for an intercontinental-range mobile ballistic missile that would weigh more than 33,000 pounds or that would carry more than a single warhead.

REPORT ON THE JOINT TACTICAL MISSILE SYSTEM AND THE JOINT SURVEILLANCE AND TARGET ATTACK SYSTEM; RESTRICTION ON USE OF FUNDS

SEC. 207. (a) The Secretary of Defense and the Chairman of the Joint Chiefs of Staff shall submit to the Committees on Armed Services of the Senate and the House of Representatives not later than October 1, 1984, a report setting forth a comprehensive and coordinated plan for the development and procurement of the Joint Tactical Missile System and the Joint Surveillance and Target Attack System (JSTARS) of the Air Force. The report shall clearly define the integration of those systems within the Air-Land Battle concept developed in the Department of Defense and the expected contribution of those systems to the disruption and destruction of follow-on enemy forces.

(b) Of the total amount appropriated for the Air Force JSTARS program pursuant to authorizations in this title, $20,000,000 may not be obligated or expended for the integration of the JSTARS radar on any airborne platform until after the completion of a joint hearing of the Committees on Armed Services of the Senate and the House of Representatives on the subject of deep strike interdiction or until after December 1, 1983, whichever occurs first.

ANTIBALLISTIC MISSILE DEFENSE SYSTEM RESEARCH

SEC. 208. (a) Subject to subsection (b), the Secretary of Defense may use not more than $50,400,000 of amounts appropriated pursuant to an authorization of appropriations in this title which are not obligated for any other purpose to carry out research, development, test, and evaluation on the Ballistic Missile Defense systems technology program of the Army. The amount authorized under the preceding sentence—

(1) is in addition to any amount authorized to be appropriated by this title to carry out research, development, test, and evaluation on the Ballistic Missile Defense systems technology program of the Army; and

(2) is not an addition to the total of the authorizations of appropriations contained in this Act.

(b) Funds for the purpose of subsection (a) may not be derived from amounts appropriated for Army tactical conventional programs.

TITLE III—OPERATION AND MAINTENANCE

AUTHORIZATION OF APPROPRIATIONS

SEC. 301. (a) ARMY.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $17,523,091,000 for expenses, not otherwise provided for, for the operation and maintenance of the Army as follows:

(1) For general purpose forces, $6,389,569,000.

(2) For intelligence and communications, $1,025,578,000.

(3) For central supply and maintenance, $5,005,214,000.

(4) For training, medical, and other general personnel activities, $3,858,200,000.

(5) For administration, $1,138,288,000.

(6) For support of other nations, $106,242,000.

(b) NAVY.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $22,489,400,000 for expenses, not otherwise provided for, for the operation and maintenance of the Navy and the Marine Corps as follows:

(1) For strategic forces, $1,974,261,000.

(2) For general purpose forces, $10,645,207,000.

(3) For intelligence and communications, $1,063,381,000.

(4) For central supply and maintenance, $6,160,033,000.

(5) For training, medical, and other general personnel activities, $1,987,832,000.

(6) For administration, $656,166,000.

(7) For support of other nations, $2,520,000.

(c) MARINE CORPS.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $1,554,700,000 for expenses, not otherwise provided for, for the operation and maintenance of the Marine Corps as follows:

(1) For general purpose forces, $910,501,000.

(2) For central supply and maintenance, $337,123,000.

(3) For training, medical, and other general personnel activities, $210,773,000.

(4) For administration, $96,303,000.

(d) AIR FORCE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $18,061,100,000 for expenses, not otherwise provided for, for the operation and maintenance of the Air Force as follows:

(1) For strategic forces, $3,100,886,000.

(2) For general purpose forces, $3,966,062,000.

(3) For intelligence and communications, $1,792,317,000.

(4) For airlift and sealift, $1,182,783,000.

(5) For central supply and maintenance, $5,483,689,000.

(6) For training, medical, and other general personnel activities, $1,986,810,000.

(7) For administration, $540,310,000.

(8) For support of other nations, $8,243,000.

(e) DEFENSE AGENCIES.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $6,709,400,000 for expenses, not otherwise provided for, for the operation and maintenance of activities and agencies of the Department of Defense (other than the military departments) as follows:

(1) For general purpose forces, $284,114,000.

(2) For intelligence and communications, $2,279,559,000.

(3) For central supply and maintenance, $1,559,231,000.

(4) For training, medical, and other general personnel activities, $2,164,915,000.

(5) For administration, $421,581,000.

(f) ARMY RESERVE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $685,500,000 for expenses, not otherwise provided for, for the operation and maintenance of the Army Reserve as follows:

(1) For mission forces, $398,470,000.

(2) For depot maintenance, $8,910,000.

(3) For other support, $278,120,000.

(g) NAVY RESERVE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $675,300,000 for expenses, not otherwise provided for, for the operation and maintenance of the Navy Reserve as follows:

(1) For mission forces, $413,148,000.

(2) For depot maintenance, $88,538,000.

(3) For other support, $173,614,000.

(h) MARINE CORPS RESERVE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $52,929,000 for expenses, not otherwise provided for, for the operation and maintenance of the Marine Corps Reserve as follows:

(1) For mission forces, $27,503,000.

(2) For depot maintenance, $1,589,000.

(3) For other support, $23,837,000.

(i) AIR FORCE RESERVE.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $791,100,000 for expenses, not otherwise provided for, for the operation and maintenance of the Air Force Reserve as follows:

(1) For mission forces, $521,718,000.

(2) For depot maintenance, $131,149,000.

(3) For other support, $138,233,000.

(j) ARMY NATIONAL GUARD.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $1,180,200,000 for expenses, not otherwise provided for, for the operation and maintenance of the Army National Guard as follows:

(1) For training operations, $223,357,000.

(2) For logistical support, $861,108,000.

(3) For headquarters and command support, $85,374,000.

(4) For medical support, $10,361,000.

(k) AIR NATIONAL GUARD.—Funds are hereby authorized to be appropriated for fiscal year 1984 in the total amount of $1,808,900,000 for expenses, not otherwise provided for, for the operation and maintenance of the Air National Guard as follows:

(1) For mission forces, $1,292,200,000.

(2) For depot maintenance, $403,700,000.

(3) For other support, $113,000,000.

(l) NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE, ARMY.—There is hereby authorized to be appropriated for fiscal year 1984 the amount of $899,000 for the expenses of the Secretary of the Army, upon the recommendation of the National Board for the Promotion of Rifle Practice, under section 4308 of title 10, United States Code, and the expenses of the Secretary of the Army under sections 4309 and 4313 of such title.

(m) CLAIMS, DEFENSE.—There is hereby authorized to be appropriated for fiscal year 1984 the amount of $172,900,000 for payment, not otherwise provided for, of claims authorized by law to be paid by the Department of Defense (except for civil functions).

(n) COURT OF MILITARY APPEALS, DEFENSE.—There is hereby authorized to be appropriated for fiscal year 1984 the amount of $3,372,000 for salaries and expenses for the United States Court of Military Appeals.

GENERAL AUTHORIZATION OF APPROPRIATIONS FOR PAY RAISES, FUEL COSTS, AND INFLATION ADJUSTMENTS

SEC. 302. There are authorized to be appropriated for fiscal year 1984, in addition to the amounts authorized to be appropriated in section 301, such sums as may be necessary—

(1) for increases in salary, pay, retirement, and other employee benefits authorized by law for civilian employees of the Department of Defense whose compensation is provided for by funds authorized to be appropriated in section 301;

(2) for unbudgeted increases in fuel costs; and

(3) for increases as the result of inflation in the cost of activities authorized by section 301.

PROHIBITION OF USE OF VESSELS WITH FOREIGN-BUILT MAJOR COMPONENTS UNDER CERTAIN LEASES OR SERVICE CONTRACTS

SEC. 303. (a)(1) None of the funds appropriated pursuant to the authorizations of appropriations in section 301 may be obligated or expended for the lease of a vessel which has not previously been placed in service, or for the provision of a service through use by a contractor of a vessel which has not previously been placed in service, under a contract which will be for a long term or under which the United States will have a substantial termination liability and under which the vessel involved will have a main propulsion system or other major component of the hull or superstructure not built in the United States.

(2) None of the funds appropriated pursuant to the authorizations of appropriations in section 301 may be obligated or expended for a contract that is an agreement to lease or an agreement to provide services and that is (or will be) accompanied by a contract for the actual lease or provision of services if the contract for the actual lease or provision of services is (or will be) a contract described in paragraph (1).

(b) For purposes of subsection (a)—

(1) a contract shall be considered to be for a long term if the term of the contract, including all options under the contract, is for more than 5 years; and

(2) the United States shall be considered to have a substantial termination liability under a contract if, as determined under regulations prescribed by the Secretary of Defense, the sum of—

(A) the present value of the amount of the termination liability of the United States under the contract as of the end of the term of the contract (exclusive of any option to extend the contract), and

(B) the present value of the total of the payments to be made by the United States under the contract (excluding any option to extend the contract) attributable to capital-hire,

is more than one-half the price of the vessel involved.

(c) Subsection (a) does not apply with respect to a contract entered into before the date of the enactment of this Act.

AUTHORIZATION OF APPROPRIATIONS FOR ASSISTANCE FOR 1984 GAMES OF THE XXIII OLYMPIAD

SEC. 304. (a) Notwithstanding any other provision of law, the Secretary of Defense is authorized—

(1) to provide logistical support and personnel services to the 1984 games of the XXIII Olympiad;

(2) to lend and provide equipment in support of the 1984 games of the XXIII Olympiad; and

(3) to provide such other services in support of the 1984 games of the XXIII Olympiad as the Secretary may consider advisable.

(b) There is authorized to be appropriated to the Department of Defense for fiscal 1984 an amount not to exceed $50,000,000 for the purpose of carrying out subsection (a). Except for funds used for pay and nontravel related allowances for members of the Armed Forces (other than members of the reserve components called or ordered to active duty to provide support for the XXIII Olympiad), no funds may be obligated for such purpose unless specifically appropriated for such purpose. The costs for pay and nontravel related allowances of members of the Armed Forces (other than members of the reserve components called or ordered to active duty to provide support for the XXIII Olympiad) may not be charged to appropriations made pursuant to this authorization.

(c) None of the funds appropriated pursuant to the authorization contained in this section may be obligated until the President approves the justification for the assistance described in subsection (a) submitted by the Olympic Law Enforcement Coordination Council. The justification shall include an explanation of the necessity for the requested support for security, medical services, and for related equipment or other support. The justification shall also include the operational responsibilities and financial limitations of each governmental agency represented on the Council. Such justification shall be presented in such detail as the Secretary of Defense considers necessary.

(d) Upon approval of the justification referred to in subsection (c) by the President, a copy of such justification shall be forwarded to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives.

SHELTER FOR THE HOMELESS AT MILITARY INSTALLATIONS

SEC. 305. (a)(1) Chapter 151 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2546. Shelter for homeless; incidental services

"(a)(1) The Secretary of a military department may make military installations under his jurisdiction available for the furnishing of shelter to persons without adequate shelter. The Secretary may, incidental to the furnishing of such shelter, provide services as described in subsection (b). Shelter and incidental services provided under this section may be provided without reimbursement.

"(2) The Secretary concerned shall carry out this section in cooperation with appropriate State and local governmental entities and charitable organizations. The Secretary shall, to the maximum extent practicable, use the services and personnel of such entities and organizations in determining to whom and the circumstances under which shelter is furnished under this section.

"(b) Services that may be provided incident to the furnishing of shelter under this section are the following:

"(1) Utilities.

"(2) Bedding.

"(3) Security.

"(4) Transportation.

"(5) Renovation of facilities.

"(6) Minor repairs undertaken specifically to make suitable space available for shelter to be provided under this section.

"(7) Property liability insurance.

"(c) Shelter and incidental services may only be provided under this section to the extent that the Secretary concerned determines will not interfere with military preparedness or ongoing military functions.

"(d) The Secretary of Defense shall prescribe regulations for the administration of this section.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2546. Shelter for homeless; incidental services.".

(b) Section 2546 of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1983.

TITLE IV—ACTIVE FORCES

AUTHORIZATION OF END STRENGTHS

SEC. 401. The Armed Forces are authorized strengths for active duty personnel as of September 30, 1984, as follows:

(1) The Army, 780,000.

(2) The Navy, 564,800.

(3) The Marine Corps, 196,600.

(4) The Air Force, 594,500.

QUALITY CONTROL ON ENLISTMENTS INTO THE ARMY FOR FISCAL YEAR 1984

SEC. 402. Effective on October 1, 1983, section 302(a) of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 10 U.S.C. 520 note), is amended by striking out "October 1, 1982" and "September 30, 1983" and inserting in lieu thereof "October 1, 1983" and "September 30, 1984", respectively.

EXTENSION OF AUTHORITY FOR THE TEMPORARY PROMOTIONS OF CERTAIN NAVY LIEUTENANTS

SEC. 403. Section 5721(f) of title 10, United States Code, is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1984".

LIMIT ON FUNDS FOR PERMANENT CHANGE OF STATION (PCS) TRAVEL DURING FISCAL YEAR 1984

SEC. 404. (a)(1) Except as provided in paragraph (2), during fiscal year 1984, not more than $2,585,626,000 may be spent from funds available to the Department of Defense for permanent change of station travel (including all expenses of such travel for organizational movements). Assignments for temporary duty may not be increased in order to circumvent the limitation in the preceding sentence.

(2) The limit on expenditures specified in paragraph (1) may be exceeded if the Secretary of Defense notifies the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives of the need to exceed such limit and identifies the source of the funds that will be used for that purpose.

(b) The Secretary of Defense shall take such steps as are necessary, consistent with the requirements of military readiness, to reduce the number of permanent changes of station of members of the Armed Forces. Such steps may include—

(1) reductions to the minimum essential level in the number of permanent changes of station required within the continental United States;

(2) extensions of the length of tours of duty overseas in locations other than locations that do not allow for accompanied tours; and

(3) reductions in the number of active duty military personnel stationed outside the continental United States.

TITLE V—RESERVE FORCES

AUTHORIZATION OF AVERAGE STRENGTHS FOR SELECTED RESERVE

SEC. 501. (a) For fiscal year 1984 the Selected Reserve of the reserve components of the Armed Forces shall be programed to attain average strengths of not less than the following:

(1) The Army National Guard of the United States, 425,000.

(2) The Army Reserve, 273,700.

(3) The Naval Reserve, 112,600.

(4) The Marine Corps Reserve, 40,300.

(5) The Air National Guard of the United States, 103,400.

(6) The Air Force Reserve, 68,600.

(7) The Coast Guard Reserve, 12,000.

(b) The average strength prescribed by subsection (a) for the Selected Reserve of any reserve component shall be proportionately reduced by (1) the total authorized strength of units organized to serve as units of the Selected Reserve of such component which are on active duty (other than for training) at any time during the fiscal year, and (2) the total number of individual members not in units organized to serve as units of the Selected Reserve of such component who are on active duty (other than for training or for unsatisfactory participation in training) without their consent at any time during the fiscal year. Whenever such units or such individual members are released from active duty during any fiscal year, the average strength prescribed for such fiscal year for the Selected Reserve of such reserve component shall be proportionately increased by the total authorized strength of such units and by the total number of such individual members.

AUTHORIZATION OF END STRENGTHS FOR RESERVES ON ACTIVE DUTY IN SUPPORT OF THE RESERVES

SEC. 502. Within the average strengths prescribed in section 501, the reserve components of the Armed Forces and the National Guard are authorized, as of September 30, 1984, the following number of Reserves to be serving on full-time active duty, and members of the National Guard to be serving in a full-time duty status, for the purpose of organizing, administering, recruiting, instructing, or training the reserve components or the National Guard:

(1) The Army National Guard and the Army National Guard of the United States, 18,194.

(2) The Army Reserve, 9,914.

(3) The Naval Reserve, 13,846.

(4) The Marine Corps Reserve, 801.

(5) The Air National Guard and the Air National Guard of the United States, 5,915.

(6) The Air Force Reserve, 517.

(b) Upon a determination by the Secretary of Defense that such action is in the national interest, the end strengths prescribed by subsection (a) may be increased by a total of not more than the number equal to 2 percent of the total end strengths prescribed.

INCREASE IN NUMBER OF CERTAIN PERSONNEL AUTHORIZED TO BE ON ACTIVE DUTY IN SUPPORT OF THE RESERVE COMPONENTS

SEC. 503. (a) The table in section 517(b) of title 10, United States Code, is amended to appear as follows:

"Grade	Army	Navy	Air Force	Marine Corps
E-9	314	156	143	6
E-8	1,494	381	617	56".

(b) The table in section 524(a) of such title is amended to appear as follows:

"Grade	Army	Navy	Air Force	Marine Corps
Major or Lieutenant Commander	1,948	823	408	95
Lieutenant Colonel or Commander	967	520	303	48
Colonel or Navy Captain	338	177	171	23".

(c) The amendments made by subsections (a) and (b) shall take effect on October 1, 1983.

CLARIFICATION OF STATUS OF CERTAIN MEMBERS OF THE NATIONAL GUARD SERVING IN A FULL-TIME STATUS

SEC. 504. (a) Section 502 of the Department of Defense Authorization Act, 1983 (Public Law 97-252; 96 Stat. 726), is amended—

(1) by inserting "and the National Guard" after "the Armed Forces";

(2) by inserting ", and members of the National Guard to be serving in a full-time duty status," after "active duty";

(3) by inserting "or the National Guard" after "reserve components" the second place it appears;

(4) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) The Army National Guard and the Army National Guard of the United States, 14,419."; and

(5) by striking out paragraph (5) and inserting in lieu thereof the following:

"(5) The Air National Guard and the Air National Guard of the United States, 5,158.".

(b)(1) Chapter 3 of title 32, United States Code, is amended by adding at the end thereof the following new section:

"§ 335. Status of certain members performing full-time duty

"Members of the National Guard serving in a full-time duty status for the purpose of organizing, administering, recruiting, instructing, or training the National Guard shall be entitled to all rights, privileges, and benefits of members called to active duty under section 265 of title 10 and shall be considered to be serving on active duty for purposes of sections 524(a) and 976 of such title.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"335. Status of certain members performing full-time duty.".

(c) Not later than November 15, 1983, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives a draft of legislation to provide on a permanent basis that members of the National Guard described in section 335 of title 32, United States Code, as added by subsection (b), are under State control except when explicitly ordered to Federal service in accordance with law.

TITLE VI—CIVILIAN PERSONNEL

AUTHORIZATION OF END STRENGTH

SEC. 601. (a) The Department of Defense is authorized a strength in civilian personnel, as of September 30, 1984, of 1,056,200.

(b) The strength for civilian personnel prescribed in subsection (a) shall be apportioned among the Department of the Army, the Department of the Navy, the Department of the Air Force, and the agencies of the Department of Defense (other than the military departments) in such numbers as the Secretary of Defense shall prescribe. The Secretary of Defense shall report to the Congress within 60 days after the date of enactment of this Act on the manner in which the initial allocation of civilian personnel is made among the military departments and the agencies of the Department of Defense (other than the military departments) and shall include the rationale for each allocation.

(c)(1) In computing the strength for civilian personnel, there shall be included all direct-hire and indirect-hire civilian personnel employed to perform military functions administered by the Department of Defense (other than those performed by the National Security Agency) whether employed on a full-time, part-time, or intermittent basis, but excluding special employment categories for students and disadvantaged youth such as the stay-in-school campaign, the temporary summer aid program and the Federal junior fellowship program and personnel participating in the worker-trainee opportunity program.

(2) Personnel employed under a part-time career employment program established by section 3402 of title 5, United States Code, shall be counted as prescribed by section 3404 of that title. Personnel employed in an overseas area on a part-time basis under a nonpermanent local-hire appointment who are dependents accompanying a Federal civilian employee or a member of a uniformed service on official assignment or tour of duty shall also be counted as prescribed by section 3404 of that title.

(3) Whenever a function, power or duty, or activity is transferred or assigned to a department or agency of the Department of Defense from a department or agency outside of the Department of Defense, or from another department or agency within the Department of Defense, the civilian personnel end-strength authorized for such departments or agencies of the Department of Defense affected shall be adjusted to reflect any increases or decreases in civilian personnel required as a result of such transfer or assignment.

(d) When the Secretary of Defense determines that such action is necessary in the national interest, the Secretary of Defense may authorize the employment of civilian personnel in excess of the number authorized by subsection (a), but such additional number may not exceed 2 percent of the total number of civilian personnel authorized for the Department of Defense by subsection (a). The Secretary of Defense shall promptly notify the Congress of any authorization to increase civilian personnel strength under this subsection.

CIVILIAN PERSONNEL CEILINGS ON INDUSTRIALLY FUNDED ACTIVITIES DURING FISCAL YEAR 1983

SEC. 602. In computing the authorized strength for civilian personnel prescribed in section 601(a) of the Department of Defense Authorization Act, 1983 (Public Law 97-252; 96 Stat. 727), any increase during fiscal year 1983 in the number of civilian personnel of industrially funded activities of the Department of Defense in excess of the number of civilian personnel employed in such activities on September 30, 1982, shall not be counted.

TITLE VII—MILITARY TRAINING STUDENT LOADS

AUTHORIZATION OF TRAINING STUDENT LOADS

SEC. 701. (a) For fiscal year 1984, the components of the Armed Forces are authorized average military training student loads as follows:

(1) The Army, 71,817.

(2) The Navy, 66,911.

(3) The Marine Corps, 21,105.

(4) The Air Force, 49,007.

(5) The Army National Guard of the United States, 21,105.

(6) The Army Reserve, 12,724.

(7) The Naval Reserve, 2,886.

(8) The Marine Corps Reserve, 3,223.

(9) The Air National Guard of the United States, 2,845.

(10) The Air Force Reserve, 1,705.

(b) The average military student loads for the Army, the Navy, the Marine Corps, and the Air Force and the reserve components authorized in subsection (a) for fiscal year 1984 shall be adjusted consistent with the manpower strengths authorized in titles IV, V, and VI of this Act. Such adjustment shall be apportioned among the Army, the Navy, the Marine Corps, and the Air Force and the reserve components in such manner as the Secretary of Defense shall prescribe.

EXTENSION OF REDUCTION IN NUMBER OF STUDENTS REQUIRED TO BE IN A UNIT OF THE JUNIOR RESERVE OFFICERS' TRAINING CORPS

SEC. 702. Section 602 of the Department of Defense Authorization Act, 1981 (10 U.S.C. 2031 note), is amended by striking out "August 31, 1983" and inserting in lieu thereof "August 31, 1984".

TITLE VIII—CIVIL DEFENSE

AUTHORIZATION OF APPROPRIATIONS

SEC. 801. There is hereby authorized to be appropriated for fiscal year 1984 to carry out the provisions of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2251 et seq.) the sum of $169,000,000.

AMOUNT AUTHORIZED FOR CONTRIBUTIONS FOR STATE PERSONNEL AND ADMINISTRATIVE EXPENSES

SEC. 802. Notwithstanding the second proviso of section 408 of the Federal Civil Defense Act of 1950 (50 U.S.C. App. 2260), $54,000,000 of the amount authorized to be appropriated by section 801 is available for appropriations for contributions to the States under section 205 of such Act (50 U.S.C. App. 2286) for personnel and administrative expenses.

TITLE IX—MILITARY COMPENSATION AND HEALTH CARE MATTERS

PART A—PAY AND ALLOWANCES

PAY INCREASE OF 4 PERCENT FOR MEMBERS OF THE UNIFORMED SERVICES

SEC. 901. (a) The adjustment required by section 1009 of title 37, United States Code, in certain elements of the compensation of members of the uniformed services to become effective on October 1, 1983, shall not be made.

(b)(1) Subject to the provisions of paragraphs (2) and (3), each element of compensation specified in section 1009(a) of title 37, United States Code, shall be increased for members of the uniformed services by 4 percent effective on April 1, 1984.

(2) The increase provided for in paragraph (1) shall not apply to enlisted members in pay grade E-1 with less than 4 months active duty.

(3) The President may allocate the percentage increase specified under paragraphs (1) and (2) in the same manner and to the same extent the President is authorized under subsections (c) and (d) of section 1009 of title 37, United States Code, to allocate any percentage increase described in subsection (b)(3) of section 1009 of such title.

(c) Notwithstanding the effective date of April 1, 1984, prescribed in subsection (b) for the increase in compensation of members of the uniformed services, if an adjustment is made after the date of the enactment of this Act in the General Schedule of compensation for Federal classified employees and such adjustment is to become effective before April 1, 1984, the increase in the compensation of members of the uniformed services provided for in subsection (b) shall become effective on the first day of the first pay period for members of the uniformed services which begins on or after the effective date of the adjustment made in the compensation of Federal classified employees.

ADJUSTMENT IN BASIC PAY OF CERTAIN OFFICERS WITH PRIOR ENLISTED AND WARRANT OFFICER SERVICE

SEC. 902. (a) Section 203(d) of title 37, United States Code, is amended to read as follows:

"(d) The basic pay of a commissioned officer who is in pay grade O-1, O-2, or O-3 and who is credited with a total of over four years' active service as a warrant officer or as a warrant officer and enlisted member shall be computed in the same manner as the basic pay of a commissioned officer in the same pay grade who has been credited

with over four years' active service as an enlisted member.".

(b) The amendment made by subsection (a) shall take effect on October 1, 1983.

HAZARDOUS DUTY PAY FOR CERTAIN TOXIC FUEL HANDLERS

SEC. 903. (a) Section 301(a)(12) of title 37, United States Code, is amended by inserting "or the testing of aircraft or missile systems (or components of such systems) during which highly toxic fuels or propellants are used" after "propellants".

(b) The amendment made by subsection (a) shall take effect on October 1, 1983.

EXTENSION OF SPECIAL PAY FOR CERTAIN AVIATION CAREER OFFICERS

SEC. 904. (a)(1) Section 301b(e) of title 37, United States Code, is amended by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) During the period beginning on October 1, 1983, and ending on September 30, 1984, only agreements executed by officers of the Navy or Marine Corps who are pilots may be accepted under this section.

"(3) During the period beginning on October 1, 1983, and ending on September 30, 1984, only an agreement—

"(A) that is executed by an officer who—

"(i) has at least six but less than eleven years of active duty;

"(ii) has completed the minimum service required for aviation training; and

"(iii) has not previously been paid special pay authorized by this section; and

"(B) that requires the officer to remain on active duty in aviation service for either three or four years;

may be accepted under this section. An officer from whom an agreement is accepted during such period may be paid an amount not to exceed $4,000 for each year covered by that agreement if that officer agrees to remain on active duty for three years or an amount not to exceed $6,000 for each year covered by that agreement if that officer agrees to remain on active duty for four years. An agreement that requires an officer to remain on active duty in aviation service for six years may also be accepted during such period if the officer meets the requirements of clause (A) of this paragraph and the officer has completed less than seven years of active duty. An officer from whom such an agreement is accepted may be paid an amount not to exceed $6,000 for each year covered by the agreement.

"(4) An officer may not receive incentive pay under section 301 of this title for the performance of hazardous duty for any period of service which the officer is obligated to serve pursuant to an agreement entered into under this section.".

(2) Section 301b(f) of such title is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1984".

(b)(1) It is the sense of the Congress that eligibility for special pay for aviation career officers under section 301b of title 37, United States Code, should be made available only to officers who will likely be induced to remain on active duty in aviation service by receipt of the special pay.

(2) The Secretary of the Navy shall submit to the Congress not later than July 1, 1984, a written report, approved by the Secretary of Defense, on the payment of special pay for aviation career officers under section 301b of title 37, United States Code, since the date of the enactment of this Act. Such report shall include—

(A) a list of the specific aviation specialties by aircraft type determined to be critical for purposes of the payment of special pay under such section since the date of the enactment of this Act;

(B) the number of officers within each critical aviation specialty who received the special pay under such section since the date of the enactment of this Act by grade, years of prior active service, and amounts of special pay received under such section;

(C) an explanation and justification for the Secretary's designation of an aviation specialty as "critical" and for the payment of special pay under section 301b of such title to officers who have more than eight years of prior active service and who are serving in pay grade O–4 or above, if payment of such pay was made to such officers; and

(D) an evaluation of the progress made since the date of the enactment of this Act toward eliminating shortages of aviators in the aviation specialties designated by the Secretary as critical.

HOSTILE FIRE PAY FOR MEMBERS SERVING IN AREAS THREATENING IMMINENT DANGER

SEC. 905. (a) Section 310(a) of title 37, United States Code, is amended—

(1) by striking out "or" at the end of clause (2);

(2) by striking out the period at the end of clause (3) and inserting in lieu thereof "; or"; and

(3) by inserting after clause (3) the following new clause:

"(4) was on duty in a foreign area in which he was subject to the threat of physical harm or imminent danger on the basis of civil insurrection, civil war, terrorism, or wartime conditions.".

(b)(1) The heading of section 310 of such title is amended to read as follows:

"§ 310. Special pay: duty subject to hostile fire or imminent danger".

(2) The item relating to such section in the table of sections at the beginning of chapter 5 of such title is amended to read as follows:

"310. Special pay: duty subject to hostile fire or imminent danger.".

(c) The amendments made by this section shall take effect on October 1, 1983.

FREEZE OF VARIABLE HOUSING ALLOWANCE AT FISCAL YEAR 1983 RATES

SEC. 906. During fiscal year 1984, the rates at which the variable housing allowance under section 403(a)(2) of title 37, United States Code, is paid shall be the same as the rates in effect on September 30, 1983.

VARIABLE HOUSING ALLOWANCE FOR RESERVES ON ACTIVE DUTY FOR A PERIOD OF 140 DAYS OR MORE

SEC. 907. (a) Section 403(a)(2) of title 37, United States Code, is amended—

(1) by striking out "A member" in the first sentence of subparagraph (A) and inserting in lieu thereof "Except as provided in subparagraph (D) of this paragraph, a member"; and

(2) by adding at the end thereof the following new subparagraph:

"(D) A member of a reserve component is not entitled to a variable housing allowance while on active duty under a call or order to active duty specifying a period of less than 140 days.".

(b) The amendments made by subsection (a) shall apply only with respect to members called or ordered to active duty after September 30, 1983.

CLARIFICATION OF RULES FOR PAYMENT OF PER DIEM

SEC. 908. (a) Section 402(e) of title 37, United States Code, is amended—

(1) by inserting "(1)" after "(e)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) For purposes of subsection (b) of this section, a member shall not be considered to be performing travel under orders away from his designated post of duty if such member—

"(A) is an enlisted member serving his first tour of active duty;

"(B) has not actually reported to a permanent duty station pursuant to orders directing such assignment; and

"(C) is not actually traveling between stations pursuant to orders directing a change of station.".

(b) Section 404(f) of such title is amended by adding at the end thereof the following new paragraph:

"(3) For purposes of entitlement to per diem in place of subsistence under subsection (d)(2) of this section, a member shall not be considered under subsection (a)(1) of this section to be performing travel under orders away from his designated post of duty if such member—

"(A) is an enlisted member serving his first tour of active duty;

"(B) has not actually reported to a permanent duty station pursuant to orders directing such assignment; and

"(C) is not actually traveling between stations pursuant to orders directing a change of station.".

CLARIFICATION OF ALLOWANCE FOR TRANSPORTATION OF MOTOR VEHICLE

SEC. 909. Section 406(b)(1) of title 37, United States Code, is amended—

(1) by inserting "(A)" before "Except as provided in paragraph (2)";

(2) by striking out the third and fourth sentences; and

(3) by adding at the end thereof the following:

"(B) Subject to uniform regulations prescribed by the Secretaries concerned, in the case of a permanent change of station in which the Secretary concerned has authorized transportation of a motor vehicle under section 2634 of title 10 (except when such transportation is authorized from the old duty station to the new duty station), the member is entitled to a monetary allowance for transportation of that motor vehicle—

"(i) from the old duty station to—

"(I) the customary port of embarkation which is nearest the old duty station if delivery of the motor vehicle to the port of embarkation is not made in conjunction with the member's travel to the member's port of embarkation; or

"(II) the customary port of embarkation which is nearest to the member's port of embarkation if delivery of the motor vehicle to the port of embarkation is made in conjunction with the member's travel to the member's port of embarkation;

whichever is most cost-effective for the Government considering all operational, travel, and transportation requirements incident to such change of station; and

"(ii) from the customary port of debarkation which has been designated by the Government as most cost-effective for the Government considering all operational, travel, and transportation requirements incident to such change of station to the new duty station.

Such monetary allowance shall be established at a rate per mile that does not exceed the rate established under section 404(d)(1) of this title.".

TRANSPORTATION FOR DEPENDENT CHILDREN ATTENDING SCHOOL IN THE UNITED STATES WHEN THE MEMBER-PARENT IS STATIONED OVERSEAS

SEC. 910. (a)(1) Chapter 7 of title 37, United States Code, is amended by inserting after section 429 the following new section:

"§ 430. Travel and transportation: dependent children of members stationed overseas

"(a) Under regulations to be prescribed by the Secretary of Defense, a member of a uniformed service who—

"(1) is assigned a permanent duty station outside the United States,

"(2) is accompanied by his dependents at or near his oversea duty station (unless his only dependents are in the category of dependent described in clause (3) of this subsection), and

"(3) has a dependent child who is under 23 years of age attending a school in the United States for the purpose of obtaining a secondary or undergraduate college education,

may be paid the allowance set forth in subsection (b) of this section if he otherwise qualifies for such allowance.

"(b) A member described in subsection (a) of this section may be paid a transportation allowance for each unmarried dependent child, who is under 23 years of age and is attending a school in the United States for the purpose of obtaining a secondary or undergraduate college education, of one annual trip between the school being attended and the member's duty station in the oversea area and return. The allowance authorized by this section may be transportation in kind or reimbursement therefor, as prescribed by the Secretaries concerned. However, the transportation authorized by this section may not be paid a member for a child attending a school in the United States for the purpose of obtaining a secondary education if the child is eligible to attend a secondary school for dependents that is located at or in the vicinity of the duty station of the member and is operated under the Defense Dependents' Education Act of 1978.

"(c) Whenever possible, the Military Airlift Command or Military Sealift Command shall be used, on a space-required basis, for the travel authorized by this section.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"430. Travel and transportation: dependent children of members stationed overseas.".

(b) Section 430 of title 37, United States Code, as added by subsection (a), shall apply only with respect to travel begun after September 30, 1983.

CLARIFICATION OF ELIGIBILITY FOR SEPARATION PAY

SEC. 911. (a) Subsection (c) of section 1174 of title 10, United States Code, is amended to read as follows:

"(c)(1) Except as provided in paragraphs (2) and (3), a member of an armed force other than a regular member who after September 14, 1981, is discharged or released from active duty and who has completed 5 or more, but fewer than 20, years of active service immediately before that discharge or release is entitled to separation pay computed under subsection (d)(1) or (d)(2), as determined by the Secretary concerned, if—

"(A) the member's discharge or release from active duty is involuntary; or

"(B) the member was not accepted for an additional tour of active duty for which he volunteered.

"(2) If the Secretary concerned determines that the conditions under which a member described in paragraph (1) is discharged or separated do not warrant separation pay under this section, that member is not entitled to that pay.

"(3) A member described in paragraph (1) who was not on the active-duty list when discharged or separated is not entitled to separation pay under this section unless such member had completed at least five years of continuous active duty immediately before such discharge or release. For purposes of this paragraph, a period of active duty is continuous if it is not interrupted by a break in service of more than 30 days.".

(b) Subsection (g)(2) of such section is amended by inserting ", other than section 1212 of this title," after "any other provision of law".

(c) The amendments made by this section shall take effect on October 1, 1983.

REIMBURSEMENTS FOR ACCOMMODATIONS IN PLACE OF QUARTERS

SEC. 912. (a) Paragraph (3) of section 7572(b) of title 10, United States Code, is amended to read as follows:

"(3) The total amount of reimbursement under this subsection may not exceed $9,000,000 for fiscal year 1981, $6,300,000 for fiscal year 1982, $1,700,000 for fiscal year 1983, and $1,300,000 for fiscal year 1984.".

(b) Section 3 of Public Law 96-357 (94 Stat. 1182; 10 U.S.C. 7572 note) is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1984".

ADVANCE PAYMENT OF TRAVEL AND TRANSPORTATION ALLOWANCES FOR ESCORTS AND ATTENDANTS OF DEPENDENTS

SEC. 913. (a) Section 1036 of title 10, United States Code, is amended by adding at the end thereof the following new sentence: "Such allowances may be paid in advance.".

(b) The last sentence of section 1040(a) of such title is amended by inserting ", and such expenses may be paid in advance" after "attendants".

(c) The amendments made by subsections (a) and (b) shall apply to travel performed by escorts or attendants of dependents on or after the date of the enactment of this Act.

PART B—RETIRED PAY MATTERS

LIMITATION ON APPLICABILITY OF ONE YEAR LOOK-BACK PROVISION

SEC. 921. (a)(1) Subsection (e) of section 1401a of title 10, United States Code, is repealed.

(2)(A) Notwithstanding the repeal of such subsection, the provisions of such subsection shall apply in the case of any member or former member of the Armed Forces eligible to retire on the date of the enactment of this Act for a period of three years after such date in the same manner such provisions would have applied had they not been repealed.

(B) The amount of retired or retainer pay of any member or former member of the Armed Forces who was eligible to retire on the date of the enactment of this Act and who becomes entitled to such pay at any time after the end of the three-year period beginning on the date of the enactment of this Act may not be less than it would have been had he become entitled to retired or retainer pay on the day before the end of such three-year period.

(b) Subsection (f) of such section is amended by striking out ", subject to subsection (e) of this section," in the second sentence.

ROUNDING OF RETIRED PAY AND SURVIVOR ANNUITIES TO NEXT LOWER WHOLE DOLLAR AMOUNT

SEC. 922. (a)(1) Section 1401 of title 10, United States Code, is amended by inserting after the second sentence the following new sentence: "The amount computed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(2) Section 1401a of such title is amended by adding at the end thereof the following new subsection:

"(g) Retired or retainer pay of a member or former member of an armed force as adjusted under this section, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(3) Section 1402(a) of such title is amended by striking out "as follows:" in the first sentence and inserting in lieu thereof "according to the following table. The amount recomputed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(4) Section 1402(d) of such title is amended by striking out "as follows:" in the first sentence and inserting in lieu thereof "according to the following table. The amount computed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(5) Section 1402a(a) of such title is amended by striking out "as follows:" and inserting in lieu thereof "according to the following table. The amount recomputed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(6) Section 1402a(d) of such title is amended by striking out "as follows:" and inserting in lieu thereof "according to the following table. The amount computed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(7) Section 3991 of such title is amended by inserting after the second sentence the following new sentence: "The amount computed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(8) Section 3992 of such title is amended by inserting after the sentence preceding the table the following new sentence: "The amount recomputed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(9) Section 6151 of such title is amended by adding at the end thereof the following new subsection:

"(e) Retired pay computed under subsection (b) or (c), if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(10)(A) Chapter 571 of such title is amended by adding at the end thereof the following new section:

"§ 6333. Treatment of fractions of dollar amounts in computing retired and retainer pay

"Retired or retainer pay computed under this chapter, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(B) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"6333. Treatment of fractions of dollar amounts in computing retired and retainer pay.".

(11) Section 6383 of such title is amended by adding at the end thereof the following new subsection:

"(k) Retired pay computed under subsection (c), if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(12) Section 8991 of such title is amended by inserting after the second sentence the following new sentence: "The amount com-

puted, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(13) Section 8992 of such title is amended by inserting after the sentence preceding the table the following new sentence: "The amount recomputed, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(14)(A) Section 1437(a) of such title is amended by adding at the end thereof the following new sentence: "The monthly amount of an annuity payable under this subchapter, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(B) Section 1451 of such title is amended by adding at the end thereof the following new subsection:

"(e) The monthly amount of an annuity payable under this subchapter, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(b) Section 423(a) of title 14, United States Code, is amended by adding at the end thereof the following new sentence: "Retired pay, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(c) Section 16(a) of the Coast and Geodetic Survey Commissioned Officers' Act of 1948 (33 U.S.C. 853o) is amended by adding at the end thereof the following new sentence: "Retired pay, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(d) Section 211(a) of the Public Health Service Act (42 U.S.C. 212(a)) is amended by adding at the end thereof the following new paragraph:

"(7) Retired pay computed under section 210(g)(3) or under paragraph (4) or (5) of this subsection, if not a multiple of $1, shall be rounded to the next lower multiple of $1.".

(e) The amendments made by this section shall take effect on October 1, 1983.

TERMINATION OF SIX-MONTH ROUNDING RULE FOR COMPUTING RETIRED PAY

SEC. 923. (a)(1) The text of each of the footnotes listed in paragraph (2) is amended to read as follows: "Before applying percentage factor, credit each full month of service that is in addition to the number of full years of service creditable to the member as one-twelfth of a year and disregard any remaining fractional part of a month.".

(2) The footnotes referred to in paragraph (1) are the following:

(A) Footnote 3 of the table in section 1401 of title 10, United States Code.

(B) Footnote 2 of the table in section 1402(a) of such title.

(C) Footnote 1 of the table in section 1402(d) of such title.

(D) Footnote 1 of the table in section 1402a(a) of such title.

(E) Footnote 1 of the table in section 1402a(d) of such title.

(F) Footnote 4 of the table in section 3991 of such title.

(G) Footnote 2 of the table in section 3992 of such title.

(H) Footnote 4 of the table in section 8991 of such title.

(I) Footnote 2 of the table in section 8992 of such title.

(b) Subsection (f) of section 1174 of title 10, United States Code, is amended to read as follows:

"(f) In determining a member's years of active service for the purpose of computing separation pay under this section, each full month of service that is in addition to the number of full years of service creditable to the member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(c)(1) Paragraph (2) of section 6151(b) of such title is amended to read as follows:

"(2) In determining the number of years to be used as a multiplier under this subsection, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(2) The text of section 6328 of such title is amended to read as follows:

"In determining the total number of years of service to be used as a multiplier in computing the retired pay of officers retiring under this chapter, each full month of service that is in addition to the number of full years of service creditable to an officer is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(3) The first sentence of section 6330(d) of such title is amended to read as follows: "For the purposes of subsection (c), each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(4) The text of section 6404 of such title is amended to read as follows:

"In determining the total number of years of service to be used as a multiplier in computing retired pay and separation pay on discharge under this chapter, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(d) The fourth sentence of section 423(a) of title 14, United States Code, is amended to read as follows: "In computing the number of years of service by which the rate of 2½ percent is multiplied, each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(e) Subsection (b) of section 16 of the Coast and Geodetic Survey Commissioned Officers' Act of 1948 (33 U.S.C. 853o) is amended to read as follows:

"(b) In computing the number of years of service of an officer for the purposes of subsection (a), each full month of service that is in addition to the number of full years of service creditable to a member is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(f) Section 211(e) of the Public Health Service Act (42 U.S.C. 212(e)) is amended by striking out "a part of" and all that follows and inserting in lieu thereof "each full month of service that is in addition to the number of full years of service credited to an officer is counted as one-twelfth of a year and any remaining fractional part of a month is disregarded.".

(g) The amendments made by this section shall apply with respect to (1) the computation of retired or retainer pay of any individual who becomes entitled to that pay after September 30, 1983, and (2) the recomputation of retired pay under section 1402, 1402a, 3992, or 8992 of title 10, United States Code, of any individual who after September 30, 1983, becomes entitled to recompute retired pay under any such section.

RETIRED PAY FOR CERTAIN OTHERWISE INELIGIBLE RESERVISTS

SEC. 924. (a) Section 1331(c) of title 10, United States Code, relating to retired pay for nonregular service, is amended by striking out "unless he" the first place it appears and all that follows in such section and inserting in lieu thereof "unless—

"(1) he performed active duty after April 5, 1917, and before November 12, 1918, or after September 8, 1940, and before January 1, 1947; or

"(2) he performed active duty (other than for training) after June 26, 1950, and before July 28, 1953, after August 13, 1961, and before May 31, 1963, or after August 4, 1964, and before March 28, 1973.".

(b) The amendment made by subsection (a) shall apply with respect to retired pay payable for months beginning after September 30, 1983, or the date of the enactment of this Act, whichever is later.

ACCRUAL FUNDING FOR MILITARY RETIREMENT SYSTEM

SEC. 925. (a)(1) Title 10, United States Code, is amended by inserting after chapter 73 the following new chapter:

"CHAPTER 74—DEPARTMENT OF DEFENSE MILITARY RETIREMENT FUND

"Sec.
"1461. Establishment and purpose of Fund; definition.
"1462. Assets of Fund.
"1463. Payments from the Fund.
"1464. Board of Actuaries.
"1465. Determination of contributions to the Fund.
"1466. Payments into the Fund.
"1467. Investment of assets of Fund.

"§ 1461. Establishment and purpose of Fund; definition

"(a) There is established on the books of the Treasury a fund to be known as the Department of Defense Military Retirement Fund (hereinafter in this chapter referred to as the 'Fund'), which shall be administered by the Secretary of the Treasury. The Fund shall be used for the accumulation of funds in order to finance on an actuarially sound basis liabilities of the Department of Defense under military retirement and survivor benefit programs.

"(b) In this chapter, 'military retirement and survivor benefit programs' means—

"(1) the provisions of this title creating entitlement to, or determining the amount of, retired or retainer pay; and

"(2) the programs under the jurisdiction of the Department of Defense providing annuities for survivors of members and former members of the armed forces, including chapter 73 of this title, section 4 of Public Law 92-425, and section 5 of Public Law 96-402.

"§ 1462. Assets of Fund

"There shall be deposited into the Fund the following, which shall constitute the assets of the Fund:

"(1) Amounts paid into the Fund under section 1466 of this title.

"(2) Any amount appropriated to the Fund.

"(3) Any return on investment of the assets of the Fund.

"§ 1463. Payments from the Fund

"(a) There shall be paid from the Fund—

"(1) retired pay payable to persons on the retired lists of the Army, Navy, Air Force, and Marine Corps;

"(2) retainer pay payable to members of the Fleet Reserve and Fleet Marine Corps Reserve; and

"(3) benefits payable under programs under the jurisdiction of the Department of Defense that provide annuities for survivors of members and former members of the

armed forces, including chapter 73 of this title, section 4 of Public Law 92-425, and section 5 of Public Law 96-402.

"(b) The assets of the Fund are hereby made available for payments under subsection (a).

"§ 1464. Board of Actuaries

"(a)(1) There is established in the Department of Defense a Department of Defense Retirement Board of Actuaries (hereinafter in this chapter referred to as the 'Board'). The Board shall consist of three members, who shall be appointed by the President from among qualified professional actuaries who are members of the Society of Actuaries.

"(2)(A) Except as provided in subparagraph (B), the members of the Board shall serve for a term of 15 years, except that a member of the Board appointed to fill a vacancy occurring before the end of the term for which his predecessor was appointed shall only serve until the end of such term. A member may serve after the end of his term until his successor has taken office. A member of the Board may be removed by the President for misconduct or failure to perform functions vested in the Board, and for no other reason.

"(B) Of the members of the Board who are first appointed under this subsection, one each shall be appointed for terms ending five, ten, and fifteen years, respectively, after the date of appointment, as designated by the President at the time of appointment.

"(3) A member of the Board who is not otherwise an employee of the United States is entitled to receive pay at the daily equivalent of the annual rate of basic pay of the highest rate of basic pay then currently being paid under the General Schedule of subchapter III of chapter 53 of title 5, for each day the member is engaged in the performance of duties vested in the Board and is entitled to travel expenses, including a per diem allowance, in accordance with section 5703 of title 5.

"(b) The Board shall report to the Secretary of Defense annually on the actuarial status of the Fund and shall furnish its advice and opinion on matters referred to it by the Secretary.

"(c) The Board shall review valuations of the Fund under section 1466 of this title and under chapter 95 of title 31 and shall report periodically, not less than once every four years, to the President and Congress on the status of the Fund. The Board shall include in such reports recommendations for such changes as in the Board's judgment are necessary to protect the public interest and maintain the Fund on a sound actuarial basis.

"§ 1465. Determination of contributions to the Fund

"(a) Not later than six months after the Board of Actuaries is first appointed, the Board shall determine the amount that is the present value (as of October 1, 1984) of future benefits payable from the Fund that are attributable to service in the armed forces performed before October 1, 1984. That amount is the original unfunded liability of the Fund. The Board shall determine the period of time over which the original unfunded liability should be liquidated and shall determine an amortization schedule for the liquidation of such liability over that period. Contributions to the Fund for the liquidation of the original unfunded liability in accordance with such schedule shall be made as provided in section 1466(b) of this title.

"(b)(1) The Secretary of Defense shall determine each year, in sufficient time for inclusion in budget requests for the following fiscal year, the total amount of Department of Defense contributions to be made to the Fund during that fiscal year under section 1466(a) of this title. That amount shall be determined as the product of—

"(A) the current estimate of the value of the single level percentage of basic pay to be determined at the time of the next actuarial valuation under subsection (c); and

"(B) the total amount of basic pay expected to be paid during that fiscal year to members of the armed forces (other than the Coast Guard) on active duty or in the Selected Reserve.

"(2) The amount determined under paragraph (1) for any fiscal year is the amount needed to be appropriated to the Department of Defense for that fiscal year for payments to be made to the Fund during that year under section 1466(a) of this title. The President shall include not less than the full amount so determined in the budget transmitted to Congress for that fiscal year under section 1105 of title 31. The President may comment and make recommendations concerning any such amount.

"(c)(1)(A) Not less often than every four years, the Secretary of Defense shall carry out an actuarial valuation of Department of Defense military retirement and survivor benefit programs. Each actuarial valuation of such programs shall include a determination (using the aggregate entry-age normal cost method) of a single level percentage of basic pay to be used for the purposes of subsection (b) and section 1466(a) of this title.

"(2) If at the time of any such valuation (or any valuation carried out in order to comply with chapter 95 of title 31) there has been a change in benefits under a military retirement or survivor benefit program that has been made since the last such valuation and such change in benefits increases or decreases the present value of amounts payable from the Fund, the Secretary of Defense shall determine an amortization methodology and schedule for the amortization of the cumulative unfunded liability (or actuarial gain to the Fund) created by such change and any previous such changes so that the present value of the sum of the amortization payments (or reductions in payments that would otherwise be made) equals the cumulative increase (or decrease) in the present value of such amounts.

"(3) If at the time of any such valuation (or any valuation carried out in order to comply with chapter 95 of title 31) the Secretary of Defense determines that, based upon changes in actuarial assumptions since the last valuation, there has been an actuarial gain or loss to the Fund, the Secretary shall determine an amortization methodology and schedule for the amortization of the cumulative gain or loss to the Fund created by such change in assumptions and any previous such changes in assumptions through an increase or decrease in the payments that would otherwise be made to the Fund.

"(4) Contributions to the Fund in accordance with amortization schedules under paragraphs (2) and (3) shall be made as provided in section 1466(b) of this title.

"(d) All determinations under this section shall be made using methods and assumptions approved by the Board of Actuaries (including assumptions of interest rates and inflation) and in accordance with generally accepted actuarial principles and practices.

"(e) The Secretary of Defense shall provide for the keeping of such records as are necessary for determining the actuarial status of the Fund.

"§ 1466. Payments into the Fund

"(a) The Secretary of Defense shall pay into the Fund at the end of each month as the Department of Defense contribution to the Fund for that month the amount that is the product of—

"(1) the level percentage of basic pay determined under the most recent (as of the first day of the current fiscal year) actuarial valuation under section 1465(c) of this title; and

"(2) the total amount of basic pay paid that month to members of the armed forces (other than the Coast Guard) on active duty or in the Selected Reserve.

Amounts paid into the Fund under this subsection shall be paid from funds available for the pay of members of the armed forces under the jurisdiction of the Secretary of a military department.

"(b)(1) At the beginning of each fiscal year the Secretary of the Treasury shall promptly pay into the Fund from the General Fund of the Treasury the amount certified to the Secretary by the Secretary of Defense under paragraph (3). Such payment shall be the contribution to the Fund for that fiscal year required by sections 1465(a) and 1465(c) of this title.

"(2) At the beginning of each fiscal year the Secretary of Defense shall determine the sum of the following:

"(A) The amount of the payment for that year under the amortization schedule determined by the Board of Actuaries under section 1465(a) of this title for the amortization of the original unfunded liability of the Fund.

"(B) The amount (including any negative amount) for that year under the most recent amortization schedule determined by the Secretary of Defense under section 1465(c)(2) of this title for the amortization of any cumulative unfunded liability (or any gain) to the Fund resulting from changes in benefits.

"(C) The amount (including any negative amount) for that year under the most recent amortization schedule determined by the Secretary of Defense under section 1465(c)(3) of this title for the amortization of any cumulative actuarial gain or loss to the Fund.

"(3) The Secretary of Defense shall promptly certify the amount determined under paragraph (2) each year to the Secretary of the Treasury.

"§ 1467. Investment of assets of Fund

"The Secretary of the Treasury shall invest such portion of the Fund as is not in the judgment of the Secretary of Defense required to meet current withdrawals. Such investments shall be in public debt securities with maturities suitable to the needs of the Fund, as determined by the Secretary of Defense, and bearing interest at rates determined by the Secretary of the Treasury, taking into consideration current market yields on outstanding marketable obligations of the United States of comparable maturities. The income on such investments shall be credited to and form a part of the Fund.".

(2) The tables of chapters at the beginning of subtitle A, and at the beginning of part II of subtitle A, of title 10, United States Code, are amended by inserting after the item relating to chapter 73 the following new item:

"74. Department of Defense Military Retirement Fund..... 1461".

(b)(1) Section 1464 (relating to the Board of Actuaries) of title 10, United States Code,

as added by subsection (a), shall take effect on October 1, 1983.

(2) Sections 1463 (relating to payments from the Fund) and 1466 (relating to payments to the Fund) of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1984.

(3) There shall be transferred into the Fund on October 1, 1984, any unobligated balances of appropriations made to the Department of Defense that are currently available for retired pay, and amounts so transferred shall be part of the assets of the Fund.

PART C—HEALTH-CARE MATTERS

CHAMPUS PROVISIONS

SEC. 931. (a) Section 1079 of title 10, United States Code, is amended—

(1) in subsection (a)—

(A) by striking out the period at the end of clause (5) and inserting in lieu thereof "; and"; and

(B) by inserting after such clause the following new clause:

"(6) inpatient mental health services may not (except as provided in subsection (i)) be provided to a patient in excess of 60 days in any year."; and

(2) by adding at the end thereof the following new subsections:

"(i) The limitation in subsection (a)(6) does not apply in the case of inpatient mental health services—

"(1) provided under the program for the handicapped under subsection (d);

"(2) provided as residential treatment care;

"(3) provided as partial hospital care; or

"(4) provided pursuant to a waiver authorized by the Secretary of Defense because of extraordinary medical or psychological circumstances that are confirmed by review by a non-Federal health professional pursuant to regulations prescribed by the Secretary of Defense.

"(j)(1) A benefit may not be paid under a plan covered by this section in the case of a person enrolled in any other insurance, medical service, or health plan to the extent that the benefit is also a benefit under the other plan, except in the case of a plan administered under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.).

"(2)(A) The amount to be paid to a provider of services for services provided under a plan covered by this section may be determined under joint regulations to be prescribed by the Secretary of Defense and the Secretary of Health and Human Services which provide that the amount of such payments shall be determined to the extent practicable in accordance with the same reimbursement rules as apply to payments to providers of services of the same type under title XVIII of the Social Security Act (42 U.S.C. 1395 et seq.).

"(B) In subparagraph (A), 'provider of services' means a hospital, skilled nursing facility, comprehensive outpatient rehabilitation facility, home health agency, or other institutional facility providing services for which payment may be made under a plan covered by this section.

"(k) A plan covered by this section may include provision of liver transplants (including the cost of acquisition and transportation of the donated liver) in accordance with this subsection. Such a liver transplant may be provided if—

"(1) the transplant is for a dependent considered appropriate for that procedure by the Secretary of Defense in consultation with the Secretary of Health and Human Services and such other entities as the Secretary considers appropriate; and

"(2) the transplant is to be carried out at a health-care facility that has been approved for that purpose by the Secretary of Defense after consultation with the Secretary of Health and Human Services and such other entities as the Secretary considers appropriate.".

(b) Subsection (d) of section 1086 of such title is amended to read as follows:

"(d) The provisions of section 1079(j) of this title shall apply to a plan covered by this section.".

(c) The amendments made by this section shall take effect on October 1, 1983, except that—

(1) clause (6) of section 1079(a) of title 10, United States Code, as added by subsection (a)(1), shall not apply in the case of inpatient mental health services provided to a patient admitted before January 1, 1983, for so long as that patient remains continuously in inpatient status for medically or psychologically necessary reasons; and

(2) subsection (k) of section 1079 of such title, as added by subsection (a)(1), shall apply with respect to liver transplant operations performed on or after July 1, 1983.

AUTHORITY FOR INCREASED USAGE OF CONTRACT HEALTH CARE PROVIDERS

SEC. 932. (a)(1) Chapter 55 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1091. Contracts for direct health care providers

"(a) The Secretary concerned may contract with persons for services including personal services for the provision of direct health care services determined by the Secretary concerned to be required for the purposes of this chapter.

"(b) A person with whom the Secretary contracts under this section for the provision of direct health care services under this chapter may be compensated at a rate prescribed by the Secretary concerned, but at a rate not greater than the rate of basic pay and allowances authorized by chapters 3 and 7 of title 37 for a commissioned officer in pay grade O-6 with 26 or more years of service computed under section 205 of such title.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1091. Contracts for direct health care providers.".

(b)(1) Section 4022 of title 10, United States Code, is repealed.

(2) The table of sections at the beginning of chapter 373 of such title is amended by striking out the item relating to section 4022.

(c)(1) Section 9022 of title 10, United States Code, is repealed.

(2) The table of sections at the beginning of chapter 873 of such title is amended by striking out the item relating to section 9022.

(d) Section 201 of title 37, United States Code, is amended—

(1) by striking out subsection (b);

(2) by redesignating subsections (c) through (f) as subsections (b) through (e), respectively; and

(3) by striking out "subsections (d) and (e)" in subsection (e), as redesignated by clause (2), and inserting in lieu thereof "subsections (c) and (d)".

(e) Chapter 7 of title 37, United States Code, is amended—

(1) by striking out section 421; and

(2) by striking out in the table of sections at the beginning of such chapter the item relating to section 421.

(f) The amendments made by this section shall take effect on October 1, 1983. Any contract of employment entered into under the authority of section 4022 or 9022 of title 10, United States Code, before the effective date of this section and which is in effect on such date shall remain in effect in accordance with the terms of such contract.

STUDIES AND DEMONSTRATION PROJECTS RELATING TO HEALTH AND MEDICAL CARE

SEC. 933. (a)(1) Chapter 55 of title 10, United States Code, is amended by adding after section 1091 (as added by section 932) the following new section:

"§ 1092. Studies and demonstration projects relating to delivery of health and medical care

"(a)(1) The Secretary of Defense, in consultation with the Secretary of Health and Human Services, shall conduct studies and demonstration projects on the health care delivery system of the uniformed services with a view to improving the quality, efficiency, convenience, and cost effectiveness of providing health care services (including dental care services) under this title to members and former members and their dependents. Such studies and demonstration projects may include the following:

"(A) Alternative methods of payment for health and medical care services.

"(B) Cost-sharing by eligible beneficiaries.

"(C) Methods of encouraging efficient and economical delivery of health and medical care services.

"(D) Innovative approaches to delivery and financing of health and medical care services.

"(E) Alternative approaches to reimbursement for the administrative charges of health care plans.

"(F) Prepayment for medical care services provided to maintain the health of a defined population.

"(2) The Secretary of Defense shall include in the studies conducted under paragraph (1) alternative programs for the provision of dental care to the spouses and dependents of members of the uniformed services who are on active duty, including a program under which dental care would be provided the spouses and dependents of such members under insurance or dental plan contracts. A demonstration project may not be conducted under this section that provides for the furnishing of dental care under an insurance or dental plan contract.

"(3) The Secretary of Defense shall submit to Congress from time to time written reports on the results of the studies and demonstration projects conducted under this subsection and shall include in such reports such recommendations for improving the health-care delivery systems of the uniformed services as the Secretary considers appropriate.

"(b) Subject to the availability of appropriations for that purpose, the Secretary of Defense may enter into contracts with public or private agencies, institutions, and organizations to conduct studies and demonstration projects under subsection (a).

"(c) The Secretary of Defense may obtain the advice and recommendations of such advisory committees as the Secretary considers appropriate. Each such committee consulted by the Secretary under this subsection shall evaluate the proposed study or demonstration project as to the soundness of the objectives of such study or demonstration project, the likelihood of obtaining productive results based on such study or demonstration project, the resources which were required to

conduct such study or demonstration project, and the relationship of such study or demonstration project to other ongoing or completed studies and demonstration projects.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1092. Studies and demonstration projects relating to delivery of health and medical care.".

(b) Section 1092 of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1983.

MEDICAL MALPRACTICE PROTECTION FOR HEALTH-CARE PERSONNEL OF THE SOLDIERS' AND AIRMEN'S HOME

SEC. 934. (a) Subsection (a) of section 1089 of title 10, United States Code, is amended by inserting "the United States Soldiers' and Airmen's Home," after "the Department of Defense,".

(b) Subsection (f) of such section is amended by striking out "or his designee may, to the extent that he or his designee deems" and inserting in lieu thereof "may, to the extent that the head of the agency concerned considers".

(c) Subsection (g) of such section is amended—

(1) by striking out "and" at the end of clause (2);

(2) by redesignating clause (3) as clause (4); and

(3) by inserting after clause (2) the following new clause (3):

"(3) the Board of Commissioners of the United States Soldiers' and Airmen's Home, in the case of an employee of the United States Soldiers' and Airmen's Home; and".

(d) The amendments made by this section shall apply only to claims accruing on or after the date of the enactment of this Act.

ADJUSTMENTS IN STIPEND PAID TO RECIPIENTS OF ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIPS

SEC. 935. (a) Section 2121(d) of title 10, United States Code, is amended to read as follows:

"(d) Except when serving on active duty pursuant to subsection (c), a member of the program shall be entitled to a stipend at the rate of $579 per month. That rate shall be increased annually by the Secretary of Defense effective on July 1 of each year by an amount (rounded to the next highest multiple of $1) equal to—

"(1) the amount of such stipend (as previously adjusted (if at all)), multiplied by

"(2) the overall percentage of the adjustment (if such adjustment is an increase) in the rates of basic pay for members of the uniformed services made effective for the fiscal year in which the school year ends.".

(b) The amendment made by subsection (a) shall take effect on October 1, 1983.

PART D—SURVIVOR BENEFITS

CLARIFICATION OF SURVIVOR BENEFITS COVERAGE FOR FORMER SPOUSES

SEC. 941. (a)(1) The second sentence of subsection (a)(5) of section 1448 of title 10, United States Code, is amended by inserting "except in accordance with subsection (b)(3)" after "may not be revoked".

(2) Subsection (b) of such section is amended to read as follows:

"(b)(1) A person who is not married and does not have a dependent child when he becomes eligible to participate in the Plan may elect to provide an annuity to a natural person with an insurable interest in that person. In the case of a person providing an annuity under this paragraph by virtue of eligiblity under subsection (a)(1)(B), such an election shall include a designation under subsection (e).

"(2) A person who has a former spouse when he becomes eligible to participate in the Plan may elect to provide an annuity to that former spouse. In the case of a person with a spouse or a dependent child, such an election prevents payment of an annuity to that spouse or child, including payment under subsection (d). If there is more than one former spouse, the person shall designate which former spouse is to be provided the annuity. In the case of a person providing an annuity under this paragraph by virtue of eligibility under subsection (a)(1)(B), such an election shall include a designation under subsection (e).

"(3)(A) A person—

"(i) who is a participant in the Plan and is providing coverage for a spouse or a spouse and child (even though there is no beneficiary currently eligible for such coverage), and

"(ii) who has a former spouse who was not that person's former spouse when he became eligible to participate in the Plan,

may (subject to subparagraph (B)) elect to provide an annuity to that former spouse. Any such election terminates any previous coverage under the Plan and must be written, signed by the person, and received by the Secretary concerned within one year after the date of the decree of divorce, dissolution, or annulment.

"(B) A person may not make an election under subparagraph (A) to provide an annuity to a former spouse who that person married after becoming eligible for retired or retainer pay unless—

"(i) the person was married to that former spouse for at least one year, or

"(ii) that former spouse is the parent of issue by that marriage.

"(C) An election under this paragraph may not be revoked except in accordance with section 1450(f) of this title and is effective as of the first day of the first calendar month following the month in which it is received by the Secretary concerned. This paragraph does not provide the authority to change a designation previously made under subsection (e).

"(D) If a person who is married makes an election to provide an annuity to a former spouse under this paragraph, that person's spouse shall be notified of that election.

"(4) A person who elects to provide an annuity to a former spouse under paragraph (2) or (3) shall, at the time of making the election, provide the Secretary concerned with a written statement (in a form to be prescribed by that Secretary and signed by such person and the former spouse) setting forth whether the election is being made pursuant to a written agreement previously entered into voluntarily by such person as a part of or incident to a proceeding of divorce, dissolution, or annulment and (if so) whether such voluntary written agreement has been incorporated in, or ratified or approved by, a court order.".

(3) Section 1450 of title 10, United States Code, is amended—

(A) by striking out "at the time the person to whom section 1448 applies became entitled to retired or retainer pay" in subsection (a)(4); and

(B) by inserting "(without regard to the eligibility of the person making the change of election to make an election under such section)" before the period at the end of the third sentence of subsection (f)(1).

(b) In the case of a person who on the date of the enactment of this Act is a person described in subparagraph (A) of subsection (b)(3) of section 1448 of title 10, United States Code (as amended by subsection (a)(2)), such subsection shall apply to that person as if the one-year period provided for in subparagraph (A) of such subsection began on the date of the enactment of this Act.

(c)(1) Section 1447(8) of title 10, United States Code, is amended by striking out "annulment, or legal separation," both places it appears and inserting in lieu thereof "or annulment".

(2) Section 1448(a)(3) is amended—

(A) by inserting "for a former spouse" after "an annuity" the second place it appears in subparagraphs (A) and (B); and

(B) by striking out "of this section" both places it appears.

(3) Section 1450(f) of such title is amended—

(A) by striking out "of this subsection" in paragraph (1); and

(B) by striking out "annulment, or legal separation," in paragraph (2) and inserting in lieu thereof "or annulment,".

(4) Section 1006(e)(3) of the Uniformed Services Former Spouses' Protection Act (title X of Public Law 97-252; 96 Stat. 738) is amended by striking out "section" and all that follows and inserting in lieu thereof "section 1072 of title 10, United States Code.".

EXTENSION OF MINIMUM INCOME PROVISION FOR CERTAIN WIDOWS

SEC. 942. (a) Section 4(a)(1) of the Act entitled "An Act to amend chapter 73 of title 10, United States Code, to establish a Survivor Benefit Plan, and for other purposes", approved September 21, 1972 (10 U.S.C. 1448 note), is amended by striking out "on the effective date of this Act is, or within one calendar year after that date becomes," and inserting in lieu thereof "on September 21, 1972, was, or during the period beginning on September 22, 1972, and ending on March 20, 1974, became,".

(b) Any annuity payable by reason of subsection (a) shall be payable only for months after September 1983.

CLARIFICATION OF CONTINUING RESPONSIBILITY FOR FUNDING OF CERTAIN SURVIVORS' BENEFITS

SEC. 943. Section 156(g)(1) of Public Law 97-377 (96 Stat. 1922) is amended—

(1) by striking out "fiscal year 1983" and inserting in lieu thereof "each fiscal year";

(2) by striking out "from the 'Retired Pay, Defense' account of the Department of Defense"; and

(3) by inserting between the first and second sentences the following: "During fiscal year 1983, transfers under this subsection shall be made from the 'Retired Pay, Defense' account of the Department of Defense. During subsequent fiscal years, such transfers shall be made from such account or from funds otherwise available to the Secretary for the purpose of the payment of such benefits and expenses.".

TITLE X—MILITARY PERSONNEL MATTERS

PART A—OFFICER PERSONNEL MANAGEMENT AND TRAINING

TEMPORARY MODIFICATION IN CERTAIN GENERAL AND FLAG OFFICER GRADE LIMITATIONS

SEC. 1001. (a) During fiscal year 1984, the number of officers of the Air Force authorized under section 525(b)(1) of title 10, United States Code, to be on active duty in the grade of general is increased by one.

(b) During fiscal year 1984, the number of officers of the Navy authorized under section 525(b)(2) of title 10, United States Code, to be on active duty in grades above rear admiral is increased by three. None of the additional officers in grades above rear admiral authorized by this section may be in the grade of admiral.

(c) During fiscal year 1984, a commissioned officer serving in the position of Director of the Intelligence Community Staff shall not be counted against the numbers and percentages of commissioned officers of the grade of such officer authorized for the Armed Force of which he is a member, except that during such year only one commissioned officer of the Armed Forces occupying the position of Director of Central Intelligence or Deputy Director of Central Intelligence as provided for in section 102 of the National Security Act of 1947 (50 U.S.C. 403) or the position of Director of the Intelligence Community Staff may be exempt from such numbers and percentages at any one time.

PERFORMANCE OF CIVIL FUNCTIONS BY MILITARY OFFICERS

SEC. 1002. (a) Section 973 of title 10, United States Code, is amended by striking out subsection (b) and inserting in lieu thereof the following:

"(b)(1) This subsection applies—

"(A) to a regular officer of an armed force on the active-duty list (and a regular officer of the Coast Guard on the active duty promotion list);

"(B) to a retired regular officer of an armed force serving on active duty under a call or order to active duty for a period in excess of 180 days; and

"(C) to a reserve officer of an armed force serving on active duty under a call or order to active duty for a period in excess of 180 days.

"(2)(A) Except as otherwise authorized by law, an officer to whom this subsection applies may not hold, or exercise the functions of, a civil office in the Government of the United States—

"(i) that is an elective office;

"(ii) that requires an appointment by the President by and with the advice and consent of the Senate; or

"(iii) that is a position in the Executive Schedule under sections 5312 through 5317 of title 5.

"(B) An officer to whom this subsection applies may hold or exercise the functions of a civil office in the Government of the United States that is not described in subparagraph (A) when assigned or detailed to that office or to perform those functions.

"(3) Except as otherwise authorized by law, an officer to whom this subsection applies may not hold or exercise, by election or appointment, the functions of a civil office in the government of a State, the District of Columbia, or a territory, possession, or commonwealth of the United States (or of any political subdivision of any such government).

"(4) Nothing in this subsection shall be construed to invalidate any action undertaken by an officer in furtherance of assigned official duties.

"(c) The Secretary of Defense, and the Secretary of Transportation with respect to the Coast Guard when it is not operating in the Navy, shall prescribe regulations to implement this section.".

(b) Nothing in section 973(b) of title 10, United States Code, as in effect before the date of the enactment of this Act, shall be construed—

(1) to invalidate any action undertaken by an officer of an Armed Force in furtherance of assigned official duties; or

(2) to have terminated the military appointment of an officer of an Armed Force by reason of the acceptance of a civil office, or the exercise of its functions, by that officer in furtherance of assigned official duties.

(c) Nothing in section 973(b)(3) of title 10, United States Code, as added by subsection (a), shall preclude a Reserve officer to whom such section applies from holding or exercising the functions of an office described in such section for the term to which the Reserve officer was elected or appointed if, before the date of the enactment of this Act, the Reserve officer accepted appointment or election to that office in accordance with the laws and regulations in effect at the time of such appointment or election.

(d) The Act entitled "An Act to grant the consent of the United States to the Red River Compact among the States of Arkansas, Louisiana, Oklahoma, and Texas", approved December 22, 1980 (94 Stat. 3305), is amended by adding at the end thereof the following new section:

"SEC. 5. (a) The President may appoint a regular officer of the Army, Navy, Air Force, or Marine Corps who is serving on active duty as the Federal Commissioner of the Commission.

"(b) Notwithstanding the provisions of section 973(b) of title 10, United States Code, acceptance by a regular officer of the Army, Navy, Air Force, or Marine Corps of an appointment as the Federal Commissioner of the Commission, or the exercise of the functions of Federal Commissioner and chairman of the Commission, by such officer shall not terminate or otherwise affect such officer's appointment as a military officer.".

MODIFICATIONS TO RESERVE OFFICERS' TRAINING CORPS SCHOLARSHIP PROGRAM

SEC. 1003. (a)(1) Section 2101(3) of title 10, United States Code, is amended by striking out the period and inserting in lieu thereof "(except that, in the case of a student enrolled in an academic program which has been approved by the Secretary of the military department concerned and which requires more than four academic years for completion of baccalaureate degree requirements, including elective requirements of the Senior Reserve Officers' Training Corps course, such term includes a fifth academic year or a combination of a part of a fifth academic year and summer sessions).".

(2) Section 2104(a) of such title is amended by inserting "at least" before "two".

(3) Section 2107(c) of such title is amended by inserting after the first sentence the following new sentence: "In the case of a student enrolled in an academic program which has been approved by the Secretary of the military department concerned and which requires more than four academic years for completion of baccalaureate degree requirements, including elective requirements of the Senior Reserve Officers' Training Corps course, financial assistance under this section may also be provided during a fifth academic year or during a combination of a part of a fifth academic year and summer sessions.".

(4) Section 209(a) of title 37, United States Code, is amended by striking out "20" and inserting in lieu thereof "30".

(b)(1) Section 2005 of title 10, United States Code, is amended by adding at the end thereof the following new subsection:

"(f) The Secretary concerned shall require, as a condition to the Secretary providing financial assistance under section 2107 or 2107a of this title to any person, that such person enter into an agreement described in subsection (a). In addition to the requirements of clauses (1) through (4) of such subsection, any agreement required by this subsection shall provide—

"(1) that if such person fails to complete the education requirements specified in the agreement, the Secretary will have the option to order such person to reimburse the United States in the manner provided for in clause (3) of such subsection without the Secretary first ordering such person to active duty as provided for under clause (2) of such subsection and section 2107(f) and 2107a(f) of this title; and

"(2) that any amount owed by such person to the United States under such agreement shall bear interest at the rate equal to the highest rate being paid by the United States on the day on which the reimbursement is determined to be due for securities having maturities of ninety days or less and shall accrue from the day on which the member is first notified of the amount due to the United States as a reimbursement under this section.".

(2) The amendment made by paragraph (1) shall apply with respect to agreements entered into after September 30, 1983.

(c)(1) Section 2107(b)(5) of title 10, United States Code, is amended—

(A) by striking out "either" in the matter preceding subparagraph (A)(ii);

(B) by striking out "or" at the end of subparagraph (A);

(C) by striking out the period at the end and inserting in lieu thereof "; or"; and

(D) by adding at the end the following:

"(C)(i) accept an appointment, if offered, as a commissioned officer in the Army, Navy, Air Force, or Marine Corps, as the case may be; and

"(ii) serve in a reserve component of that armed force until the sixth anniversary of the receipt of such appointment, unless such appointment is otherwise extended by subsection (d) of section 2108 of this title, under such terms and conditions as may be prescribed by the Secretary of the military department concerned.".

(2) The second sentence of section 2107(b) of such title is amended—

(A) by inserting "or (5)(C)" after "(5)(B)"; and

(B) by striking out the period at the end and inserting in lieu thereof ", except that performance of service under clause (5)(C) shall include not less than two years of active duty.".

(3) The amendments made by this subsection shall apply with respect to agreements entered into under section 2107(b)(5) of title 10, United States Code, after September 30, 1983.

SELECTION OF PERSONS FROM FOREIGN COUNTRIES TO RECEIVE INSTRUCTION AT THE SERVICE ACADEMIES

SEC. 1004. (a)(1) Section 4344 of title 10, United States Code, is amended to read as follows:

"§ 4344. Selection of persons from foreign countries

"(a)(1) The Secretary of the Army may permit not more than 40 persons at any one time from foreign countries to receive instruction at the Academy. Such persons shall be in addition to the authorized strength of the Corps of the Cadets of the Academy under section 4342 of this title.

"(2) The Secretary of the Army, upon approval by the Secretary of Defense, shall de-

termine the countries from which persons may be selected for appointment under this section and the number of persons that may be selected from each country. The Secretary of the Army may establish entrance qualifications and methods of competition for selection among individual applicants under this section and shall select those persons who will be permitted to receive instruction at the Academy under this section.

"(b)(1) A person receiving instruction under this section is entitled to the pay, allowances, and emoluments of a cadet appointed from the United States, and from the same appropriations.

"(2) Each foreign country from which a cadet is permitted to receive instruction at the Academy under this section shall reimburse the United States for the cost of providing such instruction, including the cost of pay, allowances, and emoluments provided under paragraph (1) unless a written waiver of reimbursement is granted by the Secretary of Defense. The Secretary of the Army shall prescribe the rates for reimbursement under this paragraph.

"(c)(1) Except as the Secretary of the Army determines, a person receiving instruction under this section is subject to the same regulations governing admission, attendance, discipline, resignation, discharge, dismissal, and graduation as a cadet at the Academy appointed from the United States. The Secretary may prescribe regulations with respect to access to classified information by a person receiving instruction under this section that differ from the regulations that apply to a cadet at the Academy appointed from the United States.

"(2) A person receiving instruction under this section is not entitled to an appointment in an armed force of the United States by reason of graduation from the Academy.

"(d) A person receiving instruction under this section is not subject to section 4346(d) of this title.".

(2) Section 4345 of such title is repealed.

(3) The table of sections at the beginning of chapter 403 of such title is amended by striking out the items relating to sections 4344 and 4345 and inserting in lieu thereof the following:

"4344. Selection of persons from foreign countries.".

(b)(1) Section 6957 of title 10, United States Code, is amended to read as follows:

"§ 6957. Selection of persons from foreign countries

"(a)(1) The Secretary of the Navy may permit not more than 40 persons at any one time from foreign countries to receive instruction at the Academy. Such persons shall be in addition to the authorized strength of the midshipmen under section 6954 of this title.

"(2) The Secretary of the Navy, upon approval by the Secretary of Defense, shall determine the countries from which persons may be selected for appointment under this section and the number of persons that may be selected from each country. The Secretary of the Navy may establish entrance qualifications and methods of competition for selection among individual applicants under this section and shall select those persons who will be permitted to receive instruction at the Academy under this section.

"(b)(1) A person receiving instruction under this section is entitled to the pay, allowances, and emoluments of a midshipman appointed from the United States, and from the same appropriations.

"(2) Each foreign country from which a midshipman is permitted to receive instruction at the Academy under this section shall reimburse the United States for the cost of providing such instruction, including the cost of pay, allowances, and emoluments provided under paragraph (1) unless a written waiver of reimbursement is granted by the Secretary of Defense. The Secretary of the Navy shall prescribe the rates for reimbursement under this paragraph.

"(c)(1) Except as the Secretary of the Navy determines, a person receiving instruction under this section is subject to the same regulations governing admission, attendance, discipline, resignation, discharge, dismissal, and graduation as a midshipman at the Academy appointed from the United States. The Secretary may prescribe regulations with respect to access to classified information by a person receiving instruction under this section that differ from the regulations that apply to a midshipman at the Academy appointed from the United States.

"(2) A person receiving instruction under this section is not entitled to an appointment in an armed force of the United States by reason of graduation from the Academy.".

(2) The item relating to section 6957 in the table of sections at the beginning of chapter 603 of such title is amended to read as follows:

"6957. Selection of persons from foreign countries.".

(c)(1) Section 9344 of title 10, United States Code, is amended to read as follows:

"§ 9344. Selection of persons from foreign countries

"(a)(1) The Secretary of the Air Force may permit not more than 40 persons at any one time from foreign countries to receive instruction at the Academy. Such persons shall be in addition to the authorized strength of the Air Force Cadets of the Academy under section 9342 of this title.

(2) The Secretary of the Air Force, upon approval by the Secretary of Defense, shall determine the countries from which persons may be selected for appointment under this section and the number of persons that may be selected from each country. The Secretary of the Air Force may establish entrance qualifications and methods of competition for selection among individual applicants under this section and shall select those persons who will be permitted to receive instruction at the Academy under this section.

"(b)(1) A person receiving instruction under this section is entitled to the pay, allowances, and emoluments of a cadet appointed from the United States, and from the same appropriations.

"(2) Each foreign country from which a cadet is permitted to receive instruction at the Academy under this section shall reimburse the United States for the cost of providing such instruction, including the cost of pay, allowances, and emoluments provided under paragraph (1) unless a written waiver of reimbursement is granted by the Secretary of Defense. The Secretary of the Air Force shall prescribe the rates for reimbursement under this paragraph.

"(c)(1) Except as the Secretary of the Air Force determines, a person receiving instruction under this section is subject to the same regulations governing admission, attendance, discipline, resignation, discharge, dismissal, and graduation as a cadet at the Academy appointed from the United States. The Secretary may prescribe regulations with respect to access to classified information by a person receiving instruction under this section that differ from the regulations that apply to a cadet at the Academy appointed from the United States.

"(2) A person receiving instruction under this section is not entitled to an appointment in an armed force of the United States by reason of graduation from the Academy.

"(d) A person receiving instruction under this section is not subject to section 9346(d) of this title.".

(2) Section 9345 of such title is repealed.

(3) The table of sections at the beginning of chapter 903 of such title is amended by striking out the items relating to sections 9344 and 9345 and inserting in lieu thereof the following:

"9344. Selection of persons from foreign countries.".

(d)(1) Sections 4344(b)(2), 6957(b)(2), and 9344(b)(2) of title 10, United States Code, as added by this section, do not apply to the cost of providing instruction to a person who, before the effective date of this section, entered the United States Military Academy, the United States Naval Academy, or the United States Air Force Academy under section 4344, 4345, 6957, 9344, or 9345 of such title, as in effect on the day before such date. Any such person shall be counted against the maximum of 40 persons who may attend the Academy concerned at any time under any of those sections.

(2) The amendments made by subsections (a), (b), and (c) shall take effect one year after the date of the enactment of this Act and shall apply to each person entering the United States Military Academy, the United States Naval Academy, or the United States Air Force Academy after that effective date.

NOMINATIONS TO SERVICE ACADEMIES FROM GUAM AND FORMER CANAL ZONE AREA

SEC. 1005. (a)(1) Clause (10) of section 4342(a) of title 10, United States Code, is amended to read as follows:

"(10) One cadet from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(2) Clause (10) of section 6954(a) of such title is amended to read as follows:

"(10) One from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(3) Clause (10) of section 9342(a) of such title, is amended to read as follows:

"(10) One cadet from American Samoa, nominated by the Delegate in Congress from American Samoa.".

(b)(1) Clause (8) of section 4342(a) of title 10, United States Code, is amended to read as follows:

"(8) One cadet nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States Government residing in the Republic of Panama who are citizens of the United States.".

(2) Clause (8) of section 6954(a) of such title is amended to read as follows:

"(8) One nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States residing in the Republic of Panama who are citizens of the United States.".

(3) Clause (8) of section 9342(a) of such title is amended to read as follows:

"(8) One cadet nominated by the Administrator of the Panama Canal Commission from the children of civilian personnel of the United States Government residing in the Republic of Panama who are citizens of the United States.".

APPOINTMENT OF CITIZENS OF NORTHERN MARIANA ISLANDS AS COMMISSIONED OFFICERS

SEC. 1006. (a) Notwithstanding any provision of law respecting citizenship and in accordance with the covenant entitled "A Covenant to establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America" (approved on March 24, 1976, by Public Law 94-241), a citizen of the Northern Mariana Islands who indicates in writing to a commissioned officer of the Armed Forces of the United States an intent to become a citizen, and not a national, of the United States upon full implementation of such covenant, and who is otherwise qualified for military service under applicable laws and regulations, may be appointed as an officer in the Armed Forces of the United States, may be appointed or enrolled in the Senior Reserve Officers' Training Corps program of any of the Armed Forces under chapter 103 of title 10, United States Code, and may be selected to be a participant in the Armed Forces Health Professions Scholarship program under chapter 105 of such title.

(b) This section shall expire upon the establishment of the Commonwealth of the Northern Mariana Islands.

TRANSFER OF PUBLIC HEALTH SERVICE OFFICERS TO OTHER UNIFORMED SERVICES

SEC. 1007. (a)(1) Section 716 of title 10, United States Code, is amended to read as follows:

"§ 716. Commissioned officers: transfers among the armed forces, the National Oceanic and Atmospheric Administration, and the Public Health Service

"(a) Notwithstanding any other provision of law, the President, within authorized strengths and with the consent of the officer involved, may transfer any commissioned officer of a uniformed service from his uniformed service to, and appoint him in, another uniformed service. The Secretary of Defense, the Secretary of Transportation, the Secretary of Commerce, and the Secretary of Health and Human Services shall jointly establish, by regulations approved by the President, policies and procedures for such transfers and appointments.

"(b) An officer transferred under this section may not be assigned precedence or relative rank higher than that which he held on the day before the transfer.

"(c) In this section, 'uniformed service' means any of the armed forces, the Commissioned Corps of the National Oceanic and Atmospheric Administration, or the Commissioned Corps of the Public Health Service.".

(2) The item relating to such section in the table of sections at the beginning of chapter 41 of such title is amended to read as follows:

"716. Commissioned officers: transfers among the armed forces, the National Oceanic and Atmospheric Administration, and the Public Health Service.".

(b)(1) Chapter 53 of such title is amended by adding at the end thereof the following new section:

"§ 1043. Service credit: service in the National Oceanic and Atmospheric Administration or the Public Health Service

"Active commissioned service in the the National Oceanic and Atmospheric Administration or the Public Health Service shall be credited as active commissioned service in the armed forces for purposes of determining the retirement eligibility and computing the retired pay of a member of the armed forces.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1043. Service credit: service in the National Oceanic and Atmospheric Administration or the Public Health Service.".

(c)(1) Section 533(a)(1) of such title is amended by inserting ", the National Oceanic and Atmospheric Administration, or the Public Health Service" after "in any armed force".

(2) Section 1174(i) of such title is amended—

(A) by inserting "(1)" after "(i)"; and

(B) by adding at the end thereof the following new paragraph:

"(2) Active commissioned service in the National Oceanic and Atmospheric Administration or the Public Health Service shall be credited as active service in the armed forces for the purposes of this section.".

(3) Section 3353(a)(1) of such title is amended—

(A) by striking out "chapters 337 and 363" and inserting in lieu thereof "this chapter and chapter 363"; and

(B) by inserting ", the National Oceanic and Atmospheric Administration, or the Public Health Service" after "in any armed force".

(4) Section 5600(a)(1) of such title is amended by inserting ", the National Oceanic and Atmospheric Administration, or the Public Health Service" after "in any armed force".

(5) Section 8353(a)(1) of such title is amended—

(A) by striking out "chapters 837 and 863" and inserting in lieu thereof "this chapter and chapter 863"; and

(B) by inserting ", the National Oceanic and Atmospheric Administration, or the Public Health Service" after "in any armed force".

(d) Clause (13) of section 3(a) of the Act of August 10, 1956 (33 U.S.C. 857a(a)), is amended to read as follows:

"(13) Section 716, Commissioned officers: transfers among the Armed Forces, the National Oceanic and Atmospheric Administration, and the Public Health Service.".

PART B—RESERVE COMPONENT MANAGEMENT

BONUSES FOR ENLISTMENTS, REENLISTMENTS, AND VOLUNTARY EXTENSIONS OF SERVICE IN ELEMENTS OF THE READY RESERVE OTHER THAN THE SELECTED RESERVE

SEC. 1011. (a) Chapter 5 of title 37, United States Code, is amended by inserting after section 308f the following new sections:

"§ 308g. Special pay: bonus for enlistment in elements of the Ready Reserve other than the Selected Reserve

"(a) An eligible person who enlists in a combat or combat support skill of an element (other than the Selected Reserve) of the Ready Reserve of an armed force for a term of enlistment of not less than six years, and who has not previously served in an armed force, may be paid a bonus as provided in subsection (b) of this section.

"(b) Eligibility for and the amount and method of payment of a bonus under this section shall be determined in accordance with regulations prescribed under subsection (g) of this section, except that the amount of such a bonus may not exceed $1,000.

"(c) A bonus may not be paid under this section for a term of enlistment to any person who fails to complete satisfactorily initial active duty for training or who, upon completion of initial active duty for training, elects to serve the remainder of the term of enlistment in the Selected Reserve or in an active component of an armed force.

"(d) A person who receives a bonus payment under this section and who fails during the period for which the bonus was paid to serve satisfactorily in the element of the Ready Reserve with respect to which the bonus was paid shall refund to the United States an amount which bears the same ratio to the amount of the bonus paid to such person as the period which such person failed to serve satisfactorily bears to the total period for which the bonus was paid.

"(e) An obligation to reimburse the United States imposed under subsection (d) of this section is, for all purposes, a debt owed to the United States.

"(f) A discharge in bankruptcy under title 11 that is entered less than five years after the termination of an enlistment for which a bonus was paid under this section does not discharge the person receiving such bonus payment from the debt arising under subsection (d) of this section. This subsection applies to any case commenced under title 11 after the date of the enactment of the Department of Defense Authorization Act, 1984.

"(g) This section shall be administered under regulations prescribed by the Secretary of Defense for the armed forces under his jurisdiction and by the Secretary of Transportation for the Coast Guard when it is not operating as a service in the Navy.

"(h) A bonus may not be paid under this section to any person for an enlistment after September 30, 1985.

"§ 308h. Special pay: bonus for reenlistment, enlistment, or voluntary extension of enlistment in elements of the Ready Reserve other than the Selected Reserve

"(a)(1) An eligible person who is or has been a member of an armed force and who reenlists, enlists, or voluntarily extends an enlistment in a combat or combat support skill of an element (other than the Selected Reserve) of the Ready Reserve of an armed force for a period of not less than three years beyond any other period the person is obligated to serve may be paid a bonus as provided in subsection (b) of this section.

"(2) A bonus may not be paid under this section to a person who has failed to complete satisfactorily any original term of enlistment in the armed forces.

"(b) Eligibility for and the amount and method of payment of a bonus under this section shall be determined under regulations to be prescribed under subsection (f) of this section, except that the amount of such a bonus may not exceed $900.

"(c) A person who receives a bonus payment under this section and who fails during the period for which the bonus was paid to serve satisfactorily in the Ready Reserve shall refund to the United States an amount which bears the same ratio to the amount of the bonus paid to such person as the period which such person failed to serve satisfactorily bears to the total period for which the bonus was paid.

"(d) An obligation to reimburse the United States imposed under subsection (c) of this section is, for all purposes, a debt owed to the United States.

"(e) A discharge in bankruptcy under title 11 that is entered less than five years after the termination of a reenlistment, enlistment, or extension for which a bonus was paid under this section does not discharge

the person receiving such bonus payment from the debt arising under subsection (c) of this section. This subsection applies to any case commenced under title 11 after the date of the enactment of the Department of Defense Authorization Act, 1984.

"(f) This section shall be administered under regulations to be prescribed by the Secretary of Defense for the armed forces under his jurisdiction and by the Secretary of Transportation for the Coast Guard when it is not operating as a service in the Navy.

"(g) A bonus may not be paid under this section to any person for a reenlistment, enlistment, or voluntary extension of an enlistment after September 30, 1985.".

(b)(1) Section 308d of such title is repealed.

(2) The table of sections at the beginning of such chapter is amended—

(A) by striking out the item relating to item 308d; and

(B) by inserting after the item relating to section 308f the following new items:

"308g. Special pay: bonus for enlistment in elements of the Ready Reserve other than the Selected Reserve.

"308h. Special pay: bonus for reenlistment, enlistment, or voluntary extension of enlistment in elements of the Ready Reserve other than the Selected Reserve.".

(c) The amendments made by subsections (a) and (b) shall take effect on October 1, 1983.

(d) During fiscal year 1984, not more than $12,000,000 may be expended to carry out sections 308g and 308h of title 37, United States Code (as added by subsection (a)).

EXTENSION OF MEDICAL AND DENTAL CARE FOR RESERVISTS

SEC. 1012. (a)(1) Chapter 55 of title 10, United States Code, is amended by inserting after section 1074 the following new section:

"§ 1074a. Medical and dental care for members of the uniformed services for injuries incurred or aggravated while traveling to and from inactive duty training

"(a) Under joint regulations prescribed by the Secretary of Defense and the Secretary of Health and Human Services, a member of the uniformed services is entitled to the benefits described in subsection (b) for an injury incurred or aggravated while the member is traveling directly to or from the place at which he is to perform, or has performed, inactive duty training, unless the injury is incurred or aggrevated as the result of the member's own gross negligence or misconduct.

"(b) A person described in subsection (a) is entitled to—

"(1) the medical and dental care appropriate for the treatment of his injury until the resulting disability cannot be materially improved by further hospitalization or treatment; and

"(2) subsistence during hospitalization.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 1074 the following new item:

"1074a. Medical and dental care for members of the uniformed services for injuries incurred or aggravated while traveling to and from inactive duty training.".

(b) Section 204 of title 37, United States Code, is amended by adding at the end thereof the following new subsection:

"(j) A member of the uniformed services who is entitled to medical or dental care under section 1074a of title 10 is entitled to travel and transportation allowances, or a monetary allowance in place thereof, for necessary travel incident to such care, and return to his home upon discharge from treatment.".

(c) The amendments made by subsections (a) and (b) shall apply only in cases of injuries incurred or aggravated on or after the date of the enactment of this Act.

TEST PROGRAM ON LIMITED USE OF COMMISSARY STORES BY MEMBERS OF THE SELECTED RESERVE

SEC. 1013. (a) The Secretary of Defense shall carry out in one or more areas of the United States a test program under which members of the Selected Reserve of the Ready Reserve of a reserve component of the Armed Forces will be permitted to use commissary stores of the Department of Defense a number of days each year equal to the number of days the member performs active duty for training as a member of the Selected Reserve. Under any such test program, a member of the Selected Reserve shall be permitted a period of one year, from the date on which the member performs active duty for training, to use a day of eligibility for using commissary stores.

(b) The Secretary of Defense shall report the results of the test program to the Congress no later than September 30, 1984, together with such comments and recommendations as he determines appropriate.

GRADE DETERMINATION FOR PERSONS RECEIVING ORIGINAL APPOINTMENTS AS RESERVE MEDICAL OFFICERS OF THE ARMY OR AIR FORCE

SEC. 1014. (a) Section 3359 of title 10, United States Code, is amended—

(1) by striking out all that precedes clause (1) and inserting in lieu thereof the following:

"(a) Except as provided in subsection (b), the commissioned grade in which a person credited with service under section 3353 of this title is originally appointed as a reserve officer of the Army (based on the service credited under that section) shall be determined as follows:"; and

(2) by adding at the end thereof the following new subsection:

"(b) In the case of a person who is originally appointed as a reserve officer in the Medical Corps of the Army during the period beginning on October 1, 1983, and ending on September 30, 1985, and who is credited with service under section 3353 of this title, the commissioned grade in which that person is appointed (based on the service credited under that section) shall be determined as follows:

"(1) For persons with at least four, but less than 14, years of service—captain.

"(2) For persons with at least 14, but less than 21, years of service—major.

"(3) For persons with at least 21 years of service—lieutenant colonel.

"(4) For persons with at least 23 years of service—lieutenant colonel or colonel, as the Secretary of the Army determines.".

(b) Section 8359 of title 10, United States Code, is amended—

(1) by striking out all that precedes clause (1) and inserting in lieu thereof the following:

"(a) Except as provided in subsection (b), the commissioned grade in which a person credited with service under section 8353 of this title is originally appointed as a reserve officer of the Air Force with a designation as a medical officer (based on the service credited under that section) shall be determined as follows:"; and

(2) by adding at the end thereof the following new subsection:

"(b) In the case of a person who is originally appointed as a reserve officer of the Air Force with a designation as a medical officer during the period beginning on October 1, 1983, and ending on September 30, 1985, and who is credited with service under section 8353 of this title, the commissioned grade in which that person is appointed (based on the service credited under that section) shall be determined as follows:

"(1) For persons with at least four, but less than 14, years of service—captain.

"(2) For persons with at least 14, but less than 21, years of service—major.

"(3) For persons with at least 21 years of service—lieutenant colonel.

"(4) For persons with at least 23 years of service—lieutenant colonel or colonel, as the Secretary of the Air Force determines.".

(c) Reserve officers in the Medical Corps of the Army and Reserve officers of the Air Force designated as medical officers who have at least four years of commissioned service and who on the date of the enactment of this Act have a reserve grade below the grade of captain shall be eligible for immediate promotion to the grade of captain if otherwise qualified.

PROMOTION OF CERTAIN RESERVE COMMISSIONED OFFICERS SERVING ON ACTIVE DUTY

SEC. 1015. (a)(1) Section 3380 of title 10, United States Code, is amended to read as follows:

"§ 3380. Commissioned officers: promotion of reserve commissioned officers on active duty and not on the active duty list

"(a) Notwithstanding any other provision of law, a reserve commissioned officer on active duty for duty described in clause (1)(B), (1)(C), or (7) of section 523(b) of this title who is recommended by a selection board for promotion to, or found qualified for Federal recognition in, a higher reserve grade may, in accordance with regulations prescribed by the Secretary of Defense and subject to the limitations of section 524 of this title, be promoted to or extended Federal recognition in such higher reserve grade and may continue to serve on active duty, or be ordered to serve on active duty, in such higher reserve grade.

"(b) Notwithstanding any other provision of law, the service in grade for promotion purposes only of any reserve commissioned officer who is promoted to or extended Federal recognition in a higher reserve grade but whose promotion to or recognition in such higher reserve grade was delayed solely because of limitations imposed in accordance with regulations prescribed by the Secretary of Defense under subsection (a) or contained in section 524 of this title, is the date such officer would have been promoted to or recognized in such higher reserve grade if the limitations did not exist. In computing service in grade for the purposes of determining the date for discharge or transfer to the Retired Reserve under chapter 363 of this title, the date the officer would have been promoted to or recognized in such higher grade had the limitations not existed shall be considered the date of promotion to or recognition in such higher grade.

"(c) Regulations prescribed by the Secretary of Defense under subsection (a) shall prohibit the promotion of an officer under the authority of that subsection unless the duty assignment of the officer requires a higher grade than the grade currently held by the officer.

"(d) The authority to promote officers under this section shall expire on September 30, 1985.".

(2) The item relating to section 3380 in the table of sections at the beginning of chapter 337 of such title is amended to read as follows:

"3380. Commissioned officers: promotion of reserve commissioned officers on active duty and not on the active duty list.".

(b)(1) Section 8380 of title 10, United States Code, is amended to read as follows:

"§ 8380. Commissioned officers: promotion of reserve commissioned officers on active duty and not on the active duty list

"(a) Notwithstanding any other provision of law, a reserve commissioned officer on active duty for duty described in clause (1)(B), (1)(C), or (7) of section 523(b) of this title who is recommended by a selection board for promotion to, or found qualified for Federal recognition in, a higher reserve grade may, in accordance with regulations prescribed by the Secretary of Defense and subject to the limitations of section 524 of this title, be promoted to or extended Federal recognition in such higher reserve grade and may continue to serve on active duty, or be ordered to serve on active duty, in such higher reserve grade.

"(b) Notwithstanding any other provision of law, the service in grade for promotion purposes only of any reserve commissioned officer who is promoted to or extended Federal recognition in a higher reserve grade but whose promotion to or recognition in such higher reserve grade was delayed solely because of limitations imposed in accordance with regulations prescribed by the Secretary of Defense under subsection (a) or contained in section 524 of this title, is the date such officer would have been promoted to or recognized in such higher reserve grade if the limitations did not exist. In computing service in grade for the purposes of determining the date for discharge or transfer to the Retired Reserve under chapter 863 of this title, the date the officer would have been promoted to or recognized in such higher grade had the limitations not existed shall be considered the date of promotion to or recognition in such higher grade.

"(c) Regulations prescribed by the Secretary of Defense under subsection (a) shall prohibit the promotion of an officer under the authority of that subsection unless the duty assignment of the officer requires a higher grade than the grade currently held by the officer.

"(d) The authority to promote officers under this section shall expire on September 30, 1985.".

(2) The item relating to section 8380 in the table of sections at the beginning of chapter 837 of such title is amended to read as follows:

"8380. Commissioned officers: promotion of reserve commissioned officers on active duty and not on the active duty list.".

COMPUTATION OF YEARS OF SERVICE FOR MANDATORY TRANSFER OF CERTAIN RESERVISTS TO THE RETIRED RESERVE

SEC. 1016. (a) Section 3853 of title 10, United States Code, is amended—

(1) in clause (1)—

(A) by inserting "and" at the end of subclause (A); and

(B) by striking out the comma and "and" at the end of subclause (B) and all that follows through "Public Law 85-861"; and

(2) by striking out the last sentence.

(b) Sections 3360(b) and 3360(c) of such title are each amended by striking out the last sentence.

(c) Section 8853 of such title is amended—

(1) by inserting "and" at the end of clause (1);

(2) by striking the semicolon and "and" at the end of clause (2) and inserting in lieu thereof a period; and

(3) by striking out clause (3).

(d) The amendments made by this section shall be effective only for the period beginning on October 1, 1983, and ending on September 30, 1985.

AUTHORITY TO ORDER CERTAIN RETIRED MEMBERS OF RESERVE COMPONENTS TO ACTIVE DUTY

SEC. 1017. (a) Section 675 of title 10, United States Code, is amended by inserting "or 688" after "672(a)".

(b)(1) Subsection (a) of section 688 of such title is amended by inserting ", a member of the Retired Reserve who has completed at least 20 years of active service, or a member of the Fleet Reserve or Fleet Marine Corps Reserve" in the first sentence after "Marine Corps".

(2) Subsection (b) of such section is amended by striking out "A retired member of the Regular Army, Regular Navy, Regular Air Force, or Regular Marine Corps" and inserting in lieu thereof "A member ordered to active duty under this section".

(3) The heading of such section is amended to read as follows:

"§ 688. Retired members".

(4) The item relating to such section in the table of sections at the beginning of chapter 39 of such title is amended to read as follows:

"688. Retired members.".

AUTHORITY TO PERMIT RETIRED ENLISTED MEMBERS OF REGULAR COMPONENTS TO BE PLACED VOLUNTARILY IN THE READY RESERVE

SEC. 1018. Section 269(d) of title 10, United States Code, is amended to read as follows:

"(d) Under such regulations as the Secretary concerned may prescribe, any qualified member of a reserve component or any qualified retired enlisted member of a regular component may, upon his request, be placed in the Ready Reserve. However, a member of the Retired Reserve entitled to retired pay or a retired enlisted member of a regular component may not be placed in the Ready Reserve unless the Secretary concerned makes a special finding that the member's services in the Ready Reserve are indispensable. The Secretary concerned may not delegate his authority under the preceding sentence.".

VALIDATION OF CERTAIN ARMY APPOINTMENTS MADE IN GRADES ABOVE THE GRADE OF SECOND LIEUTENANT

SEC. 1019. (a) The appointment of a person as a reserve commissioned officer of the Army in a grade above second lieutenant that was made during the period beginning on September 15, 1981 (the effective date of the Defense Officer Personnel Management Act (Public Law 96-513; 94 Stat. 2835)), and ending on August 24, 1982 (the date of a Department of the Army directive which terminated the appointments of reserve commissioned officers above the grade of second lieutenant under appointment criteria in effect before the effective date of the Defense Officer Personnel Management Act) shall be held and considered to be a valid appointment in the grade in which the appointment was made, subject to the consent of the officer concerned.

(b)(1) A reserve commissioned officer whose appointment in a grade above second lieutenant is validated by subsection (a) is entitled to all the rights, privileges, and benefits of the grade to which appointed as of the original date of that appointment, except that such officer is not entitled to any increase in pay or allowances for any period prior to the date of the enactment of this section by virtue of the enactment of this section.

(2) An appointment validated by subsection (a) supersedes any appointment or enlistment of the person concerned made between August 25, 1982, and the date of the enactment of this Act.

PART C—OTHER PERSONNEL MANAGEMENT PROVISIONS

AUTHORITY OF PRESIDENT TO SUSPEND CERTAIN LAWS RELATING TO PROMOTION, RETIREMENT, AND SEPARATION

SEC. 1021. (a) Chapter 39 of title 10, United States Code, is amended by adding after section 673b the following new section:

"§ 673c. Authority of President to suspend certain laws relating to promotion, retirement, and separation

"(a) Notwithstanding any other provision of law, during any period members of a reserve component are serving on active duty pursuant to an order to active duty under authority of sections 672, 673, or 673b of this title, the President may suspend any provision of law relating to promotion, retirement, or separation applicable to any member of the armed forces who the President determines is essential to the national security of the United States.

"(b) A suspension made under the authority of subsection (a) shall terminate (1) upon release from active duty of members of the reserve component ordered to active duty under the authority of sections 672, 673, or 673b, as the case may be, or (2) at such time as the President determines the circumstances which required the action of ordering members of the reserve component to active duty no longer exist, whichever is earlier.".

(b) The table of sections at the beginning of chapter 39 of such title is amended by inserting immediately below the item relating to section 673b the following new item:

"673c. Authority of President to suspend certain laws relating to promotion, retirement, and separation.".

AUTHORITY TO INCREASE TOTAL INITIAL TERM OF SERVICE IN THE ARMED FORCES

SEC. 1022. (a)(1) Section 511 of title 10, United States Code, is amended—

(A) in subsection (b), by striking out "six years" and inserting in lieu thereof "not less than six years nor more than eight years"; and

(B) in subsection (d), by striking out "six years" and inserting in lieu thereof "not less than six years nor more than eight years".

(2) The amendments made by paragraph (1) shall apply only with respect to persons who enlist under the authority of subsection (b) or (d) of section 511 of title 10, United States Code, 60 or more days after the date of the enactment of this Act.

(b)(1) Subsection (a) of section 651 of title 10, United States Code, is amended to read as follows:

"(a) Each person who becomes a member of an armed force, other than a person deferred under the next to the last sentence of section 6(d)(1) of the Military Selective Service Act (50 U.S.C. App. 456(d)(1)) shall serve in the armed forces for a total initial period of not less than six years nor more than eight years, as provided in regulations pre-

scribed by the Secretary of Defense for the armed forces under his jurisdiction and by the Secretary of Transportation for the Coast Guard when it is not operating as a service in the Navy, unless such person is sooner discharged under such regulations because of personal hardship. Any part of such service that is not active duty or that is active duty for training shall be performed in a reserve component.".

(2) The amendment made by paragraph (1) shall apply only with respect to persons who enter the Armed Forces 60 or more days after the date of the enactment of this Act.

VARIABLE TERMS FOR ENLISTMENTS AND REENLISTMENTS IN REGULAR COMPONENTS

SEC. 1023. Section 505 of title 10, United States Code, is amended by striking out "two, three, four, five, or six years" in subsections (c) and (d) and inserting in lieu thereof "at least two but not more than six years".

PART D—MISCELLANEOUS

EXTENSION OF PERIOD DURING WHICH CERTAIN ACCUMULATED LEAVE MAY BE USED

SEC. 1031. (a) The last sentence of section 701(f) of title 10, United States Code, is amended by inserting "third" after "end of the".

(b)(1) The amendment made by subsection (a) shall take effect on the date of the enactment of this Act and shall apply to leave accumulated under section 701(f) of such title after September 30, 1980.

(2) A member of the Armed Forces who was authorized under section 701(f) of such title to accumulate 90 days' leave during fiscal year 1980, 1981, or 1982 and lost any leave at the end of fiscal year 1981, 1982, or 1983, respectively, because of the provisions of the last sentence of such section, as in effect on the day before the date of the enactment of this Act, shall be credited with the amount of the leave lost and may retain leave in excess of 60 days until (A) September 30, 1984, or (B) the end of the third fiscal year after the year in which such leave was accumulated, whichever is later, but in no case may such a member accumulate leave in excess of 90 days.

(3) Section 404 of the Department of Defense Authorization Act, 1983 (Public Law 97-252; 96 Stat. 725), is repealed.

TRANSPORTATION OF REMAINS OF MILITARY RETIREES DYING IN MILITARY HOSPITALS

SEC. 1032. (a)(1) Chapter 75 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1490. Transportation of remains of members entitled to retired or retainer pay who die in a military medical facility

"(a) Subject to subsection (b), when a member entitled to retired or retainer pay or equivalent pay dies while properly admitted under chapter 55 of this title to a medical facility of the armed forces located in the United States, the Secretary concerned may transport the remains, or pay the cost of transporting the remains, of the decedent to the place of burial of the decedent.

"(b)(1) Transportation provided under this section may not be to a place outside the United States or to a place further from the place of death than the decedent's last place of permanent residence, and any amount paid under this section may not exceed the cost of transportation from the place of death to the decedent's last place of permanent residence.

"(2) Transportation of the remains of a decedent may not be provided under this section if such transportation is authorized by sections 1481 and 1482 of this title or by chapter 23 of title 38.

"(c) In this section, 'United States' includes the Commonwealth of Puerto Rico and the territories and possessions of the United States.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1490. Transportation of remains of members entitled to retired or retainer pay who die in a military medical facility.".

(b) Section 1490 of title 10, United States Code, as added by subsection (a), shall apply with respect to the transportation of the remains of persons dying after September 30, 1983.

FEE FOR VETERINARY SERVICES

SEC. 1033. Effective on October 1, 1984, the Secretary of Defense shall require that a member of the Armed Forces pay a fee of $10 for each time that a pet of such member is provided veterinary care service by a member of the Armed Forces.

EXTENSION OF PILOT DEPARTMENT OF DEFENSE EDUCATIONAL ASSISTANCE LOAN REPAYMENT PROGRAM

SEC. 1034. Section 902(g) of the Department of Defense Authorization Act, 1981 (10 U.S.C. 2141 note), is amended by striking out "October 1, 1983" and inserting in lieu thereof "October 1, 1984".

TITLE XI—NATO AND RELATED MATTERS

NORTH ATLANTIC DEFENSE COOPERATIVE PROGRAMS

SEC. 1101. In order to fulfill the international obligations incurred by the United States under the North Atlantic Treaty Organization's Long-Term Defense Program for the rapid reinforcement of Europe, and recognizing that such action is in the national interest of the United States, the Secretary of Defense shall to carry out commitments of the United States under the United States-German Wartime Host Nation Support Agreement of April 15, 1982, and under the Prepositioned Materiel Configured in Unit Sets (POMCUS) program at the earliest practicable date. The Secretary of Defense shall include in his annual report to the Congress a statement describing the status of implementation of such agreement and program, including his assessment of whether our allies are bearing their equitable share under such agreement and program and whether the implementation of such agreement and program adversely affects the readiness of the reserve components of the Armed Forces of the United States.

REPORT ON ALLIED CONTRIBUTIONS TO THE COMMON DEFENSE

SEC. 1102. (a) In recognition of the increasing military threat faced by the Western World and in view of the growth, relative to the United States, in the economic strength of Japan, Canada, and a number of Western European countries which has occurred since the signing of the North Atlantic Treaty on April 4, 1949, and the Mutual Cooperation and Security treaty between Japan and the United States on January 19, 1960, it is the sense of the Congress that—

(1) the burdens of mutual defense now assumed by some of the countries allied with the United States under those agreements are not commensurate with their economic resources;

(2) since May 1978, when each NATO member nation agreed to increase real defense spending annually in the range of 3 percent, most NATO members, except for the United States, have failed to meet the 3 percent real growth commitment consistently and performance toward this goal in 1983 is estimated to be the most deficient, on average, since the goal was established;

(3) since May 1981, when the Government of Japan established its policy to defend the air and sea lines of communication out to 1,000 nautical miles from the coast of Japan, progress to develop the necessary self-defense capabilities to fulfill that pledge has been extremely disappointing;

(4) Japan is the ally of the United States with the greatest potential for improving its self-defense capabilities and should therefore rapidly increase its annual defense spending to the levels required to fulfill that pledge and to enable Japan to be capable of an effective conventional self-defense capability by 1990, including the capability to carry out its 1,000-mile defense policy, a development that would be consonant not only with Japan's current prominent position in the family of nations but also with its unique sensibilities on the issues of war and peace, sensibilities that are recognized and respected by the people of the United States; and

(5) the continued unwillingness of such countries to increase their contributions to the common defense to more appropriate levels will endanger the vitality, effectiveness, and cohesiveness of the alliances between those countries and the United States.

(b) It is further the sense of the Congress that the President should seek from each signatory country (other than the United States) of the two treaties referred to in subsection (a) acceptance of international security responsibilities and an agreement to make contributions to the common defense which are commensurate with the economic resources of such country, including, when appropriate, an increase in host nation support.

(c)(1) The Secretary of Defense shall submit to the Congress not later than March 1, 1984, a classified report containing—

(A) a comparison of the fair and equitable shares of the mutual defense burdens of these alliances that should be borne by the United States, by other member nations of the North Atlantic Treaty Organization (NATO), and by Japan, based upon economic strength and other relevant factors, and the actual defense efforts of each nation together with an explanation of disparities that currently exist and their impact on mutual defense efforts;

(B) a description of efforts by the United States and of other efforts to eliminate existing disparities;

(C) estimates of the real growth in defense spending in fiscal year 1983 projected for each NATO member nation compared with the annual real growth goal in the range of 3 percent set in May 1978;

(D) a description of the defense-related initiatives undertaken by each NATO member nation within the real growth in defense spending of such nation in fiscal year 1984;

(E) an explanation of those instances in which the commitments to real growth in defense spending have not been realized and a description of efforts being made by the United States to ensure fulfillment of these important NATO commitments;

(F) a description of the activities of each NATO member and Japan to enhance the security and stability of the Southwest Asia region and to assume additional missions for their own defense as the United States allocates additional resources to the mission

of protecting Western interests in world areas not covered by the system of Western Alliances; and

(G) a description of what additional actions the executive branch plans to take should the efforts by the United States referred to in clauses (B) and (E) fail, and, in those instances where such additional actions do not include consideration of the repositioning of American troops, a detailed explanation as to why such repositioning is not being so considered.

(2) The Secretary of Defense shall also submit to the Congress not more than 30 days after the submission of the report required under paragraph (1) an unclassified report containing the matters set forth in clauses (A) through (G) of such paragraph.

LIMITATION ON NUMBER OF MILITARY PERSONNEL STATIONED IN EUROPE

SEC. 1103. (a) Except as provided in subsections (b) and (c), none of the funds authorized to be appropriated by this or any other Act may be used for the purpose of supporting an end-strength level, as of September 30, 1984, of members of the Armed Forces of the United States assigned to permanent duty ashore in European member nations of the North Atlantic Treaty Organization (NATO) at any level in excess of 315,600.

(b) A number of United States military personnel in excess of 315,600, but not in excess of 320,000, may be permanently assigned to duty ashore in such European nations as of September 30, 1984, if—

(1) the Secretary of Defense determines and certifies to the Congress in writing that on September 30, 1984, the total number of military personnel of NATO member nations, other than the United States, stationed in the Federal Republic of Germany will not be less than the total number of military personnel of such member nations stationed in that country on the date of the enactment of this Act;

(2) the Secretary of Defense certifies to the Congress in writing on or after June 1, 1984, that the budget for the Department of Defense for fiscal year 1985 and the Five-Year Defense Plan of the Department of Defense for fiscal years 1985 through 1989 give significant priority to programs directly intended to improve NATO's conventional capabilities, particularly its capability for deep interdiction;

(3) the Department of Defense has conducted a thorough and detailed analysis of the United States force and support structure in Europe which the Secretary of Defense submits to Congress on or after June 1, 1984, with his certification in writing that a number of United States military personnel in excess of 315,600 is required to meet the United States commitment to NATO; and

(4) the studies required by sections 1104 through 1107 have been conducted and the reports and recommendations resulting from such studies have been submitted to the Congress.

(c) A number of United States military personnel in excess of 315,600 or in excess of 320,000 may be assigned to permanent duty ashore in European member nations of NATO as of September 30, 1984, without the conditions specified in subsection (b) having been met if the President (1) determines and certifies to the Congress in writing that overriding national security interests require a number of such personnel to be assigned to permanent duty ashore in such nations in excess of 315,600 or 320,000, as the case may be, and (2) includes in the certification the total number of such personnel required and an explanation of the overriding national security interests that require such number of personnel.

(d) In computing the limitation specified in subsections (a) and (b), there may be excluded not more than 2,600 military personnel assigned to the Ground Launched Cruise Missile program and the Pershing II Missile program.

REPORT ON IMPROVEMENT OF CONVENTIONAL FORCES OF NATO

SEC. 1104. (a) At the same time the President submits the budget for fiscal year 1985 pursuant to section 1105 of title 31, United States Code, but not later than May 1, 1984, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives a comprehensive report and plan for improving conventional defense capabilities of the North Atlantic Treaty Organization (NATO). The Secretary shall include in such report—

(1) his recommendations on how NATO's strategy and military program could and should be changed to improve substantially the chances of a successful conventional defense of Europe;

(2) a statement and explanation of what the aggregate NATO conventional defense requirements are;

(3) a current assessment and statement of the status of the Air-Land Battle concept within the Department of Defense and NATO;

(4) an explanation of how and to what extent the various doctrines of NATO military forces are coordinated, and how variations in doctrine can be rectified or exploited to NATO's advantage;

(5) his judgment on the most effective means by which NATO military forces can be operationally integrated to implement the Air-Land Battle concept;

(6) the United States programs which are necessary to support improved NATO conventional capabilities, the changes which are needed, and what the fiscal year 1985 budget and Five-Year Defense Plan of the Department of Defense for fiscal years 1985 through 1989 provide for with respect to NATO conventional capabilities;

(7) the United States conventional programs and weapons that are provided for in the fiscal year 1985 budget and Five-Year Defense Plan of the Department of Defense for fiscal years 1985 through 1989 to enhance the disruption and destruction of Soviet follow-on echelons as well as fixed-site military targets;

(8) the new weapons or systems which are available for such purpose that are not in the current budget or Five-Year Defense Plan of the Department of Defense;

(9) a determination of what are the achievable NATO-wide improvements in conventional defense capability; and

(10) a separate addendum and assessment by the Supreme Allied Commander, Europe, on measures necessary to improve NATO conventional defense capabilities, including a recommended plan for such measures.

(b) The President shall submit to the Congress not later than June 1, 1984, his recommendations and plan for improving NATO conventional defense capabilities.

REPORT ON THE NUCLEAR POSTURE OF NATO

SEC. 1105. (a) The Secretary of Defense shall conduct a study on the tactical nuclear posture of the North Atlantic Treaty Organization (NATO) and submit a report on the results of such study to the Committees on Armed Services of the Senate and the House of Representatives not later than May 1, 1984. Such study shall include—

(1) a detailed assessment of the current tactical nuclear balance in Europe and that projected for 1990;

(2) an assessment of the current, respective operational doctrines for the use of tactical nuclear weapons in Europe of the Warsaw Pact and NATO;

(3) an explanation of how the threat of the use of such weapons relates to deterrence and to conventional defense;

(4) an identification of the number and types of nuclear warheads, if any, considered to be inessential to the defense structure of Western Europe, the quantity and type of such weapons that could be eliminated from Europe under appropriate circumstances without jeopardizing the security of NATO nations and an assessment of what such circumstances might be;

(5) an explanation of the steps that can be taken to develop a rational and coordinated nuclear posture by NATO in a manner that is consistent with proper emphasis on conventional defense forces; and

(6) an identification of any notable, relevant developments that have occurred since the submission to the Congress in April 1975 of the report entitled "The Theater Nuclear Force Posture in Europe", prepared by the Secretary of Defense pursuant to section 302 of the Department of Defense Appropriation Authorization Act, 1975 (Public Law 93-365), which might cause the findings and conclusions of that report to require revision and such revisions in such report as the Secretary considers appropriate.

(b) The President shall submit a written report to the Congress on or before June 1, 1984, containing his views on the Department of Defense study and report required under subsection (a) together with such recommendations with respect to such study and report as he considers appropriate.

REPORT ON COMBAT-TO-SUPPORT RATIO OF UNITED STATES FORCES IN EUROPE IN SUPPORT OF NATO

SEC. 1106. (a) The Secretary of Defense shall submit a report to the Committees on Armed Services of the Senate and House of Representatives not later than May 1, 1984, on the combat, combat support, combat service support, and noncombat components of the Armed Forces of the United States assigned to permanent duty in Europe in support of the North Atlantic Treaty Organization (NATO). The Secretary shall include in such report—

(1) an analysis of the historical (since 1974), current, and projected combat, combat support, combat service support, and noncombat components of the Armed Forces of the United States assigned to permanent duty in Europe in support of NATO and their relationship to each other;

(2) a review of the requirements for such combat, combat support, combat service support, and noncombat components; and

(3) his assessment of the current balance among units of United States combat components, combat support components, and combat service support components forward deployed in Europe and his recommendations for any changes needed to improve that balance in the future.

(b) For the purposes of the report required by subsection (a)—

(1) the combat component of the Army includes only the infantry, cavalry, artillery, armored, combat engineers, special forces, attack assault helicopter units, air defense, and missile combat units of battalion or smaller size;

(2) the combat component of the Navy includes only the combatant ships (aircraft carrier, battleship, cruiser, destroyer, frigate, submarine, and amphibious assault ships) and combat aircraft wings (fighter, attack, reconnaissance, and patrol); and

(3) the combat component of the Air Force includes only the tactical fighter, reconnaissance, tactical airlift, fighter interceptor, and bomber units of wing or smaller size.

REPORT ON UNITED STATES EXPENDITURES IN SUPPORT OF NATO

SEC. 1107. (a) The Secretary of Defense shall review and analyze the fiscal year 1983 expenditures of the Department of Defense in fulfilling the United States commitment to the North Atlantic Treaty Organization (NATO) and the expenditures projected for such purpose for each of the fiscal years 1984 through 1989.

(b)(1) The Secretary of Defense shall submit a detailed written report to the Congress not later than June 1, 1984, on the review and analysis required under subsection (a). The Secretary shall set out in such report, in current and constant fiscal year 1983 dollar figures, the expenditures made in fiscal year 1983 and expenditures projected to be made in fiscal years 1984 through 1989 by the United States in fulfilling its commitment to NATO in each of the following categories:

(A) Procurement.

(B) Operations and maintenance.

(C) Military construction.

(D) Military personnel.

(E) Research, development, test, and evaluation.

(2) The Secretary of Defense shall also include in such report a separate breakout of the fiscal year 1983 Department of Defense expenditures in each of the categories specified in paragraph (1) for the Armed Forces of the United States assigned to permanent duty ashore in the European member nations of NATO and the expenditures projected to be incurred by the Department of Defense in each of those categories in each of the fiscal years 1984 through 1989 for personnel of the Armed Forces of the United States planned to be assigned to permanent duty ashore in such nations during each of those fiscal years. The Secretary of Defense shall also include in such report similar separate breakouts for all classes of United States forces reflected in the data submitted to the Committee on Armed Services of the Senate and printed in part 1, pages 61–68, of that Committee's hearings on Department of Defense Authorization For Appropriations For Fiscal Year 1982.

(3) The Secretary of Defense shall also include in such report the estimated percentage growth in each of the five categories specified in paragraph (1) of subsection (b), after allowing for inflation, from one year to the next for the fiscal years 1983 through 1989. In the case of each category of expenditures for which the annual projected rate of expenditure growth after fiscal year 1983 exceeds 3 percent, after allowing for inflation, over the previous fiscal year, the Secretary shall include his assessment of the impact on NATO of limiting the growth of expenditures in that category to 3 percent real growth.

TITLE XII—GENERAL PROVISIONS

PART A—FINANCIAL MATTERS

TRANSFER AUTHORITY

SEC. 1201. (a)(1) Upon determination by the Secretary of Defense that such action is necessary in the national interest, the Secretary may transfer amounts of authorizations made available to the Department of Defense in this Act between any such authorizations (or any subdivisions thereof). Amounts of authorizations so transferred shall be merged with and be available for the same purposes as the authorization to which transferred.

(2) The total amount of authorizations that the Secretary of Defense may transfer under the authority of this section may not exceed $1,500,000,000.

(b) The authority provided by this section to transfer authorizations—

(1) may only be used to provide authority for higher priority items than the items from which authority is transferred; and

(2) may not be used to provide authority for an item that has been denied authorization by Congress.

(c) The Secretary of Defense shall promptly notify Congress of transfers made under the authority of this section.

(d) Transfers between paragraphs of a subsection of section 301 may be made without regard to the requirements of this section.

LONG-TERM LEASE OR CHARTER OF AIRCRAFT AND VESSELS

SEC. 1202. (a)(1) Chapter 141 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2401. Requirement for authorization by law of certain contracts relating to vessels and aircraft

"(a)(1) The Secretary of a military department may make a contract for the lease of a vessel or aircraft or for the provision of a service through use by a contractor of a vessel or aircraft only as provided in subsection (b) if—

"(A) the contract will be a long-term lease or charter; or

"(B) the terms of the contract provide for a substantial termination liability on the part of the United States.

"(2) The Secretary of a military department may make a contract that is an agreement to lease or charter or an agreement to provide services and that is (or will be) accompanied by a contract for the actual lease, charter, or provision of services only as provided in subsection (b) if the contract for the actual lease, charter, or provision of services is (or will be) a contract described in paragraph (1).

"(b)(1) The Secretary may make a contract described in subsection (a)(1) if—

"(A) the Secretary has been specifically authorized by law to make the contract;

"(B) before a solicitation for proposals for the contract was issued the Secretary notified the Committees on Armed Services and on Appropriations of the Senate and House of Representatives of the Secretary's intention to issue such a solicitation; and

"(C) the Secretary has notified the Committees on Armed Services and on Appropriations of the Senate and House of Representatives of the proposed contract and provided a detailed description of the terms of the proposed contract and a justification for entering into the proposed contract rather than providing for the lease, charter, or services involved through purchase of the vessel or aircraft to be used under the contract, and a period of 30 days of continuous session of Congress has expired following the date on which notice was received by such committees.

"(2) For purposes of paragraph (1)(C), the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in a computation of such 30-day period.

"(c) Funds may not be appropriated for any fiscal year to or for any armed force or obligated or expended for—

"(1) the long-term lease or charter of any aircraft or naval vessel; or

"(2) for the lease or charter of any aircraft or naval vessel the terms of which provide for a substantial termination liability on the part of the United States,

unless funds for that purpose have been specifically authorized by law.

"(d)(1)(A) In this section, the term 'long-term lease or charter' (except as provided in subparagraph (B)) means a lease, charter, service contract, or conditional sale agreement—

"(i) the term of which is for a period of five years or longer or more than one-half the useful life of the vessel or aircraft; or

"(ii) the initial term of which is for a period of less than five years but which contains an option to renew or extend the agreement for a period which, when added to the initial term (or any previous renewal or extension), is five years or longer.

Such term includes the extension or renewal of a lease or charter agreement if the term of the extension or renewal thereof is for a period of 5 years or longer or if the term of the lease or charter agreement being extended or renewed was for a period of five years or longer.

"(B) In the case of an agreement under which the lessor first places the property in service under the agreement or the property has been in service for less than one year and there is allowable to the lessor or charterer an investment tax credit or depreciation for the property leased, chartered, or otherwise provided under the agreement under section 168 of the Internal Revenue Code of 1954 (unless the lessor or charterer has elected depreciation on a straightline method for such property), the term 'long-term lease or charter' means a lease, charter, service contract, or conditional sale agreement—

"(i) the term of which is for a period of three years or longer; or

"(ii) the initial term of which is for a period of less than three years but which contains an option to renew or extend the agreement for a period which, when added to the initial term (or any previous renewal or extension), is three years or longer.

Such term includes the extension or renewal of a lease or charter agreement if the term of the extension or renewal thereof is for a period of three years or longer or if the term of the lease or charter agreement being extended or renewed was for a period of three years or longer.

"(2) For the purposes of this section, the United States shall be considered to have a substantial termination liability under a contract—

"(A) if there is an agreement by the United States under the contract to pay an amount not less than the amount equal to 25 percent of the value of the vessel or aircraft under lease or charter, calculated on the basis of the present value of the termination liability of the United States under such charter or lease (as determined under regulations prescribed by the Secretary of Defense); or

"(B) if (as determined under regulations prescribed by the Secretary of Defense) the sum of—

"(i) the present value of the amount of the termination liability of the United States

under the contract as of the end of the term of the contract (exclusive of any option to extend the contract); and

"(ii) the present value of the total of the payments to be made by the United States under the contract (excluding any option to extend the contract) attributable to capital-hire,

is more than one-half the price of the vessel or aircraft involved.

"(e)(1) Whenever a request is submitted to Congress for the authorization of the long-term lease or charter of aircraft or naval vessels or for the authorization of a lease or charter of aircraft or naval vessels which provides for a substantial termination liability on the part of the United States, the Secretary of Defense shall submit with that request an analysis of the cost to the United States (including lost tax revenues) of any such lease or charter arrangement compared with the cost to the United States of direct procurement of the aircraft or naval vessels by the United States.

"(2) Any such analysis shall be reviewed and evaluated by the Director of the Office of Management and Budget and the Secretary of the Treasury within 30 days after the date on which the request and analysis are submitted to Congress. The Director and Secretary shall conduct such review and evaluation on the basis of the guidelines issued pursuant to subsection (f) and shall report to Congress in writing on the results of their review and evaluation at the earliest practicable date, but in no event more than 45 days after the date on which the request and analysis are submitted to the Congress.

"(3) Whenever a request is submitted to Congress for the authorization of funds for the Department of Defense for the long-term lease or charter of aircraft or naval vessels authorized under this section, the Secretary of Defense—

"(A) shall indicate in the request what portion of the requested funds is attributable to capital-hire; and

"(B) shall reflect such portion in the appropriate procurement account in the request.

"(f) The Director of the Office of Management and Budget and the Secretary of the Treasury shall jointly issue guidelines for determining under what circumstances the Department of Defense may use lease or charter arrangements for aircraft and naval vessels rather than directly procuring such aircraft and vessels. Such guidelines shall be issued not later than 90 days after the date of enactment of this section.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2401. Requirement for authorization by law of certain contracts relating to vessels and aircraft.".

(3) Section 2401 of title 10, United States Code, as added by paragraph (1), shall not apply in the case of any lease or charter agreement entered into by the Department of Defense before December 1, 1983.

(b) Funds appropriated pursuant to an authorization contained in this Act may not be used to indemnify any person under the terms of a contract entered into with the United States under section 2401 of title 10, United States Code (as added by subsection (a))—

(1) for any amount paid or due by any person to the United States for any liability arising under the Internal Revenue Code of 1954; or

(2) to pay any attorneys' fees in connection with such contract.

(c)(1) At the same time that the President submits the budget request for the Department of Defense to Congress for fiscal year 1985, the Secretary of Defense shall submit a written report to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives concerning leases or charters described in paragraph (2).

(2) Such report shall include a list of all leases, charters, service contracts, or conditional sales, the term of which is for a period of 1 year or longer, for major items of defense equipment (including aircraft and naval vessels) which are to be funded either directly or indirectly by any portion of the funds contained in such budget request. Such report shall also include an estimate of the funding level and the source of funding for each such lease, charter, service contract, or conditional sale.

(d) Funds available to the Department of Defense may not be used to enter into any contract during fiscal year 1984 under section 2401 of title 10, United States Code, as added by subsection (a), the term of which is for 3 years or more, inclusive of any option for contract extension or renewal, for any vessels, aircraft, or vehicles, through a lease, charter, or similar agreement, that imposes an estimated termination liability (excluding the estimated value of the leased item at the time of termination) on the United States exceeding 50 percent of the original purchase value of the vessel, aircraft, or vehicle involved for which the Congress has not specifically provided budget authority for the obligation of 10 percent of such termination liability.

(e) Nothing in this section shall impede or affect the ability of the Secretary of the Navy to proceed to acquire the use of thirteen T-AKX class Maritime Prepositioning Ships and the use of five new T-5 class tankers in accordance with the long-term charter arrangements negotiated by the Navy before the date of the enactment of this Act.

INDEPENDENT COST ESTIMATES OF MAJOR DEFENSE ACQUISITION PROGRAMS

SEC. 1203. (a)(1) Chapter 4 of title 10, United States Code, is amended by inserting after section 139b the following new section:

"§ 139c. Major defense acquisition programs: independent cost estimates

"(a) The Secretary of Defense may not approve the full-scale engineering development or the production and deployment of a major defense acquisition program unless an independent estimate of the cost of the program first has been submitted to (and considered by) the Secretary of Defense.

"(b) In this section:

"(1) 'Major defense acquisition program' has the same meaning as provided in section 139a(a)(1) of this title.

"(2) 'Independent estimate' means, with respect to a major defense acquisition program, an estimate of the cost of such program prepared by an office or other entity that is not under the supervision, direction, or control of the military department, defense agency, or other component of the Department of Defense that is directly responsible for carrying out the development or acquisition of the program.

"(3) 'Cost of the program' means, with respect to a major defense acquisition program, all elements of the life-cycle costs of the program, including—

"(A) the cost of all research and development efforts, without regard to the funding source or management control;

"(B) the cost of the prime hardware and its major subcomponents, support costs (including training, peculiar support, and data), initial spares, military construction costs, and the cost of all related procurements (including, where applicable, modifications to existing aircraft or ship platforms), without regard to the funding source or management control of the program; and

"(C) all elements of operating and support costs.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 139b the following new item:

"139c. Major defense acquisition programs: independent cost estimates.".

(b) Section 139c of title 10, United States Code, as added by subsection (a), shall take effect on October 1, 1983.

(c) Not later than May 1, 1984, the Secretary of Defense shall submit a written report to the Committees on Armed Services of the Senate and House of Representatives on the use of independent cost estimates in the planning, programing, budgeting, and selection process for major defense acquisition programs in the Department of Defense. That report shall include an overall assessment of the extent to which such estimates were adopted by the Department in making decisions on the fiscal year 1985 budget and a general explanation of why such estimates might have been modified or rejected. In addition, the Secretary shall include in that report a discussion of current and future initiatives to make greater or more productive use of independent cost estimates in the Department of Defense.

(d) It is the sense of the Congress that the Secretary of Defense should ensure that adequate personnel and financial resources are allocated at all levels of the Department of Defense to those organizations or offices charged with developing or assessing independent estimates of the costs of major defense acquisition programs.

REQUIREMENT OF AUTHORIZATION OF APPROPRIATIONS FOR WORKING-CAPITAL FUNDS

SEC. 1204. (a) The second sentence of section 2208(d) of title 10, United States Code, is amended to read as follows: "In addition, such amounts may be appropriated for the purpose of providing capital for working-capital funds as have been specifically authorized by law.".

(b) The amendment made by subsection (a) shall apply only with respect to appropriations for fiscal years beginning after September 30, 1984.

ONE-YEAR EXTENSION OF TEST PROGRAM TO AUTHORIZE PRICE DIFFERENTIALS TO RELIEVE ECONOMIC DISLOCATIONS

SEC. 1205. (a) Subsection (a) of section 1109 of the Department of Defense Authorization Act, 1983 (10 U.S.C. 2392 note), is amended by striking out "fiscal year 1983" each place it appears and inserting in lieu thereof "fiscal years 1983 and 1984".

(b) Subsection (b) of such section is amended by inserting "and April 15, 1984," after "1983" in the first sentence.

AUTHORIZATION OF FUNDS FOR UPGRADING THE INTERNATIONAL COORDINATING COMMITTEE (COCOM) LOGISTICAL SUPPORT

SEC. 1206. The Secretary of Defense may use, out of any funds available to the Department of Defense for fiscal year 1984, an amount not to exceed $2,000,000 for the purpose of upgrading and improving the logistical support of the International Coordinating Committee (COCOM) in order to

strengthen control over the export of technology and equipment to certain countries by the United States and certain of its allies.

PART B—DEPARTMENT OF DEFENSE MANAGEMENT MATTERS

ESTABLISHMENT OF DEFENSE DIRECTOR OF OPERATIONAL TEST AND EVALUATION

SEC. 1211. (a)(1) Chapter 4 of title 10, United States Code, is amended by inserting after section 136 the following new section:

"§ 136a. Director of Operational Test and Evaluation: appointment; powers and duties

"(a)(1) There is a Director of Operational Test and Evaluation in the Department of Defense, appointed from civilian life by the President, by and with the advice and consent of the Senate. The Director shall be appointed without regard to political affiliation and solely on the basis of fitness to perform the duties of the office of Director. The Director may be removed from office by the President. The President shall communicate the reasons for any such removal to both Houses of Congress.

"(2) In this section:

"(A) 'Operational test and evaluation' means—

"(i) the field test, under realistic combat conditions, of any item of (or key component of) weapons, equipment, or munitions for the purpose of determining the effectiveness and suitability of the weapons, equipment, or munitions for use in combat by typical military users; and

"(ii) the evaluation of the results of such test.

"(B) 'Major defense acquisition program' means a Department of Defense acquisition program that is a major defense acquisition program for purposes of section 139a(a)(1) of this title or that is designated as such a program by the Director for purposes of this section.

"(b) The Director is the principal adviser to the Secretary of Defense on operational test and evaluation in the Department of Defense and the principal operational test and evaluation official within the senior management of the Department of Defense. The Director shall—

"(1) prescribe, by authority of the Secretary of Defense, policies and procedures for the conduct of operational test and evaluation in the Department of Defense;

"(2) provide guidance to and consult with the Secretary of Defense and the Secretaries of the military departments with respect to operational test and evaluation in the Department of Defense in general and with respect to specific operational test and evaluation to be conducted in connection with a major defense acquisition program;

"(3) monitor and review all operational test and evaluation in the Department of Defense;

"(4) coordinate operational testing conducted jointly by more than one military department or defense agency;

"(5) analyze the results of the operational test and evaluation conducted for each major defense acquisition program and, at the conclusion of such operational test and evaluation, report to the Secretary of Defense and to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives as provided in subsection (c) on—

"(A) whether the test and evaluation performed was adequate; and

"(B) whether the test and evaluation results confirm that the items or components actually tested are effective and suitable for combat; and

"(6) review and make recommendations to the Secretary of Defense on all budgetary and financial matters relating to operational test and evaluation, including operational test facilities and equipment, in the Department of Defense.

"(c) Each report of the Director required under subsection (b)(5) shall be submitted to the committees specified in that subsection in precisely the same form and with precisely the same content as the report originally submitted to the Secretary and shall be accompanied by such comments as the Secretary of Defense may wish to make on such report.

"(d) The Director reports directly, without intervening review or approval, to the Secretary of Defense. The Director shall consult closely with, but the Director and the Director's staff are independent of, the Under Secretary of Defense for Research and Engineering and all other officers and entities of the Department of Defense responsible for research and development.

"(e)(1) The Secretary of a military department shall report promptly to the Director the results of all operational test and evaluation conducted by the military department and of all studies conducted by the military department in connection with operational test and evaluation in the military department.

"(2) The Director may require that such observers as he designates be present during the preparation for and the conduct of the test part of any operational test and evaluation conducted in the Department of Defense.

"(3) The Director shall have access to all records and data in the Department of Defense (including the records and data of each military department) that the Director considers necessary to review in order to carry out his duties under this section.

"(f)(1) Operational testing of a major defense acquisition program may not be conducted until the Director has approved in writing the adequacy of the plans (including the adequacy of projected levels of funding) for operational test and evaluation to be conducted in connection with that program.

"(2) A final decision within the Department of Defense to proceed with a major defense acquisition program beyond low-rate initial production may not be made until the Director has submitted to the Secretary of Defense the report with respect to that program required by subsection (b)(5) and the Committees on Armed Services and on Appropriations of the Senate and House of Representatives have received that report.

"(g)(1) The Director shall prepare an annual report summarizing the operational test and evaluation activities of the Department of Defense during the preceding fiscal year. Each such report shall be submitted concurrently to the Secretary of Defense and the Congress not later than January 15 immediately following the end of the fiscal year for which the report is prepared. The report shall include such comments and recommendations as the Director considers appropriate, including comments and recommendations on resources and facilities available for operational test and evaluation and levels of funding made available for operational test and evaluation activities. The Secretary may comment on any report of the Director to Congress under this paragraph.

"(2) The Director shall comply with requests from Congress (or any committee of either House of Congress) for information relating to operational test and evaluation in the Department of Defense.

"(h) The President shall include in the Budget transmitted to Congress pursuant to section 1105 of title 31 for each fiscal year a separate statement of estimated expenditures and proposed appropriations for that fiscal year for the activities of the Director of Operational Test and Evaluation in carrying out the duties and responsibilities of the Director under this section.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 136 the following new item:

"136a. Director of Operational Test and Evaluation: appointment; powers and duties.".

(b) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Director of Operational Test and Evaluation, Department of Defense.".

(c) The amendments made by this section shall take effect on November 1, 1983.

ASSISTANT SECRETARIES IN THE DEPARTMENT OF DEFENSE

SEC. 1212. (a)(1) Subsection (a) of section 136 of title 10, United States Code, is amended by striking out "seven" and inserting in lieu thereof "eleven".

(2) Subsection (b) of such section is amended—

(A) by inserting "(1)" after "(b)";

(B) by designating the second sentence of such subsection as paragraph (2);

(C) by designating the fourth sentence of such subsection as paragraph (3) and by striking out "Reserve Affairs" in such sentence and inserting in lieu thereof "Logistics";

(D) by striking out "reserve component" in the fifth sentence of such subsection and inserting in lieu thereof "logistics";

(E) by inserting after paragraph (3) of such subsection (as designated by clause (C)) the following paragraphs:

"(4) One of the Assistant Secretaries shall be the Assistant Secretary of Defense for Reserve Affairs. He shall have as his principal duty the overall supervision of reserve component affairs of the Department of Defense.

"(5) One of the Assistant Secretaries shall be the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence. He shall have as his principal duty the overall supervision of command, control, communications, and intelligence affairs of the Department of Defense.";

(F) by designating the sentence beginning "In addition" as paragraph (6) and in such sentence—

(i) striking out "In addition, one" and inserting in lieu thereof "One";

(ii) redesignating clauses (1) through (5) as clauses (A) through (E), respectively;

(iii) redesignating subclauses (A) through (D) of subclauses (i) through (iv), respectively; and

(iv) striking out "clauses (1)–(4)" and inserting in lieu thereof "clauses (A) through (D)".

(3) Subsection (f) of such section is repealed.

(b) Section 175(c) of title 10, United States Code, is amended by striking out "Manpower and".

(c)(1) The first sentence of section 3013 of title 10, United States Code, is amended by striking out "four" and inserting in lieu thereof "five".

(2) The first sentence of section 5034(a) of such title is amended by striking out "three" and inserting in lieu thereof "four".

(d) Section 5315 of title 5, United States Code, is amended—

(1) by striking out "(7)" after "Assistant Secretaries of Defense" and inserting in lieu thereof "(11)";

(2) by striking out "(4)" after "Assistant Secretaries of the Army" and inserting in lieu thereof "(5)"; and

(3) by striking out "(3)" after "Assistant Secretaries of the Navy" and inserting in lieu thereof "(4)".

(e) The amendments made by this section shall take effect on October 1, 1983.

COMMANDANT OF THE MARINE CORPS TO BE A MEMBER OF THE ARMED FORCES POLICY COUNCIL

SEC. 1213. Section 171(a) of title 10, United States Code, is amended—

(1) by striking out "and" at the end of clause (9);

(2) by striking out the period at the end of clause (10) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding after clause (10) the following new clause:

"(11) the Commandant of the Marine Corps.".

5 PERCENT ACROSS-THE-BOARD REDUCTION IN HEADQUARTERS STAFFS

SEC. 1214. (a) Not later than September 30, 1984, the Secretary of Defense shall reduce the total number of military and civilian personnel assigned to duty in the Office of the Secretary of Defense, the agencies of the Department of Defense, and the military departments to perform management headquarters activities or management headquarters support activities by a number that is at least 5 percent below the total number of personnel requested by the President for fiscal year 1984 to perform such activities.

(b) Any reduction in military or civilian personnel assigned to perform management headquarters activities or management headquarters support activities in the National Security Agency/Central Security Service, the Defense Intelligence Agency, the Organization of the Joint Chiefs of Staff, or the Naval Intelligence Command may not be included for the purposes of complying with the requirements of subsection (a).

(c) For purposes of this section, the terms "management headquarters activities" and "management headquarters support activities" have the same meanings as prescribed for such terms in Department of Defense Directive 4100.73 entitled "Department of Defense Management Headquarters and Headquarters Support", dated March 12, 1981.

REGULATIONS RELATING TO INCREASES IN PRICES FOR SPARE PARTS AND REPLACEMENT EQUIPMENT

SEC. 1215. (a) Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall issue regulations which—

(1) except as provided in clause (2), prohibit the purchase of any spare part or replacement equipment when the price of such part or equipment, since a time in the past specified by the Secretary (in terms of days or months) or since the most recent purchase of such part or equipment by the Department of Defense, has increased in price by a percentage in excess of a percentage threshold specified by the Secretary in such regulations, and

(2) permit the purchase of such spare part or equipment (notwithstanding the prohibition contained in clause (1)) if the contracting officer for such part or equipment certifies in writing to the head of the procuring activity before the purchase is made that—

(A) such officer has evaluated the price of such part or equipment and concluded that the increase in the price of such part or equipment is fair and reasonable, or

(B) the national security interests of the United States require that such part or equipment be purchased despite the increase in price of such part or equipment.

(b) The Secretary shall publish the regulations issued under this section in the Federal Register.

(c) Not less than 30 days before the Secretary publishes such regulatons in accordance with subsection (b), the Secretary shall submit the text of the proposed regulations to the Committees on Armed Services of the Senate and House of Representatives.

REPORT ON MANAGEMENT OF SPARE PARTS

SEC. 1216. (a) The Secretary of Defense shall submit to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives, by June 1, 1984, a comprehensive report on the management by the Department of Defense of acquisition of initial and replenishment spare parts and on the status of efforts within the Department of Defense (including particularly the Defense Logistics Agency and the military departments) to correct problems associated with increased costs of such parts. The Secretary shall include in such report the following:

(1) An analysis of the extent of overcharging on spare parts and shortages of spare parts.

(2) The status of efforts (if any) to ensure that procurement method codes (PMCs) used to denote the method of procurement for spare parts are accurately and appropriately applied.

(3) With respect to technical data required by a contract to be delivered to the Department of Defense, the status of efforts (if any) to identify and obtain such data that are missing and to identify and correct such data that are inaccurate or incomplete.

(4) The status of efforts to enhance the Department of Defense High-Dollar Spare Parts Breakout Program.

(5) The organizational identity of personnel assigned to the efforts referred to in paragraphs (1) through (4).

(6) A brief summary of any audit, investigation, or study relating to the acquisition or management of spare or replenishment parts conducted by or for any organization within the Department of Defense during the period beginning on the date of the interim report required in subsection (b) and ending on the date of the submission of the report under this subsection, to be accompanied by a copy of all current regulations or proposed defense regulations relating specifically to the acquisition or management of spare or replenishment parts.

(7) An analysis of the feasibility and desirability of establishing a statutory or contractual time limit on the protection from disclosure outside the Department of Defense given technical data delivered by contractors to the Department of Defense with limited rights (as defined in the Defense Acquisition Regulations).

(8) An analysis of the feasibility and desirability of withholding Department of Defense contracts from contractors who have obtained unreasonable profits on defense contracts or have sold items to the Department of Defense at unjustifiable prices, until any such excess amounts have been repaid.

(b) Not later than December 1, 1983, the Secretary shall submit to the committees named in subsection (a) an interim report stating briefly the actions being taken by the Department of Defense to improve the acquisition and management of spare parts by the Department. Such interim report shall include the identity of any working groups and a description of any studies being done.

(c) The Secretary of Defense shall put into effect at the earliest practicable date policies and procedures to achieve a long-term solution to problems relating to excessive costs of, and long lead times in the acquisition of, initial and replenishment spare parts. In formulating such policies and procedures, the Secretary shall consider the following recommendations:

(1) Parts should be acquired competitively whenever feasible and practicable.

(2) Parts should be acquired through Federal Supply Schedules and the Department of Defense supply system.

(3) Parts should be acquired in economic order quantities and on a multiyear basis whenever feasible and practicable.

(4) On all major system acquisitions, contractors should be required to identify in their contract proposals the cost to the Government of acquiring unlimited rights in technical data and the extent to which the contractor uses standard commercial products in order to allow the Government to assess the desirability of acquiring those unlimited rights and to enable the Government to assess properly the total life-cycle cost of the system.

(5) Contractors should be required to identify the manufacturer of a part and the manufacturer's part number.

(6) Consideration should be given early in the acquisition process to determinations of whether acquisition of unlimited rights in technical data is desirable, taking into consideration that the cost of acquiring reprocurement data may in some instances outweigh the benefits to be derived from such acquisition.

(7) When unlimited data rights in technical data are acquired from a contactor, the contractor should be required to provide to the Government data necessary to incorporate changes in design or technology.

(8) Before ordering any spare part, the contracting officer should review the acquisition history of that part.

AUTHORITY TO WITHHOLD FROM PUBLIC DISCLOSURE CERTAIN TECHNICAL DATA

SEC. 1217. (a) Chapter 4 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 140c. Secretary of Defense: authority to withhold from public disclosure certain technical data

"(a) Notwithstanding any other provision of law, the Secretary of Defense may withhold from public disclosure any technical data with military or space application in the possession of, or under the control of, the Department of Defense, if such data may not be exported lawfully outside the United States without an approval, authorization, or license under the Export Administration Act of 1979 (50 U.S.C. App. 2401–2420) or the Arms Export Control Act (22 U.S.C. 2751 et seq.). However, technical data may not be withheld under this section if regulations promulgated under either such Act authorize the export of such data pursuant to a general, unrestricted license or exemption in such regulations.

"(b)(1) Within 90 days after enactment of this section, the Secretary of Defense shall propose regulations to implement this section. Such regulations shall be published in the Federal Register for a period of no less than 30 days for public comment before promulgation. Such regulations shall address, where appropriate, releases of technical

data to allies of the United States and to qualified United States contractors, including United States contractors that are small business concerns, for use in performing United States Government contracts.

"(2) In this section, 'technical data with military or space application' means any blueprints, drawings, plans, instructions, computer software and documentation, or other technical information that can be used, or be adapted for use, to design, engineer, produce, manufacture, operate, repair, overhaul, or reproduce any military or space equipment or technology concerning such equipment.".

(b) The table of sections at the beginning of chapter 4 of such title is amended by adding at the end thereof the following new item:

"140c. Secretary of Defense: authority to withhold from public disclosure certain technical data.".

USE OF POLYGRAPHS BY THE DEPARTMENT OF DEFENSE

SEC. 1218. (a) The Secretary of Defense may not, before April 15, 1984, use, enforce, issue, implement, or otherwise rely on any rule, regulation, directive, policy, decision, or order that would permit the use of polygraph examinations in the case of civilian employees of the Department of Defense or members of the Armed Forces in any manner or to any extent greater than was permitted under rules, regulations, directives, policies, decisions, or orders of the Department of Defense in effect on August 5, 1982.

(b) The restrictions prescribed in subsection (a) with respect to the use of polygraph examinations in the Department of Defense shall not apply to the National Security Agency of the Department of Defense.

AUTHORITY TO PROVIDE ROUTINE PORT SERVICES TO NAVAL VESSELS OF ALLIED COUNTRIES AT NO COST

SEC. 1219. (a) Section 7227(b) of title 10, United States Code, is amended—

(1) by inserting "(1)" after "(b)"; and

(2) by adding at the end thereof the following new paragraph:

"(2)(A) When furnishing routine port services under this section to naval vessels of an allied country, the Secretary may furnish such services without reimbursement if such services are provided under an agreement that provides for the reciprocal furnishing by such country of routine port services to naval vessels of the United States without reimbursement. If routine port services are furnished under this section by a working-capital fund activity of the Navy established under section 2208 of this title and such activity is not reimbursed directly for the costs incurred by the activity in furnishing those services by reason of this paragraph, the working-capital fund activity shall be reimbursed for such costs out of operating funds currently available to the Navy.

"(B) In this paragraph, 'allied country' means any of the following:

"(i) A country that is a member of the North Atlantic Treaty Organization.

"(ii) Australia or New Zealand.

"(iii) Any other country designated as an allied country for the purposes of this paragraph by the Secretary of Defense with the concurrence of the Secretary of State.".

(b) The amendments made by subsection (a) shall take effect on October 1, 1983.

RECIPROCAL COMMUNICATIONS SUPPORT

SEC. 1220. (a) During fiscal year 1984, the Secretary of Defense, subject to the concurrence of the Secretary of State, may enter into an agreement with the Government of any allied country under which the United States agrees to provide communications support and related supplies and services to such country in return for the reciprocal provision to the United States of an equivalent value of communications support and related supplies and services by such country.

(b) In this section, "allied country" means any of the following:

(1) A country that is a member of the North Atlantic Treaty Organization.

(2) Australia or New Zealand.

TWO-YEAR EXTENSION OF PROHIBITION ON CONTRACTS FOR THE PERFORMANCE OF FIREFIGHTING AND SECURITY FUNCTIONS

SEC. 1221. (a) Except as provided in subsection (b), funds appropriated to the Department of Defense may not be obligated or expended before October 1, 1985, for the purpose of entering into a contract for the performance of firefighting or security-guard functions at any military installation or facility.

(b) The prohibition in subsection (a) does not apply—

(1) to a contract to be carried out at a location outside the United States (including its commonwealths, territories, and possessions) at which military personnel would have to be used for the performance of the function described in subsection (a) at the expense of unit readiness;

(2) to a contract to be carried out on a Government-owned but privately operated installation; or

(3) to a contract (or the renewal of a contract) for the performance of a function under contract on the date of the enactment of this Act.

(c) Not later than March 1, 1984, the Secretary of Defense shall submit to Congress a written report containing an assessment of the special needs of the Department of Defense with respect to firefighting and base security and an assessment of how those needs are met by both Federal employees and contract personnel. The report shall be prepared in consultation with the Administer of the United States Fire Administration of the Federal Emergency Management Agency.

REPORT ON COST SAVINGS UNDER CONTRACTING OUT PROCEDURES

SEC. 1222. (a) Not later than April 15, 1984, the Secretary of Defense shall submit a report to Congress describing the experience of the Department of Defense since January 1, 1981, with conversion to contractor operation of commercial or industrial type functions of the Department of Defense which previously had been performed by Department of Defense civilian or military personnel.

(b)(1) The report under subsection (a) shall include with respect to each function of the Department of Defense converted to contractor operation since January 1, 1981—

(A) the estimated cost (as of the date of the award of the contract) of performance of the function by the Government;

(B) the contractor's estimated cost of performance of the function in the bid of the contractor;

(C) the actual cost (as of the end of the contract or the date of the report) of contractor operation of such function; and

(D) the savings (shown in dollars and as a percentage) for the operation of such function since conversion to contractor performance.

(2) The report shall also show—

(A) the average savings (shown in dollars and as a percentage) of all functions converted to contractor performance since January 1, 1981, as projected at the time of contracting and as realized at the end of the contract or the date of the report;

(B) the dollar amount and percentage of such contracts awarded to small businesses; and

(C) the number of Federal employees whose employment by the Government was terminated as a result of conversion of such functions to contractor performance.

EXTENSION OF PERIOD FOR TRANSFER OF DEFENSE DEPENDENTS' EDUCATION SYSTEM TO DEPARTMENT OF EDUCATION

SEC. 1223. Section 302(a) of the Department of Education Organization Act (20 U.S.C. 3442(a)) is amended by striking out "not later than May 4, 1984" and inserting in lieu thereof "not earlier than May 4, 1986".

FORCE STRUCTURE CHANGES, AIR FORCE

SEC. 1224. None of the funds appropriated pursuant to an authorization contained in this or any other Act for operation and maintenance for the Air Force may be obligated or expended to carry out alterations in the planned changes with respect to F-106 and F-15 aircraft announced by the Air Force on January 31, 1983, in its plan for "Tactical and Air Defense Force Structure Changes" to be carried out at K. I. Sawyer Air Force Base, Michigan, until—

(1) the Secretary of the Air Force has conducted a study of the cost benefit, cost effectiveness, and military effectiveness of those proposed alterations to such plan and has submitted a written report to Congress, in conjunction with the submission of the Department of Defense's budget request for funds for fiscal year 1986 or any subsequent fiscal year, containing the results of such study, including an analysis of—

(A) the impacts on the regional economy of the area that would be affected by those proposed alterations to such plan of the nonmilitary costs to the United States, including increases in Federal outlays for unemployment compensation, for other benefits and services to individuals and communities, and for economic adjustment activities; and

(B) the environmental, strategic, and operational consequences of those proposed alterations to such plan; and

(2) a period of 60 days has expired after the date on which such report is received by the Congress in order to provide the appropriate committees of Congress with ample opportunity to consider fully the fiscal, economic, environmental, and military ramifications of those proposed alterations to the plan announced January 31, 1983.

PART C—PROVISIONS RELATING TO SPECIAL PROGRAMS

LIMITATION ON DEPLOYMENT OF MX MISSILE; DEVELOPMENT OF SMALL MOBILE MISSILE

SEC. 1231. (a) The Secretary of Defense may not deploy more than 10 MX missiles until—

(1) demonstration of subsystems and testing of components of the small mobile intercontinental ballistic missile system (including missile guidance and propulsion subsystems) have occurred; and

(2) nuclear effects tests on the components and subsystems of the prototype mobile transporter-launcher basing system and fixed basing system for the small missile have been carried out using full-scale tests, when practicable, and otherwise using scaled tests.

(b) The Secretary of Defense may not deploy more than 40 MX missiles until—

(1) the major elements (including the guidance and control subsystems) of a mobile missile weighing less than 33,000 pounds as a part of an intercontinental ballistic missile system have been flight tested;

(2) the major elements of the prototype small mobile intercontinental ballistic missile system (including the missile, the prototype mobile transporter-launcher basing system and fixed basing system, and the command, control, and communications system) have been designed and functionally integrated and the system has been validated;

(3) contractors for the full-scale engineering development of such a missile system have been selected and contracts have been awarded to those contractors; and

(4) full-scale engineering development of such a missile system has begun.

(c)(1) Not later than January 15 of each year from 1984 through 1988, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives a report—

(A) on the progress being made with respect to the development and deployment of the MX missile system;

(B) on the progress being made with respect to the development and testing of a small mobile intercontinental ballistic missile system; and

(C) on developments related to silo-hardening technology.

(2) In each report under paragraph (1), the Secretary shall certify whether the Department of Defense is developing a small mobile intercontinental ballistic missile system with a missile that weighs no more than 33,000 pounds and that is planned to carry no more than a single warhead.

(d) If at any time during the development of the small mobile intercontinental ballistic missile it appears that the weight of the missile when deployed will exceed 30,000 pounds, the Secretary of Defense shall submit a report to Congress stating the projected weight of the missile and providing an explanation of the reasons for the weight exceeding 30,000 pounds and the anticipated effects that weight could have on the mobility and blast resistance of the missile system.

(e) The President shall submit to the Committees on Armed Services of the Senate and the House of Representatives, coincident with the submission to the Congress of any request made after the date of the enactment of this Act for funds for the procurement of operational MX missiles intended for deployment, a written assessment relating to the requirement for and the anticipated impact of the procurement of such missiles. This assessment shall include the President's judgment with respect to—

(A) the degree to which current and projected international conditions require the procurement of such missiles for operational purposes;

(B) the expected impact the procurement of such missiles will have on the stability of the strategic balance between the United States and the Soviet Union; and

(C) the effect the procurement of such missiles, if approved by the Congress, will likely have on achieving negotiated reductions in the nuclear forces of the United States and the Soviet Union through sound, equitable, and verifiable arms control agreements.

SMALL, MOBILE, SINGLE WARHEAD ICBMS

SEC. 1232. It is the sense of the Congress that the design, development, and testing of small, mobile, single warhead intercontinental ballistic missiles (ICBMs) be pursued as a matter of the highest national priority. To achieve this objective, the administration should proceed without delay to engineering design of a small, single warhead ICBM capable of mobile deployment. Key elements of such a program which should be pursued immediately include missile design, guidance accuracy, hardened mobile transporter design, mobile basing and survivable Communication, Command and Control (C^3). Program emphasis should be consistent with past top national priorities such as Polaris, Minuteman, and Apollo, and program management structure should also reflect such priority. The Department of Defense should set forth funding and production schedules consistent with the earliest possible Initial Operational Capability (IOC), at or prior to 1992, in its submission to Congress to authorize appropriations for fiscal year 1985.

LIMITATION ON PROCUREMENT OF BINARY CHEMICAL WEAPONS

SEC. 1233. (a) Notwithstanding any other provision of law, no funds may be obligated or expended after the date of the enactment of this Act for the production of binary chemical weapons unless the President certifies to the Congress that for each 155-millimeter binary artillery shell or aircraft-delivered binary aerial bomb produced a serviceable unitary artillery shell from the existing arsenal shall be rendered permanently useless for military purposes.

(b)(1) Funds appropriated pursuant to the authorization of appropriations for the Army in section 101 of this Act may be used for the establishment of a production base for binary chemical munitions and for the procurement of components for 155-millimeter binary chemical artillery projectiles, but such funds may not be used for the actual production of binary chemical munitions before October 1, 1985.

(2) Notwithstanding the provisions of paragraph (1), before the production of binary chemical munitions may begin after September 30, 1985, the President must certify to Congress in writing that, in light of circumstances prevailing at the time the certification is made, the production of such munitions is essential to the national interest.

(3) For purposes of this subsection, "production of binary chemical munitions" means the final assembly of weapon components and the filling or loading of components with binary chemicals.

PROHIBITION AGAINST USING FUNDS APPROPRIATED FOR THE ADVANCED TECHNOLOGY BOMBER PROGRAM FOR ANY OTHER PURPOSE

SEC. 1234. None of the funds appropriated pursuant to an authorization of appropriations in this Act to carry out the Advanced Technology Bomber program may be used for any other purpose.

ESTABLISHING CRITERIA GOVERNING THE TEST OF ANTISATELLITE WARHEADS

SEC. 1235. Notwithstanding any other provision of law, none of the funds appropriated pursuant to an authorization contained in this or any other Act may be obligated or expended to test any explosive or inert antisatellite warheads against objects in space unless the President determines and certifies to the Congress—

(1) that the United States is endeavoring, in good faith, to negotiate with the Soviet Union a mutual and verifiable ban on antisatellite weapons; and

(2) that, pending agreement on such a ban, testing of explosive or inert antisatellite warheads against objects in space by the United States is necessary to avert clear and irrevocable harm to the national security.

REQUIREMENT FOR THE USE OF COMPETITIVE BIDDING PROCEDURES FOR THE LEASE OF CT-39 REPLACEMENT AIRCRAFT

SEC. 1236. None of the funds appropriated pursuant to an authorization of appropriations contained in this Act may be used by the Air Force for the lease of any CT-39 replacement aircraft unless competitive bidding procedures are followed in the awarding of the lease for such aircraft and the bidding on the lease is open to all qualified domestic firms. Such bidding procedures shall include consideration of the total costs to the Government of leasing such aircraft, including maintenance, logistics and training costs.

LIMITATION ON WAIVERS OF COST-RECOVERY REQUIREMENTS UNDER ARMS EXPORT CONTROL ACT

SEC. 1237. The authority of the President under section 21(e)(2) of the Arms Export Control Act may be exercised without regard to the limitation imposed by section 770 of the Department of Defense Appropriation Act, 1983 (as contained in Public Law 97-377; 96 Stat. 1862).

WAIVER OF LIMITATION ON FOREIGN MILITARY SALES PROGRAM

SEC. 1238. The Arms Export Control Act shall be administered as if section 747 of the Department of Defense Appropriation Act, 1983 (as contained in Public Law 97-377; 96 Stat. 1858) had not been enacted into law.

F/A-18 AIRCRAFT PROGRAM

SEC. 1239. The Secretary of the Navy may carry out the F/A-18 aircraft program without regard to the first proviso in the paragraph under the heading "AIRCRAFT PROCUREMENT, NAVY" in title IV (procurement) of the Department of Defense Appropriation Act, 1983 (as contained in Public Law 97-377; 96 Stat. 1841).

STUDY TO RE-ESTIMATE THE COST OF THE B-1B BOMBER PROGRAM

SEC. 1240. (a) The Secretary of Defense shall conduct a detailed financial analysis on the projected cost of procuring 100 B-1B bomber aircraft and, on the basis of such analysis, shall as necessary make any revisions to the estimate of the total projected cost for the procurement of such aircraft certified to by the President on January 18, 1982.

(b) The Secretary shall submit a written report to the Congress not more than 60 days after the date of the enactment of the Department of Defense Appropriation Act for fiscal year 1984, but in no event later than January 31, 1984, setting forth the results of the analysis required under subsection (a). The Secretary shall include in such report the new estimate of the projected total cost for the procurement of 100 B-1B aircraft.

(c) The Secretary shall transmit a copy of the report referred to in subsection (b) to the Comptroller General of the United States for his review and shall make available to the Comptroller General (consistent with those provisions of title 31, United States Code, replacing the Budget and Accounting Act, 1921, and provisions of law contained in the amendments made by Public Law 96-226) such additional data and information as the Comptroller General requires for the purposes of his review. Such data and information as the Comptroller General receives under this section shall not be disclosed to anyone other than those persons specially

designated by the Comptroller General to have access to that data and information. Any report by the Comptroller General concerning data and information provided pursuant to this section may, consistent with the classification of such report, be provided to the Congress and shall be prepared with due regard to the sensitivity of the information received in such a manner as to avoid disclosure of data which could adversely affect ongoing contract negotiations or the national security.

PART D—MISCELLANEOUS

ENDORSEMENT OF REPORT ON IMPROVED STRATEGIC COMMUNICATIONS

SEC. 1251. (a) The Congress finds that the report to the Congress by the Secretary of Defense entitled "Direct Communications Links and Other Measures to Enhance Stability", dated April 11, 1983, and submitted to the Congress pursuant to section 1123 of the Department of Defense Authorization Act, 1983 (Public Law 97-252; 96 Stat. 756), contains several significant proposals that if implemented would, taken together, make significant progress toward eliminating the danger of accident or misinterpretation leading to nuclear war. Among the proposals in that report that Congress specifically finds constructive are proposals—

(1) to enhance the speed and quality of communications between the Governments of the United States and the Soviet Union;

(2) to establish a communications link between the senior military commands of the United States and the Soviet Union; and

(3) to develop a system of prior notification between the United States and the Soviet Union of missile launches and military exercises by either nation that could be misinterpreted by the other and therefore be destabilizing.

(b) The Congress—

(1) endorses the findings in the report described in subsection (a) and urges the President and the Secretary of Defense to implement as rapidly as possible the proposals made in that report;

(2) suggests that, when practicable and not harmful to the national security of the United States, the United States should unilaterally implement confidence-building measures (such as prior notification of missile launches and military exercises) on a temporary, voluntary basis and should invite the Soviet Union to join in implementing those measures; and

(3) endorses proposals that the United States, through its arms control negotiators, should seek a separate, limited agreement with the Soviet Union on confidence-building measures, such as those recommended in the report described in subsection (a), designed to reduce the danger of accident or misinterpretation leading to nuclear war.

PUBLIC HEALTH SERVICE HOSPITALS

Sec. 1252(a) The Secretary of Defense, in consultation with the Secretary of Health and Human Services, shall conduct demonstration projects for the purpose of comparing and evaluating the cost-effectiveness, accessibility, patient acceptance, and the quality of medical care contracted for by the Secretary of Defense under sections 1079 and 1086 of title 10, United States Code, with the medical care provided in those facilities deemed to be facilities of the uniformed services by virtue of section 911 of the Military Construction Authorization Act, 1982 (42 U.S.C. 248c). The Secretary of Defense shall begin conducting such projects within one year after the date of the enactment of this section and continue conducting such projects for not less than three years.

(b) The projects carried out by the Secretary of Defense under this subsection shall utilize various alternative mechanisms for the payment of medical services provided eligible persons, including capitation, prospective payment, all-inclusive fee-for-service charges, and other concepts and programs consistent with the purpose of this section.

(c) If the Secretary of Defense and the Secretary of Health and Human Services determine such action is necessary in order to permit a meaningful evaluation of alternative methods of providing medical care to persons eligible for such care under sections 1079 and 1086 of title 10, United States Code, they may jointly designate additional civilian medical facilities to be facilities of the uniformed services for the purposes of section 1079 of such title. The Secretary may designate a facility under the authority of this subsection for such purposes only if such action is agreed to by the governing body of the facility.

(d) The Secretary of Defense, in consultation with the Secretary of Health and Human Services, shall submit annually to the Committees on Appropriations and on Armed Services of the Senate and the House of Representatives a written report on the results of the studies and projects carried out under this section. The first such report shall be submitted not later than one year after the date of the enactment of this section. The last such report shall be submitted not later than one year after the completion of all such studies and projects.

(e) The Secretary of Defense and the Secretary of Health and Human Services may terminate, for purposes of chapter 55 of title 10, United States Code, the status of any facility referred to in subsection (a) or (c) to furnish medical or dental care to members and former members of the uniformed services or their dependents, and such termination may become effective at any time after December 31, 1987. The termination of such status in the case of any such facility may be effected only by an order jointly issued by the Secretary of Defense and the Secretary of Health and Human Services which identifies the facility whose status is being terminated and specifies the date on which such status is being terminated. A copy of each such order shall be furnished to the affected facility and the Committees on Appropriations and on Armed Services of the Senate and the House of Representatives and shall become effective in accordance with the terms of the notice, but not earlier than six months following the date on which a copy of the notice has been furnished to the facility and the committees. Any facility described in subsection (a) or designated under subsection (c) may terminate its status or designation made under that subsection at any time after the expiration of six months following the date on which a copy of the order terminating the status or designation has been furnished the facility.

(f) Section 911(b) of the Military Construction Authorization Act, 1982 (42 U.S.C. 248c(b)), is amended by striking out "at any time after" and all that follows through the end of the second sentence and inserting in lieu thereof: "as provided for in section 1252(e) of the Department of Defense Authorization Act, 1984.".

EMPLOYMENT PROTECTION FOR CERTAIN NONAPPROPRIATED FUND INSTRUMENTALITY EMPLOYEES

SEC. 1253. (a)(1) Chapter 81 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 1587. Employees of nonappropriated fund instrumentalities

"(a) In this section:

"(1) 'Nonappropriated fund instrumentality employee' means a civilian employee who is paid from nonappropriated funds of Army and Air Force Exchange Service, Navy Resale and Services Support Office, Marine Corps exchanges, or any other instrumentality of the United States under the jurisdiction of the armed forces which is conducted for the comfort, pleasure, contentment, or physical or mental improvement of members of the armed forces.

"(2) 'Civilian employee' has the meaning given the term 'employee' by section 2105(a) of title 5.

"(3) 'Personnel action', with respect to a nonappropriated fund instrumentality employee (or an applicant for a position as such an employee), means—

"(A) an appointment;

"(B) a promotion;

"(C) a disciplinary or corrective action;

"(D) a detail, transfer, or reassignment;

"(E) a reinstatement, restoration, or reemployment;

"(F) a decision concerning pay, benefits, or awards, or concerning education or training if the education or training may reasonably be expected to lead to an appointment, promotion, or other action described in this paragraph; and

"(G) any other significant change in duties or responsibilities that is inconsistent with the employee's salary or grade level.

"(b) Any civilian employee or member of the armed forces who has authority to take, direct others to take, recommend, or approve any personnel action shall not, with respect to such authority, take or fail to take a personnel action with respect to any nonappropriated fund instrumentality employee (or any applicant for a position as such an employee) as a reprisal for—

"(1) a disclosure of information by such an employee or applicant which the employee or applicant reasonably believes evidences—

"(A) a violation of any law, rule, or regulation; or

"(B) mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety;

if such disclosure is not specifically prohibited by law and if the information is not specifically required by or pursuant to executive order to be kept secret in the interest of national defense or the conduct of foreign affairs; or

"(2) a disclosure by such an employee or applicant to any civilian employee or member of the armed forces designated by law or by the Secretary of Defense to receive disclosures described in clause (1), of information which the employee or applicant reasonably believes evidences—

"(A) a violation of any law, rule, or regulation; or

"(B) mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety.

"(c) This section does not apply to an employee in a position excluded from the coverage of this section by the President based upon a determination by the President that the exclusion is necessary and warranted by conditions of good administration.

"(d) The Secretary of Defense shall be responsible for the prevention of actions prohibited by subsection (b) and for the correc-

tion of any such actions that are taken. The authority of the Secretary to correct such actions may not be delegated to the Secretary of a military department or to the Assistant Secretary of Defense for Manpower and Logistics.

"(e) The Secretary of Defense, after consultation with the Director of the Office of Personnel Management and the Special Counsel of the Merit Systems Protection Board, shall prescribe regulations to carry out this section. Such regulations shall include provisions to protect the confidentiality of employees and applicants making disclosures described in clauses (1) and (2) of subsection (b).".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1587. Employees of nonappropriated fund instrumentalities.".

(b) Section 1587 of such title, as added by subsection (a), shall apply with respect to any conduct prohibited by subsection (b) of such section which occurs after the date of the enactment of this Act.

EXTENSION OF THE GRACE PERIOD FOR THE ENFORCEMENT OF THE PROVISIONS RELATING TO THE FAILURE TO REGISTER AND THE DENIAL OF FEDERAL EDUCATIONAL ASSISTANCE

SEC. 1254. The provision of the notice regarding the implementation of regulations entitled "Student Assistance General Provisions; Registration With Selective Service" (48 Federal Register No. 130, July 6, 1983), relating to the schedule under which an institution of higher education may certify first and then inform the student of the requirement that the student file a Statement of Registration Compliance for the period prior to July 31, 1983, is extended from July 31, 1983, through September 30, 1983.

IMPACT AID AUTHORIZATION

SEC. 1255. (a)(1) Section 505(a)(1) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "section 2" the second place it appears and inserting in lieu thereof "section 7".

(2) Section 505(a)(1) of such Act is further amended—

(A) by striking out "1983, and 1984" and inserting in lieu thereof "and 1983, and $565,000,000 for each of the fiscal years 1984 and 1985"; and

(B) by inserting after "$10,000,000" in clause (A) the following: "for each of the fiscal years 1982 and 1983 and $20,000,000 for each of the fiscal years 1984 and 1985".

(3)(A) Section 505(a)(3) of such Act is amended by striking out "or 1984" and inserting in lieu thereof "1984, or 1985".

(B) Section 505(b) of such Act is amended by striking out "or 1984" and inserting in lieu thereof "1984, or 1985".

(b) Section 3(d)(2)(E) of the Act of September 30, 1950 (Public Law 874, 81st Congress) is amended—

(1) by inserting "or 1984" after "fiscal year 1983" in clause (ii); and

(2) by striking out "1984" in clause (iii) and inserting in lieu thereof "1985".

RETIREMENT DEDUCTIONS FROM THE PAY OF JUDGES OF THE UNITED STATES COURT OF MILITARY APPEALS

SEC. 1256. (a) Section 8334 of title 5, United States Code, is amended—

(1) in the first sentence of subsection (a)(1) by inserting "and a judge of the United States Court of Military Appeals" before the period; and

(2) by adding at the end of the table contained in subsection (c) the following:

"Judge of the United States Court of Military Appeals for service as a judge of that court.	6	May 5, 1950, to October 31, 1956.
	6½	November 1, 1956, to December 31, 1969.
	7	January 1, 1970, to (but not including) the date of the enactment of the Department of Defense Authorization Act, 1984.
	8	On and after the date of the enactment of the Department of Defense Authorization Act, 1984.".

(b) Section 8336 of such title is amended—

(1) by redesignating subsection (k) as subsection (l); and

(2) by inserting after subsection (j) the following new subsection (k):

"(k) A judge of the United States Court of Military Appeals who is separated from the service after becoming 62 years of age and completing 5 years of civilian service or after completing the term of service for which he was appointed as a judge of such court is entitled to an annuity. A judge who is separated from the service before becoming 60 years of age is entitled to a reduced annuity.".

(c) Section 8337(a) of such title is amended by inserting the following after the third sentence: "A judge of the United States Court of Military Appeals who completes 5 years of civilian service and who is found by the Office to be disabled for useful and efficient service as a judge of such court or who is removed for mental or physical disability under section 867(a)(2) of title 10 shall be retired on the judge's own application or upon such removal.".

(d) Section 8338 of such title is amended—

(1) by redesignating subsection (c) as subsection (d); and

(2) by inserting after subsection (b) the following new subsection (c):

"(c) A judge of the United States Court of Military Appeals who is separated from the service after completing 5 years of civilian service is entitled to an annuity beginning at the age of 62 years. A judge of such court who is separated from the service after completing the term of service for which he was appointed is entitled to an annuity. If an annuity is elected before the judge becomes 60 years of age, it shall be a reduced annuity.".

(e) Section 8339 of such title is amended—

(1) in subsection (d), by adding at the end thereof the following new paragraph:

"(6) The annuity of an employee who is a judge of the United States Court of Military Appeals, or a former judge of such court, retiring under this subchapter is computed under subsection (a) of this section, except, with respect to his service as a judge of such court, his service as a Member, his congressional employee service, and his military service (not exceeding 5 years) creditable under section 8332 of this title, his annuity is computed by multiplying 2¼ percent of his average pay by the years of that service."; and

(2) by adding at the end of subsection (h) the following new sentence: "The annuity computed under subsections (a), (d)(6) and (f) of this section for a judge of the United States Court of Military Appeals retiring under the second sentence of section 8336(k) of this title or the third sentence of section 8338(c) of this title is reduced by 1/12 of 1 percent for each full month not in excess of 60 months, and 1/6 of 1 percent for each full month in excess of 60 months, the judge is under 60 years of age at the date of separation.".

(f) The increase in deductions from the pay of a judge of the United States Court of Military Appeals required by section 8334(a) of title 5, United States Code, as amended by subsection (a), shall take effect with respect to the first pay period that begins after the date of the enactment of this Act.

ONE-YEAR POSTPONEMENT FOR CERTAIN DEPOSITS FOR CIVIL SERVICE RETIREMENT CREDIT FOR MILITARY SERVICE

SEC. 1257. Section 8334(j)(2)(A) of title 5, United States Code, is amended by striking out "October 1, 1982" and inserting in lieu thereof "October 1, 1983".

COMPENSATION FOR INJURIES INCURRED IN THE PERFORMANCE OF DUTY BY MEMBERS OF THE CIVIL AIR PATROL

SEC. 1258. (a) Section 8141 of title 5, United States Code, is amended—

(1) in subsection (a), by inserting "under 18 years of age" after "Civil Air Patrol Cadet"; and

(2) in subsection (b)(1), by striking out "$300" and inserting in lieu thereof "the rate of basic pay payable for step 1 of grade GS-9 in the General Schedule under section 5332 of this title".

(b)(1) The amendments made by subsection (a) shall take effect on the date of the enactment of this Act.

(2) The amendment made by subsection (a)(1) shall apply only to deaths or injuries occurring on or after the date of the enactment of this Act.

(3) The amendment made by subsection (a)(2) shall apply only to the computation of compensation payable for periods commencing on or after the date of the enactment of this Act.

REPEAL OF REQUIREMENT FOR RETIREE SUGGESTION PROGRAM

SEC. 1259. (a) Section 2390 of title 10, United States Code, is repealed.

(b) The table of sections at the beginning of chapter 141 of such title is amended by striking out the item relating to section 2390.

OFFSHORE DRILLING AFFECTING NAVAL OPERATIONS

SEC. 1260. (a) The Secretary of the Navy shall submit a report to the Committees on Armed Services of the Senate and House of Representatives on the potential effect on naval operations of any proposed lease by the Department of the Interior of offshore lands for oil or gas drilling.

(b) The Secretary of the Navy shall define offshore zones along the United States in which oil or gas drilling would cause appreciable impact on naval operations. The Secretary shall transmit to Congress and to the Secretary of the Interior a report describing the zones so established and the justification for each such zone.

RESTORATION OF BEDFORD AIR FORCE STATION, VIRGINIA

SEC. 1261. The Secretary of the Air Force may remove from the site of the former Bed-

ford Air Force Station, Virginia, the improvements made to that site by the Air Force and may restore the premises as provided in the license from the United States Forest Service of the Department of Agriculture authorizing the use of that site by the Air Force.

PROHIBITION ON PURCHASE OF CERTAIN TYPEWRITERS

SEC. 1262. None of the funds available to the Department of Defense shall be available for the procurement of manual typewriters which were manufactured by facilities located within states which are signatories to the Warsaw Pact.

AWARD OF CAMPAIGN AND SERVICE MEDALS TO CERTAIN PERSONS

SEC. 1263. (a) Section 401 of the GI Bill Improvements Act of 1977 (Public Law 95-202; 91 Stat. 1449; 38 U.S.C. 106 note) is amended by adding at the end thereof the following new subsection:

"(c) Under regulations prescribed by the Secretary of Defense, any person who is issued a discharge under honorable conditions pursuant to the implementation of subsection (a) of this section may be awarded any campaign or service medal warranted by such person's service.".

(b) The amendment made by subsection (a) shall apply to all persons issued discharges under honorable conditions pursuant to section 401 of the GI Bill Improvements Act of 1977, whether such discharges are awarded before, on, or after the date of the enactment of this Act.

COMMEMORATIVE MEDAL FOR FAMILIES OF AMERICAN PERSONNEL MISSING IN SOUTHEAST ASIA

SEC. 1264. (a) The Congress finds and declares that—

(1) 2,494 Americans, military and civilian, are listed as missing or otherwise unaccounted for in Southeast Asia;

(2) those missing or otherwise unaccounted for Americans have suffered untold hardship at the hands of a cruel enemy while in the service of their country;

(3) the loyalty, hope love, and courage of these families provide inspiration to all Americans;

(4) the Congress and the people of the United States are committed to a full accounting for all Americans missing or otherwise unaccounted for in Southeast Asia; and

(5) the service of those missing and otherwise unaccounted for Americans is deserving of special recognition by the Congress and all Americans.

(b)(1)(A) The Speaker of the House of Representatives and the President pro tempore of the Senate are authorized jointly to present, on behalf of the Congress, to those American personnel listed as missing or otherwise unaccounted for in Southeast Asia, to be accepted by next of kin, bronze medals designed by an artist who is an in-theater Vietnam veteran, in recognition of the distinguished service, heroism, and sacrifice of these personnel, and the commitment of the American people to their return. For such purpose, the Secretary of the Treasury shall cause to be struck bronze medals.

(B) There is authorized to be appropriated not to exceed $20,000 to carry out the provisions of subparagraph (A).

(2) The Secretary of the Treasury may cause miniature duplicates in bronze of the medal provided for in paragraph (1) to be coined and sold, under such regulations as he may prescribe, at a price sufficient to cover the cost thereof (including labor, materials, dies, use of machinery, and overhead expenses), and the appropriation used for carrying out the provisions of this subsection shall be reimbursed out of the proceeds of such sale.

(3) The medals provided for in this subsection are national medals for the purpose of section 5111 of title 31, United States Code.

NAME OF SCHOOL OF MEDICINE AT THE UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

SEC. 1265. The School of Medicine of the Uniformed Services University of the Health Sciences shall after the date of the enactment of this Act be known and designated as the "F. Edward Hébert School of Medicine". Any reference to such school of medicine in any law, regulation, map, document, or other record of the United States shall after such date be deemed to be a reference to such school of medicine as the F. Edward Hébert School of Medicine.

ACCEPTANCE OF VOLUNTARY SERVICES FOR MILITARY MUSEUMS AND FAMILY SUPPORT PROGRAMS

SEC. 1266. (a) Chapter 81 of title 10, United States Code, is amended by adding after section 1587 (as added by section 1253) the following new section:

"§ 1588. Authority to accept certain voluntary services

"(a) Notwithstanding section 1342 of title 31, the Secretary of a military department may accept from any person voluntary services to be provided for a museum or a family support program operated by that military department.

"(b) A person providing voluntary services under subsection (a) shall be considered to be an employee for the purposes of chapter 81 of title 5, relating to compensation for work-related injuries, and to be an employee of the Government for the purposes of chapter 171 of title 28, relating to tort claims. Such a person who is not otherwise employed by the Federal Government shall not be considered to be a Federal employee for any other purpose by reason of the provision of such services.".

(b) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 1587 (as added by section 1253) the following new item:

"1588. Authority to accept certain voluntary services.".

REPORT ON PROPOSED LEGISLATION FOR CODIFICATION OF CERTAIN PROVISIONS OF LAW

SEC. 1267. The Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives not later than February 1, 1984, proposed legislation for codification into appropriate titles of the United States Code, or for incorporation into other existing laws, those provisions of law that have been enacted during the past five years as a part of the annual Department of Defense Authorization Act or the annual Department of Defense Appropriation Act under the heading "General Provisions" and that in the opinion of the Secretary should be so codified or incorporated.

TECHNICAL AMENDMENTS TO TITLE 10, UNITED STATES CODE

SEC. 1268. Title 10, United States Code, is amended as follows:

(1) Section 139b(g)(2) is amended by striking out "procurment" and inserting in lieu thereof "procurement".

(2) Section 140 is amended by striking out "of this section" in subsections (a) and (c).

(3) Section 520(a) is amended—

(A) by striking out "For the fiscal year beginning on October 1, 1980" and all that follows through "1982, the" and inserting in lieu thereof "The";

(B) by striking out "such fiscal year" the first place it appears in the last sentence and inserting in lieu thereof "any fiscal year"; and

(C) by striking out "number of such" and all that follows through "into" in the last sentence and inserting in lieu thereof "total number of persons originally enlisted or inducted to serve on active duty (other than active duty for training) in".

(4) Section 1079 is amended—

(A) by striking out "thirty" in subsections (a) and (d) and inserting in lieu thereof "30"; and

(B) by striking out "of this section" in subsection (g).

(5)(A) The heading of section 1081 is amended by striking out the semicolon and the last word.

(B) The item relating to that section in the table of sections at the beginning of chapter 55 is amended by striking out the semicolon and the last word.

(6) Section 1085 is amended by inserting a comma after "or his dependent" the first place it appears.

(7) Section 1090 is amended by striking out "(a)".

(8) Section 1126(a)(1) is amended by striking out "Who" and inserting in lieu thereof "who".

(9) Section 1489(a)(2) is amended by striking out "the date of the enactment of this section" and inserting in lieu thereof "October 14, 1980".

(10) Section 2005 is amended—

(A) by striking out "of this section" each place it appears in subsections (c) and (d); and

(B) by striking out "section—" in subsection (e) and inserting in lieu thereof "section:".

(11) Section 2101 is amended—

(A) by striking out "chapter—" and inserting in lieu thereof "chapter:";

(B) by striking out "'program'" and inserting in lieu thereof "'Program' ";

(C) by striking out the semicolon at the end of paragraph (1) and inserting in lieu thereof a period;

(D) by striking out "'member'" and inserting in lieu thereof "'Member' ";

(E) by striking out "; and" and inserting in lieu thereof a period; and

(F) by striking out "'advanced'" and inserting in lieu thereof " 'Advanced' ".

(12)(A) Section 2116 is repealed.

(B) The table of sections at the beginning of chapter 104 is amended by striking out the item relating to section 2116.

(13) Section 2120 is amended by striking out "chapter—" and inserting in lieu thereof "chapter:".

(14) Section 2134 is amended by striking out the second sentence of such section.

(15) The table of chapters at the beginning of subtitle A and the table of chapters at the beginning of part II of such subtitle are amended by striking out "and" in the item relating to chapter 60 and inserting in lieu thereof "or".

And the House agree to the same.

Solely for consideration of section 1030C:

ROBERT T. STAFFORD,
CLAIBORNE PELL,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 675) to authorize appropriations for fiscal year 1984 for the Armed Forces for procurement, for research, development, test, and evaluation, and for operation and maintenance, to prescribe personnel strengths for such fiscal year for the Armed Forces and for cvivilian employees of the Department of Defense, to authorize appropriations for such fiscal year for civil defense, to authorize certain construction at military installations for fiscal year, to authorize appropriations for the Department of Energy for national security for such fiscal year, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SUMMARY STATEMENT OF CONFERENCE ACTION

The conferees have agreed to authorizations in Titles I, II, III and VIII for procurement, research, development, test, and evaluation, operation and maintenance, and civil defense that total $187.5 billion. This figure is $10.5 billion below the President's budget request, $1.5 billion above the recommendations in the Senate bill and $0.2 billion above the comparable figures in the House amendment. The dollar authorizations in the bill explicitly include the cost of a 4 percent civilian personnel pay raise effective January 1, 1983.

The Defense authorization bill provides authorizations for appropriations but does not provide budget authority. Budget authority for Department of Defense programs will be provided in appropriations bills. Because the First Concurrent Budget Resolution for Fiscal Year 1984 provides for target levels of budget authority and outlays, there is not a direct relation between the Defense authorization bill and the budget resolution. Nevertheless the conferees were mindful that the Congress has adopted a budget resolution that targets an $11.9 billion reduction in budget authority to the President's budget for National Defense.

The conferenece agreement would make a reduction of $10.5 billion in those portions of the defense budget authorized by dollar amounts in the bill. The conferees believe that this reduction is consistent with the target of the first budget resolution in light of the additional reductions that have been or will be made in items under the jurisdiction of the Armed Services Committees, such as reductions in military construction and Department of Energy Military Application programs. Reductions that have been or are expected to be made in military active duty and retires compensation, which are not authorized by dollar amounts in the bill, will offset virtually all of the cost of the military pay raise provided in the bill.

Adjustments to reflect lower than budgeted prices of purchased goods and services

The Senate bill incorporated $3.4 billion in reductions to reflect revised Administration estimates of the cost of the fiscal year 1984 defense program. The reduction of $3.4 billion included a reduction of $1.3 billion to reflect an anticipated lower average price for fuel and petroleum products and a reduction of $2.1 billion to reflect an anticipated lower price for other goods and services purchased by the Department of Defense.

The House amendment incorporated a reduction of $1.3 billion in anticipation of lower than budgeted fuel costs and also included as reduction of $0.1 billion in the operations and maintenance accounts in anticipation of lower than budgeted prices.

The conferees agreed to incorporated approximately one half of the $2.1 billion in reductions in anticipation of lower than budgeted prices of goods and services purchased by the Department of Defense. The conferees further agreed that this adjustment would be incorporated into each authorization account as was done in the Senate bill. The tables accompanying the discussion of each major category of procurement delineate the specific reductions recommended.

SUMMARY OF CONFERENCE ACTIONS ON DEFENSE AND CIVIL DEFENSE AUTHORIZATION FOR FISCAL YEAR 1984

[Amounts in millions of dollars]

Item	Fiscal year 1984

AIRCRAFT PROCUREMENT, ARMY—Continued

[Amounts in millions of dollars]

Item	Fiscal year 1984 request		H.R. 2969		S. 675		Conference		Change from request	
	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount
Inflation adjustment		0		0		−31.0		−16.2		−16.2
Total, aircraft procurement, Army		3,472.1		3,331.8		3,230.9		3,331.4		−140.7

C-12 utility aircraft (Huron)

No authorization was requested for the C-12D aircraft. The Senate bill contained no authorization for the C-12D. The House amendment authorized $11.8 million for procurement of 6 C-12D aircraft.

The conferees recommend authorization of $11.8 million for procurement of 6 C-12D aircraft.

The Senate recedes.

AH-64 attack helicopter (Apache)

The budget request contained $1,219.3 million for procurement of 112 AH-64 helicopters and $78.2 million for advance procurement. The Senate bill authorized $1,114.3 million for procurement of 96 AH-64 helicopters and $62.2 million for advance procurement. The House amendment authorized $1,204.1 million for procurement of 112 AH-64 helicopters and $60.4 million for advance procurement.

The conferees recommend authoriztion of $1,189.1 million for procurement of 112 AH-64 helicopters and $62.2 million for advance procurement.

The conferees believe that the Army should begin selectively to equip Army National Guard units with the Apache while it continues to transition AH-1's to lower priority units. This approach is similar to that of the Navy and Air Force where F-18's and F-16's are being distributed to reserve components.

Accordingly, the conferees request that the Army identify those Army National Guard units that should be equipped with the AH-64 and include funds in its fiscal year 1986 request for aircraft for the first AH-64 unit in the Army National Guard.

The Senate recedes with an amendment.

UH-60A utility helicopter (Black Hawk)

The conferees concur in the House position that the Army is authorized, under its departmental support for civilian law enforcement operations, to loan 4 UH-60 Black Hawk helicopters to Customs Air Operations for use as apprehension aircraft in aerial drug interdiction.

Joint surveillance and target attack radar (JSTARS) advance procurement

No authorization was requested for JSTARS advance procurement. The Senate bill contained no authorization for JSTARS advance procurement. The House amendment authorized $5.0 million for JSTARS advance procurement.

The conferees recommend authoriztion of $5.0 million for JSTARS advance procurement. A more detailed description of conference action on the JSTARS program is contained in the discussion of Title II of this report.

The Senate recedes.

Modification of aircraft, Army

The budget request contained $633.3 million for modification of Army aircraft including $26.3 million for AH-1 modifications; $360.5 million for CH-47 modifications; and $45.8 million for OV-1 modifications.

The Senate bill authorized $639.1 million for modification of Army aircraft including $72.1 million for AH-1 modifications; $360.5 million for CH-47 modifications (of which $335.7 million was for modification of 36 CH-47A-C helicopters to the CH-47D configuration under a multiyear procurement program); $45.8 million for OV-1 modifications; and a general reduction of $40.0 million in the Army aircraft modification account.

The House amendment authorized $596.2 million for modification of Army aircraft including $72.1 million for AH-1 modifications; $296.5 million for CH-47 modifications (of which $271.7 million was for modification of 32 CH-47A-C helicopters to the CH-47D configuration under an annual procurement program); and $26.9 million for OV-1 modifications (a reduction of $18.9 million from the amount requested for side-looking radar data link packages).

The conferees recommend authorization of $608.2 million for modification of Army aircraft including $72.1 million for AH-1 modifications; $333.5 million for CH-47 modifications (of which $308.7 million is for modification of 36 CH-47A-C helicopters to the CH-47D configuration under an annual procurement program); $26.9 million for OV-1 modifications (a reduction of $18.9 million without prejudice); and a general reduction of $25.0 million in the Army aircraft modification account. The conferees direct that none of the general reduction is to be applied to the Army Helicopter Improvement Program (AHIP).

Spares and repair parts, Army

The budget request contained $649.4 million for Army aircraft spares and repair parts including $389.6 million for replenishment spares; $168.1 million for AH-64 initial spares; and $91.7 million for other initial spares. The Senate bill authorized $574.4 million for Army aircraft spares including $389.6 million for replenishment spares; $144.1 million for AH-64 initial spares; and $40.7 million for other initial spares. The House amendment authorized $574.4 million for Army aircraft spares including $314.6 million for replenishment spares; $168.1 million for AH-64 initial spares; and $91.7 million for other initial spares.

The conferees recommend authorization of $599.4 million for Army aircraft spares including $339.6 million for replenishment spares; $168.1 million for AH-64 initial spares; and $91.7 million for other initial spares.

Support equipment and facilities—Common ground support equipment

The budget request contained $176.3 million for common ground support equipment. The Senate bill authorized $156.3 million, applying a general reduction of $20.0 million in the account. The House amendment authorized $164.3 million applying a specific reduction without prejudice of $12.0 million to the CH-47D flight simulator program.

The conferees recommend an authorization of $156.3 million for common ground support equipment with a general reduction of $20.0 million.

The House recedes.

MISSILE PROCUREMENT, ARMY

[Amounts in millions of dollars]

Item	Fiscal year 1984 request		H.R. 2969		S. 675		Conference		Change from request

Patriot

The budget request contained $992 million for the procurement of 525 missiles and 15 Patriot fire units. The House amendment would authorize $936 million for the procurement of 525 missiles and 15 Patriot fire units which is a reduction of $56 million from the requested amount. The House amendment would also authorize the $135.2 million requested for initial spares.

The Senate bill would authorize $812.4 million to procure 287 missiles and 12 fire units and $81.2 million for initial spares.

The conferees recognize the importance of the patriot missile system as an integral part of our European air defense system and support the fielding of Patriot at the earliest possible date.

The conferees agree to authorize $885 million to procure 440 missiles and 12 fire units and $100 million for initial spares.

Laser Hellfire

The request contained $238.8 million to procure 5,351 Laser Hellfire missiles. The Senate bill would authorize $218.8 million for 5,351 missiles. The House amendment supported the request.

The conferees agree, without prejudice, to authorize $218.8 million.

TOW (BGM-71A, BTM-71A)

The request contained $189.2 million to procure 18,000 TOW missiles and $28.2 million for advance procurement to support production surge requirements. The Senate bill would authorize the amount requested. The House amendment would authorize $155.8 million for 18,000 TOW missiles and would disapprove the $28.2 million for surge support.

The conferees agree to authorize $189.2 million for TOW missile procurement and to disapprove the $28.2 million for surge support.

Joint tactical missile (adv. proc.)

The budget request did not contain funds for the Joint Tactical Missile (JTACM). The House amendment would authorize $20 million for JTACM. The Senate bill contained no authorization for JTACM.

The Senate recedes.

PROCUREMENT OF WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

[Amounts in millions of dollars]

PROCUREMENT OF WEAPONS AND TRACKED COMBAT VEHICLES, ARMY—Continued

[Amounts in millions of dollars]

Item	Fiscal year 1984 request		H.R. 2969		S. 675		Conference		Change from request	
	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount
Inflation adjustment		0		0		−44.0		−23.1		−23.1
General reduction		0		0		0		−19.8		−19.8
Total, procurement of weapons and tracked combat vehicles, Army		4,934.4		4,738.4		4,531.0		4,734.5		−199.9

M557A2 command post vehicle

The budget request contained $130 million to procure 652 M577A2 Command Post Vehicles. The Senate bill would authorize $50 million for the procurement of 170 vehicles. The House amendment would authorize $50 million for the procurement of 250 vehicles. A reduction of $80 million and 402 vehicles from the budget request.

The Senate recedes.

M113A2 armored personnel carrier

The budget request contained $73.2 million for procurement of 400 M113A2 armored personnel carriers. The Senate bill would authorize $73.2 million for the procurement of 400 armored personnel carriers. The House amendment would authorize $46 million for the procurement of 250 carriers, a reduction of $27.2 million and 150 carriers from the budget request.

The Senate recedes.

Bradley fighting vehicle

The budget request contained $766 million to procure 600 Bradley Fighting Vehicles, $62.5 million for initial spares, and $29.5 million for initial spares, and $29.8 million to support advance procurement of 830 Bradley Fighting Vehicles, $23.8 million for advance procurement, and $62.5 million for initial spares. The House amendment contained $799 million to procure 600 Bradley Fighting Vehicles, $29.8 million for advance procurement, and $62.5 million for initial spares. The $799 million is an increase of $33 million over the budget request. The increase of $33 million would allow the Army to purchase tooling and long-lead components to support starting the integration of the TOW II missile system on the Bradley Fighting Vehicle.

The Senate recedes.

The conferees strongly support the Bradley Fighting Vehicle program. The Bradley Fighting Vehicle program appears to be an excellent candidate for multiyear contracting. Therefore, the Secretary of the Army is directed to review the procurement strategy for the Bradley Fighting Vehicle. This review should include an analysis of the costs and benefits associated with pursuing a multiyear contract versus a single year contract both with firm fixed price and fixed price incentive fee type contracts. The review should also include an analysis of the costs and benefits associated with the prime contractor assuming total responsibility and furnished many major system components and performs the systems integration function. The results of the review, together with recommendations, should be reported to the Armed Service Committee of the Senate and House of Representatives by February 1, 1984.

Field artillery ammunition support vehicle (FAASV)

The budget request contained $103.4 million for 217 Field Artillery Ammunition Support Vehicles (FAASV's). The Senate bill would authorize $32 million for procurement of 54 FAASV's. The House amendment would authorize $88.3 million to procure 180 FAASV's.

The conferees agree to authorize $60 million to procure 120 FAASV's.

M109A2 155mm howitzer

The budget request contained $82.1 million to procure 112 M109A2 155mm Self Propelled Howitzers. The Senate bill would authorize $118.1 million for procurement of 162 howitzers. The House amendment would authorize $44 million for procurement of 60 Self Propelled Howitzers.

The conferees agree to authorize $88 million to procure 120 M109A2 155mm Self Propelled Howitzers.

M1 Abrams tank

The budget request contained $1,361.2 million to procure 720 M1 tanks, $251.1 million for advance procurement to support the production of 840 M1 tanks in fiscal year 1985, and $145 million for initial spares. The Senate bill would authorize $1,134.3 million for 600 M1 tanks, $251.1 million for advance procurement, and $120.8 million for spares. The House amendment would authorize $1,351.3 million which includes the authority to transfer forward $46.4 million from unused fiscal year 1983 authorization and to apply $65.2 million from foreign military sales receipts from the sale of M48A5 tanks to the fiscal year 1984 Army weapons and tracked combat vehicle account to support procurement of 840 M1 tanks. The House amendment would also authorize $170 million for initial spares and $293.1 million for advance procurement for 840 M1 tanks in fiscal year 1985.

The Senate recedes.

Light armored vehicle (LAV)

The budget request contained $132.4 million to procure 176 Light Armored Vehicles (LAV's) for the Army and $10.1 million for initial spares. The Senate bill would authorize the amount requested. The House amendment contained no authorization for the Army's LAV program.

The conferees recommend authorizing $33 million for the Army's LAV program but agree that those LAV's purchased with the $33 million should be immediately transferred to the Marine Corps. The conferees do not believe the Army has sufficiently justified its requirements for the LAV. The conferees agree that the Secretary of the Army should reassess the Army's requirement for a light armored vehicle. The reassessment should include evaluating the feasibility of using alternative vehicles to satisfy the LAV requirement.

The conferees also agree that while the Army is reassessing its LAV requirements, those LAV's authorized for the Army in the fiscal year 1983 Defense Department Authorization Act could be used to satisfy immediate Marine Corps requirements. Therefore, the conferees direct the Secretary of the Army to immediately transfer those LAV's procured with fiscal year 1983 funds to the Marine Corps.

Production base support—Depot maintenance plant equipment (DMPE)

The budget request contained $65.6 million for production base support, including $11.8 million for Depot Maintenance Plant Equipment (DMPE) for tracked combat vehicles. The Senate bill would authorize the amount requested. The House amendment would authorize $12.8 million, an increase of $1.0 million above the budget request. The increase of $1.0 million would provide the DMPE needed at Anniston Army Depot to support overhauling of M–1 tank hulls, turrets, shocks, and hydraulic motors.

The House recedes and the conferees direct that the Secretary of the Army shall provide DMPE at Anniston Army Depot within the funds authorized.

M42 40mm duster gun

The budget request contained no funds for the M42 40mm Duster Gun. The Senate bill contained no funds for the M42 40mm Duster Gun. The House amendment would authorize procurement of $10 million to start a M42 40mm Duster improvement program.

The House recedes.

Product improved Vulcan air defense system (PIVADS)

The budget request contained $9.3 million to product improve 39 Vulcan Air Defense Systems. The Senate bill would authorize $38.3 million for PIVADS. The House amendment would authorize $29.3 million for PIVADS, an increase to the request of $20 million.

The House recedes.

9mm handgun

The Army's budget request contained $3.9 million to procure 11,500 9mm handguns. The Senate bill would not authorize 9mm handguns. The House amendment would authorize $3.9 million to procure 11,500 9mm handguns.

The House recedes.

Support equipment and facilities—production base support

The budget request contained $111.2 million for production base support. The Senate bill would authorize the amount requested. The House amendment would authorize $115 million, an increase of $3.8 million above the budget request. The $3.8 million would provide funds to facilitize an Army arsenal to support the rehabilitation of the 40mm cannon for the Sergeant York Gun.

The House recedes and the conferees direct that the Secretary of the Army shall support the 40mm cannon rehabilitation program within the funds authorized.

General reduction

Neither the Senate bill nor the House amendment authorized a general reduction in Army Weapons and Tracked Combat Vehicle programs.

The conferees agree to authorize a general reduction of $19.8 million in Army Weapons and Tracked Combat Vehicle programs.

Binary chemical munitions

The budget request contained $18.1 million for the procurement of components for the 155mm binary chemical artillery projectile, $96.5 million to procure binary production base equipment.

The Senate bill would authorize $130.6 million, $16 million above the amount requested. The Senate bill also contains a provision (section 1013(a)) that would explicitly prohibit the final assembly of binary chemical munitions authorized prior to October 1, 1985, and permits their final assembly, thereafter, only if the President certifies in writing that such final production assembly is essential to the national interest. The Senate provision further states that the absence of constructive movement towards the negotiation of a verifiable ban on chemical weapons would contribute to justifying the initiation of production of binary chemical munitions. The House amendment contained no authorization for the production of binary chemical munitions.

The House recedes on the above provision.

The House amendment contained no authorization for the production of binary chemical munitions and a provision (sec. 109) that would prohibit the use of funds authorized for procurement of binary munitions, production facilities, production equipment, and chemicals for binary munitions. The House amendment also contained a provision (sec. 1103) that would prohibit the obligation or expenditure of funds for the production of binary munitions unless the President certifies to the Congress that for each 155mm binary artillery projectile or binary aerial bomb produced, a serviceable unitary artillery projectile will be rendered permanently useless for military purposes. The Senate bill contained no similar provision.

The Senate recedes to section 1103 of the House amendment with amendments.

The question of binary chemical munitions was discussed at length on several occasions during the conference, and the House conferees insisted on reconsideration after the matter had been first agreed to. But the Senate conferees were adamant and the House conferees reluctantly receded on the dollar authorizations.

In agreeing to the potential assembly of binary chemical weapons two years hence, subject to presidential certification, the conferees of both Houses wish to strongly state their intent to reaffirm the longstanding United States Government policy and our commitment to the Geneva Protocol of 1925, which states that the United States will not use chemical weapons unless they are first used against us.

Summarizing, the conferees agreed (1) to recommend the authorization of $114.6 million to procure 155mm artillery projectile components and for binary production base support, a reduction of $16 million from the Senate bill; (2) to approve section 1013(a) of the Senate bill prohibiting the final assembly of any chemical munitions until October 1, 1985; (3) to approve section 1103 of the House amendment requiring that one serviceable unitary artillery projectile be rendered useless for military purposes for each binary chemical munition produced (section 1233 of the conference report); (4) to require presidential certification of the requirement for binary chemical munitions prior to initiating production (section 1233 of the conference report) and (5) to express the sense of the conferees in reaffirming the United States commitment to the terms of the Geneva Protocol of 1925, which supports the policy of no first-use of chemical weapons.

Projectile, 155mm HE Copperhead

The budget request contained $75 million to procure Copperhead 155mm artillery projectiles. The Senate bill contained no authorization for the Copperhead projectiles. The House amendment would authorize $150 million to procure 155mm Copperhead artillery projectiles.

The conferees agree to authorize $75 million to procure Copperhead projectiles.

Cartridge, 9mm, ball

The budget request contained $1.2 million to procure 9mm ammunition. The Senate bill would authorize the amount requested. The House amendment contained no authorization for 9mm ammunition for the Army.

The House recedes.

Cartridge, 25mm, all types

The budget request contained $91.9 million to procure all types of 25mm ammunition. The Senate bill would authorize the amount requested. The House amendment would authorize $67.9 million to procure 25mm ammunition.

The conferees agree, without prejudice, to authorize $67.8 million for the procurement of all types of 25mm ammunition.

Cartridge, 81mm, conventional

The budget request contained $22.4 million to procure 81mm conventional ammunition. The Senate bill would authorize the amount requested. The House amendment would authorize $12.1 million to procure 81mm ammunition.

The House recedes.

Cartridge, 4.2 inch, all types

The budget request contained $77.2 million to procure all types of 4.2 inch ammunition. The Senate bill would authorize $97.4 million for 4.2 inch ammunition. The House amendment would authorize $64.2 million to procure 4.2 inch ammunition.

The conferees agree to authorize the amount requested, $77.2 million, for all types of 4.2 inch ammunition.

Light antitank system

The House amendment would recommend authorizing the transfer forward of $20.7 million from funds previously authorized to help offset the cost of priority programs. The Senate bill contained no similar authorization.

The Senate recedes.

Projectile, 8 inch, HE, ICM

The budget request contained $201 million to procure 8 inch ammunition. The Senate bill would authorize $138 million for 8 inch ammunition. The House amendment would authorize $136.9 million to procure 8 inch ammunition.

The Senate recedes.

Cartridge, 105mm (APFSDA-T/TP)

The budget request contained $123.8 million to procure 105mm tank ammunition. The Senate bill would authorize $170.2 million for 105mm tank ammunition. The House amendment would authorize $148.5 million to procure 105mm tank ammunition.

The conferees agree to authorize $153.4 million for 105mm tank ammunition, an increase of $29.6 million over the request.

Cartridge, 5.56mm, all types

The budget request contained $74.7 million to procure all types of 5.56mm ammunition. The Senate bill would authorize $83.5 million for procurement of 5.56mm ammunition. The House amendment would authorize $77.4 million for procurement of 5.56mm ammunition.

The conferees agree to authorize $80.0 million to procure all types of 5.56mm ammunition.

155mm nuclear projectile

The budget request contained classified amounts for the 155mm nuclear projectile. The Senate bill would authorize a reduction of $50 million in the 155mm nuclear projectile program. The House amendment would authorize the amount requested.

The conferees agree to terminate this program. Additional language describing the conferees' action on this issue appears in the General Provisions section of this report.

Cartridge, Cal. .45 all types

The budget request contained $1.7 million to procure all types of .45 caliber ammunition. The Senate bill would authorize $4.1 million for procurement of all types of .45 caliber ammunition. The House amendment would authorize $1.7 million for procurement of all types of .45 caliber ammunition.

The conferees agree to authorize $2.9 million.

Cartridge, 40mm (conventional) all types

The budget request contained $1.8 million to procure all types of 40mm ammunition. The Senate bill would authorize $4.0 million to procure all types of 40mm ammunition. The House amendment would authorize $1.8 million to procure all types of 40 mm ammunition.

The Senate recedes.

8 inch M509 threaded base

The budget request contained $8.9 million for 8-inch M509 threaded base production equipment. The Senate bill would authorize the amount requested. The House amendment contained no authorization for 8-inch M509 threaded base production equipment.

The Senate recedes.

Motorcycle

The budget request contained $9.9 million for the procurement of 3,433 motorcycles. The Senate bill would recommend authorizing the $9.9 million. The House amendment disapproved authorization for motorcycles.

The conferees agree to recommend authorization of $1.0 million for the procurement of motorcycles.

Fast attack vehicle

The budget request contained $4.7 million for the procurement of 138 Fast Attack Vehicles. The Senate bill would authorize the amount requested. The House amendment authorized $1.0 million for Fast Attack Vehicles.

The conferees agree to authorize $2.0 million for Fast Attack Vehicles.

5,000 gallon semitrailer, full tanker

The budget request contained $24.7 million to procure 523 tankers. The Senate bill would authorize the amount requested. The House amendment would recommend authorizing $15.1 million for 5,000 gallon tankers.

The Senate recedes.

Army communications and electronics

Reserve component communications equipment.—The budget request contained no funds for the procurement of reserve component communications equipment. The Senate bill contained no authorization for this program. The House amendment contained authorization for $15.0 million to be equally divided between the Army National Guard and Army Reserve.

The conferees recommend authorization of $15.0 million for communications equipment for the Army Reserve.

The Senate recedes.

Communications system engineering.—The budget request contained $8.0 million for communications systems engineering. The Senate bill recommended authorization of the request. The House amendment would authorize $6.5 million.

The House recedes.

Navstar GPS.—The budget request contained $2.4 million for procurement of ground equipment associated with the Navstar GPS program. The Senate bill recommended authorization of the request. The House amendment deleted the requested authorization.

The Senate recedes.

Multi-subscriber equipment.—The budget request contained $4.4 million for procurement of multi-subscriber equipment. The Senate bill recommended authorization of the request. The House amendment deleted $3.0 million from the request.

The House recedes.

Fort Devens training support.—The budget request contained $15.8 million for procurement of items for Fort Devens training support. The Senate bill recommended authorization of the request. The House amendment deleted $7.9 million from the request.

The House recedes.

Decentralized automated service support system (DASSB).—The budget request contained $52.0 million for the procurement of the Decentralized Automated Service Support System. The Senate bill recommended authorization of the request. The House

amendment deleted $7.6 million from the request.

The House recedes.

AN/GVS-5, laser rangefinder.—The budget request contained $10.1 million for procurement of the AN/GVS-5, laser rangefinder. The Senate bill recommended authorization of the request. The House amendment deleted $2.9 million from the request.

The House recedes.

Modification of in-service equipment.—The budget request contained $18.7 million for modification of in-service communications equipment. The Senate bill recommended authorization of the request. The House amendment deleted $4.0 million from the request.

The House recedes.

AN/UGC-74, teletypewriter.—The budget request contained $26.0 million for procurement of the AN/UGC-74 teletypewriter. The Senate bill recommended authorization of the request. The House amendment deleted $5.0 million from the request.

The House recedes.

AN/TSQ-111 (Communications Nodal Control Element).—The budget request contained $33.0 million for procurement of the Communications Nodal Control Element. The Senate bill recommended authorization of the request. The House amendment deleted $28.0 million from the request.

The conferees were aware of a recent cost estimate that showed a requirement for additional funding in fiscal year 1986 of $30 million for the Air Force portion of this joint program. In view of the revised cost estimate, the Army is reconsidering its requirement.

Until the cost and requirement are reaffirmed, the conferees recommend deferral of the multiyear acquisition program.

The Senate recedes.

Modification, Tactical Satellite (TACSAT).—The budget request contained $43.0 million for modifications to the TACSAT system. The Senate bill recommended authorization of the request. The House amendment contained no authorization.

The House recedes.

Joint surveillance and target attack radar system (JSTARS) ground station advance procurement.—No authorization was requested for JSTARS ground station advance procurement. The Senate bill contained no authorization for this program. The House amendment authorized $7.0 million for the program.

The conferees recommend authorization of $7.0 million for advance procurement for the JSTARS ground station. A more detailed discussion of the conference recommendations on the JSTARS program is contained in the R&D section of this report.

The Senate recedes.

Spares, Tactical Satellite (TACSAT).—The budget request contained $189.8 million for spares. The Senate bill recommended authorization of the request. The House amendment deleted $8.8 million for TACSAT spares.

The House recedes.

Spares (AN/GVS-5).—The budget request contained $178.1 million for spares. The Senate bill recommended approval of the request. The House amendment deleted $0.5 million for spares for the AN/GVS-5, laser rangefinder.

The House recedes.

General reduction.—The Senate bill recommended a general reduction of $350 million in communications and electronics equipment. The House amendment contained no general reduction.

The conferees agreed to a general reduction of $265 million. The Secretary of the Army is directed to notify the Committees on Armed Services, in writing, as to how this reduction will be apportioned before obligating any funds in this account.

Other support equipment

The budget request contained $1,433.6 million to procure other support equipment. The Senate bill would authorize a general reduction to the other support equipment account of $150 million which results in an authorization of $1,274.2 for other support equipment.

The House amendment would authorize specific line item reductions and one increase, as reflected in the chart above.

The conferees agree to authorize a general reduction of $185 million, resulting in an authorization of $1,264.1 million for other support equipment. The Secretary of the Army is directed to notify the Committees on Armed Services in writing as to how the reduction will be apportioned before obligating any funds in this account.

NATIONAL GUARD, ARMY

Miscellaneous equipment

No authorization was requested for procurement of miscellaneous equipment for the Army National Guard. The Senate bill authorized $100.0 million for this purpose; the House amendment contained no such authorization.

The conferees recommend authorization of $100.0 million for procurement of miscellaneous equipment for the Army National Guard. The Secretary of the Army is directed to notify the Committees on Army Services in writing of the planned use of these funds before obligating any funds in this account.

[1]Including Marine Corps aircraft.

A–6E attack aircraft (Intruder)

The budget request contained $205.4 million for procurement of 6 A–6E aircraft and $11.0 million for advance procurement. The Senate bill authorized no A–6E aircraft but provided $14.0 million for costs associated with suspension of the production line and $91.0 million for procurement of ground support equipment for the existing inventory of A–6E aircraft. The House amendment authorized the amount requested.

The conferees recommend authorization of $205.4 million for procurement of 6 A–6E aircraft and $11.0 million for advance procurement.

The Senate recedes.

EA–6B electronic warfare aircraft (Prowler)

The budget request contained $382.0 million for procurement of 6 EA–6B aircraft and $17.6 million for advance procurement to support procurement of 6 aircraft in fiscal year 1985.

The Senate bill authorized $435.1 million for procurement of 8 aircraft and $23.6 million advance procurement for 6 aircraft in

fiscal year 1985. The House amendment authorized $325.0 million for procurement of 6 aircraft and the amount requested for advance procurement.

The conferees recommend authorization of $435.1 million for procurement of 8 EA-6B aircraft in fiscal year 1984 and $23.6 million advance procurement to support procurement of 8 aircraft in fiscal year 1985.

The House recedes.

AV-8B attack aircraft (Harrier)

The budget request contained $810.1 million for procurement of 32 AV-8B aircraft and $98.4 million for advance procurement. The Senate bill authorized $715.1 million for procurement of 27 aircraft and the amount requested for advance procurement. The House amendment authorized the amounts requested.

The conferees recommend authorization of $715.1 million for procurement of 27 AV-8B aircraft and $98.4 million for advance procurement.

The House recedes.

F-14A fighter aircraft (Tomcat)

The budget request contained $886.5 million for procurement of 24 F-14A aircraft and $178.8 million for advance procurement. The Senate bill authorized $792.4 million for procurement of 21 F-14A aircraft and $178.8 million for advance procurement. The House amendment authorized $861.5 million for procurement of 24 aircraft and the amount requested for advance procurement.

The conferees recommend authorization of $792.4 million for procurement of 24 F-14A aircraft and $178.8 million for advance procurement.

The Senate recedes with an amendment.

CH-53E helicopter (Super Stallion)

The budget request contained $221.8 million for procurement of 11 CH-53E helicopters and $7.3 million for advance procurement. The Senate bill authorized $211.8 million for procurement of 11 aircraft and $7.3 million for advance procurement. The House amendment authorized $206.8 million for procurement of 11 aircraft and $7.3 million for advance procurement.

The conferees recommend authorization of $206.8 million for procurement of 11 CH-53D helicopters and $7.3 million for advance procurement.

The Senate recedes.

AH-1T attack helicopter (Sea Cobra)

The budget request contained $17.8 million for advance procurement for the AH-1T helicopter. The Senate bill authorized the amount requested. The House amendment did not authorize advance procurement for the AH-1T helicopter.

The conferees recommend authorization of $17.8 million for advance procurement for the AH-1T helicopter.

The House recedes.

SH-60B ASW helicopter (Seahawk)

The budget request contained $446.9 million for procurement of 21 SH-60B helicopters and $58.8 million advance procurement to support procurement of 18 aircraft in fiscal year 1985. The Senate authorized $483.9 million for procurement of 24 SH-60B helicopters and $58.8 million for advance procurement. The House amendment authorized the amounts requested. The reports on the Senate bill and the House amendment specified that the amount authorized for advance procurement was to support procurement of 24 SH-60B helicopters in fiscal year 1985.

The conferees recommend authorization of $446.9 million for procurement of 21 SH-60B helicopters in fiscal year 1984 and advance procurement of $58.8 million to support procurement of 24 SH-60B helicopters in fiscal year 1985. The conferees concur in the decision of the Department of the Navy to combine the procurement of 27 LAMPS MK-III helicopters approved in fiscal year 1983 program with the 21 helicopters approved in fiscal year 1984 program and allow the manufacturer to produce the resulting 48 helicopters at a steady rate of two aircraft per month. Moreover, the conferees concur in the rationale that supports a production rate of 24 helicopters per year and expect that the Department of Defense will sustain at least the rate throughout the remaining years of the program.

The Senate recedes.

EP-3 (Orion) electronic warfare aircraft

The budget request contained $77.1 million to procure two EP-3 electronic warfare aircraft in fiscal year 1984 and $12.4 million for advance procurement for two such aircraft in fiscal year 1985. The budget request assumed that a reprogramming request in the amount of $24.6 million would be approved by the Committees on Armed Services and Appropriations for advance procurement associated with this program. The Senate bill would authorize the amount requested for the procurement of two aircraft in fiscal year 1984 and the amount requested for advance procurement. The House amendment would authorize $45.1 million to procure one aircraft in fiscal year 1984 and $4 million for advance procurement for one aircraft in fiscal year 1985.

The conferees note that the $24.6 million reprogramming request has not been approved by the Appropriations Committees. In addition, the conferees believe that there is an urgent need to replace the existing fleet of overage and overweight EP-3 aircraft with new aircraft equipped with more modern sensors. The conferees examined the possibility that older P-3 A/B aircraft could be modified to the EP-3 configuration but rejected this option because it was not cost effective. Accordingly, the conferees recommend the authorization of $70.0 million to procure one new EP-3 aircraft in fiscal year 1984 and advance procurement in the amount of $8.0 million.

The Senate recedes with an amendment.

E-2C early warning aircraft (Hawkeye)

The budget request contained $309.6 million for procurement of 6 E-2C aircraft and $25.6 million for advance procurement. The Senate bill authorized $304.6 million for procurement of 6 aircraft and $25.6 million for advance procurement. The House amendment authorized the amounts requested.

The conferees recommend authorization of $304.6 million for procurement of 6 E-2C aircraft and $25.6 million for advance procurement.

The House recedes.

SH-2F ASW helicopter (Seasprite)

The budget request contained $109.8 million for procurement of 12 SH-2F helicopters and $6.6 million for advance procurement. The Senate bill authorized $44.7 million for procurement of 6 aircraft. The House amendment authorized $29.8 million for line termination costs but no aircraft. Neither the Senate bill nor the House amendment authorized advance procurement for 12 SH-2F helicopters.

The conferees recommend authorization of $44.7 million for procurement of 6 aircraft and recommend no authorization for advance procurement.

The House recedes.

The budget request contained $165.7 million for procurement of 8 C-2 aircraft and $37.5 million for advance procurement. The Senate bill authorized $145.7 million for procurement of 6 aircraft, and the House amendment authorized $135.7 million for the same number of aircraft. Both the Senate bill and the House amendment authorized the amount requested for advance procurement.

The conferees recommend authorization of $145.7 million for procurement of 6 C-2 aircraft and $37.5 million for advance procurement.

The House recedes.

T-34C trainer aircraft (Mentor)

The budget request contained $40.5 million for procurement of 38 T-34C aircraft. The Senate bill provided no authorization for the 38 T-34C aircraft. The House amendment authorized $26.7 million for procurement of 20 aircraft.

The conferees recommend authorization of $4.8 million for procurement of flight simulators but do not recommend authorization of any T-34C aircraft.

The House recedes with an amendment.

Adversary aircraft

The budget request contained $29.1 million for procurement of 4 adversary aircraft. The Senate bill authorized the amount requested. The House amendment contained no authorization for procurement of adversary aircraft.

The conferees recommend authorization of $29.1 million for procurement of 4 adversary aircraft.

The House recedes.

KC-130T tanker aircraft (Hercules)

The budget request contained $15.7 million for the KC-130 tanker program but no aircraft were requested. The Senate bill authorized the amount requested. The House amendment authorized $47.9 million for procurement of 2 KC-130T aircraft.

The conferees recommend authorization of 2 KC-130T tanker aircraft for the Marine Corps Reserve.

The Senate recedes.

Fleet electronic warfare support group (FEWSG) aircraft

The budget request contained $26.4 million for procurement of 1 aircraft for the fleet electronic warfare support group. The Senate bill authorized the amount requested. The House amendment did not authorize the FEWSG program.

The conferees recommend authorization of $26.4 million for procurement of 1 FEWSG aircraft.

The House recedes.

Modification of aircraft, Navy

The budget request contained $1,430.3 million for modification of Navy and Marine Corps aircraft. The Senate bill authorized $1,383.7 million for Navy and Marine Corps aircraft modifications including $11.1 million for the H-2 series; $55.3 million for the H-3 series; $149.4 million for the P-3 series; and $37.1 million for the S-3 series. The Senate bill also provided for a general reduction of $30.0 million in the Navy and Marine Corps aircraft modernization program. The House amendment authorized the amounts requested.

The conferees recommend authorization of $1,383.7 million for Navy and Marine Corps aircraft modifications including $11.1

million for the H-2 series; $55.3 million for the H-3 series. $149.4 million for the P-3 series; $37.1 million for S-3 series aircraft; and a general reduction of $30.0 million.

The conferees agreed that of the $149.4 million authorized for P-3 series modifications, $44.7 million is specifically authorized for procurement of Tactical Navigation Modification kits to upgrade 36 Naval Reserve P-3 A/B aircraft. It is the intent of the conferees that the installation of the TACNAVMOD kits on these 36 aircraft be completed during fiscal year 1985.

Spares and repair parts, Navy

The budget request contained $2,139.6 million for procurement of initial and replenishment spares and repair parts for Navy and Marine Corps aircraft. The Senate bill authorized $2,084.3 million for spares including no authorization for the KC-130T; $1.0 million for the FEWSG; $7.0 million for the SH-2F; $3.2 million for the adversary aircraft; no authorization for the A-6E; $57.0 million for the EA-6B; $117.4 million for the AV-8B; $73.8 million for the F-14A; $17.4 million for the C-2; and a general reduction of $15.8 million in the Navy and Marine Corps aircraft spares account. The House amendment authorized $2,140.4 million for spares including $12.0 million for the KC-130T; no authorization for FEWSG, SH-2F, and adversary aircraft programs; $15.9 million for the A-6E; $42.7 million for the EA-6B; $139.1 million for the AV-8B; $84.3 million for the F-14A; and $23.1 million for the C-2.

The conferees recommend an authorization of $2,122.7 million for Navy and Marine Corps aircraft spares and repair parts including $12.0 million for the KC-130T; $1.0 million for FEWSG; $7.0 million for the SH-2F; $3.2 million for the adversary aircraft; $15.9 million for the A-6E; $57.0 million for the EA-6B; $117.4 million for the AV-8B; $84.3 million for the F-14A; $17.4 million for the C-2; and a general reduction of $15.8 million in the spares account.

Support equipment and facilities—Common ground equipment

The budget request contained $328.2 million for procurement of common ground equipment for Navy and Marine Corps aircraft. The Senate bill authorized $313.2 million for this purpose and the House amendment authorized the amount requested.

The conferees recommend authorization of $313.2 million for common ground equipment.

The House recedes.

Total, weapons procurement, Navy		4,028.6		3,975.5		3,769.4		3,903.0		−125.6

WEAPONS PROCUREMENT, NAVY

The President's budget request contained $4,028.6 million for Navy weapons procurement.

The Senate bill would authorize $3,769.4 million for Navy weapons. The House amendment would provide authorizations totaling $3,975.5 million for Navy weapons. The conferees recommend authorizations totaling $3,903.0 million for Navy weapons.

Tomahawk sea-launched cruise missile

The budget request contained $350.1 million to procure 124 Tomahawk sea-launched cruise missiles. The Senate bill would authorize $243.9 million to procure 88 missiles. The House amendment would authorize the amount requested.

The Senate position reflects reductions of $51.0 million for 36 fewer missiles and $55.2 million requested to fully fund Tomahawk tooling and test equipment over a period of two years.

The conferees agreed to authorize $313.9 million for 124 Tomahawk missiles. The conferees expect the Navy to procure 48 anti-ship missiles (TASM) and 76 land attack missiles (TLAM-N) for eventual deployment on ships and/or submarines. The conferees deleted the $55.2 million requested for accelerated amortization of equipment.

The conferees note that significant difficulties have been encountered in both the testing and manufacturing aspects of the Tomahawk program. The Joint Cruise Missile Project Office has responded to these developments by restructuring the Tomahawk program effecting management improvements and combining the fiscal year 1982 and fiscal year 1983 authorized acquisitions into a program which results in the procurement of 63 fewer missiles over the two year period for the same amount of funds. The effect of this action was to increase the predicted unit procurement cost of the fiscal year 1983 Tomahawk by 67 percent. Similarly, the Tomahawk unit cost proposed in the fiscal year 1984 budget represents a 47 percent increase over the unit cost anticipated in last year's budget.

The Conferees believe that the past performance on the part of the Joint Cruise Missile Project Office (JCMPO) and the contractors was unacceptable. While progress appears to have been made in correcting some of the problems associated with this program, the Armed Services Committees wish to serve notice upon the JCMPO and its contractors that they intend to exercise even more rigorous oversight of this program.

The Conferees note that improvements in management have resulted in 10 successful test flights out of the last 12 flights since November of 1982.

In addition, while the strategy of employing the TLAM-N's positioned aboard submarines as a secure strategic reserve force merits strong support, the Conferees are concerned that the Navy has not clearly formulated and articulated its strategic planning and concept of operations for the TLAM-N's which it plans to deploy aboard surface ships. The Conferees therefore direct the Navy to submit a report to the Committees on Armed Services of the House of Representatives and the Senate not later than December 1, 1983 which defines the operational doctrine and employment concepts for use of surface launched Tomahawks and Navy's Tactical Nuclear War at Sea Doctrine.

AIM-54A/C missile (Phoenix)

The budget request contained $320.8 million for procurement of 290 AIM-54C missiles and $77.6 million for advance procurement. The Senate bill authorized $280.8 million for procurement of 240 missiles and $36.6 million for advance procurement. The House amendment authorized $320.8 million for procurement of 290 missiles and $36.6 million for advance procurement.

The conferees recommend authorization of $300.8 million for procurement of 265 AIM-54C missiles and $36.6 million for advance procurement.

The House recedes with an amendment.

AGM-84A missile (Harpoon)

The budget request contained $294.3 million for procurement of 330 Harpoon missiles. The Senate bill authorized $274.3 million for the procurement of 300 missiles. The House amendment authorized the amounts requested.

The conferees recommend authorization of $284.3 million for procurement of 315 AGM-84A Harpoon missiles.

The House recedes with an amendment.

Hellfire missile

The budget request contained $17.1 million for procurement of 219 Hellfire missiles. The Senate bill authorized the amounts requested. The House amendment provided no authorization for Hellfire missiles.

The conferees recommend authorization of $17.1 million for procurement of 219 Hellfire missiles.

Mobile target (MK-30)

The President's budget request contained $22.1 million for procurement of MK-30 mobile target, including $14.7 million for seven targets and $7.4 million to implement a three-year multi-year procurement program.

The Senate bill would authorize $17.6 million for procurement of seven MK-30 mobile targets. The House amendment would authorize acquisition of MK-30 targets as requested.

The conferees recommend $17.6 million for procurement of seven MK-30 mobile targets.

The House recedes.

Undistributed reduction against modifications

The Senate bill contained a reduction of $16.5 million to conform with overall reduction required under the First Concurrent Resolution on the Budget for fiscal year 1984 in the national defense function. The budget request and the House amendment contained no similar adjustment. The conferees agreed not to incude an undistributed reduction.

The Senate recedes.

SHIPBUILDING AND CONVERSION

The President's budget request contained $12,698.8 million for the construction, conversion, reactivation, service life extension and acquisition of 23 naval vessels.

The Senate bill contained an authorization of $11,391.6 million for 23 naval vessels. The House amendment contained authorization totaling $12,149.6 million for 22 naval vessels.

The conferees agreed to authorization totaling $12,045.4 million for 22 naval vessels.

Aegis guided missile cruiser (CG–47)

The budget request contained $3,435.0 million for three CG–47 class, Aegis guided missile cruisers, including $3.6 million for advance procurement.

The Senate bill recommended authorization of $3,359.8 million for three CG–47 cruisers, a reduction of $75.2 million from the President's request.

The House amendment recommended authorization of the requested amount.

The conferees recommended authorization of $3,397.4 million for procurement of three CG–47 cruisers, including $3.6 million for advance procurement.

The Senate recedes with an amendment.

Landing ship dock (LSD–41)

The budget request contained $509.0 million for procurement of one LSD–41 class landing ship dock, including $182.1 million for advance procurement in fiscal year 1984. Of the request for advance procurement funds, $102.1 million is advance funding for the multi-year procurement program and $80 million for advance procurement of two LSD–41 ships to be procured in fiscal year 1985.

The Senate bill recommended authorization of $336.9 million for procurement of one LSD–41 class ship in fiscal year 1984 and $80 million for advance procurement of two LSD–41's in fiscal year 1985.

The House amendment recommended approval of the President's request.

The Senate recedes.

Amphibious service life extension program (LPD–4 (SLEP))

The budget request contained $13.8 million for the amphibious service life extension program (SLEP) for LPD–4 class ships.

The Senate bill deleted funds for the LPD–4 SLEP program.

The House amendment recommended authorization of the requested amount.

The House recedes.

Guided missile frigate (FFG–7)

The Senate bill recommended authorization of $650.0 million for two FFG–7 frigates. No FFG–7 guided missile frigates were requested in the fiscal year 1984 budget request. The House amendment contained no authorization for FFG–7 frigates.

The conferees agreed to an authorization of $300 million for procurement of one FFG–7 guided missile frigate equipped with an upgraded MK–92 fire control system. In the current, very favorable market for ships, the conferees were optimistic that the ship could be constructed for the authorized amount of $300 million but agreed that in the event that the actual cost of the ship was higher than the authorized amount a reprogramming action should be submitted.

The House recedes with an amendment.

Fleet oiler (TAO–187)

The President's budget request contained $524.6 million for procurement of three TAO–187 class fleet oilers in fiscal year 1984.

The Senate bill recommended authorization of $365.4 million for procurement of two TAO–187 class fleet oilers.

The House amendment recommended approval of the President's request.

The House recedes.

Cost growth

The budget request contained $674.7 million for cost growth, including $106.4 million for revised costs of the fiscal year 1975–1978 Trident program, $436 million for upgrade of the fiscal year 1981 Trident to a D–5 missile configuration; $107.3 million for second source costs for the CG–47 Aegis cruiser program, and $25 million to fully fund the fiscal year 1983 SSN–688 program.

The Senate bill recommended $370.0 million for cost growth, including $25 million for cost growth in the SSN–688 program and $345 million for the Trident program.

The House amendment recommended the requested amount.

The conferees agreed to an authorization of $540.3 million for cost growth, including

$25 million for cost growth in the SSN-688 program and $515.3 million for Trident program.

The Senate recedes with an amendment.

Prior year authorization transfer

The Senate recommended authorization of the transfer to fiscal year 1984 of $650 million of prior year authorizations.

The budget and the House amendment contained no prior year authorization transfer.

The Senate recedes.

OTHER PROCUREMENT, NAVY

The President's budget request contained $5,001.8 million for Navy other procurement.

The Senate bill contained an authorization of $4,375.3 million. The House amendment contained an authorization of $4,583.5 million.

The conferees agreed to an authorization of $4,497.6 million for other procurement.

Ship support equipment

The President's budget request contained $730.5 million for ship support equipment.

The Senate bill would authorize $678.4 million. The House amendment would authorize $684.5 million. The conferees recommend the authorization of $681.5 million.

The Senate recedes with an amendment.

Communications and electronics equipment

The President's budget request contained $1,703.3 million for communications and electronics equipment.

The Senate bill would authorize $1,524.4 million of the amount requested. The House amendment would authorize $1,600.5 million. The conferees recommend the authorization of $1,562.8 million.

Aviation support equipment

Laser guided bomb kit.—The budget request contained $9.9 million to procure low level laser guided bomb (LLG-B) kits. The Senate approved the amount requested. The House amendment contained no authorization for the LLG-B kits.

The conferees agree to authorize $4 million for LLG-B kits.

AN/SSQ-62.—The budget request contained $29.8 million for the procurement of AN/SSQ-62 sonobuoys and $53.2 million for advanced procurement to support multiyear contracting. The Senate bill would authorize $29.8 million for AN/SSQ-62 sonobuoys and $4 million for advanced procurement. The House amendment authorized $33.8 million and denied the multiyear funding request.

The Senate recedes.

Practice bombs.—The request contained $69 million to procure practice bombs. The Senate authorized the amount requested. The House authorized $46 million for practice bombs.

The conferees agree to authorize $57.5 million.

General purpose bombs.—The request contained $82.5 million to procure general purpose bombs. The Senate bill recommended authorizing the amount requested. The House amendment would authorize $72.5 million.

The conferees agree to authorize $77.5 million to procure general purpose bombs.

Gator.—The request contained $24.9 million for Gator munitions. The Senate bill would recommend approving the request. The House amendment authorized $12.5 million.

The conferees agree to authorize $18.7 million to procure Gator munitions.

2.75 inch rocket.—The budget request contained $15.3 million for the procurement of 2.75 inch rockets. The Senate bill authorized the amount requested. The House amendment contained no authorization for the 2.75 inch rocket.

The House recedes.

Ordnance support equipment

The President's budget request contained $992.3 million for ordnance support equipment.

The Senate bill would authorize $938.1 million. The House amendment would authorize $930.3 million. The conferees recommend the authorization of $930.3 million.

The Senate recedes.

Civil engineering support equipment

Earthmoving equipment.—The request contained $17 million for earthmoving equipment. The Senate bill authorized the requested amount. The House amendment authorized $10 million for earthmoving equipment.

The Senate recedes.

Amphibious equipment.—The request contained $50.1 million for amphibious equipment. The Senate bill authorized $35 million for amphibious equipment. The House amendment authorized $25 million for amphibious equipment.

The House recedes.

Collateral equipment.—The budget request contained $14.1 million for the procurement of collateral engineering support equipment. The Senate bill authorized the amount requested. The House amendment authorized $10 million.

The Senate recedes.

Fleet hospital support equipment.—The budget request contained $69.5 million for the procurement of fleet hospital support equipment. The Senate bill authorized $57.6 million for fleet hospital support equipment. The House amendment authorized the amount requested.

The House recedes.

Personnel/command support equipment

Training support equipment.—The budget request contained $11.1 million for training support equipment. The Senate bill would authorize $8.1 million for training support equipment. The House amendment would authorize the amount requested.

The House recedes.

Medical support equipment.—The budget request contained $35.6 million for medical support equipment. The Senate bill would authorize $29.5 million. The House amendment would authorize the amount requested.

The House recedes.

Intelligence support equipment.—The budget request contained $33.4 million for intelligence support equipment. The Senate bill would authorize $18.6 million for support equipment. The House amendment would authorize the amount requested.

The conferees agree to authorize $30.6 million for intelligence support equipment.

Operating forces support equipment.—The budget request contained $14.3 million for operating forces support equipment. The Senate bill would authorize $12 million for support equipment. The House amendment would authorize the amount requested.

The House recedes.

Naval Rework Facility (NRF) support equipment.—The budget request contained $5.5 million for NRF support equipment. The Senate would authorize $3.9 million. The House amendment would authorize the amount requested.

The House recedes.

Environmental support equipment.—The budget request contained $7.2 million for environmental support equipment. The Senate bill would authorize $5 million for environmental support equipment. The House amendment would authorize the amount requested.

The House recedes.

Computer acquisition program.—The budget request contained $108.9 million to support the Computer Acquisition Program (CAP). The Senate bill would authorize $30 million for the CAP. The House amendment would authorize $78.9 million.

The Senate recedes.

Undistributed reduction

The Senate bill would authorize an undistributed reduction in the Other Procurement, Navy account of $44.7 million. The House amendment did not contain an undistributed reduction.

The conferees agree to authorize an undistributed reduction of $20 million to the Other Procurement, Navy account.

Copperhead

The budget request contained $24.9 million for the procurement of Copperhead 155mm projectiles. The Senate bill contained no authorization for the Copperhead 155mm artillery projectile. The House amendment authorized the amount requested.

The House recedes.

General reduction (ammunition)

The Senate bill did not authorize a general reduction in the Marine Corps ammunition account. The House amendment would authorize a general reduction in the Marine Corps ammunition of $25 million.

The conferees agreed to authorize a general reduction in the Marine Corps ammunition account of $32 million.

Light armored vehicle

The budget request contained $78.5 million for the procurement of 113 Light Armored Vehicles (LAV's) for the Marine Corps. The Senate bill would authorize the amount requested. The House amendment authorized $51.9 million for the procurement of 70 LAV's, consisting of 60 basic LAV–25 vehicles and 10 LAV-Recovery Vehicles.

The LAV program was the object of considerable discussion during the conference. The conferees agreed upon the requirement for the Marine Corps basic LAV program and believe that it is both affordable and executable. However, the conferees expressed some concern that portions of the so-called derivative LAV program, consisting of an air defense vehicle, mortar carrier, assault gun vehicle, logistics vehicle, antitank vehicle, and a command/control vehicle, may not be affordable.

Therefore, the conferees authorize $99.5 million for the procurement of an unspecified number of basic LAV's and recovery vehicles and direct the Secretary of the Army (see Army Weapons and Tracked Combat Vehicles section of the statement of managers) to transfer to the Marine Corps the basic LAV's to be procured with the $33 million the conferees authorized for the Army. Further, the conferees direct the Secretary of the Army to transfer immediately to the Marine Corps the LAV's procured with the funds authorized in the fiscal year 1983 Department of Defense Authorization Act.

The conferees agreed that with the authorization of $99.5 million and the directed transfer of LAV's from the Army, the Marine Corps should be capable of completing it basic LAV–25 and LAV-Recovery Vehicle procurement program in fiscal year 1984.

9mm handgun

The budget request contained $2 million for the procurement of 6,053 9mm handguns. The Senate bill contained no authorization for 9mm handguns. The House amendment authorized the amount requested for 9mm handguns.

The House recedes.

F–15 fighter aircraft (Eagle)

The budget request contained $1,528.9 million for procurement of 48 F–15 aircraft and $431.5 million for advance procurement to support procurement of 72 aircraft in fiscal year 1985 under a multiyear procurement program. The Senate bill authorized $1,322.7 million for procurement of 36 F–15 aircraft and $144.3 million for advance procurement to support procurement of 39 aircraft in fiscal year 1985. The House amendment authorized $1,131.5 million for procurement of 30 F–15 aircraft and $118.7 million for advance procurement to support procurement of 30 aircraft in fiscal year 1985. Neither the Senate bill nor the House amendment authorized multiyear procurement for the F–15 program.

The conferees recommend authorization of $1,281.5 million for procurement of 36 F–15 aircraft and $133.2 million for advance procurement of 36 aircraft in fiscal year 1985.

The intent of the conferees is that F–15 production be stabilized at a rate of 36 aircraft per year. In the event that the funds authorized are insufficient for procurement of 36 F–15 aircraft and associated ground support equipment, the Air Force is encouraged to submit a request to reprogram the necessary funds.

The House recedes with an amendment.

F–16 fighter aircraft (Falcon) advance procurement

The budget request contained $344.5 million for advance procurement to support procurement of 120 F–16 aircraft in fiscal year 1985, including $30.0 million for engine surge spares and $58.9 million for engine competition spares. The Senate bill authorized $396.1 million for advance procurement to support procurement of 150 aircraft including the amounts requested for engine surge spares and engine competition spares. The House amendment authorized $321.4 million for advance procurement of 150 aircraft but authorized no advance procurement for engine surge spares or engine competition spares.

The conferees recommend authorization of $371.4 million for advance procurement to support procurement of 150 F–16 aircraft in fiscal year 1985, including $50.0 million for engine competition spares. No authorization is recommended for engine surge spares.

The House recedes with an amendment.

Tactical fighter derivative

The budget request contained $21.4 million for advance procurement and non-recurring tooling costs unique to the F–15E or F–16E, depending upon which aircraft is selected for the tactical fighter derivative program. The Senate bill authorized $10.0 million for the tactical fighter derivative. The House amendment authorized no funds for the program.

The conferees recommend authorization of $10.0 million for the tactical fighter derivative program.

The House recedes.

E–3A (AWACS) advance procurement

The budget request contained $76.2 million for advance procurement to support procurement of three E–3A AWACS aircraft in fiscal year 1985. The Senate bill would authorize the amount requested. The House amendment would provide no authorization for this purpose.

The House action was based on doubt that the Air Force could afford to continue to fund the E–3A program at planned procurement levels. The House also questioned the requirement for 12 additional aircraft for continental air defense. The Senate cited the stated Air Force requirement for additional E–3A aircraft to supplement early warning radars against a growing Soviet manned bomber threat.

The conferees recommend authorization of the $76.2 million requested.

The House recedes.

C-5B airlift aircraft (Galaxy) advance procurement

The request contained $240.3 million for advance procurement associated with the C-5B aircraft procurement program. The Senate bill would authorize $222.2 million for this purpose. The House amendment would authorize the amount requested.

The conferees note that the C-5B procurement program consists of 50 aircraft to be purchased through a firm fixed price contract and that the contract price and aircraft delivery schedule are sensitive to changes in the funding schedule. The conferees agreed to an authorization of $240.3 million, the amount requested.

The Senate recedes.

C-130H airlift aircraft (Hercules)

No authorization was requested for procurement of C-130H aircraft. The Senate bill contained no authorization for the C-130H. The House amendment authorized $183.0 million for procurement of 10 C-130H aircraft for the Air Force reserve components.

The conferees recommend authorization of $183.0 million for procurement of 10 C-130H aircraft, of which 8 would be authorized specifically for the Air National Guard and 2 for the Air Force Reserve.

The Senate recedes.

C-12D mission support aircraft (Huron)

No authorization was requested for procurement of C-12D aircraft. The Senate bill contained no authorization for the C-12D. The House amendment authorized $11.8 million for procurement of 6 C-12D aircraft for replacement of C-131 aircraft in the Air National Guard as appropriate.

The conferees recommend authorization of $11.8 million for procurement of 6 C-12D aircraft.

The Senate recedes.

TR-1/U-2 standoff surveillance aircraft

The budget request contained $202.8 million to procure five TR-1A/U-2 standoff surveillance aircraft. Included within the amount requested was $72.7 million to procure several airborne synthetic aperture radar systems (ASARS) suites. The Senate bill would authorize the full amount requested. The House amendment would authorize $130.1 million for procurement and defer the $72.7 million requested for ASARS suites.

The conferees recommend the authorization of $162.0 million for procurement of five TR-1/U-2 aircraft including $31.9 million for ASARS suites—a reduction of $40.8 million.

The House recedes with an amendment.

CT-39 capital hire procurement

No procurement authorization was requested for replacement of CT-39 aircraft. The Senate bill authorized $7.5 million for CT-39 capital hire costs associated with initiation of a lease program for aircraft that will begin to replace the 120 CT-39 aircraft currently in inventory. The balance of the cost of the lease program—contractor logistics support—was authorized in the Air Force Operation and Maintenance Account. The House bill contained no authorization for this program.

The conferees recommend authorization of $7.5 million for CT-39 capital hire.

The House recedes.

Modification of aircraft, Air Force

The budget request contained $3,208.8 million for modification of Air Force aircraft including $607.0 million for the B-53 series; $875.8 million for the 31 KC-135R kits under a multiyear procurement program; $121.1 million for classified modification programs; $171.6 million for the C-130 series; $144.3 million for the Civil Reserve Air Fleet (CRAF) Enhancement Program. No authorization was requested for the KC-135 JT-3D reengining program.

The Senate bill authorized $2,636.7 million for Air Force aircraft modifications including $472.0 million for the B-52 series; $550.0 million for 27 KC-135R modifications under an annual procurement plan; $77.8 million for re-engining 32 Air National Guard KC-135 aircraft with JT-3D engines. The Senate bill applied $47.7 million from the fiscal year 1982 CRAF modification account as an offset reduction to the fiscal year 1984 KC-135 JT-3D modification program. The Senate bill also authorized $118.7 million for classified modifications; $134.5 million for the C-130 series, and a general reduction of $25.6 million in Air Force aircraft modifications. The Senate bill contained no authorization for the CRAF Enhancement Program.

The House amendment authorized $2,793.0 million for Air Force aircraft modification including $567.0 million for the B-52 series; $435.0 million for 24 KC-135R modification kits under an annual procurement plan; $118.1 million for classified modifications; $171.6 million for the C-130 series; and $144.3 million for CRAF modifications.

The conferees recommend authorization of $2,683.8 million for modification of Air Force aircraft including $472.0 million for the B-52 series; $500.0 million for 24 KC-135R kits under an annual procurement plan; $77.8 million for re-engining the final 32 Air National Guard KC-135 aircraft with JT-3D engines offset by the application of $47.7 million available from the fiscal year 1982 CRAF program; $118.1 million for classified aircraft modifications; $171.6 million for the C-130 series; $100.0 million for the CRAF Enhancement Program; and a general reduction of $65.0 million in the Air Force aircraft modification account.

Spares and repair parts, Air Force

THe budget request contained $5,128.8 million for spares and repair parts for Air Force aircraft including $167.0 million for the F-15; $392.6 million for the F-111 replenishment spares; $35.9 million for the sortie surge spares; $160.7 million for the F-16; and $3,383.2 million for other replenishment spares. No authorization was requested for initial spares for C-130H aircraft.

The Senate bill authorized $4,971.0 million for Air Force aircraft spares including $125.3 million for the F-15; $392.6 million for F-111 replenishment spares; $35.9 million for sortie surge spares; $3,275.4 million for replenishment spares; and a general reduction of $40.4 million in the Air Force aircraft spares account.

The House amendment authorized $4,579.0 million for Air Force aircraft spares including $110.1 million for the F-15; $5.5 million for the C-130H; $400.1 million for F-111 replenishment spares; and $3,383.2 million for other replenishment spares. No authorization was provided for sortie surge spares. The House amendment also provided for a $2.1 million reduction in a classified program and a general reduction of $500.0 million in the Air Force spares account.

The conferees recommend authorization of $4,666.7 million for Air Force aircraft spares and repair parts including $125.3 million for the F-15; $400.1 million for F-111 replenishment spares, $3.0 million for the C-130H; and $3,383.2 million for other replenishment spares. No authorization is recommended for sortie surge spares. The conferees also recommend a $2.1 million reduction in a classified program and a general reduction of $425.0 million in the Air Force aircraft spares account.

Support equipment and facilities, Air Force

The budget request contained $2,300.1 million for support equipment and facilities including $182.5 million for war consumables; $1,047.4 million for classified programs, and $294.7 million for electronic countermeasures (ECM) pods. The Senate bill authorized $2,250.1 million for support equipment and facilities including $997.4 million for classified programs and the amounts requested for war consumables and ECM pods. The House amendment authorized $2,294.4 million for support equipment and facilities including $154.3 million for war consumables; $1,042.9 million for classified programs and $321.7 million for ECM pods.

The conferees recommend authorization of $2,312.6 million for support equipment and facilities including $182.5 million for war consumables; $1,032.9 million for classified programs; and $321.7 million for ECM pods.

Land based intercontinental ballistic missile (ICBM) modernization

The House amendment would provide authorization for the M–X missile, development of the small mobile missile and related authorizations in a separate Title III. The Senate bill would keep the authorizations in Titles I and II as in the past. Both versions included authorization for the M–X, the development of the small mobile missile and related provisions, in the context of the recommendations of the President's Commission on Strategic Forces (known as the Scowcroft Commission). The dollar authorizations were for different amounts, however, in each version of the bill. Additionally, each House had somewhat different statutory language provisions pertaining to ICBM-related issues.

There was no basic difference in philosophy between the Senate bill and the House amendment. The major differences related to specific levels of authorization for the M–X research and development program, the procurement of 27 M–X missiles in the Senate bill versus 21 in the House amendment (as provided for by the Gore amendment) and a difference of $354 in authorization for the follow-on technology importantly, the small mobile missile. The Senate bill authorized $604 million for this latter purpose while the House amendment authorized $270 million.

The conferees recommend authorization for 21 M–X missiles consistent with the House amendment. The authorization difference and the action taken by the conferees are shown in the following table:

[Dollars in millions]

	Senate	House	Conference
M–X research and development	$2,034.4	$1,980.4	$2,034.4
M–X procurement	2,438.2	2,102.2	2,102.2
	(1)	(2)	(2)
M–X special repair parts followon technology	97.8	97.8	97.8
(Research and development including the small mobile missile)	604.0	270.0	604.0
Total ICBM modernization program (fiscal year 1984)			$4,848.4

[1] 27 missiles. [2] 21 missiles.

The amount authorized is in addition to the $72 million that is available for the fiscal year 1984 M–X Military Construction program authorized in H.R. 2972.

Additionally, the conferees adopted the following legislative provisions:

In section 110, the conferees included the provision in the Senate bill (sec. 108(a) and 108(b) that would limit the procurement of M–X missiles to 21 operational missiles from funds authorized in fiscal year 1984 and establish a completion date of January 31, 1984, for the Environmental Impact State-

ment and December 31, 1986, for initial operational capability.

In section 1231, the conferees included the provisions of the Senate bill (sec. 108(c)) and the House amendment (sec. 303) that would delineate the characteristics of the small mobile ICBM and link the deployment of M-X to the development of the small mobile ICBM.

In section 1232, the conferees included the provisions in the Senate bill (sec. 1030H) that would urge, as an expression of the sense of Congress, that the United States move towards ICBM forces of mobile single warhead missiles and urge the most expeditious design, development, testing and deployment of a small mobile ICBM.

The conferees also agreed that of the funds authorized for follow-on technology, $20 million is to be made available to the Defense Nuclear Agency (DNA) for research and development in silo hardening. The conferees intend DNA to be the lead agency for silo hardening as recommended by the Scowcroft Commission Report.

AGM-86B air launched cruise missile program

The Senate bill would authorize $422.2 million to procure 240 AGM-86B (ALCM-B) air launched cruise missiles, $14.0 million for advance procurement, and $22.8 million for initial spares—a total of $459.0 million. The House amendment would authorize $441.2 million for procurement of 240 ALCM-B missiles provide transfer authority of $14.0 million for advance procurement, and authorize $22.8 million for spares—a total of $464.0 million. In addition, the House amendment would specifically authorize $464.0 million for ALCM-B procurement.

The conferees agreed to authorize $422.2 million for ALCM-B procurement, $14.0 million for advance procurement, and $22.8 million for ALCM-B spares—a total of $459.0 million. In addition, the conferees agreed to adopt the language of section 103(c) of the House amendment specifically authorizing appropriations for the ALCM-B program with an amendment. This action by the conferees constitutes a waiver of the prohibition contained in subsection 139b(d)(3)(B) of title 10, United States Code, as added by section 1107, Public Law 97-252, the Department of Defense Authorization Act, 1983.

The Senate recedes with an amendment.

Ground-launched cruise missile (GLCM)

The budget request contained $581.5 million for procurement of 120 ground-launched cruise missiles (GLCM) including $17.7 million for accelerated amortization of certain tooling and test equipment. The Senate bill deleted the $17.7 million requested for amortization. The House amendment authorized the amount requested. The conferees recommend the authorization of $563.8 million for the GLCM program and adopted the Senate position.

The House recedes.

NATO air defense and airbase air defense

The conferees agreed to recommend authorization of $200.0 million for NATO air defense and airbase air defense.

The conferees understand that the Secretary of Defense and the German Minister of Defense have now reached an Agreement of Principle regarding air defense and airbase air defense in the Federal Republic of Germany and that negotiations are to be concluded by September 30, 1983.

The conferees have been concerned that the negotiations were moving too slowly and making inadequate progress. The conferees are, therefore, encouraged by the Agreement of Principle entered into by the Ministers.

The conferees believe that improving NATO's air defense capabilities is urgent and imperative. The Agreement of Principle and the options under consideration provide the basis for an integrated air defense plan for West Germany that is within the existing resources of the respective governments and based on approximately equivalent burdens. The conferees strongly endorse this initiative and consider it to be of the highest political and military importance.

The cooperative air defense and airbase air defense initiative should not be allowed to be sidetracked by inter-service jurisdictional debate. The conferees further hope that this initiative will become the cornerstone of future equitable cooperation as the basis for meeting NATO's conventional force modernization requirements. The conferees agree to the importance of improving NATO air base defense capabilities and are concerned over the lack of urgency displayed by the Air Force and DoD in this regard.

In connection with the $200.0 million authorization, the conferees direct the Air Force and DoD to prepare an integrated air defense plan for NATO and to enter into detailed discussions with each of our NATO allies where the United States has main or colocated air bases. A master plan for an integrated air defense program for NATO and a status report on the negotiations for airbase defense should be submitted to the House and Senate Committees on Armed Services concurrent with next year's budget submission.

The conferees believe that this, and other opportunities patterned on the Rapier role model (U.S. procurement and host nation manning) need intensive consideration and expect increased allied cooperation involving NATO's more prosperous countries to lead to equitable defense burden sharing arrangements for improving overall NATO defense capabilities including the requirements of the flanks and Iberian peninsula.

The conferees agreed that no funds should be obligated or expended until bilateral air defense agreements are concluded and the Committees on Armed Services of the Senate and the House of Representatives have had an opportunity to review those agreements.

AGM-65D missile (Maverick)

The budget request contained $346.7 million for procurement of 2,600 AGM-65D Maverick missiles. The Senate bill authorized $316.7 million for procurement of 2,300 missiles. The House amendment authorized the amounts requested.

The conferees recommend authorization of $316.7 million for procurement of 2,300 missiles.

Stinger missile

The budget request contained $4.9 million for procurement of 108 Stinger missiles. The Senate bill authorized the amounts requested. The House amendment provided no authorization for Stinger missiles.

The conferees recommend authorization of $4.9 million for procurement of 108 Stinger missiles.

Special programs

Within the budget request for Air Force missiles, $1,186.2 million was included for classified special programs. The Senate bill would authorize $1,249.4 million. The House amendment would authorize $1,081.2 million for special programs. The conferees recommend the authorization of $1,178.9 million—a reduction of $7.3 million.

The Senate recedes with an amendment.

Special support programs

The Air Force missile budget request contained $477.0 million for classified special support programs. The Senate bill would authorize $362.0 million for this purpose. The House amendment would authorize $43.0 million. The conferees recommend the authorization of $362.0 million.

The House recedes.

Miscellaneous reductions

The Senate bill made a miscellaneous reduction in Air Force missile authorization in the amount of $322.0 million. The House amendment made no such reduction. The conferees agreed to adopt the Senate position.

The House recedes.

OTHER PROCUREMENT, AIR FORCE

OTHER PROCUREMENT, AIR FORCE—Continued

[Amounts in millions of dollars]

Item	Fiscal year 1984 request		H.R. 2969		S. 675		Conference		Change from request	
	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount
Mobility equipment		(95.8)		(95.8)		(83.8)		(83.8)		(−12.0)
Selected activities		(3,018.5)		(2,977.7)		(2,978.0)		(2,985.8)		(−32.7)
Undistributed reduction		0		0		−94.2		0		0
Inflation adjustment		0		0		−147.0		−77.0		−77.0
Total, other procurement, Air Force		7,626.3		6,935.6		7,150.9		7,112.1		−514.2

Laser guided bomb kit

The budget request contained $267.8 million to procure low/level laser guided bomb (LLG-B) kits. The Senate bill would authorize $167.8 million for LLG-B kits. The House amendment contained no authorization for LLG-B kits.

The conferees agree to authorize $100 million to procure LLG-B kits.

CBU-89 (Gator)

The budget request contained $154.8 million to procure CBU-89, Gator munitions. The Senate would authorize $94.8 million for Gator. The House amendment would authorize $77.4 million for the Air Force Gator program.

The Senate recedes.

GBU-15

The budget request contained $50.2 million for GBU-15's. The Senate would authorize the amount requested. The House amendment would recommend authorizing $60.2 million for GBU-15's.

The Senate recedes.

Air Force electronic and telecommunications equipment

Joint tactical communications program.—The budget request contained $30.1 million for procurement of the Communications Nodal Control Element of the joint tactical communications program. The Senate bill would authorize the amount requested. The House amendment reduced the request by $25.0 million.

The conferees were aware of a recent cost estimate that showed a requirement for additional funding in fiscal year 1986 of $30 million for the Air Force portion of this joint program. In view of the revised cost estimate, the Army is reconsidering its requirement.

Until the cost and requirement are reaffirmed, the conferees recommend deferral of the effort to procure the economic order quantity.

The Senate recedes.

Tactical air control systems improvement.—The budget request contained $11.9 million for procurement of tactical air control systems improvement. The Senate bill recommended authorization of the request. The House amendment reduced the request by $5.9 million.

The House recedes.

ADP equipment.—The budget request contained $81.3 million for procurement of automatic data processing (ADP) equipment. The Senate bill recommended authorization of the request. The House amendment deleted $26.0 million for the Advanced Weather Analysis and Prediction System (AWAPS), the Automated Tech Order System (ATOS), the Work Information Management System (WIMS), and the Automatic Data Processing Equipment (ADPE) for the Air Force Military Personnel Center.

The conferees recommended authorization of $15.7 million for the AWAPS and WIMS, for a total program authorization of $71.0 million.

Range improvements.—The budget request contained $70.2 million for procurement of range improvements. The Senate bill recommended authorization of the request. The House amendment reduced the request by $29.7 million.

The House recedes.

Over-the-horizon backscatter radar system (OTH-B).—The budget request contained $176.0 million for procurement for two additional Over-the-Horizon Backscatter (OTH-B) radar systems and $18.3 million for spares and repair parts, a total of $194.3 million. The Senate bill authorized the amount requested. The House amendment would authorize no appropriations for procurement for this system in fiscal year 1984 and would defer a procurement decision for this system until fiscal year 1985.

The conferees recognize that there is a considerable degree of concurrency in the development and procurement of the OTH-B system and that the capabilities of the system may not be fully tested prior to the investment of large sums for procurement. The conferees agreed to authorize $105 million to add one sector to the current OTH-B test facility. The purpose of this action is to expand the test data base available to ensure that subsequent procurement decisions can be made on the basis of the most complete information possible. Accordingly, the conferees recommend the authorization of $96.0 million for procurement for the OTH-B system and $9.0 million for spares and repair parts, a reduction of $89.3 million. This action results in a reduction in the request for spares and repair parts for electronic and telecommunications equipment for the Air Force from $224.5 million to $215.2 million.

The Senate recedes with an amendment.

Tactical signal intelligence support program.—The budget request contained $18.1 million within the Other Procurement, Air Force, account for the Tactical Signal Intelligence Support Program. The Senate bill would authorize the full amount requested. The House amendment would authorize $17.0 million, a reduction of $1.1 million.

The House recedes.

TEREC ground processing stations.—The budget request contained $11.0 million for TEREC ground processing stations. The Senate bill would authorize the amount requested. The House amendment would authorize no appropriations for this program.

The Senate recedes.

Other base maintenance and support equipment

Mobility equipment.—The budget request contained $95.8 million for mobility equipment. The Senate bill would authorize $83.8 million to procure mobility equipment. The House amendment authorized the amount requested.

The House recedes.

Selected activities.—Within the amount requested for Other Procurement, Air Force, $3,018.5 million was requested for Selected Activities. The Senate bill would authorize $2,987.0 million for this purpose. The House amendment would authorize $2,977.7 million for these activities. The conferees recommend the authorization of $2,958.8 million for Selected Activities.

The House recedes with an amendment.

Undistributed reduction

The Senate and House amendment did not contain an undistributed reduction for Army Weapons and Tracked Combat Vehicles.

The conferees agree to authorize an undistributed reduction of 19.8 million in the Army weapons and tracked combat vehicle account.

NATIONAL GUARD, AIR FORCE

[Amounts in millions of dollars]

Item	Fiscal year 1984 request		H.R. 2969		S. 675		Conference		Change from request	
	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount	Quantity	Amount
Miscellaneous equipment		0		0		25.0		25.0		+25.0

Air National Guard

The budget request did not contain a specific line item containing funds for Air National Guard equipment. The Senate bill authorized $25 million to be used to procure miscellaneous equipment for the Air National Guard. the House amendment did not contain a similar authorization.

The House recedes.

PROCUREMENT, DEFENSE AGENCIES

[Amounts in millions of dollars]

General reduction		(0)		(−20.0)		(0)		(0)		

Procurement, Defense agencies

The budget request contained $1,282.8 million to procure equipment to support Defense Agencies. The Senate Bill would authorize $969.1 million for Defense Agencies. The House amendment would authorize $1,053.2 million.

The conferees agrees to authorize $972.7 million to procure equipment for Defense Agencies as indicated in the chart above.

Classified annex

Specific actions by the conferees with respect to certain classified programs are included in a classified annex to this report.

LEGISLATIVE PROVISIONS

Secure communications equipment and a special classified program (sec. 106)

The Senate bill contained a provision (sec. 106) that would authorize the Secretary of Defense to use not more than $60.0 million of the funds otherwise authorized to be appropriated for procurement to procure secure telephone equipment and related items to provide a government-wide secure telephone service. The Senate provision would also authorize not more than $220.0 million for a special classified program.

The House amendment contained a provision (sec. 106) that would authorize the $60.0 million requested for procurement of secure telephone equipment but contained no authorization for the special classified program.

The House recedes.

Limitation on Army procurement (sec. 107)

The Senate bill contained a provision (Sec. 101(b)) requiring the Secretary of the Army to continue evaluation of the feasibility of establishing a second production source for the M-1 tank engine and to submit the results of his evaluation to the appropriate Congressional committees at least thirty days prior to obligation of any funds under a second source engine contract.

The House amendment contained a provision (Sec. 107) prohibiting the Secretary of the Army from making a contract for the purpose of establishing a second source for production of the engine for the M-1 tank.

The issue of second sourcing of the M-1 tank engine was discussed by the conferees at great length. The conferees are convinced that the current engine contractor is performing well at the present time, and that the Army alleged economic benefits from developing a second production source for the M-1 tank engine are tenuous at best. The conferees, therefore, agree to retain the House language prohibiting the Secretary of the Army from proceeding with a contract for a second source for the M-1 tank engine.

The conferees take this action cautiously, and suggest that it whould not be perceived as an indication that the conferees do not strongly support competition in general as a means of containing cost. In fact, as reflected by the conference agreements, the conferees express continued support for the appropriate use of competition in the weapons acquisition process. However, in this particular situation, the circumstances are such that the conferees believe it is in the best interest of the government to prohibit the Army from awarding a contract to a second M-1 tank engine contractor.

The conferees provide notice to the Army that the execution of the contract with the current contractor will be carefully monitored. If the present favorable trends in cost, quality, or engine deliveries are not sustained, the Committees on Armed Services will reassess the need for competition on the tank engine and take appropriate action.

The Senate recedes.

Limitations on Navy procurement (sec. 108)

Strategic sealift ready reserve.—The House amendment included a provision (sec. 108(a)) that would provide that none of the funds appropriated pursuant to the authorization of appropriation for the strategic sealift ready reserve program may be obligated or expended for the acquisition of a specific vessel until the Secretary of the Navy has notified the Committees on Armed Services of the Senate and House of Representatives of the proposed acquisition and a period of 30 days of continuous session of Congress has passed.

The Senate bill contained no similar provision.

The Senate recedes.

Restriction on 5-inch semiactive laser guided projectile program.—The Senate bill included a provision (sec. 102(d)) that would prohibit the obligation or expenditure of any funds appropriated pursuant to an authorization of appropriation in this or any other Act for the purchase of the 5-inch semiactive laser guided projectile (SAL-GP) until the program was offered for competition for at least 90 days.

The House amendment had no similar provision.

In order for the Navy to offer the projectile for competition, a technical data package must be available to prospective bidders. The Navy does not currently have a technical data package for the projectile. Acquisition of a technical data package for the projectile would be necessary in order to offer the projectile for competition as envisioned in the Senate bill.

The conferees agreed to a provision that would prohibit the obligation or expenditure of any funds appropriated pursuant to an authorization of appropriation in this Act for the purchase of the 5-inch semiative laser guided projectile until the Navy has acquired a technical data package and determined that it does not contain proprietary data and that it can be used to solicit a second production source.

The conferees direct the Secretary of the Navy to certify to the Committees on Armed Services of the Senate and House of Representatives that the Navy has acquired the data package prior to contracting for the purchase of the 5-inch semiactive laser guided projectile.

The House recedes with an amendment.

Landing craft air cushion (LCAC).—The House amendment contained a provision (sec. 108(b)) that would provide that none of the funds appropriated pursuant to an authorization of appropriation for the landing craft air cushion (LCAC) program may be obligated or expended until the Secretary of the Navy has submitted a report to the Committees on Armed Services of the Senate and House of Representatives that responds to the Comptroller General decision on the LCAC contract selection and that provides information on the acquisition plan for the LCAC and certain alternatives to that plan.

The Senate bill contained no similar provision.

The conferees agreed to direct the Navy to submit a report to the Committees on Armed Services of the Senate and House of Representatives not later than October 1, 1983, which—

(1) responds to the Comptroller General decision B-203652 of April 20, 1983; and

(2) evaluates the feasibility of establishing a second source for the production of the landing craft air cushion.

The House recedes.

Authorization of multiyear contracts for the B-1B aircraft; prohibition on multiyear contracts for certain equipment (sec. 109)

The Senate bill contained a provision (Sec. 107(b)) denying to the Department of Defense the authority to execute multiyear procurement contracts, as proposed in the Department's fiscal year 1984 budget request, for AH-64 helicopter engines, F-18 aircraft engines, LSD-41 class amphibious ships, F-15 aircraft, KC-135 reengining (airframes), Mark 30 targets, and AN/SSQ-62 DICASS sonobouys. The House amendment contained no similar provision. However, the accompanying report (House Report 97-749) indicated that the House amendment did not authorize multiyear procurement, as requested, for AH-64 engines, F-18 engines, F-15 aircraft, KC-135 reengining, AN/SSQ-62 DICASS sonobouys, or the CH-47D heli-

copter modification program. The House amendment authorized multiyear procurement for LSD-41 class amphibious ships and Mark 30 targets.

The conferees recommend a provision denying to the Secretary of Defense the authority to execute multiyer procurement contracts, as proposed in the department's fiscal year 1984 budget request, for AH-64 engines, F-18 engines, F-15 aircraft, KC-135 reengining (airframes), Mark 30 targets, and AN/SSQ-62 DICASS sonobouys. The conferees recommend authorization of multiyear procurement of LSD-41 class amphibious ships.

The conferees also recommend disapproval of authority to execute a multiyear contract on the CH-47D helicopter modification program. This prohibition is not included in Sec. 109(b) because there was no statutory prohibition in either the Senate bill or the House amendment regarding multiyear contract authority for the CH-47D modification program. However, it is the intent of the conferees that the Department of Defense not execute a multiyear contract on the CH-47D helicopter modification program.

The House recedes with an amendment.

Limitations and requirements with respect to the procurement and deployment of the MX missile (sec. 110)

The Senate bill contained a provision (sec. 108) that would impose various limitations and requirements with respect to the procurement and deployment of the MX missile. Further discussion of this issue is contained in the Air Force missiles section of this report under land based ICBM modernization.

The House contained no similar provision.

The House recedes.

Prohibition on use of funds to equip Naval Air Reserve units with F/A-18 aircraft

The Senate bill contained a provision (Sec. 1102(c)) prohibiting the use of funds appropriated pursuant to an authorization of appropriations in S. 675 or any prior Act for the purpose of equipping any Naval Air Reserve unit with F/A-18 aircraft. The House amendment contained no similar provision.

The conferees urge the Navy to equip the Naval Reserve with modern, deployable aircraft. The conferees debated the desirability of equipping the Reserve with F-14's, A-6E's, A-7E's and F/A-18's but made no judgment as to which aircraft would be appropriate and feasible at this time. Concern was expressed by a number of conferees over the Navy's decision to equip the Naval Reserve with F/A-18 aircraft in 1984 even though the first aircraft carrier capable of deploying F/A-18's will not be available until 1985.

The Senate recedes.

TITLE II—RESEARCH, DEVELOPMENT, TEST AND EVALUATION

GENERAL

The Administration requested a total authorization of $29,625,266,000 for the fiscal year 1984 Research, Development, Test and Evaluation (RDT&E) appropriations. The conferees agreed on a total authorization of $27,302,908,000 for the RDT&E program, a reduction of $2,322,358,000 from the Administration's request. The following tables summarize the conference actions.

RDT&E SUMMARY

[In thousands of dollars]

	Request	Senate	House	Conference
Army [1]	4,793,674	4,193,364	4,204,552	4,204,552
Navy [2]	8,182,419	7,652,642	7,604,385	7,619,409
Air Force	13,652,273	12,936,116	11,960,530	12,622,193
Defense agencies [3]	2,996,900	2,468,537	3,068,422	2,856,754
Total, RDT&E	29,625,266	27,250,659	26,837,889	27,302,908

[1] Includes $1,474 for special foreign currency.
[2] Includes $1,376 for special foreign currency.
[3] Includes $200 for special foreign currency.

CONFERENCE SUMMARY

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

[Dollar amounts in thousands]

ADVANCED COMMUNICATIONS SYSTEMS

The Administration requested $65.216 million for the Air Force's Advanced Communications System program.

The Senate bill would provide authorization of $60.216 million; the House amendment would provide authorization of $7.267 million.

The conferees agreed to provide $40 million authorization for the Air Force program with the understanding that the development of the Enhanced Joint Tactical Information Distribution System, within this program element, would provide for interoperability among Navy, (including and Marine corps) and Air Force aircraft.

ALTERNATE FIGHTER ENGINE/ENGINE MODEL DERIVATIVE

The Senate bill would provide full authorization for the Air Force request of $132.059 million for the Alternate Fighter Engine program. The House amendment would provide no specific level of authorization for this program because authorization for this purpose was included within the Advanced Fighter Aircraft program element.

The conferees agreed to an authorization of $98.059 million for the Alternate Figher Engine program and $35 million for a new program element entitled F–100 durability. This authorization would allow the Air Force to continue the development of the F–110 engine under the Alternate Fighter Engine program and would fund F–100 improvements such as the improved gear

pump and Digital Electronic Engine Control (DEEC) under the F-100 durability program element.

The Senate bill also would provide authorization of $13.853 million as requested by the Air Force for the Engine Model Derivative program. The House amendment would provide additional authorization of $40 million to ensure that a competitive environment would be maintained for future tactical aircraft engines.

The conferees did not provide the additional authorization of $40 million for this purpose and agreed that the engine competition currently in progress between the F-100 and F-110 should proceed without interruption. The conferees adopted the House position that no additional authorization should be provided for enhancement to either of these engines unless and until the Air Force provides its findings on the current competition that address operational, support, logistics, performance, cost and other pertinent considerations.

ANTI-TACTICAL MISSILE PROGRAM

The Administration requested $33.275 million for the Army's Anti-Tactical Missile program.

The Senate bill would provide the full request; the House amendment reduced the request by $16 million.

The conferees agreed to an authorization of $25 million.

The conferees support enhancing Army Defense program efforts which address the urgency of response to the tactical ballistic missile and cruise missile threats. The conferees further support pursuit of a long range program to counter the tactical missile threat and to make maximum use of technology being developed in other agencies. The conferees direct the Secretary of Defense to identify anti-tactical missile defensive requirements among all services and to report to the Committees on Armed Services of the Senate and House of Representatives concerning their future planing in this area by February 15, 1984.

BALLISTIC MISSILE DEFENSE

The Administration requested $538.38 million for the Army's Ballistic Missile Defense System's Technology program.

The Senate bill would provide authorization of $391.245 million; the House amendment would provide authorization of $238 million.

As is noted elsewhere in this report, the Administration is currently conducting a review of the various technologies and systems approaches which hold promise as a means of defending against ballistic missiles. It is anticipated that, as a result of this review, significant revisions may be made in the ballistic missile defense program requested in January, 1983.

The conferees believe that the Army's ballistic missile defense program should be structured so as to support the Administration's new strategic defense initiatives. The conferees agreed to provide $338 million for the Army's Ballistic Missile Defense System Technology Program with an additional option to allow the Secretary of Defense to reprogram—if necessary—up to $50 million into this program from programs other than Army tactical conventional activities which enjoy lower priority.

As has been indicated in connection with the directed-energy weapons programs, the conferees agree that no significant programmatic changes should be undertaken in ballistic missile defense-related research and development activities until the Congress has been apprised of the President's views on the Fletcher Commission Report.

The Committees on Armed Services of the Senate and the House of Representatives expect to be notified promptly of any plans to revise the direction, technological focus or management of the ballistic missile defense program in order to conform that program to a restructured policy guidance.

CENTER FOR NAVAL ANALYSES

The Senate would provide $10.672 million of the Navy request for $12.672 million for the Center for Naval Analyses. The House amendment would authorize the full request.

The conferees agreed to an authorization of $10.672 million with the understanding that none of the reduction may be applied to the activities of Center for Naval Analyses' Operational and Evaluation Groups.

CLASSIFIED PROGRAM

Full authorization was provided for an Army classified program, 12821A in the Senate bill; the House amendment deleted the entire request.

The conferees agreed to delete authorization without prejudice.

The Senate recedes.

COMBAT SYSTEMS INTEGRATION

The Navy requested $17.128 million for its combat system integration (CSI) program. The Senate bill would provide the full request; the House amendment would provide $10 million authorization for this program.

The conferees agreed to an authorization of $15.128 million. The conferees expressed concern, however, regarding the Navy's approach to integrate combat systems and weapon direction systems many years after the deployment of combat ships. This approach is costly and inefficient. The conferees believe that the integration of combat and direction systems should be delineated during the design phase of the ship and believe, therefore, that the CSI program should be brought to an orderly conclusion within the next five years.

The conferees expect that the Secretary of the Navy will prepare a plan for the elimination of the CSI program and present this plan to the Committees of Armed Services of the Senate and House of Representatives no later than April 2, 1984. The plan should include the manner in which the Wallops Island Test Facility, Wallops Island, Virginia, will be used to enhance combat systems integration and planning.

CONVENTIONAL STAND-OFF CAPABILITY PROGRAM

The Air Force requested authorization of $35 million for the Strategic Conventional Stand-Off capability program. The Senate bill would provide no authorization for this program; the House amendment would provide full authorization.

The conferees agreed to an authorization of $10 million to continue the effort on active and passive sensors for target acquisition. The conferees further agreed that integration of conventional stand-off missiles on the B-52 should be deferred until the Department of Defense provides the Committees on Armed Services in the Senate and the House of Representatives a plan for the development of the joint Navy-Air Force tactical cruise missile.

C-17 AIRCRAFT PROGRAM

The Senate bill contained a provision (sec. 112) which would prohibit the expenditure of funds for the C-17 aircraft program until a Selected Acquisition Report on the C-17 aircraft program and a report validating the requirement, concepts, and design of the C-17 aircraft have been submitted to the Committees on Armed Services of the Senate and House of Representatives and a period of 30 days has elapsed.

The House amendment contained no similar provision.

The conferees agreed to direct the Secrtary of Defense to submit to the Committees on Armed Services of the Senate and House of Representatives concurrent with next year's budget submission:

1. A Selected Acquisition Report on the C-17 Aircraft program, and

2. A report validating the requirement, concepts and design of the C-17 aircraft.

The Senate recedes.

DIRECTED ENERGY PROGRAMS

The Senate bill would provide $495.2 million authorization of the requested $505.2 million for the Department of Defense Directed Energy Research and Development activities.

The House amendment would authorize $509.8 million and direct several significant changes to the Department of Defense program—principally, a reduction of $12.839 million from the Army's request of $32.839 million for the Laser Weapons Technology program; deletion of the Navy's entire request of $67.902 million for the High Energy Laser Technology program; deletion of the Air Force entire request for $36.095 million for the Space Laser Technology program; a reduction of $43.905 million from the Air Force request of $82.530 million for the Advanced Radiation Technology program; additional authorization of $80 million to the Air Force Space Command for the Visible/Ultraviolet Strategic Laser Technology program; additional authorization of $30 million to the Defense Advanced Research Project Agency (DARPA) request of $207.9 million for the Strategic Technology program; additional authorization of $15 million to the DARPA request of $33.1 million for the Particle Beam Technology program; additional authorization of $15 million for the DARPA Sea-Lite Beam Director program.

The conferees noted that a highly important reexamination of directed energy technologies, their potential applications, and related policy issues is currently being conducted by the Administration. The impetus for this effort was provided in an address by the President on March 23, 1983, in which he endorsed the concept of utilizing appropriate technological capabilities to provide a national defense against ballistic missiles.

Following the President's statement of this goal, the Department of Defense empanelled a blue-ribbon commission, referred to as the Fletcher Commission, to assess the various means whereby such a defensive capability might be realized. The Fletcher Commission's deliberations were ongoing as the conferees met to consider the differences between the Senate bill and the House amendment.

The conferees recognize that the recommendations of the Fletcher Commission could result in very significant changes to the directed energy program emphasis, funding, and management envisioned in the President's fiscal year 1984 request for defensive technologies. The conferees strongly endorse this panel's effort to provide a comprehensive assessment of the most promising technologies available for the purposes espoused by the President.

The Fletcher panel is expected to report its findings and recommendations to the President in October 1983. It is the confer-

ees' understanding that the President will shortly thereafter make known to the Congress any changes to his fiscal year 1984 program and any that might ensue in future year programs.

The conferees have intentionally refrained from taking any action that might impinge upon the Fletcher Commission's ability to make its determinations in an objective and technically sound fashion.

Consistent with this intent, however, the conferees have agreed to provide additional authorization over and above that requested for several defensive technologies of particular promise. Statutory language in the conference report stipulates that the funds so authorized are to be expended only for the purpose directed.

Specific authorizations of the conferees are shown in the accompanying chart. The following items, however, deserve special attention:

Airborne Laser Laboratory (ALL)

The conferees agreed to direct the termination of the Airborne Laser Laboratory in fiscal year 1984. This program is funded under the Advanced Radiation Technology line in the Air Force. The conferees adopted statutory language which proscribes further development of the ALL. It is the intent of the conferees that experimentation utilizing the ALL asset will be completed as soon as is possible and that an orderly termination of this program will take place in FY 1984.

Triservice Laser Test Range

The conferees agreed to provide $25.0 million to establish a national Triservice Laser Test Range at White Sands, New Mexico. It is the intent of the conferees that the existing facility and appropriate research and development articles currently located there should be utilized to perform vulnerability, lethality and laser testing for all elements of the Department of Defense. The conferees believe that the Navy's Mid-Infrared Advanced Chemical Laser (MIRACL), whose development as a prototype for Navy weapon systems is terminated by this legislation (sec. 203), may have utility and should be used as a power source for the aforementioned purposes.

Strategic laser system technology program

The conferees directed the creation of a new line in the Air Force research and development account. This line, entitled Strategic Laser System Technology Programs, will subsume two important elements of strategic laser development activities needed if the potential future laser weapon options are to be realized.

First, the conferees agreed to authorization of $20 million for research and analysis on strategic laser system issues. This work would be performed to assess among other things, laser system vulnerabilities, lethality and command and control requirements. The Administration had intended to conduct such studies as part of the Air Force Space Based Laser program for which the conferees agreed to provide no funds.

Second, the conferees determined that an increased level of effort could usefully be applied to the research and development of short wavelength laser systems as was stated in the House amendment line for the Visible/Ultraviolet Strategic Laser Technology program. For this purpose, the conferees provided $40 million within the Strategic Laser Technology Program line to be used by the Air Force Space Division and Space Command to develop visible/ultraviolet lasers with promise for weapons purposes.

Program	Fiscal year 1984 request	House	Senate	Conference
Army:				
Laser weapons technology	32.8	20.0	32.8	20.0
Neutral beam technology (BMDATC)	0	7.0	0	7.0
Navy:				
High energy laser (Sea Lite)	67.9	0	67.9	0
Air Force:				
Advanced weapons	45.7	31.0	45.7	45.7
Space laser program	36.1	0	36.1	0
Visible/UV strategic laser [1]	0	80.0	0	40.0
System analysis [1]	0	0	0	20.0
Advanced radiation technology	82.5	38.6	62.5	62.5
Defense Advanced Research Projects Agency (DARPA):				
Short wavelength laser tech [2]	35.0	65.0	35.0	65.0
DARPA/DOE third generation weapons [3]	0	20	0	22.0
Particle beam	33.1	48.1	33.1	33.1
Triservice laser test range	0	0	0	25.0
Sea lite beam director	0	15.0	0	0

[1] Included in one program element strategic laser technology.
[2] Exclusive of blue green laser technology.
[3] $50 million was identified for DOE work in this area in Title III of the Senate bill.

The conferees believe that these various initiatives provide a research and development program that complements the work currently underway in related and other directed-energy activities. By providing the identified, additional resources, the conferees hope to ensure that adequate funds are available in fiscal year 1984 for research and development of these promising technologies should the President decide to pursue them aggressively.

Consequently, in keeping with the conferees' approach to these directed energy programs, the conferees direct that the Department of Defense refrain from significant programmatic changes in these areas until the Congress has been apprised of the President's views on the Fletcher Commission's report.

Similarly, the conferees wish to make clear their intent that their actions in this bill not be construed to favor or predispose to any agency or service within the Department of Defense the long-term responsibility for the execution of the programs authorized in this bill. The conferees believe that the decisions concerning the management functions associated with the oversight and execution of the President's program should properly be made a part of the Fletcher Commission's deliberations and be incorporated into any Administration action which might result from the Commission's report. In light of the very significant sums likely to be committed to this program area in the future, serious consideration should be given to an organization structure which creates a single, senior official with overall responsibility for directed-energy functions.

ENHANCED MODULAR SIGNAL PROCESSOR

The Navy requested authorization of $22.359 million for the Enhanced Modular Signal Processor (EMSP) program.

The Senate bill would provide $31.359 million, an addition of $9 million while the House amendment would provide $22.359 million. The conferees agreed to an authorization of $31.359 million with the stipulation that the additional authorization be used in part for the Advanced Signal Processor Common Operator System (ACOS).

ACOS is closely related to the development of software (computer programs, etc.) for the Enhanced Modular Signal Processor and has significant potential for reducing the cost of software for Navy standard signal processors.

FLEET TELECOMMUNICATIONS (TACTICAL)

The Navy requested $41.963 million for the Fleet Telecommunications (Tactical) program.

The Senate bill would provide authorization of $33.430 million; the House amendment would authorize $26.963 million.

The conferees agreed to an authorization of $33.43 million provided that none of the reduction be applied to high frequency antijam improvements and that priority for the remaining authorization be given to the Combination Radio project.

HIGH-SPEED ANTI-RADIATION MISSILE (HARM) IMPROVEMENT PROGRAM

The Senate bill would authorize the Navy's full request for $11.793 million for the High-Speed Anti-Radiation Missile (HARM) improvement program.

The House amendment would provide no authorization for this purpose.

The conferees agreed to authorize $11.8 million for HARM improvements. These funds are to be used only for cost reduction efforts, but the incorporation of fixes identified during the HARM Operational Evaluation are not prohibited. No funds shall be used to initiate any new start or new programs.

JOINT TACTICAL MISSILE SYSTEM (JTACMS)

JOINT SURVEILLANCE AND TARGET ACQUISITION RADAR SYSTEM (JSTARS)

The Senate bill would authorize $30.16 million of the Army request for $50.16 million for the Joint Tactical Missile System (JTACMS) and would provide the full $9.92 million requested by the Air Force for its participation in the program. Additionally, the Senate bill would authorize $29.373 million of the Army's request for $69.373 million for the Joint Surveillance and Target Acquisition Radar System (JSTARS) program and the full authorization for $94.560 million requested by the Air Force.

The House amendment authorized the full request by the Army for $50.160 million for the JTACMS program; denied the entire request of the Air Force for $9.92 million for the JTACMS program; reduced the Army's requested authorization to $68.961 million for the JSTARS program; reduced the Air Force request of $94.560 million to $21.534 million for the JSTARS program. Additionally, the House amendment contained a provision limiting the selection of the JTACMS airframe to a derivative of either the Patriot T-16 or Lance T-22.

The conferees agreed to recommend authorization of the following amounts for research and development of the joint Army/Air Force JSTARS and JTACMS: $68.961 million for the Army JSTARS, $41.534 million for the Air Force JSTARS, $50.16 million for Army JTACMS, and $9,92 million for Air Force JTACMS.

In addition, the conferees recommended authorization of $5 million in advance procurement for Army JSTARS and $20 million in advance procurement for Army JTACMS.

Of the $41.534 million recommended for Air Force JSTARS, $20 million is intended for integration of the common radar on an airborne platform. However, these funds shall not be obligated or expended until after the completion of joint hearings of the Committees on Armed Services of the Senate and the House of Representatives on the subject of deep strike interdiction.

The conferees are persuaded that the JSTARS and JTACMS programs and associated improved munitions and C3 will pro-

vide a highly-leveraged, force multiplying capability for improving conventional capability and implementing the air/land battle doctrine. These systems offer great promise to improve substantially the effectiveness of conventional weapons and to raise the nuclear threshold. The conferees are concerned that the Army and Air Force have not worked cooperatively to arrive at common requirements and specifications for the JSTARS radar and JTACMS missile to support the air/land battle concepts. The conferees direct the Secretary of Defense to ensure that the Army and Air Fore resolve these matters at the earliest possible time. In view of the likely constraints on future growth in the defense budget, separate Army and Air Force programs may not be affordable. The Committees on Armed Services will closely monitor progress by the services in the resolution of their differences in requirements.

The Senate conferees agreed to the language contained in the House amendment restricting the expenditure of $50.16 million in the Army JTACMS program to the evaluation and selection of either the T-16 (Patriot) or T-22 (Lance) missile airframes as the air vehicle for the JTACMS program. The conferees agreed that every reasonable effort should be made to obtain this capability at the earliest opportunity and that selecting an existing airframe would best accomplish this goal.

The conferees further agreed that the Air Force JTACMS program shall concentrate on the development of a common missile or a derivative of the missile jointly selected by the Army and Air Force. This is not intended to preclude consideration of other candidate vehicles under development in other programs.

The conferees strongly support the development of the capability anticipated in these joint programs and continue to insist on the maintenance of the joint nature of these programs and strong oversight from the Office of the Secretary of Defense.

MEDIUM RANGE AIR-TO-SURFACE MISSILE (MRASM)

The Navy requested authorization of $19.512 million for the Air-Launched Tomahawk—a joint Navy/Air Force Medium Range Air-to-Surface Missile (MRASM). The Air Force requested authorization of $21.901 million for the MRASM system. The Senate bill recommended no authorization for the MRASM and termination of the program. The House amendment recommended authorization of $30.512 million for the Navy MRASM, an addition of $11 million, and $51.901 million for the Air Force an addition of $30 million. The conferees agreed that the MRASM program be terminated and that the Navy and Air Force explore the opportunity for developing a joint tactical cruise missile using an alternative system currently under development.

None of the authorization is to be used for this purpose in the absence of a Department of Defense approved plan to execute such a joint program.

The Senate bill would provide full authorization for the Navy request of $7.880 million for the NATO Sea Gnat system. The House amendment would provide no authorization for this purpose.

The conferees agreed to an authorization of $4.0 million and direct that, prior to submission of the fiscal year 1985 budget request, the Secretary of the Navy provide a report to the Committees on Armed Services of the Senate and the House of Representatives containing a complete evaluation and full assessment of the cost and performance effectiveness of Sea Gnat relative to other available systems including those developed in France.

NAVAL GUNFIRE SUPPORT SHIP

The Senate bill would provide authorization of $500,000 that was not requested by the Navy to investigate the potential of a Naval Gunfire Support Ship. The House amendment contained no similar provision.

The conferees agreed to an authorization of $500,000 and direct that the Secretary of the Navy provide the results of the study as delineated in the Senate report (S. Rept. 98-174) to the Committees on Armed Services of the Senate and the House of Representatives.

NAVAL GUNFIRE SYSTEMS IMPROVEMENT PROGRAM

The Senate bill would provide authorization of $1 million that was not requested by the Navy for a comprehensive study of the options available to improve the Navy's gunfire capability. The House amendment contained no similar provision.

The conferees agreed to an authorization of $1 million for this study. The House has proposed related initiatives in the past and fully supports this project. Naval gunfire support is a vital ingredient for U.S. military forces assigned to combat missions to coastal areas, and resources to support this mission have been permitted to dwindle significantly. Reactivation of *Iowa* class battleships will provide a temporary improvement, but less than adequate naval gunfire support resources are projected for the long term as other ships equipped with guns are retired.

NIGHT PRECISION ATTACK

The Air Force requested $89.892 million for the Night Precision Attack program for the development of the Low Altitude Navigation Targeting Infrared for Night (Lantirn) system. The Senate bill would authorize the full amount requested, the House amendment would provide no authorization for this program.

The conferees expressed concern over the history of cost growth in the program and the lack of adequate comptetition. Last year, the conferees on S. 2248, the fiscal year 1983 Defense Authorization bill, authorized the LANTIRN program but required that a competition be conducted with a suitably modified F/A-18 FLIR pod. As a result of a subsequent limitation on expenditures in the fiscal year 1983 Defense Appropriation bill, prohibiting funds in the bill from being used for such competition, the competition was not conducted.

The conferees agreed to recommend an authorization of $59.892 million only to continue those aspects of the development program necessary to evaluate the performance of the initial development pods. No funds should be used to initiate production or for production readiness.

The Air Force is encouraged to actively pursue the evaluation of alternative low altitude navigation and targeting systems should the LANTIRN program be terminated.

RANKINE CYCLE ENERGY RECOVERY (RACER) SYSTEM

The House amendment included legislative language requiring authorization of at least $24 million for the continued development of the Rankine Cycle Energy Recovery (RACER) system. The Senate bill contained no similar provision.

The conferees agreed to the provision of the House amendment and emphasize that the $24 million in authorization is in addition to the Navy's budget request of $16 million authorized in other program elements for the RACER system.

The conferees intend, therefore, that $40 million of the funds authorized in fiscal year 1984 are to be used for the RACER system development to insure compatibility of the RACER with all ships of the DDG-15 class, including the lead ship. The conferees further emphasize that the RACER system should be installed on the ship only if the system has been tested and demonstrated.

REGIONAL TACTICAL SURVEILLANCE

The Navy requested $39.023 million for the Regional Tactical Surveillance program. The Senate bill would deny the entire authorization request; the House amendment would provide full authorization.

The conferees agreed to an authorization of $29 million and in addition direct that the Secretary of the Navy provide a report to the Committees on Armed Services of the Senate and House of Representatives not later than March 31, 1984 outlining:

The difference between this system and the Air Force Over-the-Horizon systems.

The complete funding profile and schedule for the Regional Tactical Surveillance program together with the measures taken to minimize its cost.

TACTICAL EMBEDDED COMPUTERS

The Army requested authorization of $36.967 million for its command and control program which included the full scale engineering development of tactical embedded computers. The Navy requested $18.954 million for its tactical embedded computer program. The Senate bill would provide authorization for the Army tactical embedded computer program and directed that computer-related activities which enjoy lower priority be reduced at the discretion of the Secretary of Defense to offset the costs of this program. The House amendment would provide the full request for this program without comparable stipulations. The Senate bill would provide authorization of $13.254 million for the Navy's program; the House amendment would authorize the full request.

Additionally, the House amendment contained a provision prohibiting the obligation or expenditure of any funds by the Army or Navy until the Secretary of Defense submits a plan to the Committees on Armed Services of the Senate and the House of Representatives to integrate advanced microelectronic computers into weapon systems. The Senate bill contained no similar provision.

The conferees agreed to provide the full authorization requested by the Army, subject to the provision stipulated in the Senate bill, and by the Navy for tactical embedded computers. The conferees also adopted the statutory restrictions proposed on these programs by the House amendment.

TERMINALLY GUIDED PROJECTILES

The Army requested authorization of $18.849 million for its Terminally Guided Projectile program. The Senate bill would authorize the full request; the House amendment would provide no authorization and recommended termination of the program.

The conferees agreed to an authorization of $9 million to be divided equally among the Fiber Optics guidance system, the High Velocity Missile guidance system and the Sense and Destroy Armor (SADARM) guid-

ance system for the 155 millimeter projectile.

The conferees intend that the authorization be used only for this purpose.

TRIDENT II MISSILE

The Administration requested $1,496.406 million for the Trident II (D-5) missile system.

The House amendment fully funded the request; the Senate bill provided a total of $1,506.406 million. The additional $10 million was provided for the purpose of maintaining the option of a maneuvering reentry vehicle (MARV) for the Trident II, and to allow work on the interface with this missile required for a large, accurate reentry body and/or pentration aids.

The conferees agreed to adopt the Senate provision. The decision to preserve this option was taken by the conferees with an understanding that the Navy will, prior to the submission of the FY 1985 budget request, make a determination with respect to the national requirement either for developing a MARV capability in the D-5 missile or, alternatively, for preserving into the future a MARV option for the D-5. Whatever additional funds are necessary for the development of such a capability or the preservation of such an option—should it be deemed desirable to pursue either course of action—are to be budgeted for by the Navy.

The House recedes.

WIDE AREA ANTI-ARMOR MUNITIONS (WAAM)

The Air Force requested authorization of $52.159 million for the Wide Area Anti-Armor Munitions program. the Senate bill reduced the authorization request by $31 million; the House amendment would provide authorization of $64.159 million, an a addition of $12 million.

The conferees agreed to an authorization of $35 million. The reduction in authorization, however, is to be applied only to the millimeter wave guidance project and the highest priority should be given to the development of sensor fused weapons. Accordingly, $29.1 million of the authorization provided is to be used for the sensor fused weapon project.

SPECIAL LEGISLATIVE PROVISIONS IN RESEARCH, DEVELOPMENT, TEST AND EVALUATION

The conferees adopted the following legislation provisions that appeared in either the Senate bill or the House amendment:

Limitation on funds for the Army (sec. 202)

The conferees adopted the following provisions contained in section 202 of the House amendment:

—The provision [authorizing] $7.650 million only for the 75 millimeter and 90 millimeter guns for light armored vehicles.

—The provision [authorizing] $7.0 million only for neutral particle beam research as part of the ballistic missile defense program.

—The provision [authorizing] at least $15.0 million only for integration (including qualification) of the Hellfire missile on the UH-60 helicopter.

—The provision [authorizing] $50.160 million only for the Joint and Tactical Missile System and for selection of either the Patriot T-16 or Lance T-22 as the JTACMS delivery vehicle.

—The provision [authorizing] $12.561 million only for the Mobile Protected Gun System.

—The provision prohibiting the obligation and expenditure of any authorization for full scale engineering development of the Military Computer Family system until the Secretary of Defense provides a plan to the Committees on Armed Services of the Senate and the House of Representatives for the introduction and integration of advanced micro-electronic computers into weapon systems.

Limitation on funds for the Navy (sec. 203)

The conferees adopted the following provisions contained in section 203 of the House amendment:

—The provision authorizing $24 million only for the Rankine Cycle Energy Recovery (RACER) System to ensure compatibility of the RACER System with all ships (including the lead ship) of the DDG-51 class.

—The provision authorizing $20.0 million only for the development of the antiradiation projectile (ARP).

—The provision authorizing $72.593 million only for the Mark 92 Gunfire Control System. This amount was authorized in the Senate bill.

—The provision authorizing $10 million only for a derivative of the Standard Missile II to be used by the Navy for the outer air battle mission.

—The provision authorizing $1.47 million only for the evaluation of a wing lift system for Navy utility craft.

—The provision prohibiting the obligation and expenditure of funds for full scale engineering development of the AN/UYK-43 and AN/UYK-44 computers until the Secretary of Defense submits a plan to the Committees on Armed Services of the House of Representatives and the Senate for the introduction and integration of advanced microelectronic chip set computers into weapon systems.

—The provision prohibiting the use of any funds authorized the Navy for the Mid-Infrared Advanced Chemical Laser (MIRACL)

Limitation on funds for the Air Force (sec. 204)

The conferees adopted the following provisions contained in section 204 of the House amendment:

—The provision authorizing $60 million for the Air Force Strategic Laser system technology program of which $40 million is available only for the Air Force Space Command and Space Division for the development of the Visible/Ultra-Violet Short Wavelength Laser system.

—The provision authorizing $20.0 million only for the development of terminally guided and sensor fused submunitions for the Air Force Deep Strike mission.

—The provision providing for the completion of the Airborne Laser Laboratory test program and for the orderly termination of the program; the conferees agreed on authorization of $10 million for this purpose.

The conferees adopted the provision contained in section 204 of the Senate bill requiring authorization of not less than $22.477 million for research and development of training and simulation technology.

Limitations of funds for the Defense Agencies (sec. 205)

The conferees adopted the following provisions contained in section 205 of the House amendment:

—The provision authorizing not less than $65 million only for research, development, test and evaluation of free electron and other short wavelength (excluding blue-green) lasers.

—The provision authorizing appropriations only for the Particle Beam Technology program including modifications to the Advanced Test Accelerator required for free electron laser research. The conferees reduced the authorization from $481.1 million, as provided by the House, to $33.1 million, as requested.

—The provision authorizing appropriation only for a joint Defense Advanced Research Projects Agency and Department of Energy project for the research, development, test and evaluation of third generation defensive weapons. The House amendment contained $20 million. The conferees agreed on $22 million.

—The provision prohibiting the obligation or expenditure of any funds for fifth generation artificial intelligence computers until the Secretary of Defense submits to Congress a comprehensive plan for the manner in which the program would be carried out.

Limitation on size of small mobile missile (sec. 206)

The conferees adopted the provisions contained in section 303 of the House amendment delineating the characteristics of the small intercontinental range ballistic missile weighing less than 33,000 pounds carrying a single warhead and the linkage between the deployment of the small mobile missile and the deployment of M-X missiles.

Report on joint tactical missile system and joint surveillance and target attack system (sec. 207)

The conferees adopted the provision contained in section 113 of the Senate bill requiring the Secretary of Defense to submit a report to the Committees on Armed Services of the House of Representatives and the Senate by October 1, 1984, delineating a comprehensive and coordinated plan for the joint service development and procurement of a joint tactical missile system and joint surveillance and target attack system.

Antiballistic missile defense system research (sec. 208)

The conferees adopted the provision contained in section 114 of the Senate bill permitting the Secretary of Defense to reprogram $50.4 million of amounts appropriated pursuant to the authorization of appropriations in Title II of this bill (excluding amounts appropriated for Army Tactical Conventional programs) for ballistic missile defense.

TITLE III—OPERATION AND MAINTENANCE

GENERAL ISSUES

Fuel cost reestimate

The revised 1983 Department of Defense request included $6.9 billion for fuel purchases, a reduction of $1.3 billion from the February submission. The Senate bill would authorize the amount contained in the revised request. The House amendment also contained a $1.3 billion reduction for fuel purchases based on a reestimate of $28 per barrel price of crude oil in fiscal year 1984. However, the reduction was allocated differently among the major accounts.

The House recedes.

Differences in allocating these reductions between the Senate bill and the House amendment within major account title are shown as follows:

[Amounts in millions of dollars]

Major account	Senate bill	House amendment	Conference action
Army	−88.0	−77.6	−88.0
Navy	−458.0	−697.9	−458.0
Marine Corps	−6.7	−12.1	−6.7
Air Force	−613.9	−408.4	−613.9
Defense Agencies	−.8	−.6	−.8
Army Reserve	−3.6	−4.0	−3.6
Navy Reserve	−24.8	−34.8	−24.8
Marine Corps Reserve	−.3	−.4	−.3
Air Force Reserve	−23.8	−16.1	−23.8
Army National Guard	−10.6	−9.4	−10.6
Air National Guard	−74.4	−50.9	−74.4

Purchase inflation

The revised fiscal year 1984 Department of Defense operation and maintenance request included a reduction of $521 million based on a reestimate of purchase inflation rates by the Office of Management and Budget. The Senate bill would authorize the amount contained in the revised request. The House amendment contained a reduction of $105.5 million based on a selective reestimate of the projected purchase inflation rate in fiscal year 1984 from 5.1 to 4.6 percent in various operation and maintenance activities and accounts.

The conferees agreed to a reduction of $272.9 million in authorization based on 52.4 percent of the reduction contained in the President's revised request. In addition, the conferees agreed to a further reduction of $216.4 million in purchase inflation as an offset against increased authorization to meet the costs associated with anticipated congressional action providing for a nine month pay raise of four percent for civilians employed by the Department of Defense.

The resolution of differences in allocating these reductions between the Senate bill and the House amendment within major account titles follows:

[Amounts in millions of dollars]

Major account	Senate bill	House amendment	Conference action
Army	−124.0	−25.6	−122.0
Navy	−165.0	−33.3	−157.4
Marine Corps	−14.0	−2.7	−10.5
Air Force	−135.0	−26.8	−114.8
Defense Agencies	−53.0	−12.6	−53.0
Army Reserve	−4.0	−1.0	−4.0
Navy Reserve	−6.0	−1.2	−3.7
Marine Corps Reserve	−1.0	−.1	−.55
Air Force Reserve	−4.0	−.3	−4.0
Army National Guard	−6.0	−1.0	−6.0
Air National Guard	−9.0	−.9	−9.0

Civilian pay raise

The Department of Defense request did not provide fo a civilian pay raise in fiscal year 1984. However, both the Senate bill and House amendment assumed a six month pay raise of four percent and authorized $433 million to cover the operation and maintenance costs associated with such a pay raise.

Since the time the House and Senate Defense authorization bills were reported to their respective bodies, two major developments regarding a civilian pay raise in fiscal year 1984 have taken place. First, the First Concurrent Resolution on the Budget was enacted by Congress and assumed a nine month pay raise of four percent for Federal employees. Second, the conferees understand that the House and Senate committees with jurisdiction may recommend at least a nine month civilian pay raise. Consequently, the conferees agreed to increase authorization by $216.4 million to cover the estimated cost of the additional three month pay raise of four percent for Department of Defense civilians whose salaries are paid out of the operation and maintenance accounts. The conferees have taken this action as a conscious effort to authorize the full amount required to avoid a repetition of last year's 25 percent pay absorption that proved to be so disruptive to budget execution and required the transfer of funds from readiness-related activities like depot maintenance and training.

The allocation of these authorization increases to cover a nine month pay raise of four percent for civilian employees are shown as follows:

[Amounts in millions of dollars]

Major account	Senate bill	House amendment	Conference action
Army	+113.9	+113.9	+170.9
Navy	+141.8	+141.8	+212.7
Marine Corps	+6.3	+6.3	+9.5
Air Force	+87.9	+88.0	+132.0
Defense Agencies	+50.8	+50.8	+76.2
Army Reserve	+5.1	+5.1	+7.7
Navy Reserve	+1.1	+1.1	+1.7
Marine Corps Reserve	+.1	+.1	+.15
Air Force Reserve	+4.9	+4.9	+7.4
Army National Guard	+9.6	+9.6	+14.4
Air National Guard	+11.2	+11.2	+16.8

CHANGES IN MAJOR ACCOUNTS

The following table summarize the resolution of differences in each of the major accounts.

OPERATION AND MAINTENANCE, ARMY

[Amounts in millions of dollars]

Item	Senate bill	House amendment	Conference recommendation
Request	17,867.8	17,867.8	17,867.8
Fuel cost reestimate	−88.0	−77.6	−88.0
Purchase inflation	−124.0	−25.6	−122.0
Civilian pay raise	+113.9	+113.9	+170.9

Authorization of appropriations (sec. 301)

Section 116 of the Senate bill would authorize funds for operation and maintenance purposes by major account title (Army, Navy, Marine Corps, Air Force, Defense Agencies, Army Reserve, Navy Reserve, Marine Corps Reserve, Air Force Reserve, Army National Guard, Air National Guard, National Board for the Promotion of Rifle Practice—Army, Claims—Defense, Court of Military Appeals—Defense, and 1984 Games of the XXIII Olympiad). Section 401 of the House amendment would authorize funds for operation and maintenance purposes by major account title and specifically by budget activity (Strategic Forces, General Purposes Forces, Communications and Intelligence, Airlift and Sealift, Central Supply and Maintenance, Training, Medical, and Other General Personnel Activities, Administration, and Support to Other Nations, etc.).

The House conferees remain very concerned about the continued appropriation of funds for operation and maintenance activities and programs that were not contained in the President's request or specifically authorized by Congress. Over the past two fiscal years there have been over $550 million appropriated for unauthorized items. Irrespective of the particular merits of these programs and the circumstances involved, this practice is inconsistent with section 138, title 10, United States Code, which provides that no funds shall be appropriated for, or obligated or expended by, the Department of Defense without prior authorization. At issue is the continued integrity and relevance of the authorization process itself. Absent an agreed upon mechanism to reconcile such differences comprehensively, the Armed Services Committees have had to unilaterally reprogram authorization to permit the obligation and expenditure of unauthorized appropriations by the Department of Defense. The House conferees believe that the indefinite continuation of this

one-sided accommodation is unacceptable. Therefore, the conferees have reluctantly concluded that the only effective solution for this unfortunate situation is to impose progressively more detailed authorization to clarify authorization guidance.

The conferees recognize that authorizing operation and maintenance funds at budget activity levels imposes a greater burden on the Department of Defense. To minimize this inconvenience as much as possible, the conferees do not intend for the Defense Department to set up a new accounting system as a result of this method of authorization. Furthermore, within the total amounts authorized to be appropriated for the budget activities listed in section 301 of this Act, the conferees agreed that the Secretary concerned may increase the amounts for a particular budget activity listed in such sections only in accordance with the requirements and procedures prescribed in Department of Defense Directive 7250.5, "Reprogramming of Appropriated Funds," January 9, 1980, and Department of Defense Instruction 7250.10, "Implementation of Reprogramming of Appropriated Funds," January 10, 1980, or any applicable successor Directive or Instruction thereto.

The distribution of authorization adjustments by budget activities is shown in the following tables:

Total, other budget activities	277,171	227,171	−50

Prohibition of use of vessels with foreign-built major components under certain leases or service contracts (Sec. 303)

Section 404 of the House amendment would prohibit the expenditure of Navy operation and maintenance funding authorized by this Act associated with a lease or service contract of a vessel that has a main propulsion system or other major component not built in the United States if the lease were for a long term or if it involved a substantial termination liability.

The Senate bill contained no similar provision.

The conferees agreed to Senate amendments, the first of which would limit the prohibition to a vessel "which has not previously been placed in service"—meaning "newly constructed." In addition, major component was defined as being "of the hull or superstructure" which is consistent with current restrictions on the procurement of Navy vessels. Finally, a long term contract was defined as one in excess of five years.

The Senate recedes with amendments.

Authorization of appropriations for assistance for the 1984 games of the XXIII Olympiad (sec. 304)

The Senate bill contained a provision (sec. 117) that would authorize $25 million for Defense Department assistance to the Los Angeles Summer Olympic games, subject to justification for such assistance being provided to the President prior to obligation. Such justification was also to be forwarded to the Committees on Armed Services and Appropriations of the Senate and the House of Representatives.

The House amendment contained a similar provision (sec. 403) that would authorize $50 million for such assistance but would not require transmittal of the justification to the Congress.

The House recedes to the language in the Senate bill, and the Senate recedes to the $50 million authorization level in the House amendment.

Shelter for the homeless at military installations (sec. 305)

Section 405 of the House amendment would authorize the Department of Defense to provide shelter and incidental services for the homeless at military installations without reimbursement to the extent that such humanitarian assistance does not interfere with military preparedness or ongoing military functions. In addition, $10 million would be authorized to offset the anticipated incremental cost of this program to ensure that military activities would not suffer through a diversion of funding to provide shelter and incidental support for the homeless.

The Senate bill contained no similar provision.

The Senate recedes.

C–140B replacement aircraft

The conferees fully support the lease in fiscal year 1984 of 3 Gulfstream G III aircraft for the C–140B replacement aircraft program. Procurement of a total fleet of 11 Gulfstream G III aircraft is planned, beginning in fiscal year 1985. The Air Force decision to procure a single fleet of Gulfstream G III aircraft was made after a thorough life-cycle cost analysis of both foreign and domestic aircraft which were offered for the competition. The competition was conducted under standard guidelines established for procurement of "off-the-shelf", commercially available aircraft.

Limitation on amount that may be made available from the revolving and management funds for fiscal year 1984

Section 119 of the Senate bill was intended to place a limit on the revolving funds of $2,519,166,600 in fiscal year 1984.

The House amendment contained no similar provision.

The conferees recognized the significant growth in the request for direct appropriations to the revolving funds in fiscal year 1984 over the amount appropriated for fiscal year 1983. Given current budget constraints, the conferees agreed that such growth could not be fully justified, and they further agreed to recommend to the Appropriation Committees a reduction of approximately ten percent, or $280 million, from the total fiscal year 1984 request for the revolving funds. However, technical problems related to the scope of the conference prevented the inclusion of language proposed by the Senate.

The Senate recedes.

Limitation on contracting out at the service academies

Section 406 of the House amendment would prohibit the expenditure of any operation and maintenance funding authorized by this Act for management reviews and cost comparisons under the provisions of Office of Management and Budget Circular A–76 involving the possible contracting out the functions at the three service academies.

The Senate bill contained no similar provision.

The House recedes.

Loans to certain school districts in San Antonio, Texas

Section 407 of the House amendment would authorize the Secretaries of the Army and Air Force to make loans from their respective operation and maintenance accounts to three school districts in San Antonio, Texas. Furthermore, such loans would be forgiven (including interest) to the extent that the amount of impact aid provided in fiscal year 1984 is less than the amount of impact aid to which the school districts would be entitled but for the Omnibus Budget Reconciliation Act of 1981.

The Senate bill contained no similar provision.

The House recedes.

TITLE IV—ACTIVE FORCES

Active duty military strengths for the Army, Navy, Marine Corps and Air Force in the Senate bill and the House amendment differed by a total of 17,274. The conference agreement, which was 28,800 below the Administration request, is summarized in the following table:

	Administration request	House	Senate	Conference
Army	782,600	778,000	780,459	780,000
Navy	572,200	560,300	565,782	564,800
Marine Corps	197,300	194,600	196,872	196,600
Air Force	612,600	592,500	599,561	594,500
Total	2,164,700	2,125,400	2,142,674	2,135,900

The House conferees, in denying proposed active force increases for fiscal year 1984, were intent on ensuring that the military service make greater utilization of the reserve components. The Senate conferees concurred with the House conferees' concerns but were unwilling to freeze active force strengths.

Providing active force increases of more than 10,000, the conferees agreed that some increase was appropriate for fiscal year 1984. The conferees also determined that, while the Navy has shown the least initiative and commitment in the use of its reserve forces, it was also the service that offered the most justification for an end strength increase, due primarily to the large number of vessels to be commissioned in fiscal year 1984. The conferees believe that to deny any increase to the Navy could result in "punishing" innocent sailors who would be required to perform additional sea duty, even though the conferees believe that other missions or redefinition of existing missions, at least in the long run, could minimize the impact. On the other hand, the conferees decided that to exempt the Navy alone from the freeze on end strengths would send the wrong message.

The conferees place the four services on notice that fiscal year 1984 is the final year in which the conferees are prepared to rely on statement of managers language for conveying their concerns that the Guard and Reserves have a greater role in the defense program of this Nation.

Beginning with the fiscal year 1985 authorization process, the services are directed to provide the Armed Services Committees of the Senate and House of Representatives with an annual report outlining in detail what changes will be accomplished in that fiscal year to provide the Guard and Reserve with: new missions; more modern equipment; and greater integration with the active forces in keeping with the Total Force concept.

The conferees also place the services on notice that the report accompanying the fiscal year 1985 authorization request and the degree to which there is evidence that more is being accomplished in the utilization of reserves will be key elements in the consideration of end strengths for fiscal year 1985—particularly in the Navy. The conferees are fully prepared to deny further

active duty personnel strength increases if the services fail to comply with this direction.

Extension of authority for the temporary promotion of certain Navy lieutenants (sec. 403)

Under current law certain Navy lieutenants who possess skills for which there is critical shortage and who are serving in a position designated to be held by a lieutenant commander may be promoted to the grade of lieutenant commander. Authority to make these promotions outside of the contraints of law governing the normal promotion of naval officers expires on September 30, 1983.

The Senate bill contained a provision (sec. 123) that would extend this authority for one year until September 30, 1984.

The House amendment contained no similar provision.

The conferees agreed that critical shortages of this nature should be solved utilizing management policies other than early promotion and that the Navy should investigate such policies as an alternative to further extension of this authority. For the near term, however, the conferees agreed to extend this authority for one year.

The House recedes with an amendment.

Limit on funds for PCS travel during fiscal year 1984 (sec. 404)

The Senate bill contained a provision (sec. 180B) that would proscribe the payment of temporary lodging expenses to military personnel occupying temporary quarters incident to a permanent change of station move pursuant to section 404(a) of title 37, United States Code, during fiscal year 1984. The Senate bill contained no other limitation on the availability of funds for permanent change of station travel.

The House amendment contained a provision (sec. 503) that would limit the cost of permanent change of station travel during fiscal year 1984 to no more than $2,585,626,000. The House amendment also directed the Secretary of Defense to take the steps necessary, consistent with military readiness, to reduce the number of permanent change of station moves by military personnel.

The Senate recedes with an amendment making the guidance to the Secretary to Defense to reduce the number of change of station moves permissive.

It is the conferees' intent that the payment for temporary lodging expenses not be funded in fiscal year 1984. Even with the dollar limitation on funds for fiscal year 1984, the conferees' action would not preclude reprogramming from existing funds into the permanent change of station account if inflation is higher than anticipated or world events mandate such action. However, authority to exceed the dollar limitation on funds for permanent change of station travel by reprogramming existing funds would not encompass exceeding the specified amount in a supplemental appropriation request.

Prohibition on assigning troops to overthrow the Government of Nicaragua

The House amendment contained a provision (sec. 506) requiring that no personnel authorized by Title V (Active Forces) be assigned to the mission of overthrowing the government of Nicaragua.

The Senate bill contained no similar provision.

The provision in section 506 of the House amendment was considered carefully by the conferees and judged by many to be of merit. Nevertheless, it was the sense of the conferees that this provision represents an important foreign policy issue that ought to be introduced as a free-standing resolution and referred to the Committees on Foreign Affairs and Foreign Relations of the House of Representatives and Senate respectively.

The House recedes.

TITLE V—RESERVE FORCES

The average strength for the Army National Guard and the Army Reserve in the Senate bill and the House amendment differed by a total of 3,600. The Senate bill recommended a strength 3,000 above the House amendment for the Army Reserve, while the House amendment proposed a strength level 600 above that of the Senate bill for the Army National Guard. There was no disagreement on the average strength for any other reserve component.

The conference agreement, which was 9,600 above the Administration request, is summarized in the following table:

	Administration request	House	Senate	Conference
Army National Guard	418,400	425,000	424,400	425,000
Army Reserve	270,700	270,700	273,700	273,700
Naval Reserve	112,600	112,600	112,600	112,600
Marine Corps Reserve	40,300	40,300	40,300	40,300
Air National Guard	103,400	103,400	103,400	103,400
Air Force Reserve	68,600	68,600	68,600	68,600
Coast Guard Reserve	12,000	12,000	12,000	12,000
Total	1,026,000	1,032,400	1,035,000	1,035,600

Full-Time Support

The Senate bill recommended an overall reduction of 5,275 in the number of full-time support personnel requested for the reserve components by the Administration. The House amendment recommended full-time strength levels identical to that requested for each of the components except the Army National Guard for which an increase of 864 was provided.

The conference agreement, which was 1,186 below the Administration request, is summarized in the following table:

	Administration request	House	Senate	Conference
Army National Guard	18,630	19,494		18,194
Army Reserve	10,664	10,664		9,914
Naval Reserve	13,846	13,846		13,846
Marine Corps Reserve	801	801		801
Air National Guard	5,915	5,915		5,915
Air Force Reserve	517	517		517
Total	50,373	51,237	45,098	49,187

The conference agreement involved reductions from the House levels of 1,300 and 750 in the Army National Guard and the Army Reserve, respectively, to reflect the conferees' concern over the management of the program in these components.

Both the General Accounting Office and the Surveys and Investigations staff of the House Appropriations Committee have recently criticized the Army's implementation of the full-time manning program and have cited a number of management deficiencies. The slight slowing of the growth in this program which results from the conferees' agreed reduction in the Administration request should permit these deficiencies to be fully addressed.

Increase in the number of certain personnel authorized to be on active duty in support of the reserve components (sec. 503)

The Senate bill contained a provision (sec. 133) that would increase the number of field grade officers and the number of enlisted personnel in the pay grades E-8 and E-9 in all services authorized to serve on full-time active duty in support of reserve components.

The House amendment contained a provision (sec. 603) that would increase the number of field grade officers in the Army and Marine Corps authorized to serve on active duty in full-time support of reserve components.

The House recedes.

Clarification of the status of certain members of the National Guard serving in a full-time status (sec. 504)

The House amendment contained several provisions (sec. 602, 604, and 605) intended to clarify that full-time support personnel assigned to the National Guard are under the control of state National Guard authorities rather than the Federal government.

The Senate bill contained no similar provision.

The Senate recedes.

TITLE VI—CIVILIAN PERSONNEL

The Department of Defense requested an end strength of 1,072,174 for civilian personnel.

The Senate bill would authorize an end strength of 1,054,555 with a specific provision that 400 of these personnel would be full-time auditors in the Defense Contract Audit Agency.

The House amendment would authorize an end strength of 1,067,374.

The conferees agreed to provide an authorization for civilian personnel in the Department of Defense of 1,056,200.

The conferees expect that the Secretary Defense shall provide during fiscal year 1984 400 auditors in the Defense Contract Audit Agency and 1,000 personnel in the Naval Supply System in addition to those personnel requested by the President for these two activities. The conferees expect that these additional positions would result from the Secretary's use of his authority to exceed the civilian personnel ceiling and the reallocation of positions out of headquarters staffs as directed by section 1214 of this Act.

The House amendment (sec. 702) provided that civilian personnel employed at industrially-funded activities would not count against the end strength for fiscal year 1983. The Senate bill (sec. 141(a)(2) and (3)) provided that civilian personnel employed at industrially-funded activities in excess of the levels employed in the activities on September 30, 1982, would not count against the fiscal year 1983 and 1984 ceilings.

The conferees agreed to exclude civilians at industrially-funded activities for fiscal year 1983 only but intend to review this matter carefully during hearings on manpower requests for fiscal year 1985. Because the fiscal year 1984 civilian ceiling is effective only on September 30, 1984, the conferees intend to review the results of the ongoing test of operating industrially-funded activities without personnel ceilings in time to permit a decision on the continued validity of using civilian ceilings for fiscal year 1984. Managers of Department of Defense industrially-funded activities will be expected to continue operating as if there were no civilian ceiling until the Congress takes final action on this matter.

TITLE VII—MILITARY TRAINING STUDENT LOADS

Extension of reduction in number of students required to be in a unit of the Junior Reserve Officers' Training Corps unit (sec. 702)

The House amendment contained a provision (sec. 802) that would extend until August 31, 1984, the provision that permits a Junior Reserve Officers' Training Corps (JROTC) unit to be maintained with a minimum enrollment of 100 students or 10 percent of the students enrolled at the institution who are at least 14 years of age, whichever is less.

The Senate bill contained no similar provision.

The Senate recedes.

TITLE VIII—CIVIL DEFENSE

The President's budget request included $253.5 million for civil defense. The House amendment (sec. 901) would provide $200.0 million. The Senate bill (sec. 161) would authorize $161.497 million.

The conferees agreed to authorize $169.0 million

Both the Senate bill and the House amendment would increase from $47 million to $54 million the appropriations ceiling for emergency management assistance contributions that may be provided during fiscal year 1984 to the states for personnel and administrative expenses associated with civil defense.

TITLE IX—MILITARY COMPENSATION AND HEALTH CARE MATTERS

PART A—PAY AND ALLOWANCES

Pay increase of 4 percent for members of the uniformed services (sec. 901)

The Senate bill contained a provision (sec. 171) that would increase basic pay and allowances for personnel serving in pay grade E-5 by 6 percent; for personnel serving in pay grade E-6 by 5 percent; and for all other personnel by 4 percent except personnel serving in pay grade E-1 with less than 4 months of active duty who would receive no increase. The increase would be effective April 1, 1984, unless pay for general schedule employees were increased at an earlier date, in which case the increase in military pay would be effective at that earlier time.

The House amendment contained a provision (sec. 1001) that would increase basic pay and allowances for all uniformed services personnel, except personnel serving in pay grades E-1 and E-2, by 4 percent effective January 1, 1984.

The House recedes with an amendment limiting the increase for personnel in pay grades E-5 and E-6 to 4 percent.

Adjustment in basic pay of certain officers with prior enlisted and warrant officer service (sec. 902)

The House amendment contained a provision (sec. 1002) that would clarify that commissioned officers with either over 4 years of prior warrant officer service or over 4 years of combined warrant officer and enlisted service would be eligible to use that section of the basic pay table for a commissioned officer with more than 4 years of enlisted service.

The Senate bill contained no similar provision.

The Senate recedes.

Hazardous duty pay for certain toxic fuel handlers (sec. 903)

Current law authorizes payment of hazardous duty pay to service members who handle toxic fuel in conjunction with aircraft and missile systems.

The House amendment contained a provision (sec. 1003) that would extend authority to pay hazardous duty pay to individuals who handle toxic fuel in conjunction with components of aircraft and missile systems.

The Senate bill contained no similar provision.

The Senate recedes.

Extension of special pay for certain aviation career officers (sec. 904)

The Senate bill contained a provision (sec. 173) that would reinstate, for one year, the authority to pay the aviation officer career bonus to aviators in the Navy and Marine Corps. The current authority to pay this bonus expired on September 30, 1982. The Senate bill would place additional restrictions on the amount of the bonuses. Payments would be limited to $4,000 or less per year for an agreement to serve for three years and to $6,000 per year for an agreement to serve for four years or six years. Eligibility for the bonus would be limited to aviators with at least six but less than eleven years of active duty.

The Senate bill would also express the sense of Congress that the bonuses should only be paid to officers likely to be induced to remain on active duty by payment of the bonus, and it would require a report from the Secretary of the Navy regarding the effectiveness of the bonus.

The House amendment contained no similar provision.

The House recedes with an amendment limiting the eligibility for the bonus to pilots. Although the naval flight officers are critical to the operation of Navy and Marine Corps aircraft, the conferees authorized the bonus only for the purpose of reducing critical shortfalls in manning. A substantial shortage exists for pilots, but the conferees agree that a similar shortage presently does not exist for naval flight officers. Therefore, it is appropriate to limit the use of the aviation officer career bonus in fiscal year 1984 to address only the shortage of Navy and Marine Corps pilots.

The conferees direct that the Department of the Navy implement this program in such a manner as to ensure that the recipient of a bonus serve at least half of the period of the agreement in an aviation-related billet.

Hostile fire pay for members serving in areas threatening imminent danger (sec. 905)

The House amendment contained a provision (sec. 1009) that would redefine the special pay provided for exposure to hostile fire as hostile fire/imminent danger pay. In addition to the current statutory criteria, hostile fire/imminent danger pay could be paid if the service member were on duty in a foreign area in which he was subject to the threat of physical harm or imminent danger on the basis of civil insurrection, civil war, terrorism, or wartime conditions.

The Senate bill contained no similar provision.

The Senate recedes.

Clarification of rules for payment of per diem (sec. 908)

The House amendment contained a provision (sec. 1007) that would clarify that nonprior service enlistees in initial training receive only basic allowance for subsistence and the subsistence portion of per diem while in an actual travel status.

The Senate bill contained no similar provision.

The Senate recedes.

Clarification of allowance for transportation of motor vehicle (sec. 909)

The Senate bill contained a provision (sec. 175) that would clarify that an allowance for transportation of a motor vehicle would be paid from a duty station to or from the most cost-effective port of embarkation or debarkation.

The House amendment contained no similar provision.

The House recedes.

Transportation for dependent children attending school in the United States when the member-parent is stationed overseas (sec. 910)

The House amendment contained a provision (sec. 1008) that would authorize one government-funded round-trip each year for the student dependents of military personnel stationed overseas to enable those dependents to attend secondary or undergraduate school in the continental United States.

The Senate bill contained a similar provision (sec. 180A), except that this travel benefit would not be authorized for secondary school attendance if there were a Department of Defense Dependent's School in the vicinity of the military member's duty station.

The House receded.

Clarification of eligibility for separation pay (sec. 911)

Current law authorizes payment of separation pay to officers who are involuntarily separated after at least 5 years of active duty.

The House amendment contained a provision (sec. 1004) that would restrict authorization of separation pay to officers not on the active duty list who are involuntarily separated only if they have at least 5 years of continuous active duty.

The Senate bill contained no similar provision.

The Senate recedes.

Reimbursements for accommodations in place of quarters (sec. 912)

The Senate bill contained a provision (sec. 178) that would reinstate for one year the authority to pay amounts similar to basic allowance for quarters to naval personnel deprived of shipboard quarters. The Senate bill would limit the amount authorized for such purposes to $1.3 million during fiscal year 1984.

The House amendment contained no similar provision.

The House recedes.

Advance payment for travel and transportation allowances for escorts and attendants of dependents (sec. 913)

The Senate bill contained a provision (sec. 179) that would authorize the advance payment of travel and transportation benefits for escorts and attendants of dependents. Currently, advance payment for travel can not be made unless specifically authorized in law.

The House amendment contained no similar provision.

The House recedes.

Active duty pay adjustment mechanism

Under current law, military pay is adjusted at the same time and by the same percentage as pay for civil service employees covered by the general schedule. The general schedule is increased based on a survey of private sector wages.

The Senate bill contained a provision (sec. 172) that would provide an annual pay ad-

justment mechanism applying only to military pay. Under this mechanism, the Secretary of Defense would recommend increases based on the Employment Cost Index—a broad based survey of jobs in the private sector similar to many found in the military.

The original Senate bill provision represented an Administration request to permit the President to submit an alternate pay raise recommendation that would have become effective unless disapproved by either House of Congress. However, the validity of the alternate pay recommendation-legislative veto system was thrown into doubt by a recent Supreme Court decision (*Immigration and Naturalization Service* v. *Chadha*). The Senate bill provision was modified in the light of this decision to delete the President's authority to submit an alternate pay recommendation. The Department of Defense then urged the conferees not to adopt the modified Senate bill provision.

The House amendment contained no similar provision.

The Senate recedes.

PART B—RETIRED PAY MATTERS

Limitation on applicability of one-year look-back provision (sec. 921)

Current law provides an option for the retired service member in computing his retired pay. The retired service member may compute his retired pay based on the pay scales in effect on the date of his retirement. Or, if it is larger, the retired service member may compute his retired pay based on the pay scales in effect one year prior to the date of retirement and then increase that retired pay by any intervening cost-of-living adjustment.

The Senate bill contained a provision (sec. 176) that would repeal the one-year look-back provision. The provision would continue for 3 years the application of the one-year look-back provision for members eligible to retire on the date of enactment of the provision. It would further guarantee members who retire after the 3-year period an amount no less than they could have received had they retired on the last day of the 3-year period.

The House amendment contained no similar provision.

The House recedes.

Rounding of retired pay and survivor annuities to next lowest whole dollar amount (sec. 922)

The Senate bill contained a provision (sec. 177) that would round monthly retired pay and survivor annuities to the next lowest whole dollar amount at the time of the original calculation of the payment and upon subsequent adjustment.

The House amendment contained no similar provision.

The House recedes.

Termination of 6-month rounding rule for computing retired pay (sec. 923)

Under current law, members with fractional years of service may round their years of service to the next highest whole year when computing their retirement multiplier if they have 6 months or more. Members with less than 6 months must round down to the next lowest whole year. Limitations on appropriations in recent years have required those members with more than 6 months to round to the next lowest whole month; members with less than 6 months were unaffected.

The House amendment contained a provision (sec. 1013) that would authorize rounding to the next lowest whole month in determining years of service for the purpose of computing retired pay for all members.

The Senate bill contained no similar provision.

The Senate recedes.

Retired pay for certain otherwise ineligible Reservists (sec. 924)

Currently, individuals who served in the reserves prior to August 16, 1945, but who did not serve on active duty during World War I or World War II or on active duty (other than for training) during the Korean War are not eligible for reserve retirement benefits at age 60, even though they may complete 20 years of otherwise satisfactory service.

The House amendment contained a provision (sec. 1014) that would extend reserve retirement benefits to individuals who were in the reserves prior to 1945 but who did not serve on active duty during World War I or World War II or on active duty (other than for training) during the Korean War, if they had served on active duty (other than for training) during the Berlin or Cuban missile crisis or during Vietnam.

The Senate bill contained no similar provision.

The conferees agree that the provision in the House amendment is a fair solution to the issue and that further easing of the restriction would be unwarranted.

The Senate recedes.

Accrual funding for military retirement system (sec. 925)

The House amendment contained a provision (sec. 1053) that would establish a military retirement fund and provide for accural accounting as the method for funding military retired pay and survivor benefits in the future.

The Senate bill contained no similar provision.

The Senate recedes.

Permament delay in cost-of-living adjustments for military retired pay

Under current law, cost-of-living adjustments occur annually for military and civil service retired pay. These adjustments are scheduled for May 1984, June 1985, and March in every year thereafter.

The House amendment contained a provision (sec. 1011) that would permanently change the timing of the adjustment for military retirees until November of each year. This change in the adjustment for military retired pay would be contingent on a similar adjustment being enacted for civil service retired pay.

The Senate bill contained no similar provision.

The conferees noted that the direction contained in the First Concurrent Resolution on the Budget for fiscal year 1984 would suggest a permanent change in the timing of the adjustment to January of each year. Because under current law military retired pay is adjusted at the same time and by the same percentage as civil service retired pay, the conferees believe that any change should occur as part of the reconciliation process for both systems.

The House recedes.

Military retired pay cost-of-living adjustments for persons under age 62 in fiscal year 1986

The House amendment contained a provision (sec. 1012) that would extend for one additional year the provision in the Omnibus Reconciliation Act of 1982 limiting the increase in retired pay for military retirees who are under age 62 to only half of the cost-of-living adjustment. This provision would be contingent on enactment of a similar provision for civil service employees.

The Senate bill contained no similar provision.

The House recedes.

PART C—HEALTH CARE MATTERS

CHAMPUS provisions (sec. 931)

The House amendment contained a provision (sec. 1031) that would limit cost growth in the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS). First, CHAMPUS would be authorized to utilize Medicare payment procedures. Second, CHAMPUS would be secondary payor after all other insurance coverage, except Medicaid, for both active duty dependents and retirees. Finally, inpatient psychiatric would be limited to a maximum of 60 days, although a waiver of this restriction would be permitted for extraordinary medical or psychological circumstances.

The Senate bill contained no similar provision.

The Senate recedes.

The Senate bill contained a provision (sec. 190A) that would authorize payments under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) for liver transplant operations performed on dependents under age 18 of active duty military personnel. Hospitals performing liver transplant operations would be approved by the Secretary of Defense based upon demonstrated survival rates and demonstrated abilities to perform the operation, after consultation with the Secretary of Health and Human Services and other appropriate parties.

The House amendment contained a similar provision (sec. 1031), except that the House provision would not restrict payments to operations performed on dependents under age 18 and would leave the determination of the approriateness of patient and health care facility selection to the Secretary of Defense in consultation with the Secretary of Health and Human Services and such other entities as the secretary considers appropriate. Further, the provision in the House amendment would authorize CHAMPUS payment for liver transplants performed on or after July 1, 1983.

The Senate recedes.

Authority for increased usage of contract health care providers (sec. 932)

Under current law, civilian physicians may be contracted to provide non-personal services in military medical facilities. The authority to award these contracts exists for the Army and the Air Force, but not for the Navy. The maximum rate of pay for a contract surgeon is limited to the pay of an Army or Air Force captain with over four years of service.

The Senate bill contained a provision (sec. 183) that would authorize all of the military services to contract with physicians and other civilian direct health care providers for needed health care services on both a personal and non-personal services contract basis.

The Senate provision would further increase the maximum pay to that of a colonel or Navy captain with over 26 years of service.

The House amendment contained a similar provision (sec. 1032), except that the House provision would apply to contracts for the services of physicians only and not to other health care providers.

The House recedes.

The conferees intend that the military services strictly adhere to the direction in the Senate report that the maximum allowable salary be used sparingly and that the services develop regulations to ensure that the salaries provided for a particular type of service are based on objective criteria and are not susceptible to individual favoritism.

Studies and demonstration projects relating to health and medical care (sec. 933)

The Senate bill contained a provision (sec. 190(a)) that would direct the Secretary of Defense to conduct studies and demonstration projects on ways to improve the quality, efficiency, convenience, and cost effectiveness of military medical care, including dental care services. The studies and demonstration projects could address alternative payment methods, cost-sharing by beneficiaries, methods to encourage efficient and economical health care, innovative approaches to health care delivery and financing, and alternative approaches to reimbursement for administrative charges.

In addition, the provision in the Senate bill would specifically require a study, but not a demonstration project, of alternative approaches to providing dental care to active duty dependents.

The House amendment contained a similar provision (sec. 1033) except that the House provision did not mandate a study of dental care for dependents.

The House recedes with an amendment adding the prepayment for medical care services for a defined beneficiary population (a provision of the House amendment) as an additional topic that may be included in the studies and demonstration projects.

The conferees direct that the first report on the results of these studies and demonstration projects be submitted to Congress by March 1, 1984.

Medical malpractice protection for health care personnel of the Soldiers' and Airmen's Home (sec. 934)

The House amendment contained a provision (sec. 1034) that would provide that suits for medical malpractice arising from acts or omissions of health care personnel at the U.S. Soldiers' and Airmen's Home would have the United States as the sole party defendant.

The Senate bill contained no similar provision.

The Senate recedes.

Adjustments in stipends paid to recipients of Armed Forces Health Professions Scholarships (sec. 935)

Under current law, stipends received by participants in the Health Professions Scholarship program are increased at the same time and by the same amount as the stipends for participants under a similar Public Health Service program. As a result of a restriction on appropriated funds for the stipend in the Public Health Service Program in fiscal year 1983, the Department of Defense expressed concern that a similar limitation on the stipend of the Health Professions Scholarship program might also be imposed.

The House amendment contained a provision (sec. 1035) that would sever the link between these two programs and provide for a separate annual adjustment in the Health Professions Scholarship program stipend each year.

The Senate bill contained no similar provision.

The Senate recedes.

PART D—SURVIVOR BENEFITS

Clarification of survivor benefits coverage for former spouses (sec. 941)

The House amendment contained a provision (sec. 1041) that would clarify the authority for a retired service member to designate a Survivor Benefit Plan annuity for a former spouse in accordance with the Uniformed Services Former Spouses' Protection Act, Title X of Public Law 97-252.

The Provision in the House bill would clarify that an individual retired prior to the enactment of the Former Spouses' Protection Act could now elect to designate a former spouse to receive a Survivor Benefit Plan annuity, so long as the retiree had opted to participate in the Survivor benefit Plan at the time of retirement. Also, individuals retired since the passage of that Act could opt to switch their current designation to a former spouse.

Further, direct payment for court-ordered child support or alimony would be permitted, regardless of whether the court order specified that such payment be made from retired pay. The requirement that the court order specify payment from retired pay would be maintained, however, in the case of division of property.

The Senate bill contained a similar provision (sec. 1017), except the Senate bill would not remove the current restriction that the court order specify payment from retired pay in the case of child support, alimony, and community property.

The Senate recedes with an amendment making two clarifying changes to the Survivor Benefit Plan provisions and striking the portion of the House provision that would have removed the restriction that the court order specify payment from retired pay in all cases.

Extension of minimum income provision for certain widows (sec. 942)

When the Survivor Benefit Plan was enacted in 1972, a provision was included that would afford minimal payments to widows of members who died prior to the enactment of the legislation or before the end of the one-year open enrollment period. The open enrollment period was subsequently extended for 6 months; however, eligibility for the minimum income widows' program was not extended to individuals who became widows during the 6 month period.

The House amendment contained a provision (sec. 1042) that would extend coverage under the minimum income widows' program to survivors who were widowed during the 6 month extension.

The Senate bill contained no similar provision.

The Senate recedes.

Clarification of continuing responsibility for funding of certain survivors' benefits (sec. 943)

Section 156 of Public Law 97-377, the Continuing Appropriation Resolution for fiscal year 1983, provided for the payment from Department of Defense funds of benefits comparable to the social security mother's and student benefits modified by the Omnibus Reconciliation Act of 1981, Public Law 97-35. These benefits are payable to the surviving families of military personnel who died while on active duty or later as a result of a service-connected disability.

The Senate bill contained a provision (sec. 1018) that would clarify that these benefits would continue to be paid from Department of Defense funds in fiscal year 1984 and future years.

The House amendment contained no similar provision.

The House recedes.

Survivor benefit annuity for widows of reservists

The House amendment contained a provision (sec. 1043) that would provide a Survivor Benefit Plan annuity to the surviving spouse and dependent children of reservists who died between September 21, 1972, and September 30, 1978, and who had completed 20 years of service but were not yet age 60 at the time of death.

The Senate bill contained no similar provision.

The House recedes.

TITLE X—MILITARY PERSONNEL MATTERS

PART A—OFFICER PERSONNEL MANAGEMENT AND TRAINING

Temporary modification in certain general and flag officer grade limitations (sec. 1001)

Currently the total number of flag and general officers is limited to 1073. The Senate bill contained a provision (sec. 181) that would increase the total number to 1100. The Senate bill would also specify that, of the total increase, the Navy would be allocated 7 and the Marine Corps 2. This increase for the Navy would be one additional flag officer over that which it would have received under a pro rata distribution. The Senate conferees indicated that the intent of the distribution was to allow the appointment of the senior military officer currently assigned to the Central Intelligence Agency to the grade of vice admiral in view of his position as Director of the Intelligence Community Staff. The Senate bill also would extend for one year the authority for the Navy to exceed by 3 the number of vice admirals allowed under current law.

The House amendment contained a provision (sec. 1055) that would authorize the appointment of the senior military officer assigned to the Central Intelligence Agency as a vice admiral and exclude him from accountability until the next vacancy in vice admirals occurred in the Navy.

The conferees agreed to extend for one year the authority for the Navy to exceed by 3 the number of vice admirals allowed under current law. The conferees also agreed to provide a similar exemption that would authorize the Air Force the same number of individuals in the grade of general (O-10) as under the Senate bill.

Finally, the conferees adopted a provision that would exempt from grade accountability a commissioned officer serving as Director of the Intelligence Community Staff, except that, at any one time, not more than one commissioned officer serving as Director or Deputy Director of Central Intelligence or Director of the Intelligence Community Staff shall be exempt from the numbers and percentages of commissioned officers of the rank and grade authorized for the military service of which he is a member. Both the Senate bill and the House amendment would result in the Director of the Intelligence Community Staff being appointed to the grade of vice admiral during fiscal year 1984. The conferees would prefer to make this expanded exemption a permanent provision of law. However, such a change would probably the considered to be outside of the scope of the conference. The conferees, therefore, recommend a one year authority and agree to support a permanent change at the earliest opportunity.

The House recedes with an amendment.

Performance of civil functions by military officers (sec. 1002)

The Senate bill contained a provision (sec. 187) that would clarify the limitation on performance of civil functions by commissioned officers contained in section 973 of title 10, United States Code.

The House amendment contained a similar provision (sec. 1123).

The Senate recedes.

The clarification was necessary to permit military personnel assigned to Judge Advocate General's Corps duties to continue assisting attorneys in the Department of Justice with cases related to military installations and other military matters. The clarification is not intended to encourae substitution of military officers for civilian personnel in areas unrelated to the military.

The Senate bill also contained a provision (sec. 1019) that would exempt an officer of the armed forces from the prohibition of section 973(b), title 10, United States Code, against holding civil office so that such an officer could serve as a member, including chairman, of the Red River Compact Commission, established by Public Law 96-564.

The House amendment contained no similar provision.

The House recedes.

Modification in ROTC scholarship program (sec. 1003)

The House amendment contained a provision (sec. 1021) that would make several modifications to the Reserve Officers' Training Corps (ROTC) scholarship program. The provision would authorize payment of tuition assistance and the subsistence allowance to ROTC scholarship participants during the fifth year if additional academic credits were necessary to complete the requirements for a baccalaureate degree. An additional active duty obligation would be required in exchange for this additional financial assistance. The provision would also authorize the Secretaries of the military departments to require repayment of financial assistance, plus interest, by participants who fail to complete the program and who are not ordered to active duty. Further, the provision would authorize an additional option for fulfilling the service obligation acquired as a result of participation in the scholarship program: 2 years on active duty plus 4 years in the Selected Reserve.

The Senate bill contained no similar provision.

The Senate recedes.

Selection of persons from foreign countries to receive instruction at the service academies (sec. 1004)

The Senate bill contained a provision (sec. 152) that would allow the service Secretaries to accept applicants to the service academies from all nations and not just those currently listed by name in law. The provision also would increase the maximum number of foreign nationals who may be enrolled in each academy at any one time from 24 to 40.

The House amendment contained no similar provision.

The House recedes.

Nominations to the service academies from Guam and former Canal Zone area (sec. 1005)

The House amendment contained a provision (sec. 1023) that would authorize the Delegate in Congress from American Samoa to nominate one individual to each service academy. Currently, the Governor of American Samoa may nominate such individuals. In addition, the House amendment would effect changes in the statute related to academy nominations from the Panama Canal to reflect the change in the title of the governing authority.

The Senate bill contained no similar provisions.

The Senate recedes.

Appointment of citizens of Northern Mariana Islands as commissioned officers (sec. 1006)

The House amendment contained a provision (sec. 1024) that would authorize the appointment of citizens of the Northern Mariana Islands as commissioned officers, as participants in the Senior Reserve Officers' Training Corps program, and as participants in the Armed Forces Health Professions Scholarship Program.

The Senate bill contained no similar provision.

The Senate recedes.

Transfer of Public Health Service officers to other uniformed services (sec. 1007)

The Senate bill contained a provision (sec. 184) that would authorize the transfer of officers from the Public Health Service to the other uniformed services and would allow service in the Public Health Service to be credited for the purposes of determining grade at appointment, separation pay and retirement.

The House amendment contained a similar provision (sec. 1022) that would clarify that the crediting of service with the Public Health Service would apply to individuals regardless of the date of their transfer.

The Senate recedes.

Waiver of age requirement for appointment as commissioned officers

Current law requires that an individual must be able to complete 20 years of commissioned service by age 55 in order to be appointed as a regular officer.

The Senate bill contained a provision (sec. 186) that would authorize the Secretary of a military department to waive the age restriction. Such a waiver could only be made for exceptional or unusual circumstances and because the skill of the individual was needed by the military service.

The House amendment contained no similar provision.

The Senate recedes.

Constructive service credit for certain Navy doctors and dentists

The Senate bill contained a provision (sec. 189) that would direct the Secretary of the Navy to convene boards to review the records of Navy medical and dental officers and grant constructive service credit for prior service and professional experience to the extent that such credit had been granted to similarly situated officers in the Army and Air Force.

The House amendment contained no similar provision.

The Senate recedes.

A study by the Department of Defense of the service records of a representative sample of Navy medical and dental officers in comparison to the service records of a similar group of Army and Air Force medical and dental officers indicates that there was not an inequity with respect to those Navy officers appointed prior to September 11, 1979.

The conferees recognize that different procedures were followed by the services in awarding constructive credit to various groups of officers prior to the enactment of Public Law 96-513, the Defense Officer Personnel Management Act (DOPMA). The conferees want to ensure that DOPMA solved this problem. The Secretary of Defense is, therefore, directed to review the implementation of DOPMA to determine whether constructive credit is being applied equitably by the services and to report to the Committees on Armed Services of the Senate and the House of Representatives by January 15, 1984, on the implementation methodology and any administrative or legislative changes that may be required to ensure uniform application.

PART B—RESERVE COMPONENT MANAGEMENT

Bonuses for enlistments, reenlistments, and extensions of service in elements of the Ready Reserve other than the Selected Reserve (sec. 1011)

The Senate bill contained a provision (sec. 134) that would authorize enlistment and reenlistment bonuses for members of the Individual Ready Reserve during fiscal years 1984 and 1985. The maximum enlistment bonus would be limited to $1,000 for a direct enlistment in combat or combat support skills. The reenlistment bonus would be limited to $900 for an reelistment in combat or combat support skills.

The House amendment contains no similar provision.

The House recedes with an amendment that would limit the amount authorized for such bonuses to $12 million during fiscal year 1984.

Extension of medical and dental care for reservists (sec. 1012)

The Senate bill contained a provision (sec. 136) that would authorize medical and dental coverage under the military health care system for injury incurred or aggravated while the reservist was traveling to or from inactive duty for training.

The House amendment contains no similar provision.

The House recedes with an amendment to exclude coverage in the case of gross negligence or member misconduct.

The conferees emphasize that in administering this authority the Department of Defense issue regulations that ensure that eligibility for coverage is restricted to those instances where the travel is limited to the most direct route and is clearly related to the requirement for training.

Test program on limited use of commissary stores by members of the Selected Reserve (sec. 1013)

Section 1020 of the Senate bill would direct the Department of Defense to conduct a test program in one or more areas of the United States in which Selected Reservists would be allowed, at their convenience, up to 14 commissary visits each year. Selected Reservists would earn one commissary visit for every day of active duty for training they perform. Reservists would then be eligible to use commissaries in the same manner they use exchanges. Results of the test would be provided to the Armed Services Committees of the Senate and House of Representatives by June 1, 1984.

The House amendment included no similar provision.

The House recedes with an amendment changing the reporting date to September 30, 1984.

Grade determination for persons receiving original appointments as reserve medical officers of the Army and Air Force (sec. 1014)

Current law authorizes the appointment of physicians in the reserve components of the Army or the Air Force in the grade of captain if they have at least seven years of service credit. Generally speaking, such individuals only receive four years of constructive credit and, therefore, must be appointed in the grade of first lieutenant.

The Senate bill contained a provision (sec. 140D) that would authorize the initial appointment of Army and Air Force reserve medical officers with less than seven years of service credit in the grade of captain.

The House amendment contained no similar provision.

The House recedes with an amendment limiting the authority to two years.

The conferees noted that the Department of Defense is presently considering a legislative proposal to substantially revise and restructure the reserve officer personnel management system. The conferees intend that this provision be further reviewed during Congressional deliberations on the Reserve Officer Personnel Management Act, when submitted to Congress, and consequently, recommended only two-year authority.

Promotion of certain Reserve officers serving on active duty (sec. 1015)

Under current law, an Army Reserve officer serving for a short tour on active duty may not accept a promotion to a higher grade received under the reserve promotion system.

The Senate bill contained a provision (sec. 140A) that would authorize Army Reserve officers who are serving on active duty to accept such a promotion.

The House amendment contained no similar provision.

The House recedes with an amendment limiting the authority under the provision to two years.

The conferees noted that the Department of Defense is presently considering a legislative proposal to substantially revise and restructure the reserve officer personnel managment system. The conferees intend that this provision be further reviewed during Congressional deliberations on the Reserve Officer Personnel Management Act, when submitted to Congress, and, consequently, recommended only two-year temporary authority.

The conferees further intend that the authority provided only apply in those circumstances where the pay grade of the position in which the individual is serving on active duty is equal to or greater than the pay grade to which the individual would be promoted.

Determining years of service for transfer to the retired reserve (sec. 1016)

Current law requires the transfer of reserve officers to the retired reserve if they have not been promoted to specific grades by the time they have completed specified years of service. The years of service used include those years of constructive credit awarded to an officer for experience and education.

The Senate bill contained a provision (sec. 140C) that would exclude constructive credit for experience and education from being used to determine years of service for mandatory transfer to the retired reserve.

The House amendment contained no similar provision.

The House recedes with an amendment limiting the authority for the provision to two years.

The conferees noted that the Department of Defense is presently considering a legislative proposal to substantially revise and restructure the reserve officer personnel management system. The conferees intend that this provision be further reviewed during Congressional deliberations on the Reserve Office Personnel Management Act, when submitted to Congress, and, consequently, recommended only two-year temporary authority.

Authority to order retired members of Reserve components to active duty (sec. 1017)

Current law authorizes the Secretaries of the military departments to recall retired regular members to active duty.

The Senate bill contained a provision (sec. 140B) that would authorize the recall of retired reservists who have completed 20 or more years of active service.

The House amendment contained no similar provision.

The House recedes.

Authority to permit retired enlisted members of the regular components to be placed voluntarily in the Ready Reserve (sec. 1018)

Under current law retired regular enlisted members may not continue to be members of the Ready Reserve when their total (active plus retired) service equals 30 years.

The Senate bill contained a provision (sec. 140E) that would permit certain qualified retired regular enlisted members voluntarily to remain in the Ready Reserve beyond 30 years of total service.

The House amendment contained no similar provision.

The House recedes.

Validation of certain Army appointments made in grades above the grade of second lieutenant (sec. 1019)

Prior to the enactment of the Defense Officer Personnel Management Act (Public Law 95-513), constructive credit could be awarded to reserve officers based on education and experience. The Defense Officer Personnel Management Act substantially restricted the application of constructive credit. The Army continued even after the effective date of the Defense Officer Personnel Management Act to award constructive credit to certain individuals in the reserve components. Upon discovering its error, the Army terminated these appointments and provided the individuals the opportunity to accept appointment as a second lieutenant or to return to the status they held prior to the appointment.

The Senate bill contained a provision (sec. 140F) that would allow these reservists to be reappointed to the higher grade even though the Army was not authorized to offer that appointment.

The House amendment contained no similar provision.

The House recedes.

The conferees note that the extended period of time between the enactment of the Defense Officer Personnel Management Act and its effective date was more than sufficient to implement correctly its provisions. The conferees find the Army extremely negligent in its inability to implement the law properly. If it were not for the extraordinary burden placed on the affected individuals, the conferees would not have agreed to rectify the Army's obvious error.

Retention of passed-over reserve officers

The Senate bill contained a provision (sec. 140) that would authorize the Secretaries of the Army and the Air Force to retain in an active status reserve officers in pay grades O-2 and O-3 who have twice failed selection for promotion.

The House amendment contained no similar provision.

The Senate recedes.

PART C—OTHER PERSONNEL MANAGEMENT PROVISIONS

Authority of President to suspend certain laws relating to promotion, retirement, and separation (sec. 1021)

The Senate bill contained a provision (sec. 138) that would authorize the President, during a time of crisis or national emergency, to extend the enlistment or appointment of essential regular and reserve personnel serving on active duty regardless of the normal separation dates for those individuals.

The House amendment contained no similar provision.

The House recedes.

Authority to increase total initial term of service in the Armed Forces (sec. 1022)

Current law requires a military service obligation of 6 years, active and reserve, for all members who enter the military.

The Senate bill contained a provision (sec. 139) that would authorize the Secretary of Defense to increase the military service obligation by up to 2 years for a total of 8 years.

The House amendment contained no similar provision.

The House recedes.

The conferees direct the Secretary of Defense to submit a report to the Committees on Armed Services of the Senate and House of Representatives outlining in detail the program developed by the department to ensure that members of the Individual Ready Reserve remain proficient in their military skills during their service in the Individual Ready Reserve.

Variable terms for enlistments and reenlistments in regular components (sec. 1023)

The Senate bill contained a provision (sec. 182) that would grant the Secretaries of the military services the authority to establish enlistments or reenlistments of durations between two and six years instead of only whole year increments of two, three, four, five or six years.

The House amendment contained a similar provision (sec. 1025).

The Senate recedes.

Authority of President to order members of the Selected Reserve to active duty

The President currently is authorized to order up to 100,000 selected reservists to active duty for a period of 90 days.

The Senate bill contained a provision (sec. 137) that would extend this call-up authority from 90 days to 180 days.

The House amendment contained no similar provision.

The Senate recedes.

PART D—MISCELLANEOUS

Extension of period during which certain accumulated leave may be used (sec. 1031)

The Senate bill contained a provision (sec. 185) that would extend the period of time during which accrued leave in excess of 60 days (which was earned while in a deployed status) may be used. It would allow use of such leave until the end of the third fiscal

year after the year in which the leave was earned. The change would be applied retroactively to leave accured after September 30, 1980.

The House amendment contained no similar provision.

The House recedes.

Fee for veterinary services (sec. 1033)

The House amendment contained a provision (sec. 1054) that would require a $10 fee for each visit by a privately-owned pet to a military veterinarian.

The Senate bill contained no similar provision.

The Senate recedes with an amendment making the provision effective October 1, 1984, rather than October 1, 1983.

Extension of pilot Department of Defense educational assistance loan repayment program (sec. 1034)

The Defense Authorization Act for fiscal year 1981, Public Law 96-342, authorized a test of the foregiveness of a portion of Higher Education Act loans for individuals who enlist in the armed forces. The authority for this program expires on September 30, 1983.

The House amendment contained a provision (sec. 1052) that would extend the authority for this program for an additional year until September 30, 1984.

The Senate bill contained no similar provision.

The Senate recedes.

TITLE XI—NATO AND RELATED MATTERS

North Atlantic Treaty Organization defense cooperative programs (sec. 1101)

The Senate bill contained a provision (sec. 191) that directs the Secretary of Defense to carry out commitments of the United States under the United States-German Wartime Host Nation Support Agreement of April 15, 1982, and under the Prepositioned Materiel Configured in Unit Sets (POMCUS) program by December 31, 1988. The Senate provision further would require that the Secretary of Defense include in his annual report to the Congress a status report on the implementation of these programs, an assessment of whether the NATO allies are doing their fair share under these programs, and whether the readiness of the reserve components is adversely affected by these programs.

The House amendment contained no similar provision.

Although fully supporting the Wartime Host Nation Support and POMCUS programs, the House conferees believed that establishing a date certain for the full implementation of these programs was unduly restrictive given that the Secretary of Defense has less than full control over these cooperative programs. The conferees agreed to an amendment to replace a date certain for full implementation of these programs with "by the earliest practicable date."

The House recedes with an amendment.

Report on allied contributions to the common defense (sec. 1102)

The Senate bill contained a provision (Sec. 192) expressing the sense of Congress that the NATO allies and Japan should increase their contributions to the common defense to levels more commensurate with their economic resources and with their commitments to increase their defense spending. The Senate bill also required the Secretary of Defense to provide a fourth annual report to the Congress on allied contributions to the common defense. The House amendment contained a provision (Sec. 505) with a similar statement of the sense of Congress but no reporting requirements.

The conferees agreed to substitute, with a technical change, House amendment section 505(a)(4) for Section 192(a)(3) of the Senate bill. The conferees also agreed to recommend deletion of Section 192 (c)(1)(H) from the Senate provision that required the Secretary of Defense to provide six year estimates of Japanese financial resources, military procurement and programs required by the Government of Japan to produce an enhanced level of defense capability in Japan by 1990.

In addition to the reporting requirements in Sec. 1102, the conferees direct that the Secretary of Defense provide a description of those United States forces stationed in Japan whose forward development in Japan is only for the purpose of defending that nation, as opposed to those U.S. forces stationed in Japan whose primary mission is to contribute to the defense of other nations in the Pacific and Indian Ocean regions whose security is of importance to the United States.

The House recedes with an amendment.

Limitation on number of military personnel stationed in Europe (sec. 1103)

The Senate bill contained a provision (sec. 193) that would limit the number of U.S. military personnel assigned to permanent duty ashore in European member nations of the North Atlantic Treaty Organization (NATO) on September 30, 1984, to 315,600. That number could be increased to 320,000 if the Secretary of Defense were to provide certain certification and reports concerning NATO-related activities. In either case, the limitation would exempt not more than 2,600 military personnel assigned to the Ground Launched Cruise Missile or the Pershing II Missile programs. The limitations could also be exceeded if the President were to determine and certify to Congress that overriding national interests so required.

The House amendment contained no similar provision.

The House recedes with a technical amendment to clarify the intent of the provision.

Report on improvements of NATO conventional forces (sec. 1104)

The Senate bill contained a provision (Sec. 194) requiring the Secretary of Defense to submit a comprehensive report and plan for improving NATO conventional defense capabilities. Sec. 194 also required that the President and the Commander-in-Chief, Allied Forces Europe, separately submit their recommendations for improving NATO's conventional defense. The House amendment contained no similar provision.

The conferees recommend technical amendments to the Senate provision that delay the reporting requirements to May 1, 1984, for the Secretary of Defense and the Supreme Allied Commander, Europe, and to June 1, 1984, for the President.

The House recedes with an amendment.

Report on the nuclear posture of NATO (sec. 1105)

The Senate bill contained a provision (Sec. 195) requiring the Secretary of Defense to conduct a study of the tactical nuclear posture of NATO and to report to the Committees on Armed Services of the House and Senate by March 1, 1984 on the results of such study. The Senate provision also required the President to submit by April 1, 1984, a report to the Congress containing his views on the Department of Defense study and report, together with any recommendations with respect to such study and report that he considers appropriate. The House amendment contained no similar provision.

The conferees recommend technical amendments to the Senate provision that delay the reporting requirements until May 1, 1984, for the Secretary of Defense and until June 1, 1984, for the President.

The House recedes with an amendment.

Report on combat-to-support ratio of United States Forces in Europe in support of NATO (sec. 1106)

The Senate bill contained a provision (Sec. 196) requiring the Secretary of Defense to submit a report to the Committees on Armed Services of the House and Senate by May 1, 1984, analyzing past, current and projected ratios between combat, combat support, combat service support and noncombat components of the armed forces of the U.S. assigned to permanent duty in Europe and their relationship to each other. The Secretary of Defense was also required to recommend any changes needed to improve the balance between combat and support forces in the future. The House amendment contained no similar provision.

The conferees recommend technical amendments to the Senate provision to clarify its intent.

The House recedes with an amendment.

Report on United States expenditures in support of NATO (sec. 1107)

The Senate bill contained a provision (Sec. 197) requiring the Secretary of Defense to report to Congress by June 1, 1984, on U.S. expenditures, by specific categories, in support of NATO. The House amendment contained no similar provision.

The House recedes.

TITLE XII—GENERAL PROVISIONS

PART A—FINANCIAL MATTERS

Transfer authority (sec. 1201)

The House amendment contained a provision (sec. 1101) that would permit the transfer of an authorization made available in the fiscal year 1984 Defense Authorization Act to any other authorization made available in the Act only upon determination by the Secretary of Defense that such a transfer were in the national interest. The authority to transfer could only be used to provide authorization for higher priority items than the items from which authorization was transferred and could not be used to provide authorization for an item that was denied authorization by the Congress. The Secretary of Defense would be required to promptly notify the Congress of transfers. The total amount of transfers would be limited to $1.5 billion.

The Senate bill contained no similar provision.

The conferees believe that transfer authority is necessary to permit efficient operations of the Department of Defense.

The obligation or expenditure of funds by the Department of Defense for procurement, research and development or operation and maintenance is prohibited by law (section 138 of title 10, United States Code) unless such funds have been previously authorized. Transfer authority would permit the Secretary of Defense to act promptly to continue the efficient conduct of activities authorized by this Act withut obtaining prior legislative authorization.

Under the authorization for Operation and Maintenance in Title IV of the House amendment, transfer of authorizations between subdivisions (budget activities) of each Operation and Maintenance major account could only have been accomplished as provided in section 1101 of the House amendment.

Under the Senate bill, which did not subdivide the authorization within Operation and Maintenance major accounts, the Secretary of Defense would have been able to shift authorizations between subdivisions (budget activities) of an Operation and Maintenance major account.

Although the conferees adopted the format of the House amendment, specifying the authorization of budget activities within the Operation and Maintenance major accounts in Title III of the conference report, the conferees agreed that the Defense Department should continue to have the same flexibility to shift authorization within Operation and Maintenance major accounts that would have existed under the format of authorization in the Senate bill. The conferees, therefore, included subsection 1201(d) to explicitly allow unrestricted transfers between subdivisions (budget activities) of each Operation and Maintenance major account. Subsection 1201(d) would not, however, permit unrestricted transfers between major account titles such as a transfer from Operation and Maintenance, Army to Operation and Maintenance, Navy; such transfers could only be made utilizing the authority that would be provided in the other subsections of section 1201.

Under agreements that have evolved over the years, the Secretary of Defense has consulted with the Committees on Armed Services and Appropriations of the Senate and House of Representatives about realignments of defense programs subsequent to the enactment of authorization and appropriation. This process, known as reprogramming, has worked well. The conferees direct the Secretary of Defense to use the transfer authority that would be authorized in this section pursuant to the procedures governing reprogramming.

The Senate recedes with an amendment.

Long-term lease and charter of aircraft and naval vessels (sec. 1202)

The Senate bill included a provision (sec. 1001) that would require that the lease of a naval vessel or aircraft be authorized in law if the lease were for a long term or if it involved a substantial termination liability. The Senate provision would also:

(1) require that any authorization request for a lease of a naval vessel or aircraft include a financial analysis, including lost tax revenues, comparing lease with purchase of the vessel or aircraft;

(2) require that a financial analysis accompanying an authorization request for a lease be reviewed by the Director of the Office of Management and Budget and the Secretary of the Treasury and that they report to the Congress the results of their review within 45 days;

(3) require that the Secretary of Defense include the capital-hire portion of the cost of a lease of a vessel or aircraft within the request for procurement;

(4) require the Secretary of the Treasury and the Director of the Office of Management and Budget to jointly issue guidelines for determining under what circumstances the Department of Defense may utilize lease arrangements for aircraft or vessels rather than directly procuring such aircraft or vessels;

(5) prohibit use of funds appropriated pursuant to an authorization contained in this act to indemnify any person under the terms of any contract entered into with the United States on or after June 14, 1983, for any amount paid or due by any person to the United States for any liability arising under the Internal Revenue Code of 1954, as amended, or to pay any attorney fees in connection with such contract;

(6) require the Secretary of Defense to submit a report to the Committees on Armed Services and Appropriations of the Senate and House of Representatives which lists all leases, charters, service contracts or conditional sales the term of which is one year or longer, for major items of defense equipment;

(7) prohibit leases in excess of three years for vessels, aircraft or vehicles if the lease includes a termination liability in excess of 50 percent of the original value unless the Congress has specifically provided budget authority for the obligation of 10 percent of such termination liability; and

(8) provide that nothing in the section shall impede or affect the ability of the Navy to proceed to acquire the use of the TAKX Maritime Prepositioning Ships and the T-5 tankers in accordance with leases entered into before the date of enactment of this act.

The House amendment contained a provision (sec. 1102) that would require authorization in law for the acquisition of a naval vessel, or the services of a naval vessel, by lease or by a service contract if the lease or service contract would be for a long term or if, under the contract, the United States would have a substantial termination liability. Section 1102 would also require that the Committees on Armed Services and Appropriations of the Senate and House of Representatives be notified 30 days in advance of the issuance of a request for proposal (RFP) and the issuance of a contract for a long term lease or service contract for a naval vessel.

The conferees agreed to require authorization in law for the acquisition of an aircraft or naval vessel, or the services of an aircraft or naval vessel, by lease or by a service contract if the lease or service contract would be for a long term or if, under the contract, the United States would have a substantial termination liability. The provision would also require that the Committees on Armed Services and Appropriations of the Senate and House of Representatives be notified 30 days in advance of the issuance of a contract and notified of the issuance of a request for proposal (RFP) for a long term lease or service contract for an aircraft or naval vessel.

The conferees also agreed that:

(1) Whenever a request is submitted to Congress for the authorization of the lease of an aircraft or naval vessel, the Secretary of Defense shall submit with that request an analysis of the cost to the United States (including lost tax revenues) of any such lease arrangement compared with the cost to the United States of direct procurement of the aircraft or naval vessel by the United States.

Any such analysis shall be reviewed and evaluated by the Director of the Office of Management and Budget and the Secretary of the Treasury within 30 days after the date on which the request and analysis are submitted to Congress. The Director and Secretary shall conduct such review and evaluation on the basis of the guidelines issued pursuant to this act and shall report to the Congress in writing on the results of their review and evaluation at the earliest practicable date, but in no event more than 45 days after the date on which the request and analysis are submitted to the Congress.

(2) Whenever a request is submitted to Congress for the authorization of funds for the Department of Defense for the long-term lease of aircraft or naval vessels authorized under this section, the Secretary of Defense—

(A) shall indicate in the request what portion of the requested funds is attributable to capital-hire; and

(B) shall reflect such portion in the appropriate procurement account in the request.

(3) The Director of the Office of Management and Budget and the Secretary of the Treasury shall issue jointly guidelines for determining under what circumstances the Department of Defense may use lease arrangements for aircraft and naval vessels rather than directly procuring such aircraft and vessels.

(4) Funds appropriated pursuant to an authorization contained in this Act may not be used to indemnify any person under the terms of a contract entered into with the United States for a lease that is authorized under this section—

(A) for any amount paid or due by any person to the United States for any liability arising under the Internal Revenue Code of 1954; or

(B) to pay any attorney fees in connection with such contract.

(5) At the same time that the President submits the budget request for the Department of Defense to Congress for fiscal year 1985, the Secretary of Defense shall submit a written report to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives concerning leases.

(6) During fiscal year 1984 obligation of funds for a lease authorized under this section that includes a termination liability in excess of 50 percent of the original purchase value of the vessel, aircraft or vehicle is prohibited unless Congress has specifically provided budget authority for the obligation of 10 percent of such termination liability.

(7) Nothing in this section shall impede or affect the ability of the Secretary of the Navy to proceed to acquire the use of thirteen T-AKX class Maritime Prepositioning Ships and the use of five new T-5 tankers in accordance with the long term charter arrangements negotiated by the Navy before the date of enactment of this Act.

The conferees direct the Secretary of Defense to promptly report to the Committees on Armed Services of the Senate and House of Representatives any contract to lease if such contract:

(1) is entered into between June 14, 1983, and the effective date of this section; and

(2) would provide for indemnification of Federal tax liability of any person or would provide for indemnification of attorneys' fees.

The House recedes with an amendment.

Independent cost estimates of major defense acquisition programs (sec. 1203)

The Senate bill contained a provision (sec. 1005) that would require the Secretary of Defense to consider an independent estimate of the cost of a major defense acquisition program, as defined in section 139a(a)(1) of title 10, United States Code, before the Secretary may approve full-scale engineering development or production and deployment of such program. The provision

would also require the President to submit, in conjunction with the fiscal year 1985 Defense Department budget request, a report on the use of independent cost estimates within the Department of Defense to the Committees on Armed Services of the Senate and the House of Representatives. The report must provide information on how frequently independent estimates were used in making decisions on the Defense Department's fiscal year 1985 budget and identify any Department initiatives designed to encourage more effective use of independent cost estimates. The provision would also express the sense of the Congress that the Secretary of Defense should ensure that adequate personnel and resources are made available to organizations or offices charged with developing or assessing independent estimates of the costs of major defense acquisition programs.

The House amendment contained no similar provision.

The House recedes with amendments to extend the reporting date to May 1, 1984, and to change the reporting official from the President to the Secretary of Defense.

Requirement of authorization of appropriations for working capital funds (sec. 1204)

Section 1109 of the House amendment would amend section 2208(d) of title 10, United States Code, to require the annual authorization of appropriations to Department of Defense working capital funds beginning in fiscal year 1985.

The Senate bill contained no similar provision.

The Senate recedes.

One-year extension of test program to authorize price differential to relieve economic dislocations (sec. 1205)

The Senate bill contained a provision (sec. 1008) that would provide for a one-year extension of the test program that allows the Defense Logistics Agency to pay a 2.2-percent price differential to award non-fuel contracts to a firm that will perform in a labor-surplus area. The test program is an exception to section 2392 of title 10, United States Code, commonly referred to as the Maybank Amendment, which prohibits the use of funds appropriated to or for the use of the Department of Defense to pay a price differential in order to award a contract in an area of high unemployment.

The House amendment contained a similar provision (sec. 1124); however, it would make the test program permanent and increase the ceiling on the total value of the contracts that could be awarded under the program to $7 billion per year.

The conferees agreed to a one-year extension of the program and to delete the language in the Senate bill detailing the information to be included in the yearly report by Defense Logistics Agency on the costs and benefits of the program. The House recedes with an amendment.

Authorization of funds for upgrading COCOM logistical support (sec. 1206)

The Senate bill contained a provision (sec. 1010) that would allow the Department of Defense to reprogram up to $2 million available during fiscal year 1984 for upgrading and improving the logistical support of the International Coordinating Committee (COCOM) in order to strengthen the control of exported technology and equipment to certain countries by the United States and certain of its allies.

The House amendment contained no similar provision.

The House recedes.

Reduction in authorization of funds for certain intelligence activities

The Senate bill contained a provision (sec. 1025) that would impose a $100 million general reduction in the amounts authorized for certain intelligence activities. The House amendment contained no similar provision.

The Senate recedes.

PART B—DEPARTMENT OF DEFENSE MANAGEMENT MATTERS

Establishment of Defense Director of Operational Test and Evaluation; reporting requirements (sec. 1211)

Section 1030G of the Senate bill and section 1113 of the House amendment would provide for establishment of an official responsible for operational test and evaluation (OT&E) within the Office of the Secretary of Defense. The conferees agreed to combine the Senate and House provisions.

The resulting Director of Operational Test and Evaluation would be the principal OT&E official in the Department of Defense and the principal adviser to the Secretary of Defense on OT&E. The conferees intend the Director to be responsible for policy formulation, evaluation, and oversight with status and duties comparable to an assistant secretary of defense. The conferees also intend the Director to be independent of other Department of Defense officials below the Secretary of Defense. The Director should not be circumscribed in any way by other officials in carrying out his duties. He will report directly to the Secretary of Defense, but should keep the Under Secretary for Research and Development informed of his activities.

The Director would be required to originate three types of reports; the conferees agreed on legislative language ensuring that designated Congressional committees receive those reports in precisely the same form and with precisely the same content as those reports are originally submitted by the Director to the Secretary of Defense, though the Secretary of Defense may append comments to the report.

The conferees expect the Director to safeguard the integrity of operational testing and evaluation in general and with respect to specific major defense acquisition programs. He would be empowered to prescribe policies and procedures, to advise on budgetary matters including test facilities and equipment, to monitor and review all operational testing and evaluation in the Department, to act as prior approval authority for operational test and evaluation plans and funding for each major defense acquisition program, and to evaluate the adequacy of operational testing and evaluation as a precondition to the final decision to proceed with a major defense acquisition program beyond low-rate initial production.

Conferees agreed that "low-rate initial production" means the production of a system in limited quantity to be used in operational test and evaluation for verification of production engineering and design maturity and to establish a production base prior to a decision to proceed with production.

The Senate bill also contained a provision (sec. 1027) that would make the production of weapon systems that have not successfully completed operational testing contingent on a report by the Secretary of Defense to Congress. The House amendment contained other reporting requirements in section 1113. The conferees agreed to accept the reporting requirements for the Director of Operational Test and Evaluation contained in section 1113 of the House amendment.

The Senate recedes with regard to section 1027.

Assistant Secretaries in the Department of Defense (sec. 1212)

Section 1011 of the Senate bill and section 1114 of the House amendment contained a provision to amend section 136, title 10, United States Code, to authorize additional assistant secretary positions in the Department of Defense, the Department of the Army, and the Department of the Navy. The Senate bill authorized four Assistant Secretaries of Defense, one for Command, Control, Communications and Intelligence, one for Reserve Affairs, and two whose duties were not designated, one assistant secretary for the Department of the Army, and one assistant secretary for the Department of the Navy. The House amendment differed in that it authorized only three Assistant Secretaries of Defense, and revised the language of section 136.

The House recedes regarding the number of Assistant Secretaries of Defense. The Senate recedes regarding the language of section 136, title 10, United States Code.

Amendment to make Commandant of the Marine Corps a member of the Armed Forces Policy Council (sec. 1213)

The Senate bill contained a provision (sec. 1015) that would make the Commandant of the Marine Corps a statutory member of the Armed Forces Policy Council, as are the other members of the Joint Chiefs of Staff.

The House amendment contained no similar provision; the House, however, passed a bill (H.R. 1692) on May 3, 1983, which would have the same effect as the Senate provision.

The House recedes.

5 percent across-the-board reduction in headquarters staff (sec. 1214)

The Senate bill contained a provision (sec. 188) that would require that in fiscal year 1984 the number of military and civilian personnel assigned to management headquarters and headquarters support activities in the military departments and the defense agencies be reduced by five percent and in the Office of the Secretary of Defense be reduced by 10 percent. Personnel assigned to the Joint Chiefs of Staff and intelligence community activities would be excluded.

The House amendment contained a provision (section 504) that would require a reduction of 500 military personnel from headquarters staffs of the military departments, defense agencies, commands and other components of the Department of Defense.

The House recedes with an amendment requiring a reduction in headquarters personnel equal to five percent of the President's fiscal year 1984 budget request for such personnel. The reduction would be allocated by the Secretary of Defense with the Office of the Secretary of Defense allocated an equitable proportion.

Regulations relating to increases in prices for spare parts and replacement equipment (sec. 1215)

The Senate bill contained a provision (sec. 1030E) that would require the Secretary of Defense to issue regulations relating to increases in prices for spare parts and replacement equipment. The regulations required certain contracting office certifications before spare parts or replacement equipment can be purchased when the price of such parts or equipment has increased

beyond thresholds specified in the regulations by the Secretary of Defense.

The House recedes with an amendment. The amendment would change the recipient of the contracting officer certifications from the "head of the procuring agency" to the "head of the procuring activity." The conferees also agreed to delete a requirement for a period of public comment for these internal regulations. The regulations would be published in the Federal Register and would be forwarded to the Armed Services Committees of the Senate and House of Representatives prior to their implementation.

Report on management of spare parts (sec. 1216)

The Senate bill contained a provison (sec. 1028) that would require the Secretary of Defense to submit a report to the Committees on Armed Services and the Committees on Appropriations of the Senate and the House of Representatives, with an interim report by September 15, 1983, on the status of efforts within the Department of Defense to monitor, control and correct problems associated with the acquisition of spare parts.

The House amendment contained a comprehensive statistical reporting requirement (sec. 1112) that would subsume the less detailed Senate provision, with the exception of a Senate requirement that the report include an analysis of the extent of overcharging on spare parts and shortages of spare parts. In addition, the House amendment contained a requirement that the Secretary of Defense put into effect at the earliest possible date policies and procedures to achieve a long-term solution to problems related to excessive costs of the long lead times associated with the acquisition of initial and replenishment of spare parts.

The Senate recedes with an amendment.

The amendment would add a new provision requiring an analysis of the extent of overcharging on spare parts and shortages of spare parts; delete the requirement to report on the status of efforts to automate the procurement process; delete the detailed statistical reporting by various acquisition methods contained in section 1112(b) of the House amendment and the requirement to continue to compile information to prepare such reports in fiscal year 1984; delete the requirement to report on the cost of spares and data rights on major systems approved after January 1, 1980; and make three technical changes.

Authority to withhold from public disclosure certain technical data (sec. 1217)

The Senate bill contained a provision (sec. 1024) that would authorize the Secretary of Defense to withhold from public disclosure certain unclassified technical data in the possession of or under the control of the Department of Defense. With certain specific exceptions, this authority would apply to such data if they could not be exported lawfuly outside the United States without an approval, authorization, or license under the Export Administration Act of 1979 (50 U.S. C. App., 2401-2420) or the Arms Export Control Act (22 U.S.C. 2751 et seq.). The Secretary would be required to issue implementing regulations that would be subject to a period of public comment. The regulations must address, among other things, releases of technical data to allies of the United States and to qualified U.S. contractors for use in performing U.S. government contracts.

The House amendment contained no simlar provision.

The House recedes with an amendment. The conferees note that the provision would apply to certain unclassified, technical date that do not meet the standards or classification under the pertinent Executive Order. The conferees stress that nothing in this provision is for the purpose of limiting competitive bidding on U.S. government contracts. As noted above, the implementing regulations must address the release of data to qualified U.S. contractors for use in performing U.S. government contracts.

The conferees direct that copies of those regulations be forwarded to the Committees on Armed Services of the Senate and the House of Representatives after the period of public comment but 30 days before the regulations would go into effect. This will permit the committees to ensure that, in drafting such regulations, the Secretary has given sufficient consideration to the data needs of qualified U.S. contractors that are small business concerns in connection with those contractors perparing bids on Department of Defense contracts.

Use of polygraphs by the Department of Defense (sec. 1218)

Section 1007 of the Senate bill and section 1119 of the House amendment contained a provision concerning the use of polygraphs in the Department of Defense. Both provisions would freeze, until April 15, 1984, use of polygraphs in the Department of Defense to that use permitted by regulations of the department in effect as of August 5, 1982. The Senate bill would exempt the National Security Agency of the Department of Defense; it also would require certain committees of the Senate to hold hearings, prior to April 15, 1984, on polygraph use in the department.

The House recedes with an amendment.

The conferees intend that the exemption for the National Security Agency of the Department of Defense shall only apply to (1) civilian employees and prospective civilian employees of that agency; (2) members of the armed forces assigned to duty in that agency; (3) detailees to that agency with access to Sensitive Compartmented Information; and (4) employees of contractors affiliated with that agency. The exemption specifically does not apply to civilian employees or prospective civilian employees of the Department of Defense, or members of the armed forces assigned to such department, who are performing duties in any portion of the Department of Defense other than the National Security Agency, but who may have access to information gathered, disseminated or controlled by the National Security Agency. The conferees expect that the Senate Committee on Armed Services and the Senate Select Committee on Intelligence shall hold hearings, prior to April 15, 1984, on the use of polygraph examinations in the Department of Defense.

Authority to provide routine port services to naval vessels of allied countries at no cost (sec. 1219)

Section 1030F of the Senate bill would authorize the Navy to provide routine port services to allied naval vessels at no cost in cases where there is a reciprocal agreement to provide such services to visiting U.S. naval vessels. In addition, the Senate provision would amend section 7227 of title 10, United States Code, to permit the reimbursement from other Navy appropriations of the Navy Industrial Fund activities providing such routine port services.

The House amendment contains a similar provision (sec. 1120) that applies only to vessels of NATO multinational naval forces.

The conferees agreed to adopt the language of the House amendment but to expand the scope of the provision to apply to all allied nations having reciprocal agreements to provide routine port services to visiting U.S. naval vessels as provided for in the Senate bill.

The Senate recedes with an amendment.

Reciprocal communications support (sec. 1220)

Section 1004 of the Senate bill would authorize the Secretary of Defense, subject to the concurrence of the Secretary of State, to enter into agreements with the government of any allied country, or North Atlantic Treaty Organization subsidiary body, under which the United States would agree to provide communications support or related supplies and services to such country or subsidiary body in return for an equivalent value of communications support or related supplies and services.

The House amendment contained no similar provision.

The House recedes with an amendment. The amendment would provide authority for the Secretary of Defense to enter into such agreements only during fiscal year 1984. The amendment also would delete the language relative to North Atlantic Treaty Organization subsidiary body and define "allied country" as a country that is a member of the North Atlantic Treaty Organization, and Australia or New Zealand.

Two-year extension of prohibition on contracts for the performance of firefighting and security functions (sec. 1221)

Section 190D of the Senate bill would extend for two years the current prohibition on the obligation or expenditure of funds in this or any other Act for entering into a contract for the performance of firefighting or security guard functions at a military installation.

The House amendment contained a similar provision (sec. 1115).

The Senate recedes with an amendent clarifying the intent of the House provision to permit the execution of new contracts for firefighting and security guard functions currently being performed under contract.

Report on cost savings under contracting out procedures (sec. 1222)

Section 1122 of the House amendment would require that the Secretary of Defense report to the Congress, not later than April 15, 1984, on performance costs and personnel data relating to the conversion of commercial and industrial type activities within the Department of Defense from in-house to contractor performance since January 1, 1981.

The Senate bill contained no such provision.

The Senate recedes.

Extension of period for transfer of defense dependents' education system to the Department of Education (sec. 1223)

The Senate bill contained a provision (sec. 1006) that would amend section 302(a) of the Department of Education Organization Act (20 U.S.C. 3442(a)) in two respects. First, the provision would change the date when the transfer of the Department of Defense overseas schools is scheduled to take place from "not later than May 4, 1984" to "not earlier than May 4, 1986". Second, it stated that the transfer could occur only if the President or Congress determined that the transfer would not be detrimental to the quality of education being provided, to teachers' benefits and protections under

status of forces agreements, and to the morale and welfare of military personnel assigned overseas. The House amendment contained no similar provision.

The House recedes with an amendment. The provision of the Senate bill changing the date of transfer was accepted, but the provision regarding the Presidential or Congressional determination was deleted. However, the conferees direct the Secretary of Defense to submit a report in writing to the Congress not later than March 1, 1984, on the operation of the overseas schools. In preparing this report, the Secretary shall conduct a comprehensive survey of all the teachers employed by the Department of Defense in such schools to determine their views on the transfer from the Department of Defense to the Department of Education. The Secretary shall include in his report the results of the survey of the teachers, an evaluation of the quality of education being provided, and such other information as would assist the Congress in further addressing the issue of transfer of the schools.

The conferees believe that the question of the transfer should be resolved as expeditiously as possible so that the uncertainty surrounding the transfer does not adversely affect the quality of education being provided. Accordingly, the conferees urge all interested Congressional committees to conduct early hearings or such other reviews as they consider appropriate in arriving at a final resolution of this issue.

Force structure changes, Air Force (sec. 1224)

On January 31, 1983, in conjunction with submission of the Defense Department's fiscal year 1984 budget authorization request, the Air Force reported to Congress a number of proposed changes to its Tactical and Air Defense Force Structure. Less than six months later and without appropriate, prior consultation with Congress, the Air Force precipitously proposed several alterations to its January 31, 1983, plan. One of these alterations, deactivation of an active air defense squadron, appeared to raise serious national security questions.

In recognition of the seriousness of these questions, and concerned that the Air Force intended to implement these later-announced force structure changes before Congress had adequate opportunity to evaluate their military, fiscal and economic implications, the Senate bill contained a provision (sec. 118) that would prevent such actions without detailed Air Force justification and a sufficient review period.

The House bill contained no similar provision.

The House recedes with an amendment to limit the effect of the provision to the proposed deactivation of the active air defense squadron at K. I. Sawyer Air Force Base, Michigan. The amendment would require the Air Force to submit a detailed justification of the proposed deactivation, including cost benefit, cost effectiveness and military effectiveness analyses, an analysis of the impacts on the regional economy of the affected area and an estimate of the non-military costs to the Federal Government (i.e.: unemployment compensation, economic adjustment, etc.) that may result from the action. This detailed justification would be required no earlier than the submission of the Defense Department budget request for fiscal year 1986 or any subsequent fiscal year, and the Air Force would be prohibited from taking any action to implement any such squadron deactivation at K. I. Sawyer Air Force Base until after a period of sixty days had expired after submission of the detailed justification.

The conferees agreed that the manner in which the Air Force proposed the alterations to its January 1983 plan with regard to K. I. Sawyer A.F.B., Michigan was deficient and provided insufficient justification for the deactivation of the active air defense squadron.

The conferees emphasize that the Air Force should have followed its normal procedures for announcing such changes, which are to notify Congress of such proposals in conjunction with the submission of an annual Defense Department budget request in the January preceding the fiscal year in which the actions are proposed to occur.

The conferees also agreed that, in the future when a military service announces alterations to force structure changes announced within the preceding six months, and those later alterations may be expected to have adverse socio-economic impacts on the areas around the military installations affected, the Secretary of Defense or the Secretary of the military department concerned should comply fully with the requirements of the National Environmental Policy Act of 1969 with respect to such later-proposed alterations. Any such environmental impact statements should place special emphasis on the socio-economic factors in the affected areas.

PART C—PROVISIONS RELATING TO SPECIFIC PROGRAMS

Limitation on deployment of M-X missile; development of small mobile missile (sec. 1231)

The Senate bill contained a provision (sec. 108(c)) that would require the Administration to submit to the Committees on Armed Services of the Senate and House of Representatives a written assessment relating to the requirement for and the anticipated impact of the procurement of operational M-X missiles intended for deployment.

The House amendment contained a provision (sec. 303) that would limit the deployment of M-X missiles to specific levels until specific criteria are met regarding the small mobile intercontinental ballistic missile system. Further discussion of this issue is contained in the Air Force missiles section of this report under land based ICBM modernization.

The conferees agreed to accept both provisions.

Sense of the Congress regarding small, mobile, single warhead intercontinental ballistic missiles (sec. 1232)

The Senate bill contained a provision (sec. 1030H) that would express the sense of Congress that the design, development, and testing of small, mobile, single warhead ICBM's be pursued as a matter of the highest national priority. Further discussion of this issue is contained in the Air Force missiles section of this report under land based ICBM modernization.

The House amendment contained no similar provision.

The House recedes.

Limitation on procurement of binary chemical weapons (sec. 1233)

The House amendment contained a provision (sec. 1103) that would prohibit funds from being spent for the production of binary munitions unless the President certifies that for each binary munition produced, one serviceable unitary munition is rendered useless for military purposes. The Senate bill contained no similar provision.

The Senate recedes with amendments discussed in the Army ammunition section of the statement of managers.

The House amendment also contained a provision (sec. 109) that would prohibit the obligation or expenditure of funds for the procurement of binary chemical munitions. The Senate bill contained no similar provision.

The House recedes with amendments discussed in the Army ammunition section of the statement of managers.

The Senate bill contained a provision (sec. 1013(a)) that would authorize the establishment of a binary production base and the procurement of components for the 155mm binary chemical projectile. The provision would also prohibit use of funds for final assembly of 155mm binary projectile components until October 1, 1985, and permit such assembly thereafter only if the President certifies that such assembly is essential to the national interest. The House amendment contained no similar provision.

The House recedes. See further discussion of this issue elsewhere in this statement of managers under Army Procurement, Ammunition.

Prohibition against using funds appropriated for the advanced-technology bomber program for any other purpose (sec. 1234)

The Senate bill contained a provision (sec. 1026) that would direct that none of the funds appropriated to carry out the Advanced Technology Bomber program could be used for any other purpose.

The House amendment contained so similar provision.

The House recedes.

Establishing criteria governing the test of antisatellite warheads (sec. 1235)

The Senate bill contained a provision (sec. 1034A) that would direct that none of the funds appropriated for the Antisatellite program could be used for testing against objects in space unless the President determines and certifies to Congress that the United States is endeavoring to negotiate an antisatellite treaty with the Soviet Union and that this testing is clearly in the best interest of national security.

The House amendment contained no similar provision.

The House recedes.

Requirement for the use of competitive bidding procedures for the lease of CT-39 replacement aircraft (sec. 1236)

The Senate bill contained a provision (sec. 1030B) requiring that competitive bidding procedures be followed in the awarding of the lease for any CT-39 replacement aircraft (Operations Support Aircraft).

The House amendment contained no similar provision.

In order to reduce the cost of this program, the conferees agreed that not less than one-third of the aircraft leased as CT-39 replacement shall be turbopropeller aircraft and that maintenance and support facilities now in operation for the current aircraft inventory be used for these aircraft.

The House recedes.

Limitation on waivers of cost recovery requirements under Arms Export Control Act (sec. 1237).

The House amendment contained a provision (Sec. 1104) authorizing the President to exercise the authority granted under Section 21(e)(2) of the Arms Export Control Act without regard to the limitation imposed by Section 770 of the Department of

Defense Appropriation Act, 1983, as contained in Public Law 97-377. The Senate bill contained no similar provision.

The Senate recedes.

Waiver of limitation on foreign military sales program (sec. 1238)

The House amendment contained a provision (Sec. 110.5) stating that the Arms Export Control Act is to be administered as if Section 747 of the Department of Defense Appropriations Act, 1983 (as contained in Public Law 97-377) had not been enacted into law. The Senate bill contained no similar provision.

The Senate recedes.

F/A-18 aircraft program (sec. 1239)

The House amendment contained a provision (Section 1106) authorizing the Secretary of the Navy to carry out the F/A-18 aircraft program without regard to the first proviso in the paragraph under the heading "Aircraft Procurement, Navy" in Title IV of the Department of Defense Appropriation Act, 1983, as contained in Public Law 97-377. The Senate bill contained no similar provision.

The Senate recedes.

Study to reestimate the cost of the B-1B bomber program (sec. 1240)

The Senate bill contained a provision (sec. 1030) that would require the Secretary of Defense to conduct a detailed financial analysis of the projected cost of the B-1B aircraft program and, on the basis of such analysis, to make necessary revisions to the estimated cost certified to the Congress by the President on February 18, 1982. The Senate provision would also require the Secretary of Defense to submit a written report to the Congress not later than 60 days after enactment of the fiscal year 1984 Defense Appropriations Act, but in no event later than January 1, 1984. In addition, the Secretary of Defense would be required to provide a copy of the report to the Comptroller General for his review.

The House amendment contained no similar provision.

The House recedes.

Transfer of certain aircraft from the Export-Import Bank

The Senate bill contained a provision (sec. 1002) that would authorize the transfer of five DC-10-30 aircraft, or aircraft of equivalent value, from the Export-Import Bank to the Air Force and reimbursement of $125 million to the Export-Import Bank from the Air Force.

The House amendment contained no similar provision.

The Senate recedes; however, the conferees stated that, if the Air Force has important mission requirements for the DC-10-30 aircraft, the Air Force could submit a reprogramming action to acquire the DC-10-30 aircraft from the Export-Import Bank.

155MM ARTILLERY FIRED ATOMIC PROJECTILE

The budget request contained classified amounts for procurement and research and development associated with the 155mm artillery fired nuclear projectile for fiscal year 1984. The Senate bill deleted $50 million from the request; the House amendment would authorize the full amount requested.

The Senate bill also contained a provision (sec. 1030J) that would, in effect, repeal all prior authorizations for a construction project (No. 82-D-109) of the Department of Energy associated with manufacturing of the 155mm nuclear artillery projectile and prohibit further obligation of funds for that purpose. The Senate provision would also authorize $50 million for procurement and research and development for improved conventional munitions and submunitions. The House amendment contained no similar provision.

The conferees belive that the utility of short-range nuclear battlefield weapons as a deterrent to war in the NATO area is diminishing and that conventional defensive systems should receive additional emphasis.

The conferees agreed that the effort to produce the 155mm artillery-fired atomic projectile (W-82) be terminated. To implement this decision, the conferees have denied all the requested funds for procurement of Army ammunition for the W-82 warhead. In addition, the conferees direct that further research and development on this warhead be terminated and that the funds requested for that purpose be available only to cover project termination costs and to be reprogrammed to meet other Army research and development requirements.

The Senate recedes from its language restricting the expenditure of funds on Project 82-D-109 of the Department of Energy in deference to the House contention that this part of the Senate bill (sec. 1030J) was not germane under the Rules of the House; however, the conferees stated their understanding that the funding for this project could be denied when the fiscal year 1984 Department of Energy authorization bill for nuclear programs is considered in conference.

The Senate recedes with an amendment.

Sense of the Senate with regard to single warhead missiles

The Senate bill contained a provision (sec. 1030K) that would express the sense of the Senate that the United States and the Soviet Union should seek to move toward an ICBM force in which missiles contain only one warhead.

The House amendment contained no similar provision.

In view of the fact that this provision had not been considered by the House of Representatives and, consequently, a Sense of the Congress resolution would be outside the scope of the conference. It was the view of the conferees, however, that, in the context of the Scowcroft Commission's findings and recommendations, the conferees believe that the U.S. and the USSR should seek to move away from an ICBM force structure in fixed silos that relies on multiple warhead missiles (MIRVs). Pursuant to that recommendation, which was also part of the Scowcroft Commission report, the conferees have sought to insure the prompt development of a small, single warhead ICBM by linking requirements for its design, development and testing to the M-X deployment schedule.

Furthermore, the conferees agreed to insert in the Statement of Managers the full text of the Sense of the Senate Resolution.

SENSE OF THE SENATE WITH REGARD TO SINGLE WARHEAD MISSILES

SEC. 1030K. It is the sense of the Senate that, since the Scowcroft Commission concluded that—

(1) "stability should be the primary objective both of the modernization of our strategic forces and of our arms control proposals";

(2) "our ICBM programs should support pursuit of a stable regime of arms control agreements"; and

(3) "a more stable structure of ICBM deployments would exist if both sides moved toward more survivable methods of basing than is possible when there is primary dependence on large launchers and missiles";

therefore, be it declared that from the point of view of enhancing strategic nuclear stability, the Union of Soviet Socialist Republics and the United States of America should seek to move toward an ICBM force structure in which missiles contain only one warhead.

PART D—MISCELLANEOUS

Endorsement of report on improved strategic communications (sec. 1251)

The House amendment contained a provision (sec. 1111) that would endorse the findings of the report of the Secretary of Defense to the Congress on improved strategic communications dated April 11, 1983, and would urge implementation of certain recommendations.

The Senate bill contained no similar provision.

The Senate recedes.

Public Health Service hospitals (sec. 1252)

The Senate bill contained a provision (sec. 190(b)) that would direct the Secretary of Defense, in consultation with the Secretary of Health and Human Services, to conduct studies and demonstration projects in order to compare the cost and quality of care provided under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) with care provided by the ten former Public Health Service facilities designated uniformed services treatment facilities by Public Law 97-99.

The provision in the Senate bill would further specify that the two Secretaries could not terminate the uniformed services treatment facility designation of any of these hospitals and clinics for a minumum of one year after the submission of the final report evaluating the results of the demonstration projects, with the termination to become effective no sooner than six months after notification to the facility or facilities concerned.

The House amendment contained no similar provision.

The House recedes with an amendment providing that a termination of the uniformed services treatment facility designation may become effective at any time after December 31, 1987.

Employment protection for certain nonappropriated fund instrumentality employees (sec. 1253)

Section 1014 of the Senate bill would provide employment protection for employees of nonappropriated fund instrumentalities of the Department of Defense who report violations of law or mismanagement.

The House amendment included no similar provision.

Language in the Senate bill is similar to the language in H.R. 4624, which was passed by the House on November 4, 1981, during the 97th Congress (H. Rept. 97-297).

The House recedes with technical clarifying amendments.

Extension of grace period for the enforcement for the provisions relating to the failure to register and the denial of Federal educational assistance (sec. 1254)

The Senate bill contained a provision (sec. 1030D) that would extend through September 30, 1983, the grace period during which institutions of higher education may collect the required Statements of Compliance with the Selective Service registration requirement after issuing student financial aid

under Title IV of the Higher Education Act of 1965.

The House amendment contained no similar provision.

The House recedes.

Impact aid authorization (sec. 1255)

The Senate bill contained a provision (sec. 1030C) that would revise and extend Public Law 81-874, the Impact Aid Maintenance and Operations Program. Specifically, the provision would extend the authorization of appropriations contained in Public Law 81-874 during fiscal years 1984 and 1985 at a level of $625 million each year; extend authorization for payments for category "B" students through fiscal year 1984; extend the reservation of appropriations for payments under section 2 of Public Law 81-874 through fiscal year 1985 at a level of $25 million for each year; extend the prohibition on funding for sections 3(e), 4, 4A and 6 of Public Law 81-874 through fiscal year 1985, and correct a mistaken section reference relating to disaster assistance.

The House amendment contained no similar provision.

The House recedes with an amendment reducing the $625 million authorization to $565 million for each fiscal year and reducing the reservation of appropriations for payments under section 2 form $25 million to $20 million for each fiscal year.

The conferees emphatically state that any increase in appropriations that occurs as a consequence of these increased authorizations for impact aid should not be at the expense of any other Federal education program.

Retirement deductions from the pay of judges of the United States Court of Military Appeals (sec. 1256)

The Senate bill included a provision (sec. 1016) that addresses the retirement benefits of the judges of the United States Court of Military Appeals, the highest judicial tribunal in the military justice system.

The House amendment contained no similar provision.

Currently, these judges—who are appointed for 15-year terms—are treated the same as civil servants for retirement purposes. The conferees agreed that the present system does not help preseve stability on the bench; not is it likely to help attract qualified candidates to sit on the Court in the future. The Senate provision would help improve this situation by affording these judges the same retirement benefits as those now available to Members of Congress.

The House recedes.

Compensation for injuries incurred in the performance of duty by members of the Civil Air Patrol (sec. 1258)

The Senate bill contained a provision (sec. 1012) that would authorize converage under the Federal Employees' Compensation Act (FECA) for junior Civil Air Patrol cadets between the ages of 18 and 21 for injury or death that occurs while performing an operational mission under the direction of the Air Force.

In addition, the Senate provision would increase the monthly pay rate used to compute compensation for disability or death for covered Civil Air Patrol members from the current figure of $300 to the pay rate of a GS-9, step 1, Federal civilian employee.

The House amendment contained no similar provision.

The House recedes.

Repeal of requirement for retiree suggestion program (sec. 1259)

The House amendment contained a provision (sec. 1116) that would repeal the requirement that the Secretary of Defense solicit suggestions from all military and civil service retirees upon their retirement.

The Senate bill contained no similar provision.

The Senate recedes.

Offshore drilling affecting naval operations (sec. 1260)

The House amendment contained a provision (sec. 1118) that would provide that the Secretary of the Navy report to the Committees on Armed Services of the Senate and House of Representatives on the potential effect on naval operations of any proposed lease by the Department of the Interior of offshore lands for oil or gas drilling.

The Senate bill had no similar provision.

The Senate recedes.

Restoration of Bedford Air Force Station, Virginia (sec. 1261)

Section 1110 of the House amendment would provide specific authority to the Secretary of the Air Force to remove abandoned structures and improvements at former Bedford Air Force Station, Virginia, and to restore the premises to their natural state as provided in the license from the United States Forest Service of the Department of Agriculture authorizing the use of that site.

The Senate bill contained no similar provision.

The Senate recedes.

Prohibition on purchase of certain typewriters (sec. 1262)

The House amendment contained a provision (Sec. 1108) prohibiting use of any funds available to the Department of Defense for procurement of manual typewriters manufactured by facilities located within states that are signatories to the Warsaw Pact. The Senate bill contained no similar provision.

The Senate recedes.

Award of campaign and service medals to certain persons (sec. 1263)

The Senate bill contained a provision (sec. 190B) that would permit the award of campaign and service medals to individuals whose civilian wartime service is determined to be military service for the purpose of receiving benefits from the Veterans Administration in accordance with regulations prescribed pursuant to section 401 of Public Law 95-202.

The House amendment contained no similar provision.

The House recedes.

Commemorative medal for families of American personnel missing in Southeast Asia (sec. 1264)

The Senate bill contained a provision (sec. 403) that would authorize the striking of a bronze medal in honor of those missing or otherwise unaccounted for in Southeast Asia for presentation to the next of kin. The medal would be designed by an American artist who had served in Vietnam during the conflict there.

The House amendment contained no similar provision.

The House recedes.

Name of School of Medicine at the Uniformed Services University of the Health Sciences (sec. 1265)

The House amendment contained a provision (sec. 1107) that would designate the School of Medicine at the Uniformed Services University of the Health Sciences as the "F. Edward Herbert School of Medicine."

The Senate bill contained no similar provision.

The Senate recedes.

Acceptance of voluntary services for military museums and family support programs (sec. 1266)

The House amendment contained a provision (sec. 1051) that would authorize the military services to accept the services of volunteers to work in military museums and in family support programs. These volunteers would be provided coverage in the event of accident or injury under the Federal Employees' Compensation Act and the Tort Claims Act, comparable to the coverage currently provided volunteers working in other Federal programs.

The Senate bill contained no similar provision.

The Senate recedes.

Report on proposed legislation for codification of certain provisions of law (sec. 1267)

The Senate bill contained a provision (sec. 1021) that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives, not later than January 1, 1984, proposed legislation for codification of those provisions that have been enacted during the past five years as general provisions as a part of the annual authorization or appropriations legislation. The Secretary would be required to submit only those provisions he considered appropriate for codification.

The House amendment contained no similar provision.

The House recedes with an amendment altering the date for submission of this report to February 1, 1984.

Technical amendments to title 10, United States Code (sec. 1268)

The Senate bill contained a provision (sec. 1031) that would make a number of minor technical changes to title 10, such as capitalization and punctuation.

The House amendment contained no similar provision.

The House recedes.

Serviceman's group life insurance and veterans' group life insurance coverage

The Senate bill contained a provision (sec. 190C) that would permit an additional $65,000 in optional coverage above the current $35,000 maximum level for total coverage of $100,000 under the Serviceman's Group Life Insurance and Veterans' Group Life Insurance programs.

The House amendment contained no similar provision.

The Senate recedes.

Sense of Congress resolution on U.S.-U.S.S.R. relations

The Senate bill contained a provision (sec. 401) that would express the sense of Congress that President Reagan and President Andropov should meet to discuss issues of U.S.-U.S.S.R. relations and to work toward mutual, equitable and verifiable reductions in nuclear arms.

The House amendment contained no similar provision.

Because the provision would be non-germane in the House, the Senate recedes.

Commemoration of the U.S.-Republic of Korea Mutual Defense Treaty

The Senate bill contained a provision (sec. 402) that would present findings and express the sense of the Congress concerning the 30th Anniversary of the Mutual Defense Treaty by the United States and the Republic of Korea.

The House amendment contained no similar provision.

Because the provision would be non-germane in the House, the Senate recedes.

Repeal of prohibition against consolidating functions of the military transportation commands

The Senate bill contained a provision (sec. 1003) to repeal the prohibition against the consolidation of any of the functions of the Military Transportation Commands (sec. 1110 of Public Law 97-252, Department of Defense Authorization Act, 1983).

The House amendment contained so similar provision.

The Senate recedes.

Protection of reports on military aircraft accident safety investigations

The Senate bill contained a provision (sec. 1009) that would provide statutory authority for the Secretary concerned to conduct safety investigations of military aircraft accidents. Furthermore, the provision would provide that certain defined types of information contained in the reports of such investigations could not be released outside the armed force concerned except for safety purposes nor could that information be subject to discovery or used in any judicial, administrative or disciplinary proceeding. The information that would be protected is limited to three types: (1) statements of witnesses given under a promise of confidentiality; (2) the portions of the report reflecting the deliberations of the investigators including their discussions, analysis, opinions, conclusions, findings and recommendations; and (3) life science reports that generally reflect the opinions of specially qualified personnel concerning possible medical, physiological, or psychological factors that may have been involved in the accident. The provision was based on an Executive Branch legislative request transmitted to Congress on April 27, 1983.

The Senate provision was designed to recognize the statute the longstanding and consistent practice of limiting disclosure of certain portions of military aircraft accident safety investigations as provided for in regulations of each of the military departments.

The House amendment contained no similar provision. However, the conferees note that almost identical legislation was requested in 1980 by the previous Administration and that hearings were held at that time by the House Armed Services Committee.

Although the conferees generally agree that some legislation may be needed on this subject, the conferees believe that this matter requires further study. Therefore, the Senate recedes.

To permit the required further study, the Secretary of Defense is requested to furnish before January 15, 1984, to the Committees on Armed Services of the Senate and House of Representatives, a report summarizing the existing practice in the military departments concerning release of information in aircraft accident safety investigation reports, the history of the development of that practice, a description of the types of information concerning aircraft accidents that are now and should continue to be releasable to the public, and his views regarding the scope of the provisions in the Senate bill and whether those provisions would merely continue or expand existing regulatory restrictions on the release of the type of information in question.

Requirement for proposals of substantive legislation pertaining to the Department of Defense to be submitted to the Committees on Armed Services

The Senate bill contained a provision (sec. 1022) that would require the Secretary of Defense to submit all legislative proposals conferring on the Department of Defense new or expanded authority or amending or superseding existing law related to programs administered by the Department of Defense only to the Committees on Armed Services of the Senate and House of Representatives. The provision would not apply to proposals that would limit or prohibit the expenditure of funds or to legislation not within the jurisdiction of the Committees on Armed Services of the Senate and House of Representatives.

The House amendment contained no similar provision.

Although the conferees were in agreement that legislative provisions should not appear in appropriation laws, they agreed that this view could be adequately transmitted in correspondence from the committee chairmen. The Senate recedes.

Requirement to furnish copies of Department of Defense regulations to Committees on Armed Services

The Senate bill contained a provision (sec. 1023) that would require that the Secretary of Defense furnish copies of all current and future regulations promulgated by the Department of Defense to the Committees on Armed Services of the Senate and House of Representatives.

The House amendment contained no similar provision.

Based upon assurances that the Defense Department would provide any material covered by the Senate bill which either committee requested, the Senate recedes.

Restriction on funds to countries not taking adequate measures to control illegal drug trafficking

Section 1030I of the Senate bill would restrict the availability of any funds authorized by this act to the governments of any country determined by the President as failing to take adequate measures to control illegal drug traffic.

The House amendment contained no similar provision.

Because the provision would be nongermane in the House, the Senate recedes.

Limitation on authority to consolidate certain functions within the Department of Defense

The House amendment contained a provision (sec. 1117) that would require prior authorization by the Congress of the consolidation or transfer of functions from the services to the Department of Defense, or tests leading thereto.

The Senate bill contained no similar provision.

The conferees agreed that although such prior authorization may be useful in congressional oversight of such consolidations and transfers, the Senate had held no hearings to support such a change.

Accordingly, the conferees agreed that the provision would be introduced as a separate bill in the House and Senate, and that the Committees on Armed Services would hold early hearings with the object of expeditious action in the respective bodies.

The House recedes.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
September 12, 1983.

Hon. THOMAS P. O'NEILL, JR.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5, Rule III of the Rules of the U.S. House of Representatives, I have the honor to transmit sealed envelopes received from The White House as follows:

(1) At 3:26 p.m. on Friday, August 12, 1983 and said to contain a message from the President transmitting H.R. 3564, an Act to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs, together with a veto message thereon.

(2) At 2:00 p.m. on Saturday, August 13, 1983 and said to contain a message from the President transmitting H.J. Res. 338, Joint

Resolution to correct Public Law 98-63 due to an error in the enrollment of H.R. 3069, together with a veto message thereon.

(3) At 2:50 p.m. on Thursday, August 18, 1983 and said to contain a message from the President transmitting the 11th Special Message for FY 1983 under the Impoundment Control Act of 1974.

(4) At 3:14 p.m. on Wednesday, August 31, 1983 and said to contain a message from the President transmitting his recommendations under the Federal Pay Comparability Act of 1970.

(5) At 3:31 p.m. on Thursday, September 1, 1983 and said to contain a message from the President whereby he transmits a report on agencies and units of agencies excluded from the Federal Merit Pay System.

(6) At 2:08 on Thursday, September 8, 1983 and said to contain a message from the President whereby he transmits the third annual Synfuels Report.

With kind regards, I am,

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

CORRECTING PUBLIC LAW 98-63, SUPPLEMENTAL APPROPRIATIONS, 1983—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-94)

The SPEAKER laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I am returning herewith without my approval H.J. Res. 338. This bill was originally included in the 1983 Supplemental Appropriation bill, which I recently signed (P.L. 98-63), but was separately passed because it was inadvertently omitted from the enrolled version of that bill. Normally such bills passed as a result of enrollment errors are signed as a matter of course. I am taking this unusual action because of the extraordinarily important constitutional principles raised by this particular measure.

H.J. Res. 338 appropriates $20 million for the purpose of providing a source of funds from which the Secretary of Education could comply with the June 30, 1983 order issued in *United States* v. *Board of Education of the City of Chicago,* No. 80C5124 (N.D. Ill.), if the order is upheld on appeal. The case was brought by the United States to desegregate the Chicago school system. The court ordered the United States to provide a minimum of $14.6 million and froze more than $250 million appropriated by Congress for other educational programs in order to meet expenses incurred by the Chicago Board of Education in carrying out its constitutional responsibilities to desegregate its school system. The court enjoined the Department of Education from providing grants to hundreds of other worthy grantees under several programs of national significance, including grants intended to facilitate local desegregation efforts and others intended to follow up on the report of the National Commission on Excellence in Education.

I well understand the reasons motivating the Congress to pass this legislation. Under the order of the court in Chicago, other education programs throughout the country were denied the funding they rightfully expected to receive. The Chicago court's ostensible purpose in issuing this order was to provide a source of funds for the implementation of its decree. Congress hoped by the passage of this legislation to induce the court to release the funds that were impounded by the court. But I believe that the better course is to seek swift reversal of the district court's order.

This veto is not premised on a desire to protect the Federal budget. It is based upon my conviction that the Constitution and its process of separated powers and checks and balances does not permit the judiciary to determine spending priorities or to reallocate funds appropriated by Congress. Those are exclusively the functions of the legislative and executive branches, and the use of judicial decrees to assume such powers raises problems of profound constitutional significance.

If finally ordered to pay additional funds to the Board of Education of the city of Chicago, the Federal Government will of course do so. It is inappropriate, however, for a court to withhold millions of dollars worth of unrelated and necessary education programs to enforce its orders.

Under these circumstances, I must reluctantly veto this bill.

RONALD REAGAN.

THE WHITE HOUSE, *August 13, 1983.*

□ 1210

The SPEAKER. The objections of the President will be spread at large upon the Journal, and the message and joint resolution will be printed as a House document.

The Chair recognizes the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Speaker, I ask unanimous consent that further consideration of the veto message on the joint resolution (H.J. Res. 338) be postponed until Wednesday, September 21, 1983.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

REQUIRING EARLIER ANNOUNCEMENT OF 1984-CROP FEED GRAIN PROGRAM AND 1985-CROP WHEAT PROGRAM—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-95)

The SPEAKER laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I am returning herewith without my approval H.R. 3564, "To require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs."

H.R. 3564 directs the Secretary of Agriculture to announce the 1984 and 1985 feed grain programs no later than September 30 of the preceding year and to announce the 1985 wheat program no later than July 1, 1984. Current law sets November 15 as the announcement date for feed grains; the wheat program announcement date in current law is August 15. Thus, in each case the announcements would have to be made approximately six weeks earlier than the current law now requires.

The main purpose of acreage adjustment programs is to assist producers in adjusting supplies to meet demand. When projecting the supply/demand situation for the next crop year, it is essential to have the best possible information about the current crop year, while giving due consideration to producers' planning needs. Sound estimates of production as well as timely announcements are a vital component for designing successful programs. Good program design ultimately serves the best interests of producers, consumers, and taxpayers.

The Administration is sympathetic to the need for making acreage adjustment program announcements as early as possible. When conditions warrant, the Secretary of Agriculture will continue the ongoing practice of announcing commodity programs before the statutory deadlines. However, when the appropriate program decision is not obvious, it is essential that the Secretary retain the discretion to announce wheat as late as August 15 and feed grains as late as November 15.

This flexibility will enable the Secretary to respond quickly to unforeseen circumstances, such as drought or early frost. Without this flexibility, the mandate in H.R. 3564 could either exacerbate a surplus supply situation and needlessly increase budget outlays by substantial amounts or unnecessarily create a grain shortage and cause food prices to increase sharply.

RONALD REAGAN.

THE WHITE HOUSE, *August 12, 1983.*

The SPEAKER. The objections of the President will be spread at large upon the Journal, and the message and bill will be printed as a House document.

The Chair recognizes the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that further consideration of the veto message on the

bill, H.R. 3564, be postponed until Tuesday, September 20, 1983.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

REPORT OF NEW DEFERRAL OF BUDGET AUTHORITY FOR THE RAILROAD RETIREMENT BOARD—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-96)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

(For message, see proceedings of the Senate of today, Monday, Sept. 12, 1983.)

REQUIREMENT FOR ADJUSTMENT IN FEDERAL WHITE-COLLAR PAY IN OCTOBER 1983—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-97)

The SPEAKER pro tempore (Mr. FOLEY) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Post Office and Civil Service and ordered to be printed:

(For message, see proceedings of the Senate of today, Monday, Sept. 12, 1983.)

EXCLUSION OF CERTAIN AGENCIES AND UNITS OF AGENCIES FROM COVERAGE UNDER THE MERIT PAY SYSTEM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-98)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read, and, together with the accompanying papers, without objection, referred to the Committee on Post Office and Civil Service and ordered to be printed:

(For message, see proceedings of the Senate of today, Monday, Sept. 12, 1983.)

□ 1220

ANNUAL REPORT ON ACTIVITIES UNDERTAKEN BY THE U.S. SYNTHETIC FUELS CORPORATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Banking, Finance and Urban Affairs and the Committee on Energy and Commerce:

(For message, see proceedings of the Senate of today, Monday, Sept. 12, 1983.)

ANNOUNCEMENTS BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that pursuant to House Resolution 180, agreed to on August 3, 1983, the Speaker did on August 4, 1983, make certification to the U.S. district attorney for the District of Columbia as required by House Resolution 180, reciting the additional facts pertinent to the contempt citation of Anne M. (Gorsuch) Burford.

The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled bill on Friday, August 5, 1983:

H.R. 1646. An act to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes.

And the following enrolled bills on Saturday, August 13, 1983:

H.R. 1372. An act to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska;

H.R. 2895. An act to designate the Federal building and United States Courthouse at 450 Golden Gate Avenue, San Francisco, Calif., as the Phillip Burton Federal Building and the U.S. Courthouse;

H.R. 3190. An act to establish an improved program for extra long staple cotton;

H.R. 3232. An act to amend title 28 of the United States Code to authorize payment of travel and transportation expenses of newly appointed special agents of the Department of Justice;

H.R. 3409. An act to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State;

H.R. 3549. An act to amend the bankruptcy rules with respect to providing notice;

H.R. 3677. An act to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program;

H.J. Res. 297. Joint resolution providing for appointment of Jeannine Smith Clark as a citizen of the Board of Regents of the Smithsonian Institution;

S. 46. An act to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping";

S. 1696. An act authorizing three additional Assistant Administrators of the Environmental Protection Agency;

S. 1797. An act to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building";

S.J. Res. 85. Joint resolution to designate September 26, 1983, as "National Historically Black Colleges Day";

S.J. Res. 98. Joint resolution to designate October 2 through October 9, 1983, as "National Housing Week";

S.J. Res. 116. Joint resolution to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week"; and

S.J. Res. 149. Joint resolution to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States.

KOREAN AIR LINES FLIGHT 007

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, Korean Air Lines has four flights each week from New York City to Seoul, Korea. The flights operate on Sunday, Tuesday, Thursday, and Friday, departing at 11:50 p.m.

For about 8 days, I was scheduled to be on Korean Air Lines flight 007 leaving New York City on Tuesday, August 30, 11:50 p.m., for Seoul, Korea, to attend a conference celebrating the 30th anniversary of the mutual defense treaty between the United States and the Republic of Korea.

An invitation from Dr. Kala Stroup, the new president of Murray State University in my district, to moderate over a Tennessee Valley Authority symposium on Tuesday morning, August 30, was accepted by my staff and me. My being in Murray, Ky., that day caused my executive assistant, Lorraine Grant, to cancel my reservations on Korean Air Lines flight 007 in favor of Korean Air Lines flight 015 from Los Angeles by way of Nashville and St. Louis.

So, instead of being the 270th person to be shot down by the Soviet Union over the Sea of Japan on early August 31, I arrived safely in Seoul.

Natually, we are appalled at the coldblooded killing of our colleague, Congressman LARRY MCDONALD, and 268 other people.

The good that can come from this tragedy is that we in the U.S. Congress can now recognize more clearly what the people of Afghanistan, Poland, and many other countries already knew about the Soviet Union.

The murdering of 269 innocent men, women, and children, after thinking about it for 2½ hours, is nothing new to a Soviet Union regime which has killed at least 20 million of its own citizens since 1917.

KOREAN AIR LINES TRAGEDY

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, in the wake of the Korean Air Lines tragedy I am compelled once again to caution my colleagues to remain ever mindful of the insidious Soviet threat.

The shooting down of the Korean Ait Lines flight carrying 269 passengers, including 61 Americans, one of whom was a U.S. Congressman, our colleague, LARRY MCDONALD, demonstrates that the Soviets are even more nefarious than most can comprehend.

This is another horrifying reminder of the threat of communism and of the perverse Soviet mentality.

The Soviets have the distinction of being the only nation in the world to have shot down not one but two unarmed civilian aircraft. In 1978 the Soviets fired two heat-seeking missiles at a Korean jetliner, killing two and forcing the aircraft to crash land.

In their inimitable way the Soviets not only denied the incident, they brazenly sent the South Korean Government a bill for $100,000 to cover the costs of the rescue mission.

In this most recent incident 269 innocent people were given the death sentence without cause and without mercy. This Stalinistic act may be the most vivid demonstration of the Soviet mentality which rules that nation and which has designs on subjugating the rest of the world.

The Korean Air Lines massacre must not be forgotten. We must hold it up as a symbol of the Soviet barbarism. We must channel our anger and our sorrow into a firmer commitment to persevere in our struggle against tyranny.

I deplore this brutal, murderous, barbaric Soviet action and I will support the congressional resolution of condemnation.

SOVIET DESTRUCTION OF KOREAN AIR LINES FLIGHT 007

(Mr. BRITT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Korean Air Lines flight 007 reminds us all in a chilling way of the unreliability of the Soviet leadership. It was an outrageous act of international terrorism. I urge my colleagues to join in a resolution condemning this act of terror which took the lives of 269 innocent civilians including a Member of this body.

I also urge the President to continue his course of indignant, but responsible, reaction to the Soviet provocation. While our restrained response leaves us all unsatisfied in an emotional sense, it has intensified the withering fire of world opinion upon the Soviets which is the most painful and costly sanction that can be inflicted upon them. While retribution would be viscerally satisfying, it is the cold glare of truth that punishes hypocrisy most.

Our responsibility and their callous and indifferent reaction to events surrounding the destruction of flights 007 strips naked Soviet posturing as a nation of peace.

□ 1230

THE GROWING MILK SURPLUS

(Mr. CLARKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLARKE. Mr. Speaker, this country is faced with a steadily growing surplus of milk. For fiscal 1983 Government purchases of milk are estimated at 16.3 billion pounds—an increase of 2.5 billion pounds over fiscal 1982. This will cost the Federal Government $1.4 billion more than its milk purchases in the last fiscal year.

Something has to be done and the simplest and best solution is to reduce the present high support price of milk by $1 to $1.50 per hundredweight.

This is a simple and easy-to-understand approach which is much better than the temporary diversion program contained in H.R. 1875. The diversion program would pay certain milk producers not to produce milk under a complicated formula for temporarily cutting back their production. The diversion payment would be financed by a 50-cent-per-hundredweight charge on all milk producers in the United States regardless of whether or not they are producing surplus milk. The diversion program would last for only 15 months. After its termination dairy farmers who benefited could return to their former production levels—and some of them probably would.

Meanwhile a lot of other dairymen will be trying to offset their loss of income due to the 50-cent-per-hundredweight tax by increasing the number of cows in their herds. This, of course, will add to the surplus.

The only effective way to cut back the dairy surplus is to reduce the support price for milk by $1 to $1.50 per hundredweight right now.

PERMISSION FOR SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS AND HUMAN RESOURCES OF COMMITTEE ON GOVERNMENT OPERATIONS TO SIT DURING THE 5-MINUTE RULE ON TUESDAY, SEPTEMBER 13, AND WEDNESDAY SEPTEMBER 14, 1983

Mr. WEISS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Intergovernmental Relations and Human Resources of the Committee on Government Operations be permitted to meet during the 5-minute rule on Tuesday, September 13 and Wednesday, September 14, 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. LOTT. Mr. Speaker, reserving the right to object, I would like to inquire under my reservation whether or not the minority has been consulted.

Mr. WEISS. Mr. Speaker, will the gentleman yield to me?

Mr. LOTT. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding.

Mr. Speaker, the minority has been fully consulted. The gentleman from Pennsylvania (Mr. WALKER) is on the floor and he and I have worked this out.

Mr. LOTT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

VENGEANCE IS NOT THE ANSWER

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks).

Mr. GLICKMAN. Mr. Speaker, the world has responded to the shooting down of Korean Air Lines flight 007 with rightful horror. There is no explanation for that tragedy; there never could be reason enough for such a merciless act.

Still, thus far, in spite of pressures to seek revenge from many of those who have been his strongest supporters, the President has responded cautiously but sternly. He has resisted acts of revenge and steps which would only hurt Americans. The Bible says: "Vengeance is mine * * *, sayeth the Lord." The President has been wise to heed that scriptural guidance. I urge him to continue to do so and to avoid the temptation to pursue a course of vengeance ourselves.

CUTTING OFF FOREIGN AID FOR CERTAIN MEMBERS OF THE UNITED NATIONS

(Mr. HUCKABY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUCKABY. Mr. Speaker, this week the United States will be pursuing a resolution in the United Nations condemning the Russians for the barbaric action that they took in shooting down flight 007.

Today, I am introducing a piece of legislation which would prohibit future U.S. foreign aid tax dollars going to any country in the world that

fails to support America's position in the United Nations.

Mr. Speaker, no issue in recent memory has cut to the heart and the soul of Americans. Surely we do not want tax dollars going in the form of foreign aid to countries that cannot support our position against this barbaric action that the Russians have taken.

CHARLEY HAYES IS OUR LEADER; WE SHALL NOT BE MOVED

(Mr. SIMON asked as was given permission to address the House for 1 minute.)

Mr. SIMON. Mr. Speaker, I join my colleagues in their indignation at the Soviet action but I want to shift the subject for just a moment.

We had, a few moments ago, sworn in a new Member of the House. I have known the new Member, CHARLEY HAYES, for perhaps 25 years. I recall when my children were perhaps 6 and 3, going to a meeting sponsored by his union where we all sang a song, and I would sing it, Mr. Speaker, but I am afraid you would rule as the Speaker O'NEILL did against SILVIO CONTE here, but we sang the song, "Charley Hayes is our leader; we shall not be moved."

And our children sang that for years.

CHARLES HAYES is going to be a very substantial Member of this House. I think he is going to help move us in the right direction. I hope all of you will have a chance to get acquainted with him soon. I think he will be a positive, constructive, forceful person in this House who will add luster to the House of Representatives.

A BARBARIC ACT—IT MUST NOT BE REPEATED

(Mr. TALLON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TALLON. Mr. Speaker, I rise today to join the House of Representatives in deploring this barbaric act by the Soviet Union and in expressing my condolences to the loved ones of the innocent victims of the crash. My deepest sympathies go out to the family of my colleage, LARRY MCDONALD, and to the families of the other 268 victims of the crash.

While the world expressed shock and anger in the immediate aftermath of the Soviet action, our outrage has been compounded by the subsequent disclosures of the facts surrounding the incident. It has become impossible to consider the Soviet action as anything other than coldblooded murder.

The Soviets were undoubtedly attacking a civilian airliner which could not be mistaken for a military plane and which could in no way pose a threat to Soviet territory.

And the Soviet Union has further weakened its position by its deceitful and contradictory stories on this issue and by its failure to even apologize for its action.

As this Congress reconvenes, we must act swiftly to condemn the Soviet action and to take corrective and retaliatory measures. At a minimum, we must seek reparations from the Soviets for the families of the victims of the crash. We must suspend certain cultural, scientific, and diplomatic exchanges with the Soviets. We must also work with other nations to curb Soviet civil aviation in the West.

Above all, we must insure that such a horrible occurrence must not repeat itself. In this period of grief for the families of the innocent victims of the crash, they should at least have the slight consolation that such a tragedy will never occur again.

GOD CONTINUES TO CALL US TO BE MAKERS OF PEACE

(Mr. FAUNTROY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAUNTROY. Mr. Speaker, I come to the well when I know that many of our colleagues will want to express the legitimate outrage of the American people and people of conscience all over this world at the wanton murder of 269 people including our colleague, LARRY MCDONALD.

As we seek, however, an appropriate response to that heinous act, I want to stand here in my role as a minister of the Gospel to remind our Nation and our colleagues that this is a nation under God. In God we trust. We trust in a God who did not promise we would not have great difficulty and the forces of evil would not rise and cause us great pain.

He did not promise He would not send us into the fiery furnace but He did promise to be with us in that fiery furnace.

He did not promise that we would not be on tumultuous seas from time to time, but He promised to be in the ship with us.

And in the ship to protect us and if it got too much for us, to speak His peace, "Be still."

I simply hope that in response to this heinous act we will remember that and that we will hear our Judeo-Christian heritage one who said, "Love your enemies and do good to them who curse you and pray for them that spite and use you"; that we will trust in God who through Isaiah said:

If you do away with the yoke of oppression, with the pointing finger and malicious talk, and if you spend yourselves on behalf of the hungry and satisfy the needs of the oppressed, then your light will rise in the darkness, and your night will become like the noonday. The Lord will guide you always.

So said the Prophet Isaiah.

Today, God continues to call upon us to be peacemakers.

1240

THE REAL LESSON BEHIND KOREAN JETLINER DISASTER

(Mr. MARKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARKEY. Mr. Speaker, nobody deplores the shooting down of the Korean airliner more than I do. This was a brutal act by the Soviet Union, a despicable act that should not be left unpunished.

But as we formulate and implement our punishment, let us keep one thing in mind. We do not want the punishment to hurt us as much or more than it does the Soviets. We do not punish the Soviets by continuing the nuclear arms race. We only punish ourselves.

And we certainly do not punish the Soviets by wasting money on defense. We do not say: We will teach you Yuriy Andropov; we will throw away $20 billion on an MX missile system this country does not need. We only punish ourselves.

No, in formulating our punishment we need to put on our thinking hats, not our cowboy hats.

Remember, Soviet adventurism during the Cuban missile crisis shook us all up as the world edged to the brink of nuclear war. But it made us realize the need for arms control and 9 months later we had a limited test ban treaty.

Today, the Soviet shooting down of a Korean jetliner has shaken us up again and created another international crisis.

I hope that we can again realize the real lesson from this incident, the need for arms control and to negotiate an end to the nuclear arms race.

A MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agreed to the following resolution:

S. RES. 209

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of the Honorable HENRY M. JACKSON, late a Senator from the State of Washington.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate recesses today, it recess as a further mark of respect to the memory of the deceased.

EXPRESSING SENSE OF CONGRESS ON THE DEATH OF THE HONORABLE HENRY M. JACKSON, U.S. SENATOR

Mr. FOLEY. Mr. Speaker, I will offer a resolution, and I intend to offer a similar resolution in the House tomorrow, at which time a number of Members will wish to express their sympathy and condolences on the death of the distinguished Senator.

Mr. Speaker, I offer a privileged resolution (H. Res. 306) on the death of the late Honorable Senator HENRY M. JACKSON.

The Clerk read the resolution, as follows:

H. RES. 306

Resolved, That the House has heard with profound sorrow of the death of the Honorable HENRY M. JACKSON, a Senator of the United States from the State of Washington.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased Senator.

Resolved, That when the House adjourns today, it adjourn as a further mark of respect to the memory of the deceased Senator.

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEGISLATION TO INVOKE SECTION 4(a)(1) OF WAR POWERS ACT REQUIRING PRESIDENTIAL REPORT TO CONGRESS

(Mr. DOWNEY of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY of New York. Mr. Speaker, I do not know whether the gentleman is for keeping the troops in Lebanon or removing them. It is a very difficult and onerous task to decide what is right.

Today I am introducing legislation to invoke section 4(a)(1) of the war powers reolution requiring a Presidential report to Congress on the commitment of U.S. forces in Lebanon.

The time has come to bring the debate concerning the President's involvement of U.S. Armed Forces in the hostilities in Lebanon before the Congress. We must bring the President's commitment of our forces in Lebanon within the scope of the law.

Section 4(a)(1) of the war powers resolution requires the President to submit a written report within 48 hours whenever U.S. Armed Forces are introduced without a declaration of war into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances.

It is in my opinion clearly indicated today.

The war powers resolution, passed during the waning hours of the Vietnam war, also requires Congress to share responsibility for U.S. military involvement. Something I believe we should do.

One needs only to have read the morning headlines today to understand the U.S. Armed Forces are involved in what is rapidly becoming an explosive international situation. And no reasonable person can view our involvement as anything less than the commitment of troops to a hostile situation where involvement is imminent.

A TRIBUTE TO THE LATE U.S. MARINE CPL. PEDRO J. VALLE RAMOS

(Mr. CORRADA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORRADA. Mr. Speaker, it was with a deep sense of grief and anguish that I, as well as the people of Puerto Rico, received the news that my constituent, U.S. Marine Cpl. Pedro J. Valle Ramos, was killed in Lebanon while on duty there as part of a peacekeeping contingent of military forces of the United States, Great Britain, France, and Italy.

Before flying back to Washington, I paid a visit to the parents of this outstanding Puerto Rican who, as a proud citizen of the United States as we Puerto Ricans are, voluntarily joined the U.S. Marines to help preserve freedom, justice, and democracy in our country and abroad. Mr. Santos Valle, Pedro's father, and Mrs. Amelia Ramos, his mother, while terribly sad by the death of their son, realize that he did not die in vain. Those who die for peace, freedom, and democracy are contributing to the preservation of the greatest goals of the United States and Puerto Rico, as part of this country.

My prayers and condolences go to the family of this proud Puerto Rican and proud American, Marine Cpl. Pedro J. Valle Ramos.

THE PRESIDENT SHOULD HAVE STANDBY AUTHORITY TO DEAL WITH AN ECONOMIC CRISIS.

(Mr. PERKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PERKINS. Mr. Speaker, on behalf of the people of my district, I want to express their anger and outrage at the shooting down by the Soviet Union of an unarmed, innocent passenger airliner carrying 269 men, women, and children—including some 60 American citizens.

Nothing, it seems to me, has so outraged the people of this Nation since the sinking of the ocean liner, the *Lusitania*, by the Kaiser's German U-boats nearly 70 years ago.

These are perilous days for us on many fronts. In Lebanon, four fine young marines have been killed and more than a score of others wounded by armaments supplied at least indirectly by the Soviet Union.

And in Central America, the Soviet Union continues to stir up trouble for sovereign, independent nations, either directly or through the agency of willing puppet regimes.

The fact is that American citizens are being shot at and killed, and that our relations with the Soviet Union are at the most dangerous point since the Cuba missile crisis 20 years ago.

Faced with this situation, it is imperative that this Congress look to the defenses of this country and its interests around the world. If that means more funds and more expenditures, we will just have to dig down and come up with the money.

And while we are about it, we might as well give the President some standby authority to deal with the economic crisis upon us, as well as with the military and diplomatic crises.

People in my district are in serious economic straits, notwithstanding all of the ballyhoo that recovery is underway. They tell us that the interest rates are declining—but somehow the people who charge the high interest and the people who have to pay the rates have not gotten the word yet. People are still going bankrupt.

I think we ought to give the President some standby authority to control the interest rates that are crippling our ability to meet the military threat from abroad.

CONGRESSMAN McCOLLUM'S UNIQUE EFFORTS TO ALLEVIATE SUFFERING IN EL SALVADOR

(Mr. McNULTY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McNULTY. Mr. Speaker, I would like to call the House's attention to the recent actions of our colleague BILL MCCOLLUM, of the Fifth District of Florida. We all know BILL as a thoughtful and congenial legislator, but the homeless people of El Salvador—los desplazados de los campimientos—know him as a man of mercy, and a man of his word.

Congressman MCCOLLUM returned home from an official visit to El Salvador in July, and he was affected by what he had seen. Thousands of displaced Salvadorans, mostly women and children, were crowded into the campimientos. They lacked food, they frequently lacked running water, and they lacked adequate medical supplies. The war in El Salvador has displaced some 250,000 people, and regardless of which U.S. policy course one favors in

Central America, the human suffering is an inescapable fact. The gentleman from Florida understood that, and he decided to do something about it.

Upon his return, Congressman MCCOLLUM contacted officials of Project Hope and several of the largest American pharmaceutical companies. He then contacted a charter airline service in his district, which offered the services of its pilots and the use of a 1945 model C-47 cargo plane. The result was a shipment during the first week in August of some 5,000 pounds of medical supplies—all donated by the pharmaceutical companies—for the desplezados. The supplies were welcomed and very much needed. The gentleman from Florida has since undertaken efforts toward similar, future shipments.

I hope my colleagues today will join me in saying thanks to the gentleman from Florida for his humanitarian act, and in urging him to continue his unique efforts to alleviate the suffering in El Salvador.

□ 1250

FLIGHT 007 AND CRISIS MANAGEMENT

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, I am certain that all of my colleagues in the House will join me in sending our deepest sympathy to the families of those who lost loved ones in the tragic downing of Korean Air Lines flight 007. My heart goes out to the leaders of the 16 nations whose citizens perished in the cruel and barbarous attack on the unarmed commercial aircraft. This brutal act is a crime against all humanity. It is a violation of the most fundamental rules of the air on which all the nations of the world—including the Soviet Union—depend in the busy, crowded skies of the jet age. The Soviet leaders obviously put a great premium on preventing the escape of an "intruder." They appear to think little of protecting innocent human lives. I was astounded by Soviet Foreign Minister Gromyko's recent comments. He brazenly threatened to kill more men, women, and children should another civilian aircraft make the same mistake.

Although I share the anger and dismay which all of my colleagues feel, I believe that the President's handling of the crisis was proper. Our response was firm, but measured.

Although I am shocked by this incident, I believe that our Government should not let this incident create a military confrontation between our country and the Soviet Union. Our ultimate goal has been, and should continue to be, reducing the possibility of a nuclear holocaust, along with a cutback in the weapons of destruction which are now in the arsenals of both nations. We cannot let this crisis stand in the way of the President's efforts to negotiate major arms reductions with the Soviets in Geneva. We must continue to deal with the reality of the Soviet Union. Wish as we might, that nation will not simply go away.

The incident does, however, point to the need for verification of all agreements with the Soviet Union. If the downing of the Korean airliner is any indication of Soviet attitudes concerning signed international agreements, then all of us in the free world should be concerned.

DON'T DESTROY EXPORT CONTROLS

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, the brutal Soviet attack on flight 007 is fresh in our minds. That tragic incident reminded us that the President—any President—must have nonviolent means to retaliate and register our revulsion when other countries violate the law of nations.

The Export Administration Act which expires on September 30, gives the President this capability. We will shortly consider amendments to the act which severely restrict the President's ability to retaliate and impose foreign policy export controls.

These same amendment, before the House in H.R. 3231, will make it very difficult, if not impossible, to strengthen controls on the export of high technology to the Soviet Union. The evidence of a massive Soviet and East European campaign to steal advanced technology is confirmed by United States and foreign intelligence services.

We need to strengthen national security export controls—not relax them. When H.R. 3231 comes before the House, I urge my colleagues to consider and support amendments to H.R. 3231 which strengthen export controls. As it now stands, the bill would eliminate the licensing of U.S. exports to most NATO countries and Japan. It would prohibit the application of controls to foreign subsidiaries.

Not long ago Tass attacked U.S. export controls. As we ponder our reaction to the airplane wreckage washing up on Japan's coast, we should be firm in our resolve to thwart the activities of Soviet "technologies spies" to divert our high technology to enhance their military machine.

CONGRESS SHOULD STAND BEHIND THE PRESIDENT ON HIS HANDLING OF KAL TRAGEDY

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, I also rise to condemn the atrocious act perpetrated on the human race by the Soviets in shooting down the Korean airliner. I think it only points out many of the instances that many of us have been preaching over the years—that international Soviet-brand communism is nothing but liars and cheats, inhuman barbarians that have no respect for human rights and no respect for human life itself.

I would also like to criticize some of my fellow conservative colleagues both in the Congress and outside of the Congress for criticizing our President for not being strong enough.

Mr. Speaker, I remember when one previous administration used a lot of rhetoric and a lot of grandstanding when the Russians invaded Afghanistan and then a few weeks later it was all forgotten about. We are not going to let this be forgotten about. The President is doing everything in his power. He needs the U.S. Congress to stand behind him so that he can rally the rest of the free world to embarrass forever the act of atrocity that the Russians have perpetrated on the human race. We should all support him 100 percent.

THE SITUATION IN LEBANON

(Mr. COATS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COATS. Mr. Speaker, the voices of many Members of Congress have been heard this morning, rightfully focusing on the atrocity committed by the Soviets in shooting down the Korean Air Line 007. I certainly add my support to all that has been said.

However, I think it is also important that we not ignore another serious situation that exists in this world that is having and will have serious consequences for the United States.

I am referring to the situation in Lebanon. I have been observing for the last several weeks, with growing concern, the deteriorating situation that currently exists in Beirut and the jeopardy of U.S. troops stationed there. Our current policy drastically limits the U.S. response to the armed hostilities, and I find this policy unacceptable. I am calling upon the President and I am calling upon Members of Congress, either we should grant the authority to our troops to take the necessary steps to secure the peace in Lebanon and to provide for their

safety, or we should remove them from the hostilities. To merely tell our troops to duck when the bullets start flying is not an acceptable policy and makes a mockery of the term "peacekeeping force" and does nothing to secure a much needed peace for this troubled part of the world.

QUESTIONS THE AMERICAN PEOPLE ARE ASKING

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker and Members, as we return for this fall session of Congress, I think we ought to note that the American people are watching and they are asking us a lot of questions. I have heard them in my district over the past few weeks; I hope you have heard them in yours.

In a parochial sense, in my district my dairy farmers question how a Secretary of Agriculture can recommend a veto of a bill which passes both Houses of Congress by unanimous consent, when that veto will only result in the further production of surplus milk in this country.

They also question how a Congress, after 3 years, can still fail to resolve that dairy surplus issue.

My constituents question what really is happening in Central America. Liberal and conservative alike, they would simply like to know exactly what is going on down there, what exactly our goals are and what our long-term plans are for that region.

Third, my constituents question why Americans can be killed in Lebanon, without any firm decision on our part as a government. They wonder why we do not either pull out, or else give our troops the power to secure peace and to protect their own lives.

My constituents question how anybody in this Congress can in the future trust and believe in the "good faith intentions" of a country which willingly shoots down 269 innocent civilians. But most of all, they question how anybody in this Congress and anybody in this Government can actually say we are concerned about an economic recovery, that we are concerned about the long-term future of America, both individually and as a country, when we fail as a Congress to work together to deal with the deficit that confronts us.

My colleagues, there are a lot of questions out there from our constituents. Will we provide them the answers?

AN EVERLASTING REMINDER OF THE KAL TRAGEDY

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GEKAS. Mr. Speaker and Members of the House, I have with me two documents, one, a joint resolution, which would condemn the Soviet Union for the action taken against the Korean jet which cost the lives of so many, and I have another document, a listing of the fellow Americans who lost their lives in the barbarous act.

The joint resolution would do what every American seeks to have done, namely to condemn the action in the strongest possible terms and at the same time to encourage support for the President of the United States in the initiatives which he has undertaken to make certain that the world will ever remember the atrocity that happened just a week ago.

The list of the people, our follow Americans, of course, contains the name of our colleague, Congressman MCDONALD. To the families of all of those who lost their lives, this document will enter into the CONGRESSIONAL RECORD as an everlasting reminder of the tragedy itself.

[From the Washington Post, Sept. 3, 1983]

U.S. TOLL AT 52, WIDENING CIRCLE OF GRIEF, CHANCE

(By Howard Kurtz and Mary Battiata)

At least 52-Americans, including a 27-year-old specialist in Chinese law from Bethesda, were among the 269 persons who died aboard the Korean Air Lines flight to Seoul that U.S. officials say was shot down by a Soviet jet fighter this week.

After a day of conflicting accounts about passenger lists, Korean Air Lines spokesman J. H. Kim in Los Angeles said the airline had confirmed yesterday that the American victims included 30 females, 20 males and two infants—a figure nearly twice as high as previous estimates.

The airline's office in Seoul still is trying to determine whether other victims with Korean or Chinese surnames also might be American citizens. Kim said, The Associated Press identified 17 additional persons with such surnames as having home addresses in the United States, but their citizenship remained unknown.

Also on the flight, Kim said, were 78 Koreans, 35 Chinese, 27 Japanese, 16 Filipinos, 10 Canadians, six Thais, four Australians and one each from Sweden, India and Malaysia, along with nine persons who have not yet been identified. The plane also carried 29 Korean crew members, he said.

As shocked friends and relatives absorbed the tragic news, more details emerged about the circumstances and coincidences that put their loved ones aboard Flight 007.

John Oldham, a recent graduate of Columbia Law School who grew up on Falmouth Rd. in Bethesda, down the street from where Secretary of State George P. Shultz now lives, was headed for Peking for a year of studying Chinese language and law at Beijing University.

THE MURDEROUS CHARACTER OF THE RULERS OF THE SOVIET EMPIRE

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, the thing that I cannot figure out is why everybody was so surprised that the Soviets would shoot down a defenseless civilian airliner. Have we not had ample evidence over the years about the people who rule the Soviet Empire?

Has everybody forgotten about Hungary?

Has everybody forgotten about Czechoslovakia?

Poland?

Afghanistan?

Has everybody forgotten that the Soviet Government murdered 20 million of its own subjects in the 1920's and 1930's? What are 269 innocent civilians to the Russian leadership?

By all means, we must negotiate with the Russians. We must maintain

communications. But also, we must remember who these people are. They do not share our values. And they are willing to murder, and then lie about it, when it suits their purposes.

□ 1300

VUCANOVICH EXPRESSES OUTRAGE AT SOVIET ATTACK ON KOREAN AIRLINER

(Mrs. VUCANOVICH asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. VUCANOVICH. Mr. Speaker, I rise today to express my outrage and horror at the vicious Soviet attack a few weeks ago on a defenseless commercial airliner. In a moment, the Government of the Soviet Union revealed to the world its true nature, and it continues to demonstrate its callousness by refusing to provide to the world an explanation of why this tragedy took place.

The Korean Air Lines 747 posed no threat in any form to the Soviet Union, its territories, its people, or its Government. To attack and kill in this manner is to reveal a callousness and lack of regard for human life that simply has no place in a civilized world.

The United States and her allies in the free world should take notice of this event, and restructure our dealings with the Soviets to reflect a new understanding of the motivations and intentions of this apparently distrustful and violent government. Sanctions must be imposed. The Soviet Union has, by this act, violated not only the rules of civilized conduct by which our world lives, but also the sanctity of life itself. The conclusion we must draw, as a free nation, is that the Government of the Soviet Union cannot be trusted to conduct their affairs in a peaceful or civilized manner. A policy of caution should be followed in all dealings with the Soviets, particularly where the security interests of the United States and her allies are concerned.

I will support any and all congressional resolutions that condemn this barbarous and wanton action and call upon the Soviet Union to acknowledge its responsibility for this act, assist international efforts to recover the remains of the victims, provide compensation to the families of the victims, and take necessary steps to insure that such an act will never occur again.

SOVIET HARASSMENT AND BARBARITY CONTINUES

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, I join in the outrage at the downing of the Korean jetliner. I think in a response it is fine to condemn, it is fine to show compassion for those who were killed, and many others, and I think the President has handled this issue and this subject very well.

However, Mr. Speaker, the Soviet Union has failed to take any steps to atone for what they did. This morning, an American diplomat was expelled from the Soviet Union. Their harassment and barbarity continues. I would like to see the United States cut off all credits to the Soviet Union. I would like to see the United States halt all kinds of technological sales to the Soviet Union. And third, in response to their expelling our one diplomat in the Soviet Union, I think a fair trade would be if we would expel at least 20 in our country.

ANNOUNCEMENT OF APPOINTMENT OF MEMBERS TO ATTEND FUNERAL OF THE LATE SENATOR HENRY M. JACKSON

The SPEAKER pro tempore (Mr. KILDEE). The Chair desires to announce that the Speaker appointed on September 6, 1983, the following Members to attend the funeral of the late Senator HENRY M. JACKSON:

Mr. FOLEY of Washington;
Mr. PRITCHARD of Washington;
Mr. BONKER of Washington;
Mr. DICKS of Washington;
Mr. LOWRY of Washington;
Mr. SWIFT of Washington;
Mr. MORRISON of Washington; and
Mr. CHANDLER of Washington.

Without objection, the Speaker's appointment is ratified.

There was no objection.

COMMUNICATION FROM HON. ELLIOTT H. LEVITAS OF GEORGIA

The SPEAKER pro tempore laid before the House the following communication from Hon. ELLIOTT H. LEVITAS of Georgia:

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 24, 1983.

Hon THOMAS P. O'NEIL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: This is to inform you, pursuant to the provisions of House Rule L (50), that Michael Sloan, Staff Assistant in my Decatur office, has received a deposition subpoena from the United States District Court for the Northern District of Georgia.

I will undertake to make the determinations required by the Rule and communicate them to you.

With best wishes, I am,
Very truly yours,

ELLIOTT H. LEVITAS,
Member of Congress.

EXTENDING AND IMPROVING THE REHABILITATION ACT OF 1973

The SPEAKER pro tempore. Pursuant to House Resolution 283 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 3520.

The Chair designates the gentleman from Michigan (Mr. BONIOR) as Chairman of the Committee of the Whole and requests the gentleman from Texas (Mr. LELAND) to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3520) to extend and improve the Rehabilitation Act of 1973, to provide for the operation of the Helen Keller National Center for Deaf-Blind Youths and Adults, to create a select commission on Federal assistance to disabled Americans, and to increase certain authorizations of appropriations for programs within the jurisdiction of the Committee on Education and Labor with Mr. LELAND (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Kentucky (Mr. PERKINS) will be recognized for 30 minutes, and the gentleman from Texas (Mr. BARTLETT) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Chairman, I yield myself 8 minutes.

Mr. Chairman, this is a very important piece of legislation. I do not think there has been any Member in the Chamber over a period of years who has put more work in on the Vocational Rehabilitation Act than CARL PERKINS. I recall in 1949 it was a smaller program. It was overhauled in 1954, and during the Johnson years in the 1960's. It has become one of the greatest pieces of legislation that has ever been enacted by the U.S. Congress.

Today more than 226,000 people have been fully rehabilitated annually. Millions of people have received rehabilitated services under the Vocational Rehabilitation Act.

Let me make one further observation: That there is no intent on the part of the majority to do any harm to the Vocational Rehabilitation Act. I recall several years ago in the 1970's that the act was vetoed twice, in 1972 and 1973, and we had to have a continuing resolution during those years. But we never in one instance let the money anywhere along the line slide backward. We always increased that

funding for our people to be rehabilitated in this country.

When I came here, I had 30,000 coal miners in need of rehabilitation, and no rehabilitation centers in eastern Kentucky. We were able to build one of those great centers in my congressional district under the Vocational Rehabilitation Act.

But my point is, we would have never been able to get separate authorization bills through the Congress one by one, so in title IV we tied those programs together, and I think rightfully so, and added a new title to the Vocational Rehabilitation Act. For example, for the chapter 1, we would increase the authorization a few hundred million dollars up with the targets set in the budget resolution. We are now spending less on vocational education than we were in 1980, before we passed Gramm-Latta in 1981. In every congressional district in this Nation, if you will ask your vocational leaders, you will find that you have a waiting list of persons who are trying to enter vocational schools and learn certain trades and who are unable to get into those schools.

To my way of thinking, increasing vocational education by $90 million to get the States to put in extra money is a good policy on the part of the Congress. With this new authorization level, we can train hundreds of thousands more young men and women who are not going to college, and likewise train more adults.

□ 1310

We increase the basic Adult Education Act, too. But my point is that these programs can be voted on individually, and we can individually increase the amounts or decrease the amounts when we get to the amendment stage.

But do not let anybody tell us that we are doing anything out of the ordinary here. We are not. It is true enough that sometimes a Member introduces an amendment that may not be germane to a bill, but after the Member introduces that amendment, if we go back and introduce a new bill, it is germane. Perhaps I should have introduced a new, clean bill before we went to the Committee on Rules, but I did not think there would be that much controversy and I just did not do it. So we had the controversy, and we introduced the new bill, so all the amendments were germane to this bill.

Let me say something to the gentleman from Texas (Mr. BARTLETT) who has sent around several letters that I have noticed. When we passed Gramm-Latta here in this Hall—and that is what we are trying to correct in this amendment—we never had a chance to amend one item in that bill insofar as any of these programs were concerned. They were stuffed in that bill. We had to take them or leave them, and we went down by five or six votes. We were just trying to increase the amount of chapter 1 above the Gramm-Latta figure that was decided here in 1981 up to the target level provided in the budget resolution.

It is the same way with the other programs. There is nothing unusual in a procedure of this type then we think of the way in which Gramm-Latta was handled on this floor. Members like myself and hundreds of other Members who would have liked to have introduced amendments to Gramm-Latta were not permitted to introduce the first amendment to increase title I, vocational education, adult basic education, or any other program within the jurisdiction of our committee. We just had to take it or leave it.

Many of us felt that Gramm-Latta cut too deeply. Gramm-Latta did cut too deeply, and we only serve about 47 percent of the disadvantaged youngsters in this country today. Then, when we increase a few programs, some Members say we are bursting the budget.

We are within the budget, Mr. Chairman, and let me say that these amendments should be agreed to.

Now, let me go into more detail and the essential features of H.R. 3520.

Of all the programs and laws enacted by our Government for the good of disabled individuals in our country, none to my way of thinking has more noble objectives than the Vocational Rehabilitation Program. The benefits of this program are twofold:

First, the program provides medical and training services which enable handicapped citizens to lead more independent, fulfilling lives.

Second, the program allows the society as a whole to benefit from the goods and services produced by rehabilitated wage-earning and tax-paying citizens.

The history of the vocational rehabilitation program is the history of a long struggle to establish opportunities for disabled persons. I am proud to have been a part of that struggle. Soon after coming to Congress, I was privileged to serve on the Special Subcommittee on Assistance to the Physically Handicapped. This subcommittee of the Education and Labor Committee, appointed in 1953, held hearings and other investigations on the subject of rehabilitation and employment of handicapped persons. The Vocational Rehabilitation Amendments of 1954 resulted in part from the work of this subcommittee. Among the major improvements to the act in 1954 were the following:

First, Federal funding for vocational rehabilitation research and demonstrations for the first time.

Second, Federal funding for training vocational rehabilitation personnel.

Third, extension and improvement project grants to the States.

In the 1960's Congress adopted additional amendments which further strengthened and expanded this program by:

First, increasing the Federal share of dollars spent on the program in the States

Second, stimulating the establishment and construction of facilities such as sheltered workshops and comprehensive rehabilitation centers like the Eastern Kentucky Center in Paintsville, Ky.

Third, establishing a national center for deaf and blind adults; and

Fourth, extending services to migrants.

In the 1970's, vocational rehabilitation faced an uphill battle. During this time two bills were vetoed. But with perseverance, we in Congress were able to enact major provisions to aid disabled persons as they strived for a full share of our American way of life. The 1973 amendments assured that handicapped persons now have a major say in the development of his or her individual rehabilitation plan; established client assistance projects which provide an ombudsman for vocational rehabilitation clients; and state that severely disabled persons are to receive priority for services.

In addition to the Rehabilitation Act itself, the Committee on Education and Labor made major advances in the protection of the civil rights of the handicapped. Regulations have been signed which will assure that handicapped persons are not discriminated against in Federal programs and benefits. In 1974, amendments which I managed on the floor of the House made improvements in the Architectural and Transportation Barriers Compliance Board to promote accessibility of buildings and facilities for the handicapped, and in 1978, the Committee on Education and Labor played a prominent role in making major revisions to the act. The 1978 amendments added several new provisions including:

First, the National Institute of Handicapped Research to carry out research with respect to handicapped individuals.

Second, the National Council on the Handicapped, which was established to advise the Government on needs and problems of the program.

Third, a program of comprehensive services for independent living for severely disabled persons which will allow those individuals to live in their communities.

Fourth, a pilot program of community employment for handicapped persons, authorized by the Department of Labor, and a new program to promote business opportunities for disabled persons to further expand employment for those persons.

Fifth, American Indian rehabilitation services to provide services to handicapped American Indians residing on reservations.

Since I came to Congress in 1949, these programs have grown from an annual budget of $19 million to $1,036,800,000 in fiscal year 1983. More importantly, the number of persons rehabilitated each year has grown from 58,000 in 1949 to over 226,000 in fiscal year 1982; 51 percent of these persons were severely handicapped. I am particularly pleased by the benefits to Kentucky's citizens under the vocational rehabilitation program. In fiscal year 1982, for example, over 30,000 persons received rehabilitation services.

Mr. Speaker, we are here again today to consider the reauthorization of the Vocational Rehabilitation Act. H.R. 3520 extends this act for an additional 5 years at a rate calculated to restore the fiscal year 1979 purchasing power of the program by fiscal year 1987. The bill extends the authorization of appropriations for all other programs under the act for 3 fiscal years at "such sums as may be necessary".

In addition, the bill improves the targeting of training grants to areas in which there are shortages of qualified personnel; clarifies the eligibility of State rehabilitation agencies to compete for projects with industry grants; establishes a separate authority for the Helen Keller National Center for Deaf-Blind Youth and Adults; and makes several changes to improve services and training offered through rehabilitation research and training centers.

Mr. Speaker, the vocational rehabilitation program is one of the most cost-effective programs designed to assist disabled individuals in this country in becoming self-sufficient and productive citizens. It is my hope that my colleagues on both sides of the aisle will move swiftly today to pass this most important piece of legislation.

In addition to being a landmark bill for disabled Americans, H.R. 3520 is vital in order to sustain the Federal commitment to education in this country.

Title IV of H.R. 3520 contains an urgently needed provision that raises the authorizations of appropriations for fiscal year 1984 for 10 education and domestic programs under the jurisdiction of the Education and Labor Committee. If we are to implement the first concurrent budget resolution—if we are to convert the symbolic budget increases for education and other areas into real dollars—then we must pass this bill with title IV.

Let me explain why.

The first concurrent budget resolution for fiscal year 1984 allows increases for education and certain other domestic areas. However, unless we act to boost the authorizations for some key programs, this additional money cannot be considered in appropriation bills, since the authorization levels for these programs would be exceeded.

This is because the 1981 Omnibus Budget Reconciliation Act, known as Gramm-Latta II, placed limits on the authorizations for many Education and Labor Committee programs for 3 fiscal years—1982, 1983, and 1984. Generally, these limits allowed for little or no growth, and in some cases were lower than actual spending in previous years.

For example, the Gramm-Latta ceiling for vocational education for fiscal year 1984 is $735 million. We spent $784 million on this program in fiscal 1980. In fiscal year 1983, we are bumping right up against that ceiling with an appropriation of $729 million, and for fiscal year 1984 we cannot give this program any significant increase without raising the ceiling.

Several other programs are in the same situation. Title IV would set authorization levels for the following programs:

Chapter 1 program for disadvantaged children: $3,830,000,000.

Education for the Handicapped: $1,500,000,000.

Impact Aid: $505,000,000.

Vocational Education: $825,000,000.

Adult Education: $112,000,000.

Arts and Humanities: $723,900,000.

Museum Services: $10,800,000.

Community Services: $398,000,000.

Low-Income Energy Assistance: $2,250,000,000.

Special Feeding Program for Women, Infants, and Children: $1,360,000,000.

These new authorizations are consistent with the targets specified by budget functions in the conference report on the budget resolution. The budget resolution, as we know, is not binding below the budget function levels, and in fact, the budget resolution does not contain numbers on a program-by-program basis. However, there are sufficient extra funds for each of the functions in which the above programs fall, to permit these new authorizations to be implemented. And, of course, we must remember that the budget resolution limits appropriations, not authorizations.

Thus, the purpose of title IV is to give the Appropriations Committee and all the Members the flexibility to increase appropriations for these programs, if that is the will of the House.

Conversely, if we do not enact this bill, we will not be able to give these programs their fair share of the additional funding already endorsed by this body and by the Senate in the budget resolution. Our hands will be tied by the ropes of Gramm-Latta. The budget resolution will be an empty shell.

I want to emphasize that we are dealing with 10 effective, established programs, many of them serving needy Americans. All have documented records of success.

Most of these programs have suffered budget cuts during the past 2 years. This bill will permit us to restore some of this funding.

If we are truly interested in promoting educational excellence, as the President and many other leaders agree we must, we ought to start by providing adequate funding for the programs we know are successful.

The entire education community is looking to this vote—and the President's signature of this bill—as an indicator of who is really concerned about education. I can think of no better way to start off this new school year than by supporting this key legislation.

Mr. BARTLETT. Mr. Chairman, for purposes of debate, I yield 6 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Chairman, as we begin the general debate on H.R. 3520 we should keep in mind two central questions—two questions each of us must answer before we cast our votes.

First, do we want H.R. 3520, the reauthorization bill for the Rehabilitation Act, signed into law by October 1, 1983, the day the current statute expires?

Second, should Chapter 1 of the Education Consolidation Improvement Act; Impact Aid; Education of the Handicapped Act; Vocational Education; the women, infant, and children feeding program and five other programs have their fiscal year 1984 authorization ceilings increased through H.R. 3520?

The answer to the first question I believe would be a unanimous yes. The Rehabilitation Act assists States to provide training and related support to handicapped Americans so that they may join our work force and experience greater independence, that many of us, I suspect, take for granted.

The 63-year-old rehabilitation program has an impressive track record which has contributed to the strong, unwavering bipartisan support it has received during its long history. About 1 million handicapped Americans are helped through this program each year. Of those, about 20 percent are completely rehabilitated and become full participants in our work force. For every dollar invested to rehabilitate a person with a handicapping condition, that person's earning power increases by $10. Within 4 years, the average cost of rehabilitating an individual is returned to Government through taxes and removal of such a person from the rolls of income maintenance

programs. As I indicated there are impressive statistics that demonstrate the cost-effectiveness and value in human terms of this vital program. Yet its very effectiveness, its bipartisan popularity, caused its reauthorization bill to be used to promote other less attractive ends.

Let me repeat a condensed version of my second question. Should 10 programs, known as title IV in H.R. 3520, have their fiscal year 1984 authorization ceilings adjusted upward? I would hope the answer to this question would be a unanimous no. From my perspective, the facts dictate it. First, let me provide a context for my point of view.

These 10 programs have nothing to do with the rehabilitation of handicaped persons.

They would increase the potential cost of the bill by $1.6 billion over the cost associated with the rehabilitation program.

The administration has communicated to us that if title IV is in the bill when it reaches the President's desk, the President would not sign it.

If the President vetoed the bill, an untimely delay in the reauthorization of the Rehabilitation Act, which could have been avoided, will result. The State rehabilitation programs are dependent on the Rehabilitation Act for 80 percent of their funds. If a reauthorization bill is not signed by October 1, 1983, we will not have a legal basis to allocate moneys to State rehabilitation programs.

Now to return to the issue of title IV. I believe that its inclusion in H.R. 3520 represents a flagrant disregard for the authorization process. The Education and Labor Committee is charged with recommending to this body responsible authorization ceilings for programs under its jurisdiction. These recommendations should be based on hearings and careful deliberations on each program. Such was the case with the reauthorization of the rehabilitation program. However, such was not so in the case of the 10 programs in title IV; neither hearings nor careful deliberations preceded adoption of the increases in fiscal year 1984 authorization ceilings for these programs. If increases are necessary in any program, the program should be reviewed on its individual merits. An increase in an authorization for a program should not be lumped with similar increases for unrelated programs and, to quote my colleague from Kentucky, "attached to a good horse." I believe he was referring to the Rehabilitation Act reauthorization.

Furthermore, the Education and Labor Committee has an obligation to provide authorization ceilings which represent balanced, reasonable limits for consideration by the Appropriations Committee. Title IV would allow a 21-percent increase over the fiscal year 1983 appropriation for chapter I of the Education Consolidation Improvement Act. The current fiscal year 1984 authorization ceiling would allow a growth rate of 9 percent. Do we think the Appropriations Committee will view 21 percent as balanced and reasonable and 9 percent as not? I, for one, think a 9-percent increase is generous.

Title IV would permit growth rates for other programs that also exceed the bounds of reasonable, balanced limits. For example, in title IV the Education of the Handicapped Act fiscal year 1984 authorization ceiling would allow a 25-percent increase over the fiscal year appropriation, for vocational education a 14-percent increase, and adult education an increase of 18 percent. The current fiscal year 1984 authorization ceiling for vocational education and adult education allows increases of 2 percent and 5 percent, respectively. In addition, the fiscal year 1984 authorization ceiling for the Education of the Handicapped Act is increased in the Senate reauthorization bill for this program by about 5 percent over the fiscal year 1983 appropriation. Could we not, should we not have used a similar vehicle to make adjustments for this program?

Quite simply H.R. 3520 should not be used as a means to set new authorization ceilings for any program but the rehabilitation program. Early this summer, I argued that title IV was not a germane amendment to H.R. 2461, the predecessor to H.R. 3520. A rule was sought which would allow a waiver on the House rule pertaining to germaneness. A waiver was not granted on germaneness, so H.R. 2461 with title IV was reintroduced as H.R. 3520. Although I cannot raise a point of order on germaneness, the fact remains that title IV is extraneous, irrelevant to the other titles of H.R. 3520.

The rehabilitation coalition comprised of 40 organizations concerned about national disability policies concurs. We cannot, must not allow title IV to delay the timely enactment of the Rehabilitation Act. Title IV must be stricken from the bill. The negative effects of its retention will not be felt by us, but by the 1 million handicapped Americans that annually benefit from the rehabilitation program. We have other means for considering adjustments in authorization ceilings. We have only one means, and it is this critical opportunity for reauthorizing the rehabilitation program.

□ 1320

Mr. PERKINS. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Pennsylvania (Mr. MURPHY) the author of the bill.

Mr. MURPHY. Mr. Chairman, the bill H.R. 3520 would extend the basic State-Federal vocational rehabilitation program for 5 fiscal years. This is the Federal Government's primary employment program for Americans with disabilities. It insures that a wide range of rehabilitation services are available to persons with substantial handicaps to employment but who have the potential to become gainfully employed. The committee's intent in the funding levels for the basic State grant entitlement program is to restore a level of funding which more adequately meets the needs of millions of handicapped Americans who are now going unserved. Since 1979, the loss in purchasing power for this program has been 31 percent. The committee bill would phase-in a restoration to the fiscal year 1979 funding power over a period of 4 years, allowing growth above anticipated inflation in each of those years. The fifth year authorization would be determined by the cost-of-living increase for the previous year.

H.R. 3520 includes a 3-year reauthorization, at such sums as may be necessary, for the other important programs under the act. These programs include a client assistance program, a program for American Indians, funding of research through the National Institute of Handicapped Research; training for rehabilitation professionals; support for comprehensive rehabilitation centers and for rehabilitation facilities; projects for the severely disabled, for recreation and for migratory workers; projects with industry; comprehensive services for independent living; and funding for the Architectural and Transportation Barriers Compliance Board.

In addition, the bill would create a separate statutory authority for the Helen Keller National Center for Deaf-Blind Youths and Adults, and would establish a National Commission on Federal programs affecting the disabled. Mr. Chairman, the extension of these rehabilitation programs was agreed to unanimously by the Subcommittee on Select Education and by the Education and Labor Committee. I ask for the support of my colleagues in the House on behalf of the millions of Americans who depend on the services, the research, and the training of rehabilitation professionals provided for under this act.

In addition to the extension of authorizations for existing programs, H.R. 3520 makes several substantive changes in the Rehabilitation Act. The major changes include, first, in regard to the National Institute of Handicapped Research, an increase in the authority of the Director so that he may continue the funding of research and training centers beyond the end of a project period. This could be done only when there had been a thorough evaluation and peer review, including site visits. The bill would require that research and training cen-

ters include both comprehensive centers dealing with multiple disabilities and centers focused on particular disabilities. It would make the training of students preparing to be rehabilitation personnel through centers an important priority, and would permit faculty support for teaching within the centers. The committee report expresses the expectation that such training not exceed about 25 percent of the center grant and not substantially reduce the research emphasis of the center.

Second, the bill addresses the need to support the upgrading of skills of rehabilitation personnel. It amends the act to require that the Commissioner of the Rehabilitation Services Administration determine training needs for qualified personnel and that training grants and contracts be awarded for the purpose of assisting in increasing the numbers of qualified personnel. The bill would require training grants to be targeted on areas of personnel shortage and would require the Commissioner to submit a report to Congress annually on his finding of personnel shortages and a justification of allocation of grants based on those findings. This would require the Rehabilitation Service Administration to conduct a thorough evaluation of current and prospective training needs.

Third, the bill separates the Helen Keller National Center for Deaf-Blind Youths and Adults from the act and establishes it under its own statutory authority. This is in recognition of the national resource status of the Center and in order to permit more stability of its funding. The bill provides a 5-year authorization for the Center, at such sums as may be necessary.

Fourth, H.R. 3520 removes the National Council on the Handicapped from within the Department of Education and establishes the Council as an independent body. The responsibilities of the Council would remain as they have been, but would be enlarged by the requirement that it provide to Congress, on a continuing basis, such advice, recommendations, and additional information that the Council or Congress consider appropriate.

Fifth, the bill clarifies the intent of Congress that State rehabilitation agencies be entitled to compete for projects with industry grants, thereby increasing the resources available for development of the concept and encouraging increased State agency cooperation with private industry.

The Rehabilitation Act, in title VII, provides for independent living services to handicapped individuals whose impairment is so severe that they do not presently have the potential for employment. Although H.R. 3520 makes no substantive change in title VII of the act, I would point out that the bill restores the authorization for funding for part A, comprehensive services, and part C, independent living services for older blind individuals. The authorization for funding these parts had been eliminated in the Reconciliation Act of 1981. Extensive testimony during subcommittee hearings indicated that the success of independent living centers funded under part B of the act justifies the expansion of the program to full implementation of the independent living concept through funding for part A, which authorizes a statewide service delivery system for the severely handicapped. The committee report recommends $25 million of the establishment of the part A State grant program, $21 million for independent living centers and $2 million for the program for older blind individuals in fiscal year 1984.

The bill also restores the authorization of appropriations removed during the reconciliation process in 1981 for comprehensive rehabilitation centers and restores the earmark of $3.5 million for the client assistance program.

The bill makes no change in the existing entitlement authority for the basic State grants. This capped entitlement was first established in 1954 in recognition of this extremely important Federal responsibility and the need to permit States reliable funding for planning services for their handicapped citizens.

H.R. 3520 represents an extension of one of the most effective acts funded by the Federal Government, and represents a continuation of hope for our 35 million American citizens with handicaps.

Mr. BARTLETT. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, this is an extraordinarily important debate in the life of this body and in the lives of the 35 million Americans who are handicapped or disabled. This debate on the Rehabilitation Act Amendments of 1983 is a turning point in the life of this body. The decision this House makes about deleting title IV of H.R. 3520 will determine the extent to which its procedures can be manipulated in the pursuit of purely partisan objectives. It will be a signal of our willingness to draw the proverbial line in the sand across which neither the majority nor the minority should be ready to step in their efforts to obtain legislative goals. Further, this debate is important in the lives of disabled and handicapped Americans as they will be watching to see if the program they depend upon will be held hostage to partisan politics. The House should reject the use of the successful and bipartisan rehabilitation program as a vehicle for the partisan and controversial adjustment of authorization ceilings for a host of unrelated programs. We should do this to preserve the procedural integrity of this body and to guarantee that the 1 million disabled Americans who can and should have their lives uplifted and given new hope during the next 12 months will not be cynically used as the pawns of legislative arrogance.

I want to sketch for my colleagues a brief review of the rehabilitation program before describing the legislative history of H.R. 3520 and the important improvements that were made in the program during its consideration by the Select Education Subcommittee on which I serve as the ranking minority member. I then must focus on the negative implications of title IV of this bill and why this title poses such a serious threat to both the rehabilitation program as well as to the integrity of House procedure.

THE REHABILITATION PROGRAM

The rehabilitation program has a 63-year history—one that has been marked by bipartisan support. The Rehabilitation Act does its work through State rehabilitation commissions. It authorizes funds for services so that they may enter the work force. Approximately 1 million handicapped Americans benefited from rehabilitation services in fiscal year 1982. Of that number, about 20 to 25 percent were fully rehabilitated and were placed in jobs. The Federal Government provides 80 percent of the funds for the State grant program; States must provide a 20-percent match. The cost effectiveness of the program has been estimated in two ways: First, for every dollar invested in a handicapped individual, on the average, the earning power of the individual increases by $10; and second, on the average, rehabilitation dollars spent on a person are returned in 4 years through income taxes and removal from social security income maintenance programs once the person is employed. This is obviously a successful, efficient program. As I will mention in a moment, it is this success that has made it hostage of partisan politics. First, I want to briefly describe the major provisions of H.R. 3520 as contained in the first three titles.

SUMMARY OF H.R. 3520

The bill provides for an annual 9.9 percent increase in funding for the State grant program and for a separate authorization outside the Rehabilitation Act for the Helen Keller Center. The legislation includes my amendment to authorize a national commission to examine Federal legislation which affects disabled persons, identify barriers to integration and independence, and provide Congress and the President specific statutory recommendations to improve current legislation. The State grant program is reauthorized for 5 years at specified funding levels and discretionary programs would be reauthorized for 3 years at such sums as may be necessary. Also, the bill proposes that the National

Council on the Handicapped be made an independent agency within the executive branch, that State vocational rehabilitation agencies be more involved in projects with industry, and that personnel training needs be documented. These provisions in the first three titles are designed to make the rehabilitation program work better. They were supported by both the subcommittee and the full committee. Title IV is a different matter. Its attachment to H.R. 2461, the original reauthorization bill, at the end of full committee markup politicized and made controversial what should have been a sound, precisely focused reauthorization. Let me begin my remarks about title IV with a review of the legislative history of H.R. 2461 and H.R. 3520.

PROCEDURAL HISTORY OF H.R. 2461 AND H.R. 3520

H.R. 2177 was introduced to reauthorize the Rehabilitation Act on March 17, 1983. The Select Education Subcommittee held 2 days of hearings in March on this bill. Also, in March, the subcommittee reported a clean bill, H.R. 2461, to the Education and Labor Committee. The amendments offered at the subcommittee were ones needed to make the program work more efficiently and were noncontroversial.

On April 20, at the end of the Education and Labor Committee markup, Mr. PERKINS and Mr. MURPHY offered title IV as an amendment to the bill. Title IV, unbelievably, adjusted the authorization ceilings for 10 programs to the levels contained in the first budget resolution. The programs were neither related to rehabilitation policy nor to each other. The amendment was clearly nongermane and a point of order by the minority was overruled. The amendment was then adopted, despite the damage done to the rule of germaneness, the interests and rights of the minority, and the spirit of House procedure.

Title IV's advocates found problems with their work. The amendment as adopted was some 67 words long and clearly stated that all the programs within the jurisdiction of the Education and Labor Committee were to be adjusted to the levels contained on the first budget resolution (H. Con. Res. 91). The problem with this was that House Concurrent Resolution 91 was a moving target and a final resolution had not yet been adopted. Also, upon further review, title IV's proponents realized that the kind of wholesale adjustment that their amendment contemplated could have some results contrary to those they wanted to achieve. To remedy these problems, the majority took the concept of "technical and conforming changes" beyond its accepted definition: They expanded the amendment to over 300 words and singled out the 10 programs they wanted to adjust. Further, they established specified spending levels for these programs and referenced House Concurrent Resolution 91, as passed by the House in March. I will detail the distortion of budget procedure this action represents in a moment, but the procedural chronology gets more interesting.

On July 12, H.R. 2461 came before the Rules Committee. Mr. PERKINS had asked for a waiver of clause 7, rule XVI—the rule that requires germaneness of amendments. Title IV clearly violated this rule which states, "no motion or proposition on a subject different from that under consideration shall be admitted under color of amendment." In requesting this waiver, Mr. PERKINS acknowledged the nongermaneness of title IV.

Both Mr. ERLENBORN and myself testified at the Rules Committee hearing, protesting the nongermaneness of title IV and pointing out the manipulation of procedure that was taking place: A determined majority was barreling through a nongermane amendment and asking the Rules Committee to sanction its action with a waiver. The Rules Committee urged that because of our protests Mr. PERKINS should take H.R. 2461 back to the Education and Labor Committee and attempt to clear up the germaneness problem.

Instead of returning to the committee and considering the appropriateness of title IV, Mr. PERKINS reintroduced H.R. 2461 that very day and got the same bill with a new number, H.R. 3520. He also got rid of the germaneness problem as a bill does not lie for a point of order on germaneness grounds as introduced. What he did not rid himself of was the continuing inherent extraneousness of title IV to the rehabilitation reauthorization and the patina of having taken an end run around the spirit of House procedure.

On July 14, the Education and Labor Committee reported H.R. 3520 on a party-line rollcall. The bill thus arrives on the floor today with title IV attached—a title that is here only by virtue of procedural manipulation.

Although I am about to detail the reasons that title IV is inappropriately attached to this legislation and why it must be removed, I want to leave this strong message with you: If this effort to include title IV in H.R. 3520 is successful, a new tool will have been given to a determined majority—of whatever party—with which to run over the minority and any legislative procedure that might get in their way. This precedent will be one of this House passing on nongermane material that was adopted at the committee level and reintroduced as a new bill to make the extraneous matter technically germane. I urge my colleagues in the strongest manner possible not to allow this precedent to be established. Let me now offer a detailed explanation of the negative implications of title IV.

NEGATIVE IMPLICATIONS OF TITLE IV

Most importantly, title IV threatens the smooth continuation of the rehabilitation program. By adding the extraneous material in title IV with its procedural defects and its $1.6 billion increase in fiscal year 1984 authorization ceilings, the future of the Rehabilitation Act has been politicized and threatened. This can only be alleviated by the removal of title IV.

Title IV represents a precedent-setting manipulation of House rules. If title IV is successfully considered, a precedent will have been established for a determined majority to simply adopt nongermane amendments at the committee level and reintroduce the reported bill to make the extraneous matter technically germane. This manipulation cuts to the heart of the integrity of House procedure, which should serve to protect the rights of both minority and majority concerns.

Title IV represents the use of a popular, bipartisan bill to facilitate consideration of partisan legislative initiatives. The Rehabilitation Act has received strong bipartisan support during its 63-year history. The reauthorization bill prior to the inclusion of title IV received similar support. The support was assumed to be sufficiently strong to carry the title IV programs.

Title IV inappropriately converts singularly focused legislation to omnibus legislation. The inclusion of title IV in H.R. 3520 converts the bill into omnibus legislation. Not only are title IV programs not related to rehabilitation, they are not related to each other. The only element these 10 programs have in common is that their fiscal year 1984 authorization ceilings have been increased.

Title IV adds $1.6 billion in new spending above the 1984 reconciliation levels for these 10 programs. Title IV forces this House to choose between support for the rehabilitation program and support for responsible fiscal policy.

Title IV disregards the authorization process. The 10 programs in title IV have authorization ceilings for fiscal year 1984; if these ceilings were in need of adjustment, each program should have been reviewed on its individual merit and free-standing legislation prepared.

Title IV is an inappropriate use of House Concurrent Resolution 91. Title IV represents an inappropriate use of a budget resolution. Budget resolutions do not insure specific levels for individual programs, although the House version of House Concurrent Resolution 91 was used as the principal justification for increasing the authorization ceilings for the 10 programs.

Title IV intrudes on the authority of the Budget Committee. The House Budget Committee has the authority to prepare budget resolutions, and once passed by the House, conference with the Senate on a final version. By dictating specific fiscal year 1984 authorization ceilings for the programs in title IV, the education and labor majority have placed these programs in a unique category. It is unclear whether the authorization levels in title IV are program level targets which the Appropriations Committee must accept independent of or in addition to assumptions under the 1984 first budget resolution.

Title IV diverts floor debate from its appropriate focus. Since title IV is included in H.R. 3520, much of the floor debate today will address the problems with title IV, rather than contribute to the substantive legislative history of the rehabilitation program.

Title IV makes the rehabilitation reauthorization liable to a Presidential veto. In a letter of July 12, 1983, from OMB Director David Stockman to me, Mr. Stockman indicated that if title IV were retained in the reauthorization bill for rehabilitation, he would recommend that the President not sign it.

Without title IV, H.R. 3520 is sound legislation; with title IV, H.R. 3520 is unacceptable and procedurally dangerous. I urge you to carefully consider the negative implications of title IV and the importance of the rehabilitation program. Join with me tomorrow when I offer an amendment to delete title IV and return H.R. 3520 to its original purpose: the extension and improvement of the Rehabilitation Act.

TECHNICAL ADDENDUM

The majority argues that the authorization increases in title IV are necessary because the spending levels contained in the first budget resolution are higher than the authorization levels established for fiscal year 1984 by the 1981 Reconciliation Act. This argument is flawed in two major respects:

First. The first budget resolution establishes spending levels for broad categories of programs and does not get down to the detail of the individual programs that are contained in title IV. Thus it is impossible to draw any conclusions about the implications of the first budget resolution for the programs in title IV.

Second. The first budget resolution is superseded by the Reconciliation Act levels for fiscal year 1984. The first budget resolution is a nonbinding document designed to craft overall spending targets into a final budget resolution. The Reconciliation Act is a law and cannot be ignored.

□ 1330

Mr. GEKAS. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from Texas has stated that if indeed the gentleman's amendment would carry, that the effect of that would be the removal to title IV as is now appended to the main legislation; is not that correct?

Mr. BARTLETT. That is correct.

Mr. GEKAS. The thought, though, that is not made clear but your statement just now has made it clear at least for this Member; and that is that if the gentleman's amendment would succeed, nevertheless the passage of the bill in its final form would constitute an increase in spending for rehabilitation.

Mr. BARTLETT. The gentleman is correct. And that is the basis of this entire debate. That the first three titles of this act relate to rehabilitation and title IV relates to unrelated programs with no relation to rehabilitation. The rehabilitation program has been increased by this bill by over 9 percent as the authorization level. And that would stay in the bill even with the deletion of title IV.

Mr. GEKAS. There will be those who will be criticizing the supporters of the Bartlett amendment as being against the people intended to be served by it, that we are cutting back again, I can hear the voices now, when actually even if we remove title IV, we are increasing the benefits to the rehabilitation targets historically approved by this legislation.

Mr. BARTLETT. The gentleman is correct.

Mr. PERKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan (Mr. KILDEE).

Mr. KILDEE. I thank the chairman.

Mr. Chairman, I rise in strong support of H.R. 3520, the reauthorization of the Vocational Rehabilitation Act. Title IV of this bill does indeed raise authorization caps set by the Gramm-Latta budget package of 1981, which caps were extremely low. I would like to direct my remarks specifically to vocational education.

The latest available figures for unemployment in this country is 9.5 percent, still very, very high. But in my home city of Flint, Mich., we have unemployment of 21.9 percent. While there has been some recent improvement, almost anyone under 30 years of age in my city has not been working because you need about 12 years of seniority to be holding a job. Yet there are jobs appearing that require retraining for which we are not yet able to provide the retraining. The State of Michigan, in the depression it has gone through, has never been able to take up the slack caused by the cuts in vocational education on the Federal level, caused by the Gramm-Latta budget reconciliation bill.

So, at these times when we have people who need to be retrained and find ourselves on the cutting edge of technological changes, we find this vast unemployment. We find many States unable to take up that slack; we indeed have to recognize that reality.

It is not a platitude when we say that money spent in vocational education is an investment. When we talk about the reindustrialization of America, and we hear that talk at both ends of this avenue, and at the same time do not give the Appropriations Committee the tools to provide for that retraining needed for reindustrialization, we are merely talking. I urge support for this bill in its entirety.

Mr. BARTLETT. Mr. Chairman, I yield 3 minutes to the gentleman from South Carolina (Mr. CAMPBELL).

Mr. CAMPBELL. Mr. Chairman, as my colleagues know, the purpose of the Rehabilitation Act amendments is to extend and strengthen existing programs under the Rehabilitation Act that have proven themselves successful. From the strong bipartisan support exhibited for vocational rehabilitation throughout its 63-year history, it is apparent that this program is achieving positive results. In fact, my State of South Carolina is a prime example of the benefits derived from vocational rehabilitation. In fiscal year 1982, South Carolina had a rehabilitation rate of 265 per 100,000, which was once again the highest in the Nation.

I, along with many of my distinguished colleagues, have consistently fought to increase funding for vocational rehabilitation, keep this program from being incorporated in a block grant with welfare-type maintenance programs, and increase the awareness of the public that this is a cost-effective job training program for handicapped individuals which deserves the active support of our social and business communities. Currently, this program serves over 226,000 disabled persons, over half of whom are severely disabled. Furthermore, for each dollar spent on rehabilitating an individual, we get a return of approximately $11 from each person who becomes employed. I believe we must continue to provide adequate funding for this program and expand the capabilities of vocational rehabilitation for future years.

The troubling aspect of H.R. 3520, however, is a section that is totally unrelated to vocational rehabilitation. Title IV contains additional, unrelated fiscal year 1984 reauthorizations adding $1.6 billion to the existing $9.4 billion authorizations for "programs under the jurisdiction of the Committee on Education and Labor," superseding the fiscal year 1984 authorization levels established by the Omnibus

Reconciliation Act of 1981. This 17-percent increase, whether one considers is excessive or not, is only one point of contention. I believe the main objection is that these programs will not be considered on their own merits and they are not actually germane to the rehabilitation bill.

Mr. Chairman, the Rehabilitation Act has served our country well, and I urge my colleagues to support the reauthorization of this needed legislation while carefully reviewing the ramifications of including title IV in H.R. 3520, which could cause the defeat or delay of this important legislation.

Therefore, I intend to support the gentleman from Texas' amendment to strike title IV.

Mr. PERKINS. Mr. Chairman, I yield 3 minutes to the gentleman from Puerto Rico (Mr. CORRADA).

□ 1340

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 3520, the Rehabilitation Act Amendments of 1983, which would extend authority for vocational rehabilitation activities over the next 5 years.

Over the last 60 years, the federally funded rehabilitation program has provided services to more than 20 million handicapped persons, helping them work toward becoming independent, taxpaying citizens. From the time the National Civilian Vocational Rehabilitation Act, or Smith-Fess Act, became law on June 2, 1921, until today, there has been a continuous positive and supportive Federal presence in the lives of our handicapped citizens.

The central focus of the Rehabilitation Act is the State-Federal program of vocational rehabilitation. Now in its 63d year, it represents a true partnership in serving and rehabilitating handicapped individuals. The basic objective of the State-Federal services program is to provide a broad range of rehabilitation services to assist physically and mentally handicapped individuals become employable, with priority given to the most severely disabled.

Funding received under the Rehabilitation Act has been of extreme importance to the disabled community in Puerto Rico, and continues to play a major role in providing employment skill training to handicapped individuals throughout the island.

Over the last 3 years alone, Puerto Rico has received more than $58 million under the State grant portions of the act. In 1982, with a Federal award of $19.965 million and a State match of $4.991 million, the department of social services was able to serve 46,325 disabled individuals, 1,599 of which were severely handicapped. Puerto Rico has consistently reported high numbers of successful rehabilitations, as reflected by the 1982 figure of 3,652. The fact that the number of severely handicapped individuals being served has risen as rehabilitations continue to increase highlights the achievement of the Puerto Rico State program.

On a national level, in fiscal year 1982, a total of 226,924 disabled persons were rehabilitated in the State-Federal program. Of this number, 129,866, or 57.2 percent, were classified as severely disabled. A total of 959,056 persons received rehabilitation services in 1982, of which 59.6 percent were severely disabled. The number of new active cases in 1982 was 333,954, of which 60.1 percent were severely disabled. Although the percentage of severely handicapped individuals being served and rehabilitated has increased yearly since 1974, the number of both severely and nonseverely handicapped persons being served and rehabilitated has steadily declined since 1979. Unfortunately, recent appropriation levels have not kept pace with inflation and have not taken into account the increased expense of rehabilitating the severely handicapped.

For this reason, I have cosponsored the bill, H.R. 3520, introduced by my good friend and colleague, Congressman AUSTIN MURPHY, which would increase authority for the State programs over the next 5 years at a rate calculated to restore the fiscal year 1979 purchasing power of the program. This bill would authorize $1.038 billion for fiscal year 1984; $1.141 billion for fiscal year 1985; $1.255 billion for fiscal year 1986, and $1.379 billion for fiscal year 1987. After that, the amount authorized would be determined by the increase in the consumer price index.

Fiscal year 1979 has been used as a point of reference for the authorizing of these entitlement funding levels, since that is viewed as the last year in which the State-Federal rehabilitation program operated at full strength. From 1975 to 1979, there was a downward trend in overall service delivery resulting from the gradual shift in resources to more severely disabled clients; during this period, there was actually a yearly increase in the number of severely disabled clients served. However, since 1979, the drop in both severely and nonseverely disabled cases shows a clear decline in the ability of States to serve eligible clients.

These funding outlays are more than justified by the benefits derived. From an economic standpoint alone, the Rehabilitation Services Administration estimates that for every dollar spent on vocational rehabilitation, there is a return in excess of $10. The most recent data available from the RSA shows that for cases closed in fiscal year 1980, the estimated lifetime improvement in earnings for nonseverely disabled persons is $14.6 for each dollar of cost. For the severely disabled, whose cost of rehabilitation is so much greater, the ratio is $8 for each dollar spent. Persons rehabilitated in 1980 paid $211.5 million more in income, payroll, and State taxes than they would have without rehabilitation. Another $68.9 million was saved as a result of decreased dependency on public support payments and institutional care. In 4 years, the entire cost of Government of these rehabilitations would be returned. When these tangible benefits are combined with the gain in self-esteem resulting from the ability of the disabled to live more self-sufficient and independent lives, the cost-ratio figures take on even greater meaning.

There are approximately 36 million disabled Americans, 26 million of whom are adults with work disabilities. It is estimated that only 1 in 20 disabled persons eligible for rehabilitation services can be accepted into vocational rehabilitation programs because of funding limitations. I urge my colleagues to support H.R. 3520 as a first step in expanding this opportunity to a larger portion of eligible citizens, and to go before the Appropriations Committee to seek actual dollar increases.

Mr. Chairman, H.R. 3250 represents the continuation of a very successful program which enjoys bipartisan support in this chamber, and which benefits American citizens of every age, race, and economic background. I urge my colleagues to join me in supporting these authorization level increases and to vote in favor of the bill.

Mr. BARTLETT. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. PACKARD).

Mr. PACKARD. Mr. Chairman, we need to make it clear that the issue before us today is not whether we support vocational education or rehabilitation of handicapped and disabled.

Vocational education is an integral part of our overall education program. It gives students the skills and self-confidence to find satisfying jobs when they might otherwise drop out of school.

Vocational education prepares the workers across America that employers want to hire.

For millions of Americans, it constitutes the difference between a life of independence and employment, and one of dependence on public support.

Increasingly, special-needs students are served in regular vocational classes, rather than separate programs. At both the secondary and postsecondary levels, between 75 to 85 percent of the special-needs students are enrolled in regular vocational classes and are receiving support services such as additional counseling, resource instruction, tutoring assistance, and specialized job placement services.

The Commission on Excellence in Education report recently published, places great importance on vocational education by recognizing its traditional role in all areas of education.

Indeed, the support for the Rehabilitation Act Amendments of 1983 has generally been bipartisan in nature, due in large part to the positive history of this 63-year-old program and its cost-effectiveness.

Now, however, passage of this significant measure has been placed in jeopardy because of the inclusion of title IV in the bill.

Title IV, in contrast to the rest of this bill, represents an abuse of the reauthorization process and a disregard for the needs of disabled and handicapped persons helped by the rehabilitation program.

In essence, it will force Members to choose between support for this rehabilitation program or support for responsible fiscal policy.

Many Members who support the rehabilitation program will not wish to also endorse a $1.6 billion increase in fiscal year 1984 authorization ceilings for 10 other programs.

Another consideration in this debate is the fact that the Senate has already acted upon their own legislation, S. 1340. This bill does not contain a provision comparable to title IV.

A conference bill resolution of so great a magnitude is not likely without otherwise unnecessary delays.

And, finally, the administration has indicated that President Reagan would likely veto this bill if current provisions in title IV are not deleted.

We cannot afford to allow needless delays in funding for our State rehabilitation programs. Think of it in terms of your own districts, where employment depends so heavily on an uninterrupted rehabilitation and vocational program.

I urge the House to move decisively to restore the integrity and original purpose of the Rehabilitation Act reauthorization bill by striking title IV from H.R. 3520.

Mr. PERKINS. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. OWENS).

Mr. OWENS. Mr. Chairman, I would like to speak in support of the entire H.R. 3520. Title IV is just as germane as the rest of the bill. I take exception to the Neanderthal thinking which states that a program such as the WIC program, the women, infants, and children program, is not germane or relevant. I think scientific evidence clearly shows that you can deny a child, a young child, an infant, certain nutrients at a very early age in life and totally wreck that child's mental and intellectual capacity. You can also deny certain nutrients, certain important food to an infant or a child and set in motion a chain reaction of health problems, some of them which are debilitating and disabling.

The women, infants, and children program, better known as the WIC program, is one of the most efficient and effective health care programs ever funded by the Congress. As we all know, health care costs are scandalously high and they are rising in defiance of all efforts to contain them. I think it is also generally recognized that the highest costs are hospital costs, money spent for the care of the sickest people. The WIC program is a preventive health care program aimed at reducing the high cost of hospital stays. Preventive programs use available resources to keep the healthy people well, or in the case of WIC, it is used to improve the health of nutritionally marginal pregnant women, infants, and children so that they will not require costly health care at this time and later they will not develop expensive health care problems.

Knowledgeable professionals and lay people using commonsense have always recognized that dollars spent on infants and children will achieve the greatest impact for the people served and for the taxpayers. Statistics overwhelmingly support this principle. A Harvard study shows that the program has not only saved $3 for each dollar spent, but it has also prevented long-term health care costs associated with developmental problems which flow from low birth weight infants and malnourished children.

In other words, I am saying that it is clear that Congress instituted the WIC program in one of its wisest moments.

□ 1350

And this Congress cannot hesitate or equivocate about maintaining this very effective program and increasing its funding appropriately. WIC is a program with a proven track record. We cannot afford to gamble with the future health care of our children or with the taxpayers' dollars. I think it is clear that the originators of the concept of public health and preventive health who first thought of immunization and various other kinds of actions to prevent people from getting sick and to save the cost of hospitalization would approve of the extending of this idea to the simple act of providing food, the proper food, for pregnant women and the proper food for infants and for children as a means of controlling the high health care costs and as a means of guaranteeing that each individual will be able to live a healthy and a normal life.

Mr. BARTLETT. Mr. Chairman, I yield 4 minutes to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. Mr. Chairman, it is tempting, is it not, to stand before the House today and to talk about our commitment to education and all of these other programs?

I have been back to my district during August, like many of the others, and I have met with my education groups and I have talked to them about my commitment to education, improving excellence in education, doing the things we need to do for the unemployed in the Vocational Education Act, and many of these other things. It is hard, in that environment, to come here today and to talk any other line, but I think there comes a point in time when we have got to be honest with ourselves and with this country.

Let us begin by assessing exactly where we are in talking about these different programs. My distinguished colleague, the gentleman from New York, just mentioned the WIC program, as if anybody on this side of the aisle who has got problems with the bill in front of us is against feeding the women and the infant children in this country. If it needs to be clarified, let me call to the attention of everyone that the Republican recommendation to the Budget Committee from Education and Labor calls for a 57 million increase in WIC funding for 1984 over 1983. No one is rejecting that there is not a need for that program or certainly that there does not need to be an authorization level, but there already is an authorization level for WIC, as there is for all these other programs, with the exception of one, the Rehabiliation Act that expires September 30 of this year.

Let us take just a moment, if we can, to go through H.R. 3520 and find out what we are talking about in this bill.

In title I, Amendments to the Rehabilitation Act of 1973, the first section is "vocational rehabilitation services appropriations and authorizations."

The next one is "appropriations and authorizations and revisions in research and training."

It is in "supplementary services and facilities the National Council on Handicapped" is created.

We move on to "extension of authorization of appropriations for Architectural and Transportation Barriers Compliance Board."

We go on to the "employment opportunities for handicapped individuals."

We go on to "comprehensive services for independent living," technical and conforming amendments, and the effective date, which will be October 1, 1983, not too long away, not even a month away.

We go on to title II, "reauthorization of the Helen Keller National Center for Deaf-Blind Youth and Adults."

And we do on to each of the sections of title II.

We go on to title III, "National Commission on Federal Assistance to Dis-

abled Americans," and each of the subsections in that particular area, which I do not need to repeat.

But you add it all up, and you see that this is a bill which deals with disabled Americans, which provides a continuation of the services for these people. And somehow or another we have decided that in the fall of 1983 we are going to start playing politics—with one of the most serious groups that I think we could ever even consider doing such a thing with.

Take a look at the education funding levels, take a look at the Republican budget proposal, and you will find in the elementary, secondary, and vocational education that our committee, not the President, our committee, the minority members, called for a $400 million increase in spending in those programs in 1984 over 1983. No one is rejecting the need for a Federal role in education or Federal increase in spending in some of these programs. What we are rejecting today is something that is said to each and every one of us who subscribes to any Judeo-Christian ethic at all, because it comes from the Bible, which says, "That which you do to the least of these my brothers, you do also unto me."

Now, if we want to in this Chamber play politics with budgets, I think we have every reason to do so. If we want to play politics with tax policy, we have every right to do so. Frankly, if we want to play politics with education policy, we have every reason to do so. Although I think it is wrong, if we want to play politics with foreign policy, we probably have every right to do so, but I suggest to every one of my colleagues that we do not have the right, we do not have the right to play politics with the 100 million disadvantaged Americans who are looking to us for their leadership and their assistance.

Mr. PERKINS. Mr. Chariman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. HARRISON).

Mr. HARRISON. I thank the chairman for yielding.

Mr. Chairman, I support this bill and I support title IV. But I rise to take a couple of minutes and speak to only one of its provisions, and that is the provision that would increase the community service block grant authorization to the level already established in the budget reconciliation.

I would like to speak to this provision for two reasons: First, because as a director of the Commission on Economic Opportunity for Luzerne County, our community service agency in my district, before I had the honor to be sent here, I saw the good work that community service programs can do in winterizing the homes of the elderly, in providing food and nutrition programs and providing housing. And, second, because just before we went into recess, we all read the report of the Bureau of the Census that tells us that the percentage of people living under the poverty level in this country is higher now than it has been in the last 20 years, that we have lost the war on poverty, and this administration does not seem to care.

The only thing that this administration has done about that shameful fact is to appoint a commission to find out why people are hungry.

Mr. Chairman, I submit we do not need a Government commission to find out why people are hungry. They are hungry because we do not have enough food. And I submit that this bill, this increased authorization, what we can do by rejecting the amendment of the gentleman from Texas and passing this bill as written, is to fight hunger not with words, as the administration would have us do, to fight hunger with dollars and deeds, to fight hunger with the programs of the community service agencies across the United States that will be authorized by this bill as written.

Mr. Chairman, title IV of the proposed legislation would increase the authorization for the community services block grant from the level of $389.4 million presently authorized under Public Law 97-35, the Omnibus Budget Reconciliation Act, to $398 million. The community action program has already borne more than its share of changes and cutbacks under the present administration. This modest, yet important increase in authorization for the CSBG and the Nation's 932 Community Action agencies is especially important now.

In 1983, poverty remains the problem that simply will not go away. The 1980 U.S. census found more than 25 million Americans living in poverty. That is a disturbing statistic. What is even more alarming is the fact that since the Reagan administration came into office, a 20-year downward trend in the rate of poverty has been reversing. Today, the Nation's poverty rate—15 percent—is the highest it has been in 18 years.

The Economic Opportunity Act of 1964 created a nationwide network of Community Action agencies (CAA's) that provided communities fresh opportunities to coordinate and integrate Federal programs with the activities of State and local governments and private persons including foundations, private businesses and industry, labor unions and civic groups.

Staffed and governed by professionals and neighborhood residents intimately familiar with the needs of their communities, CAA's are committed to the fullest possible involvement of the poor in program design, operation and evaluation. CAA's carry their services into areas of need. With neighborhood centers, mobile units and outreach workers, Community Action agencies seek to inform and involve every family and individual who might benefit from the program in its planning and operation.

Because CAA's are actually located in poor communities and work with and are known by low-income citizens in the community, other Federal, State and local programs have come to view Community Action agencies as the best means by which to reach low-income persons. In many areas, the local CAA is the only viable organization that local residents interact with on a regular basis. The most identifiable resource in many rural areas of the country is the local Community Action agency.

Throughout their history, Community Action agencies have demonstrated a remarkable ability to adapt themselves and their programs to diminishing resources and to the ever changing needs of the people they serve.

Over the years, the network of CAA's has proven itself to be perhaps the most cost-effective service delivery system in operation. Ninety cents of each dollar received by CAA's is spent in direct services or payments to program recipients. Few public or private organizations can match this record.

The community action network provides a direct and indirect impact on local economies by creating employment opportunities and increasing purchasing power, thereby creating even more employment opportunities.

CAA's contribute or share their administrative resources and capabilities in operating such programs as Head Start, low-income weatherization, low-income energy assistance, Meals on Wheels and a variety of others. They provide or contribute space, facilities, supplies, materials, equipment and maintenance to support these programs. The result is that CAA's substantially cut the administrative costs for those programs. A 1980 study by Western Kentucky University concluded that CAA's contributed $224,095 to the State's Head Start program that year in this way.

Community Action agencies also play a vital role in the success of many human services programs through their unique ability to find and help those most in need. In times when the amount of aid is shrinking and the number of needy is growing, it is especially important to insure that help goes to those who are most needy. Community Action agencies are the only network of local organizations specifically mandated to serve low-income people. Through community-based outreach and information systems, CAA's have consistently proven to be the most effective in finding and serving the people for whom many human service programs were intended. Low-income energy programs and programs aimed at helping the elderly poor are just two examples of this.

The activities and services provided by each Community Action agency are specifically designed to meet the particular needs of the community it serves. The process of local planning, experimentation and direction, and the Federal leadership provided through the Community Services Administration (and its predecessor, the Office of Economic Opportunity) has led to the development of a number of highly successful human service programs. These include Head Start, Foster Grandparents, legal services for the poor, low-income weatherization, the Jobs Corps, neighborhood health centers, low-income home energy assistance, Meals on wheels for the elderly and a variety of others.

Community services block grant funds also go to a variety of other groups that serve low-income persons, including migrant and seasonal farmworkers organizations and Indian tribal organizations. The $25 million Secretary's discretionary fund has been targeted in fiscal year 1983 to support activities benefiting low-income persons in the areas of community economic development, migrant and seasonal farmworkers, rural housing and rural facilities.

In 1981, Congress closed down the Community Services Administration and replaced the Federal program with a new block grant program to the States for 5 years, through fiscal year 1986. The Economic Opportunity Act was repealed and replaced by the Community Services Block Grant Act (title VI-B of the Ominbus Budget Reconciliation Act, Public Law 97-35). The legislation created a new Office of Community Services (OCS) within the Department of Health and Human services to administer the CSBG program.

Even the new Office of Community Services has had to survive a number of cuts. While the Community Services Administration had 370 employees in fiscal year 1981, the Office of Community Services currently has a permanent staff of only 84. Since 1981, 900 permanent position have been eliminated. The administration has plans for fiscal year 1984 to eliminate OCS regional offices and to pare its headquarters staff to 55 permanent employee. Clearly, the OCS must not be virtually dismantled if the CSBG is to be run the way Congress intended.

Public Law 97-35 authorized $389.4 million for fiscal year 1982, a 27.6-percent reduction in funding from the fiscal year 1981 Community Services Administration level of $538 million.

Actual appropriation for the CSBG were even smaller. In fiscal year 1982, Congress appropriated $360.1 million with $348 million of that going to the States for allocation to Community Action agencies and other eligible entities for actual programs. The continuing resolution for fiscal year 1983 also provided $360.1 million for the CSBG, including $348 million to the States. Congress also appropriated $25 million under the CSBG for emergency food and shelter programs in the emergency jobs bill passed this spring. Still, the Congressional Budget Office estimates that by the end of fiscal year 1984, outlays for Community Services programs will have been cut by more than 40 percent from 1981 levels as a result of legislative actions.

The administration has made repeated attempts to kill the community services block grant by proposing to merge the CSBG with the social services block grant, submitting budget requests that zeroed out the CSBG or cut it drastically, and by cutting staff drastically at the HHS Office of Community Services, which is responsible for Federal administration of the program. In each case, Congress has rejected the administration's attempts, and reaffirmed its support for continuation of a viable CSBG program with its reliance upon Community Action agencies as local program operators.

I enthusiastically support this small, but important, increase in the CSBG authorization. We need to send yet another signal to the administration that congressional support of the CSBG and of Community Action programs. More importantly, this increase would give Congress the opportunity to increase appropriations to the program.

Mr. BARTLETT. Mr. Chairman, I yield 2 minutes to the gentleman from Utah (Mr. NIELSON).

Mr. NIELSON of Utah. Mr. Chairman, I rise in support of H.R. 3520 if the Bartlett amendment passes. The Rehabilitation Act extension is necessary and it is bipartisan. It received unanimous support in the committee. However, title IV was added after 2461, was added to 2461 under the guise of simple corrections and additions and clarifications. The Rules Committee would not go along, so this new bill, 3520, is with us.

I would certainly recommend that when Mr. BARTLETT offers his amendment tomorrow that we will support that amendment to take the 10 other programs that are not germane to the Rehabilitation Act, take them out of the legislation, and then we can vote up or down on the Rehabilitation Act, which is what we should do. The other things should be considered on their own merits separately.

Mr. PERKINS. Mr. Chairman, I yield 2 minutes to the distinguished gentleman from Missouri (Mr. YOUNG).

Mr. YOUNG of Missouri. Mr. Chairman, today we are discussing one of the most important pieces of legislation that we will address in the 98th Congress, H.R. 3520. I would like to call the attention of my colleagues to the fact that current authorization for the Rehabilitation Act of 1973 will expire at the end of this month. The programs authorized by this act play a vital role in our Nation because they provide handicapped Americans with essential training in the abilities and skills which are necessary to participate in today's modern working environment. As new technology spurs growth and vast changes in America's offices, factories, and other workplaces, we must utilize the resources of all disabled Americans. The programs included in this legislation would do just that.

In my own State of Missouri, during the last fiscal year over 36,000 persons participated in the vocational rehabilitation programs across the State; of that number several thousand persons returned to work. Mr. Chairman, we cannot allow these programs to be cut in any way. They must instead be brought up to the authorization levels contained in this bill. In the 63-year history of vocational rehabilitation, these programs have had a very high success rate, and therefore prove to be extremely cost effective. For every $1 invested in vocational rehabilitation approximately $10 are returned by these individuals becoming self-sufficient. We, as a nation, cannot afford to abandon the millions of our fellow disabled Americans without severe detrimental effects to our economy, the work force, and the human condition. Mr. Chairman, I urge my colleagues to support this much needed legislation.

□ 1400

The CHAIRMAN pro tempore. The gentleman from Texas (Mr. BARTLETT) has 2 minutes remaining.

● Mr. BIAGGI. Mr. Chairman, I rise, as a senior member of the House Education and Labor Committee, to join with my colleagues to express my wholehearted support for H.R. 3520, the Vocational Rehabilitation Act Amendments of 1973. This legislation is critical if we are to continue the vitally important work of training handicapped adults for productive and useful lives in the world of work. As one of the original authors of the landmark 1973 Rehabilitation Act I know firsthand of the value of this program to the lives of millions of individuals it has served over the years.

This legislation is also vital if we are to assure that 10 major education and domestic programs receive additional funding in the fiscal year 1984 appropriations bill. Title IV of this legislation increases the authorizations for programs which have been forced to bear a disproportionate share of cuts over the past 3 years. These are the very same programs which have served the disadvantaged with large degrees of success—success which has been delayed or detained as a result of funding losses.

Specifically, H.R. 3520 provides increases in the following 10 areas—consistent with the increases authorized

in the first concurrent budget resolution adopted by Congress earlier this year. The budget resolution assumes an increase of nearly $1 billion for education programs. Unless we act now in passing this bill—this victory will be a hollow one. The real losers will be the children, the poor, and the disadvantaged, who have been helped over the years by these programs and who have been hurt the most in the past several years.

The following programs will be helped by H.R. 3520:

Title I education for disadvantaged students would be increased from $3.4 to $3.8 billion would potentially provide services to an additional 6.2 million students—at a time when only 47 percent of the eligible population is being served;

Vocational education would be increased from $735 to $825 million—allowing growth in a program which has been cut 16 percent in the past 2 years and has eliminated 600,000 students from job training activities. This increase would restore training opportunities for youth and adults at a time when unemployment is still hovering around 10 percent;

WIC—the special feeding program for poor women, infants, and children, would be boosted from $1.126 to $1.360 billion to assure that the 2.8 million women and their children now being served would continue to receive assistance;

Handicapped education programs—authorized by Public Law 94-142 would get a long-overdue increase to $1.5 billion. Right now, States are only receiving 12 percent of the total amount of costs associated with the education of handicapped children, despite the fact that Congress intended the Federal share to be 40 percent. Funding has not kept pace with need. This problem is especially acute in high-income areas such as New York City—where the annual costs of educating a handicapped child are $8,000—with the Federal Government only contributing $250 of this amount, despite the fact that it is a Federal mandate which required this education in the first place. This money is essential if we are to make a real commitment to helping the handicapped—not just paying lipservice to rights without putting up the money to make it happen for everyone who needs this education.

Important other funding increases are provided for programs of tremendous importance to many poor people in this Nation. This includes an additional $375 million in funds for the low-income energy assistance program. There are few Federal programs which maintain the sustained need which this one does. Under its provisions, those Americans with incomes at or below 125 percent of the poverty line are able to have some of the costs of their utilities paid for. This includes both heating and cooling expenses. Notwithstanding the extremes in temperature which have plagued all parts of this Nation throughout 1983—and the demands which this has placed on the low-income energy assistance program—the administration proposed to cut spending by 25 percent for this program. H.R. 3520 would avert the loss of assistance to some 1.8 million families were the administration level to prevail. In this particular program there can be no dispute as to the need for an increase in funds. The choice for many of those served by the program has been as basic as heating or eating.

Finally, H.R. 3520 seeks to maintain current funding levels for programs and services provided under the community services block grant program. Even with these levels it would be some $200 million below what would be needed to bring service levels back to 1981 levels when the Community Services Administration was still in effect. The establishment of the community services block grant was accompanied by severe cuts in worthwhile programs aiding those in poverty in rural areas as well as the aged poor and programs for migrant and seasonal farmworkers. The funding level provided in H.R. 3520 represents a base level from which programs under the CSBG may have a good chance to survive.

Mr. Chairman, the vote tomorrow on amendments and final passage of this bill is of enormous importance. It is time that we began to reverse the decline in education caused by inadequate funding levels. It is time to renew our covenant to help those in need with Federal social service funds. It is time that we provided the resources necessary to do the job right. We have reduced Federal spending in a dangerously disproportionate fashion and the result has not been the expected lowering of the Federal deficit. It has prompted an increase in human misery and suffering in this Nation.

H.R. 3520 does what an authorization bill should do. It provides for realistic and warranted increases in funds to send a message to the Appropriations Committee that they too should help provide sufficient funding levels for these 10 programs. If we cannot indicate our support at this phase of the legislative process we cannot expect to fare very well in the all important appropriations phase.

I am proud to be supporter of H.R. 3520 and a cosponsor. I consider it to be a sound investment of the Federal dollar, for those funds spent to educate our young are investments in our future. Those funds invested to help those in need cannot be criticized for what is the alternative?

I urge my colleagues to once again follow the enlightened leadership of our chairman, Mr. PERKINS, and vote for this bill. I also wish to salute my colleague, Mr. AUSTIN MURPHY, for all of his leadership on behalf of this bill. It deserves to pass and it must pass for the good of America.●

● Mr. FRENZEL. Mr. Chairman, as we consider H.R. 3520 today, I wish to commend the fine rehabilitation programs that exist throughout our country as a result of the Rehabilitation Act. The rehabilitation programs provide a great service to the disabled, and they in turn, are able to become productive and contributing workers thereby benefiting our country. Further, this program is cost-effective and I understand that persons participating in the program generally pay back the initial costs of the training—through reduced social security disability dependency and tax revenues—within 4 years.

I strongly favor the reauthorization of the Rehabilitation Act so that this successful program may continue and I would like to support this bill. However, there are several provisions of this bill that must be considered.

First, title I of this bill would tie future year increases in VR to two times the CPI. Such increases would seriously violate section 303(a)(4) of the Budget Act which prohibits the establishment of new entitlement programs or increases in existing entitlement programs or increases in existing entitlement programs for future years. In doing so, title I would reduce Congress' ability to make funding decisions in the out-years; budget controllability will be further reduced.

Congress cannot afford to lose what little control and oversight of spending we now have. Chairman JONES' amendment to extend the current program as an entitlement through 1988 allowing for an annual increase based on the CPI will eradicate the Budget Act problem. The Jones amendment should be supported. Our ability to review programs annually and exercise control over our budgets should not be weakened. I urge my colleagues to support the Jones amendment.

Second, I strongly feel that the inclusion of title IV is inappropriate and irrelevant to this bill. Title IV would increase authorization ceilings for 10 education programs by about $1.6 billion over the fiscal year 1984 levels set in the Omnibus Reconciliation Act, during a time of high deficits and needed fiscal constraint. I find these increases completely out of line, and they surely do not need to be considered at this time.

It is my judgment that this bill is intended to reauthorize the Rehabilitation Act and it is not to be used as a vehicle to squeak by wishful increased authorization levels for education programs. The simple presence of this controversial provision will most likely

result in the veto of this bill and consequent failure to reauthorize the Rehabilitation Act which expires October 1, 1983.

The inclusion of title IV is counterproductive to the intention of this bill and the needs of the approximately 1 million persons served by the Rehabilitation Act. I join Mr. BARTLETT in strong opposition to title IV and urge support for Mr. BARTLETT's amendment to delete title IV.

It is my hope that these controversial points can be resolved so that a reasonable bill can be agreed upon today by this body. A timely, acceptable reauthorization bill is a must to insure that the business of rehabilitation continues as scheduled.●

● Mr. JONES of Oklahoma. Mr. Chairman, I would like to take this opportunity to explain the amendment which I plan to offer, for myself and others, to title I of H.R. 3520, the Vocational Rehabilitation Act Amendments of 1983.

Section 102 of the reported bill provides increases in the States' entitlement allotment under this program for fiscal years 1985 through 1988 in violation of the Budget Act. My amendment reauthorizes the vocational rehabilitation program at the level recommended by the Education and Labor Committee for fiscal year 1984 and continues the funding for this program through fiscal year 1988 according to the current law which limits any increases to the Consumer Price Index. The amendment cures the Budget Act violation and makes title I of the bill consistent with the most recently adopted budget resolution.

The following "Dear Colleague" explains the Budget Act violation and my amendment in more detail:

COMMITTEE ON THE BUDGET,
Washington, D.C., September 12, 1983.

DEAR COLLEAGUE: The Rehabilitation Act Amendments of 1983, H.R. 3520, is scheduled for consideration in the House this week. As members of the Budget Committee, we plan to offer an amendment that will eliminate a serious Budget Act violation contained in Title I of the reported bill. This amendment only applies to Title I, the entitlement section for vocational rehabilitation, and would not affect any other provision of the legislation.

As mentioned in our letter of late July, Title I of H.R. 3520 violates a provision of the Budget Act which enhances Congress' control over spending. The bill provides for increases approximately twice the consumer price index for each of the fiscal years 1985, 1986, and 1987, years for which no budget resolution is yet in place. Section 303(a)(4) of the Budget Act prohibits the establishment of new entitlement programs or increases in existing entitlement programs for future years. In so doing, this provision ensures that Congress is not committed to future spending decisions outside of the context of a budget resolution. Currently, Title I would remove our flexibility to make funding decisions in the out-years and thus increase the uncontrollable portion of the budget. More detailed information on our concerns can be found in the August 4 Congressional Record, page H6537 during the debate on the rule for H.R. 3520.

Our amendment would authorize an extension through fiscal year 1988 of the current entitlement program, which provides for annual increases in benefits based upon the consumer price index. The amendment cures the Budget Act violation contained in the reported bill as well as making the out-year funding levels consistent with the most recently adopted budget resolution. Although we believe that automatic indexing of non-means tested entitlement programs is a critical element of long-range budget deficits, we feel it is best to address that issue through a comprehensive approach rather than target individual, indexed programs for modification. Our amendment brings the entitlement obligations in H.R. 3520 in line with the assumptions in the Budget Resolution for vocational rehabilitation for fiscal years 1984–86. For FY 1984, the reported bill does not violate the Budget Act and therefore would not be affected by this amendment.

Vocational rehabilitation is an important, effective program that has had a major, positive impact on the lives and productivity levels of handicapped individuals throughout the country. We are very supportive of it, and want to see it continue to serve our handicapped individuals well. The program will continue to provide essential opportunities to handicapped individuals for rehabilitation efforts. We endorsed this program for the handicapped in our budget actions earlier this year. The budget resolution which Congress adopted accommodated substantial increases in funding for this program; in fact, the assumptions in the budget resolution we adopted provide for *increases* in fiscal year 1984 of $110 million over amounts provided in fiscal year 1983.

We look for your support of this amendment. It preserves the integrity of both the Budget Act and Budget Resolution for fiscal year 1984 and assures that the vocational rehabilitation program will continue to be a vital resource for handicapped individuals.

With best wishes.

Sincerely yours,

JAMES R. JONES,
Chairman, House Budget Committee.
LEON E. PANETTA.
RICHARD A. GEPHARDT.
BILL NELSON.
BILL FRENZEL.
BRIAN J. DONNELLY.●

● Mr. OTTINGER. Mr. Chairman, I rise in support of title IV of this bill (H.R. 3520) to increase the fiscal year 1984 authorization for the low-income energy assistance program administered by the Department of Health and Human Services.

I commend Chairman PERKINS for seeking a funding level for this program which moves us in the direction of providing what is considered the minimum assistance level for the neediest members of our society. Despite its claims to the contrary, the administration has consistently requested funding levels which all but abandon the truly needy. The low-income energy assistance program is a financial assistance program which provides for the most basic of living essentials, heat; and must be maintained at levels that permit some degree of comfort and health.

According to the Health and Human Services Department in testimony before the Energy Conservation and Power Subcommittee, which I chair, 21 million low-income households are eligible for this home heating and cooling fuel assistance program. Yet, by its own admission, only one-third of these—approximately 7 million families—are presently receiving assistance. Many more households, including those of the elderly and unemployed, are literally incapable of meeting their escalating energy bills. It is a deplorable situation that a household need as essential as energy is becoming unaffordable.

In a report by the Fuel Oil Marketing Advisory Committee of the U.S. Department of Energy, it was found that the poor spend at least 35 percent of their income directly on energy. This percentage is four times more than the average American household. The study concluded that "a program of at least $3.5 billion is necessary to offset the loss of purchasing power" borne by the poor.

The Committee for Economic Development, an independent organization of Fortune 500 business executives, reinforced the DOE advisory committee assessment in a 1982 study of escalating energy prices and public policy, concluding that—

The poor ought to receive adequate funding to help compensate them for what we calculate as a $3 to $7 billion decrease in their annual real income caused over the past 8 years. In estimating the level of need, we are convinced that $5 billion would be a small price to pay for the benefits. Compared to the size of the energy sector of the economy, we are struck by how small an ($5 billion) expenditure it would take to offset completely the impact on the poor.

Yet the administration has continually requested funding levels of $1.3 billion, far below levels needed for an adequate program. The $2.25 billion authorization provided in this bill attempts to ameliorate this growing imbalance.

Most States are now paying only a small fraction of the fuel bills of eligible households and in the last 2 years, as energy costs, particularly gas, have continued to increase, a majority of States have reduced their benefit levels. Present benefit levels are now not sufficient to protect the poor against the residential energy increase of the past 5 years. The average annual assistance level of $200 is only a small portion of a typical Northeastern annual fuel bill of $1,400. In response to this and other evidence of the inadequacy of the present funding level, earlier this year I introduced legislation to increase the LIEAP authorization of $3 billion.

Since 1978 the average electricity bill has increased by 65 percent, the

average natural gas bill by 108 percent and the average heating oil bill by 140 percent. Utility shutoffs have increased markedly, as have the number of households falling into arrears on their utility bills. The impact of skyrocketing prices for this essential commodity has been devastating to the millions in our society who are living on fixed incomes—the elderly and the millions of unemployed—the new poor of America.

We cannot abandon those victimized by our economic times to make impossibly hard choices that leave no option but suffering. I urge you support of the title IV increase in LIEAP authorization for fiscal year 1984 and commend Chairman PERKINS for bringing this legislation to the floor.

● Mr. BOUCHER. Mr. Chairman, I would first like to take this opportunity to commend my colleague, the gentleman from Kentucky, for bringing before the House H.R. 3520, the Rehabilitation Act Amendments of 1983.

As a member of the Education and Labor Committee, I have been privileged to observe firsthand the gentleman's dedication and hard work in developing a solid bipartisan consensus for our Federal commitment to quality education and training for all Americans. H.R. 3520 reaffirms that commitment by reauthorizing important vocational rehabilitation programs for handicapped citizens and by strengthening Federal support for 10 other programs under the jurisdiction of the Education and Labor Committee.

For more than 60 years, vocational rehabilitation programs have given to handicapped citizens the opportunity to become gainfully employed. The millions of handicapped Americans who have found jobs through this program attest to its success. Moreover, vocational rehabilitation programs are cost effective; for every $1 spent on vocational rehabilitation, an estimated $11 is returned by the individual who becomes employed. Yet, Federal support for this program has been cut dramatically, and the program is currently serving less than half of the people originally served. I strongly support the reauthorization of the vocational rehabilitation program.

The other programs included in title IV of this bill are effective, established programs which have documented a solid track record of success is serving millions of our citizens. The popular WIC program which provides food assistance to women, infants, and young children who are nutritionally at risk has proven to be effective in improving the health of women and their young. As much as $3 is saved for every $1 spent in the WIC program. Notwithstanding the proven effectiveness of the WIC program, Federal support for it has been reduced as the need for this assistance has increased.

The chapter 1 program for disadvantaged students also has a demonstrated record of success in raising the reading achievement scores of poor, low-achieving, and minority children. The Secretary of Education has acknowledged the outstanding success of this program; yet, less than half of the children eligible for assistance are being served because of reduced Federal support.

Vocational education has become the focus of national attention today. Federal support has been a major factor in the development of successful vocational education programs. The need for vocational training and education has increased drastically. Yet, once again, Federal support for vocational education has declined for the past 3 years.

Each of the other programs included in title IV of this bill face similar dilemmas. In the face of records of success and an increase in the number of persons needing assistance, Federal support has been reduced.

We are all well aware of the importance of each of these programs for the Nation as a whole; however, for the people of my district in southwest Virginia, these programs represent a lifeline in the midst of an economic storm.

Southwest Virginia has been particularly hard hit by the current economic recession. In many of our coal-producing counties, unemployment has soared above 25 percent. High unemployment and the resulting economic dislocation have combined to cripple the area's economy. As a result, vocational education has assumed a particular importance in southwest Virginia. Given adequate funding, vocational education programs could provide more training for the workers who have already demonstrated the drive, the determination, and the dedication to hard work that will aid southwest Virginia and the rest of the country in recovering from the recession.

Vocational rehabilitation and the programs in title IV of this bill are of proven effectiveness. Let us, therefore, recognize their success in helping millions of Americans and strengthen our Federal commitment to each of these programs. I urge my colleagues to join me in supporting H.R. 3520.●

● Mr. MARTINEZ. Mr. Chairman, I rise in support of title IV of the Rehabilitation Act Amendments of 1983. When we debated the merits of the budget resolution this past spring, a great deal of that debate was on setting our priorities. Both on the floor of the House and in conference committee, we examined the needs of this Nation and set our spending levels accordingly. Although it was initiated by Democrats, its bipartisan support in both the House and the Senate proves that it set those priorities both fairly and realistically. A lot of time and hard work went into that resolution. Now the time has come to make it work.

Title IV of the Rehabilitation Act amendments authorizes the funds that Congress decided were needed by the budget resolution. It raises the authorization for 10 vital programs—programs whose funding was drastically cut by the Omnibus Budget Reconciliation Act of 1981. Well, we have had the time to see the results of those cuts and judging by the support of the budget resolution, I do not think many of us liked what we saw. Title IV gives us the opportunity to insure that the intent of the resolution to support the programs will be carried out and that the urgent needs it responded to will be met.

I do not see any validity in the arguments against title IV. The one I hear most often is that these programs should be considered in individual authorization bills, and that we should abide by the spending levels set by the Budget Act of 1981. Although I was not a Member of Congress during its consideration, I recall that the methods being use here are the same as those used in 1981 to get that budget through. No parts of that budget were considered individually and it was even debated under a closed rule. Well, we have an open rule in H.R. 3250, and if Congress sees fit to amend title IV, it can be done. We have no reason to straitjacket Congress into accepting parts of the bill it does not want. However, the adoption of the budget resolution makes it very clear that Congress does indeed want these authorizations increased.

The needs of a nation can change in 2 years and they have certainly changed since the Omnibus Budget Reconciliation Act was passed in 1981. There is no need to abide by budget limitations that Congress feels are insufficient and outdated. These increases are hardly extravagant. Most merely allow us to continue to serve those who are already participating in these programs. None even come close to the authorizations needed if we were to serve all who are eligible. It is time that we do more than debate the needs of the disadvantaged—it is time that those needs are met.●

Mr. BARTLETT. Mr. Chairman, I yield myself the remaining 2 minutes for a summary.

I would urge this House, each Member of the House tomorrow, to cast his or her vote very carefully on title IV which, in fact, will determine whether those 1 million Americans in this country who could be helped and are being helped today will continue to be helped by the rehabilitation programs. Their interest, Mr. Chairman, would be damaged by the continuing inclusion of the extraneous matters in

title IV, which include separate and unrelated programs, some good, some bad, some in between, including the programs for museums, for adult education, for arts and the humanities, and for others, but the one thing they have in common is that they are not related to rehabilitation.

I would urge my colleagues to think of those disabled Americans who are depending on the reauthorization, on time, and the renewal into public law of the Rehabilitation Act of this country. Each of the other programs has its own authorization bill, its own legislation, can have its own hearings, will have its own markups, and can be considered on its own merits.

I would urge my colleagues to allow the Rehabilitation Act to be considered and to be passed into law in a timely way before October 1. It has already been delayed by 5 months, calling into jeopardy many of the State programs that are in the State right now today.

The gentleman from Wisconsin said it best on the floor today when he said we must not allow ourselves, as a House, to play politics with the lives of 1 million disabled Americans who are depending on each of us as representatives of the people for their continued ability to rehabilitate themselves and return themselves into active and productive lives. I urge every Member of this House to consider those 1 million Americans very carefully as they cast their votes tomorrow.

Mr. PERKINS. Mr. Chairman, I yield the balance of our time to the gentleman from Pennsylvania (Mr. MURPHY), the author of the bill.

The CHAIRMAN pro tempore. The gentleman from Pennsylvania (Mr. MURPHY) is recognized for 7 minutes.

Mr. PERKINS. Mr. Chairman, will the gentleman yield to me for just a half a minute?

Mr. MURPHY. I yield to my chairman, the gentleman from Kentucky.

Mr. PERKINS. I thank the gentleman for yielding to me.

Mr. Chairman, first let me state that the gentleman from Texas (Mr. BARTLETT) is a very sincere and fine Member of the Congress, but I think he will agree with me that not one Member on his side of the aisle has on any occasion introduced a bill to increase any of those authorizations 1 penny, nowhere along the line, and somewhere, somehow, some way, we need to get these authorizations increased in order to see that no more disadvantaged teachers are laid off throughout the Nation and try to gain back something that Gramm-Latta has taken away from us. We are not trying to bust the budget here; we are just trying to take care of a little inflation. That is all we are doing, Mr. Chairman.

Furthermore, I think the President of the United States will sign this bill. The President has made a great analysis of the need for better education in the country. We have polled the President's Commission on Excellence, and 10 of the 12 members of the President's Commission state that we need more Federal money to improve these programs. I say, in my judgment, the President of the United States will sign this bill because we are trying to help him solve one of the most serious problems in this country today.

Mr. MURPHY. I thank the gentleman for his comments.

Mr. Chairman, when I spoke originally on this measure in opening the debate, I confined my remarks to the first three sections of the Vocational Rehabilitation Act. However, as I sat and listened to the debate, and charges of politics and allegations of real concern for education, I thought that it would be my responsibility to discuss title IV insofar as it applies to the Education for the All Handicapped Children Act which my subcommittee handles.

H.R 3520, the measure we are now considering, increases the authorization of appropriations for the Education of the Handicapped Act from $1.1 billion, its present level, to $1.5 billion. The Budget Committee itself this year increased the budget level of funding to $1.226 billion, and therefore, under existing law, we would not have the growth that even the Budget Committee projected and adopted when we adopted the budget earlier this year and allowing absolutely no growth. This is 1 of the 10 items in title IV.

The Education of the Handicapped Act is the primary Federal law assuring a free appropriate public education for handicapped children. Part B of the Education of the Handicapped Act, as amended by Public Law 94-142, provides Federal financial assistance to States for the education of children, ages 3 to 21, having one or more of nine physical or mental disabilities ranging from learning disabilities to severely handicapping conditions. The level of Federal assistance is based on an annual count of handicapped children being served and is intended to pay a percentage of the excess cost associated with educating those unfortunate children.

Approximately 4 million handicapped children are currently participating in State and local special education programs. More importantly, that number is expected to increase at a rate of 80,000 children per year. The Education for All Handicapped Children Act was originally intended to be funded at 40 percent of the national average per pupil expenditure by fiscal year 1982. For the first 2 years that Public Law 94-142 was enacted, the Federal Government met its obligation to State and local educational agencies. The level of Federal assistance for the years following, from 1979 to the present, show a steady decline in that support. At the same time that the Federal Government was reducing financial assistance from 12.5 percent of the average per pupil expenditure in 1979 to an all-time low of 8 percent in 1983, I might say following Gramm-Latta, the special education population was increasing in that time from 3.7 million in 1979 to 4.04 million this year.

H.R. 3520 increases the authorization of appropriations for the education of handicapped children by a mere $274 million. This would increase the per pupil expenditure to only about 11 percent, a percent and a half lower than our 1979 funding level. Considering recent trends in Federal support and the expected increases in the special education population, it is imperative that this amendment be adopted so that we can insure the opportunity for the needed growth in this program to assist States in providing quality education programs to their handicapped children.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from Illinois.

Mr. ERLENBORN. I thank the gentleman for yielding.

Mr. Chairman, the gentleman is making a point about the necessity of increasing authorizations of these various programs in title IV. Let me ask the gentleman, titles I, II, and III, that have to do with the Rehabilitation Act, was the subject of legislation the gentleman himself introduced, hearings, negotiations between the majority and the minority, as to the level of authorizations, and finally, bipartisan support for the final product. Is this not true?

Mr. MURPHY. Substantially.

Mr. ERLENBORN. If the gentleman will yield further, can the gentleman tell me, has any authorization bill to increase the authorizations for the other 10 programs been introduced, been the subject of hearings, been the subject of discussion, amendments, negotiations and compromise, or did all 10 of those get in this bill merely by sort of an offhand, "By the way, now that we have finished with the rehabilitation bill in committee, why do we not just tack on an amendment that increases all the rest of these authorizations?"

Mr. MURPHY. Let me first answer the gentleman. I speak to the matters that my subcommittee handles. I know that we have held hearings on the Education of the Handicapped Act. We have recommended that the funding level be increased and we hope to have that act on the floor some time in the near future, but without this section, we have absolutely no room for growth in the Education for the Handicapped Act.

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania (Mr. MURPHY) has expired.

All time has expired.

□ 1410

Mr. PERKINS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. MURPHY) having assumed the chair, Mr. LELAND, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3520) to extend and improve the Rehabilitation Act of 1973, to provide for the operation of the Helen Keller National Center for Deaf-Blind Youths and Adults, to create a select commission on Federal assistance to disabled Americans, and to increase certain authorizations of appropriations for programs within the jurisdiction of the Committee on Education and Labor, had come to no resolution thereon.

TRADE ACT OF 1974 AMENDMENTS

The SPEAKER pro tempore. Pursuant to House Resolution 299 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3391.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3391) to improve worker training under the Trade Act of 1974, and for other purposes, with Mr. KILDEE in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Florida (Mr. GIBBONS) will be recognized for 30 minutes, and the gentleman from Minnesota (Mr. FRENZEL) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the trade adjustment assistance programs were enacted 20 years ago, and renewed in 1974 and 1981, to provide weekly cash benefits, training, and job search and relocation assistance to workers and technical and financial assistance to firms when increased imports contribute importantly to layoffs and to sales or production declines. For the past 20 years Congress and successive administrations have regarded it a Federal Government responsibility to aid workers and firms in certain sectors which may experience temporary dislocation as a result of a national policy to liberalize trade for the benefit of the country as a whole. Congress also recognized that special assistance beyond normal unemployment and business loan programs was necessary to meet the more difficult adjustment problems that entire industries or geographic regions may face with increased import competition.

TAA expires by statute on September 30. H.R. 3391 reauthorizes the worker and firm TAA programs for 2 years until September 30, 1985. The bill also amends these programs in several respects to improve their operation and effectiveness.

H.R. 3391 removes an inequity in current program coverage by extending eligibility to workers in independently owned firms supplying essential parts or services adversely affected by increased imports of finished articles. These workers are currently eligible for TAA if employed in an integrated company which also produces the end product. Workers laid off because a firm or plant relocates its production facilities abroad would also be covered by the bill.

The major provision of H.R. 3391 would enhance the prospects and increase the opportunities for worker training. Under present law, the Secretary of Labor has discretionary authority not to approve training even if a worker meets the five statutory conditions for eligibility. Many workers seeking training have met these criteria but have not been approved because insufficient program funds were available at the time to pay the costs. The bill would require approval of training if the existing criteria are met, thereby removing lack of funds as an additional administrative basis for denying training. Workers would be reimbursed if they self-financed their training costs, pending funds being appropriated.

The bill adds a voucher system as an alternative to State-contracted training in order to encourage workers to seek on-the-job or institutional training opportunities on their own which they believe most appropriate to their needs. Safeguards are included to prevent abuse and to require State approval of training courses.

To enable more workers to enter training, the bill adds a supplemental assistance benefit of $15 per day as minimal income support for any worker in approved training who is ineligible for trade readjustment allowances under the TAA program. Nor would such assistance be available while a worker is eligible for unemployment compensation. H.R. 3391 increases the emphasis on worker adjustment also by increasing the level of job search and relocation allowances. Amendments to the firm program increase the availability of technical assistance on an industrywide basis and increases the maximum amount of such assistance an individual industry can obtain annually from $2 to $10 million.

With respect to funding, H.R. 3391 establishes a special account consisting of customs receipts as the most appropriate source of revenue to fund the total costs of the TAA program. The Committee on Ways and Means has appropriated specific amounts of revenues attributable to import duties into the account based on CBO cost estimates of $217 million in fiscal year 1984 and $163 million in fiscal year 1985. However, actual funding of TAA will depend on appropriations out of the account through the passage of appropriations legislation. A separate account established in the Commerce Department consisting of TAA loan repayments would be available to supplement appropriations for the firm program.

In 1981, Congress addressed the criticisms that TAA had become too costly and focused on temporary income maintenance. Cash benefits were greatly reduced and the worker program reoriented to training and other adjustment measures for the longer term unemployed. The TAA programs are now modest and manageable in budgetary costs. They address the specific adjustment needs of individual trade-impacted workers and firms and provide an alternative to the far more costly responsse to the Nation of raising import restrictions. Firm TAA is the only program available combining technical and financial assistance oriented toward adjustment of small- and medium-sized businesses. Continuation of TAA is even more essential now at a time when autos, steel, textiles, and other basic industries face major basic structural adjustment problems and their workers require retraining for alternative jobs.

I urge your support of H.R. 3391.

Mr. Chairman, the moving force behind this legislation, the Member who has taken the greatest interest in it—and I want to applaud him here publicly now—is our colleague, the gentleman from Ohio (Mr. DON PEASE). He has been vitally interested in the welfare of the worker and in the retraining of the worker when the worker is laid off because of trade impact, and he has fought mightily and successfully to bring this legislation to the floor.

This is a sound piece of legislation reflecting his sound, sensible approach to nationwide problems. This program should be distinguished from the CETA program and from all other kinds of make-work types of job programs that we have had around here. It is also not the same old trade adjustment assistance program that we used to have that paid out more in

cash benefits to unemployed workers than was perhaps necessary in many instances. This is a very sound sensible training and readjustment program to meet a national need.

Mr. Chairman, I intend to yield the balance of my time to the gentleman from Ohio (Mr. PEASE).

Mr. FRENZEL. Mr. Chairman, if the gentleman from Florida (Mr. GIBBONS) does not object, I have a speaker to whom I wish to yield time immediately.

Mr. Chairman, I yield such time as he may consume to the distinguished ranking minority member of the Committee on Ways and Means, the gentleman from New York (Mr. CONABLE).

□ 1420

Mr. CONABLE. Mr. Chairman, I rise in opposition to H.R. 3391, a bill to extend for an additional 2 years the trade adjustment assistance programs for workers and firms. The bill also significantly expands the coverage of TAA programs as well as the level of training benefits provided under them. It is hardly the kind of legislation we should be considering at a time when persistently high budget deficits dictate a need for austerity and caution.

Although the Congress acted decisively only 2 years ago to bring the cost of TAA programs under control, H.R. 3391 reverses our earlier actions and multiplies the programs' cost from $92.5 million in fiscal year 1983 to $217 million in fiscal year 1984 and $163 million in fiscal year 1985. Furthermore, if additional funds are needed to cover unforeseen costs overruns, H.R. 3391 authorizes such expenditures without limitation.

From a fiscal point of view, this bill throws caution to the winds. Let me elaborate further on the reasons why I feel this legislation would be opposed.

First, the bill greatly expands worker eligibility and is expected to bring more than 16,000 new recipients under TAA coverage. As in the past, the bill before us extends benefits to workers in firms directly impacted by increased imports. However, H.R. 3391 also would create a new entitlement for workers in firms supplying essential parts and services to these primary firms. This change alone will expand the programs' cost by $44 million each year and, because the causal link to imports becomes obscured, many more workers than expected could qualify for benefits.

Second, this legislation is unnecessary because it duplicates the benefits already extended to dislocated workers under the recently enacted Job Training Partnership Act. This act provides training and other benefits to all dislocated workers, including any who have been laid off due to the effects of increased imports. The administration has requested $220 million in fiscal year 1984 for training, job search and relocation allowances under the JTPA. As a matter of policy, to single out trade impacted workers for a higher level of protection than other dislocated workers who are seeking training for new jobs, seems questionable.

Third, this legislation sets up a special account for funding worker and firm assistance to be supplied by allocations from general customs revenues. Set percentages of annual customs revenues are stipulated for this purpose. Once committed, such funds may not be used for any other purpose.

It is well known that funding procedures of this nature are generally resorted to as a means to avoid the uncertainties of the normal appropriations process. Through this special account mechanism, we are being asked to commit a level of funding for fiscal years 1984 and 1985 that we might not otherwise be willing to appropriate. Yet, later on our hands will be tied, whether or not economic circumstances might justify a lower level of funding.

Fourth, the bill, as currently drafted, strengthens the entitlement aspect of the training programs even more than was done in the 1981 amendments. This trend was objectionable then, and I have not changed my viewpoint now. The legislation narrows the discretion of the Secretary of Labor because under the revised provisions in this bill, the Secretary now is mandated to award the benefits whenever an employee can meet the broad eligibility requirements. As a result, the conferral of benefits will become virtually automatic.

In summary, this bill expands TAA benefits on questionable grounds, makes training outlays essentially automatic, and duplicates already appropriated training funds under the Job Training Partnership Act. And it will do all this in an irresponsible way—by insulating the bill from the normal appropriations process. We will be creating a situation where, in future years, and perhaps under changed economic circumstances, we will be unable to exercise control over the amount of funding committed to this program.

This legislation can hardly be held up as a blueprint for responsible congressional action at a time when controlling Federal budget outlays really would be the greatest public service we could perform.

I urge my colleagues to reject H.R. 3391, as currently drafted.

Mr. PEASE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I believe in the principle of free trade. Our trade policy should promote the free flow of goods and services among nations. But not at the unmitigated expense of thousands of jobs and markets for American workers and businesses. If you agree, you should support the passage of this bill without amendment.

It is not enough to simply join with President Reagan in decrying America's apparent shift toward protectionism as a "bunker mentality" that threatens free trade. The real challenge before us is to understand the currents of change that are transforming world trade patterns and to decide how we are going to respond.

From the end of World War II into the early 1960's, our economy was largely self-reliant. It grew by leaps and bounds with no limits in sight. Most Americans saw their standards of living rise steadily. American industries and manufacturing workers were producing primarily for the domestic marketplace and were not threatened by imports per se. Free trade was a high-sounding principle that did not cost anything.

Since the early 1960's, our position in the world economy has changed dramatically. Our easy access overseas to critical raw materials at cheap prices has disappeared forever, while we continue to draw down our domestic supplies. Our exports have not kept pace with the flood of imports pouring into the American marketplace. More than 70 percent of all goods we produce are now actively competing with foreign-made goods.

It has become clear that American business, industry, and labor were not prepared for the onslaught of foreign competition given entry to American markets in recent years by our official adherence to the principle of free trade. Consequently, the U.S. trade deficit last year rose to a record level. It is proving painful to come to terms with the new dynamics of international trade. Many American consumers now prefer foreign-made products.

To make matters worse, President Reagan is ignoring an important means of sustaining broad-based popular support for free trade policies. He is right to argue that open markets and free trade serve our national interest. Twenty percent of all the goods we now produce are exported. But he is wrong, as the first President in the postwar era, to deny flatly that our Federal Government has any obligation or constructive role to play in helping thousands of American workers and businesses who are losing their jobs and markets in American industries adversely affected by the rising tide of imports. This oversight in the President's perspective on international trade helps explain the growing hue and cry in this Congress and among the American people for protection.

The Trade Expansion Act of 1962 and the Trade Act of 1974 included provisions to assist firms and workers adversely affected by increased imports. Unlike President Reagan, Presidents Kennedy, Johnson, Nixon, Ford,

and Carter all understood that pursuing trade liberalization in the national interest necessarily requires that some of our industries and workers risk their markets and jobs to imports.

That is why Federal assistance has been available throughout the last 20 years to help trade-sensitive firms get technical assistance and loans to adjust to increased foreign competition.

That is why America's labor leaders accepted free trade policies in exchange for what they thought at the time was a solemn commitment by our Federal Government to provide adequate compensation, training opportunities, and job search and relocation aid to manufacturing workers thrown out of work by imports.

That is why it is very important for us to reauthorize an improved trade adjustment assistance [TAA] program now.

But President Reagan and the other opponents of this bill want to forget longstanding commitments. They want to abandon thousands of American workers who have lost their jobs in our basic industries like textiles, steel, autos, rubber, and electronics to foreign competition in recent years and to deny them means to reequip themselves to find new jobs. The opponents of this bill seek the benefits of free trade, while they deliberately downplay and largely ignore its human costs in unemployment and bankruptcies across our country. What the opponents cannot grasp is that modest programs like TAA for workers and firms are crucial to maintaining domestic support for free trade and to helping American firms and labor meet the challenge of increasing imports.

Do not get me wrong. I concede that the way the TAA program was designed in 1974 and later administered had many flaws. For example, when auto industry layoffs soared in the late 1970's, the TAA program for workers operated almost exclusively as an income-maintenance program with virtually no funds available for retraining unemployed workers certain not to be recalled to their old jobs. More than $1.6 billion was spent on weekly TRA benefits in fiscal year 1980, but only $5.2 million was spent on retraining. This bill provides for a much-improved TAA program with a new emphasis—on training.

The past problems of the TAA program are not sufficient cause to dismiss blithely any Federal responsibility for redressing the harmful domestic consequences of free trade policies set in Washington. This bill makes available only 2.6 percent of the more than $10 billion to be collected in customs duties levied on imports in fiscal year 1984. That is a small amount to retrain American workers who lose their jobs to foreign competition and to assist beleaguered small businesses. The required funding decreases significantly in fiscal year 1985.

President Reagan has said that our country and our trading partners are together in the "boat of open markets and free trade" in which holes are being shot by neoprotectionists. But to save the ship, the opponents of this bill are ready to throw overboard many American workers and struggling businesses.

I urge you to vote for this bill and for renewal of the TAA program. In so doing, you will be supporting a more enlightened, more compassionate, and more responsive trade policy in the turbulent years to come.

□ 1430

Mr. Chairman, I reserve the balance of my time.

Mr. FRENZEL. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I rise in opposition to H.R. 3391 as currently drafted, which extends, at expanded levels, a costly entitlement program that duplicates the benefits and protections for dislocated workers contained in the recently enacted Job Training Partnership Act. This bill would also extend a trade adjustment assistance program for firms that have been unsuccessful in encouraging anymore than a handful of companies to adjust to import competition.

In my view, expanding a policy of special treatment for import related unemployment is not justified given the varied and formidable economic forces that contribute to loss of jobs in our society today.

The retraining objectives of TAA would be more equitably addressed by the JTPA. Under title III of this act, in the first large-scale effort to provide long-term solutions for workers unemployed due to many types of economic change, the administration has requested $220 million for training and relocation allowances. The outlays associated with this program are more reasonable and can be managed responsibly by evaluating needs and appropriating funds each year rather than funding an entitlement governed by a set of static criteria.

H.R. 3391, on the other hand, reinforces in two ways the entitlement nature of training under TAA that I have objected to in the past. First of all, the bill tightens already strict limits on the discretion of the Secretary of Labor to deny assistance funds for training programs that are ineffective or too expensive. In light of the severe budget constraints we face, the Secretary must have the flexibility to target funds to efficient training while keeping within the budget amounts set by Congress.

Yet as drafted, this legislation would make it next to impossible for the Secretary to deny training. For example, benefits can only be denied to workers who fail to accept work that pays 80 percent or above of their previous wages. Since former wages of laid-off auto and steelworkers can be more than double the average manufacturing wage in the United States this provision has the effect of delaying job changes to new sectors. The fact that this program sets up a double standard for unemployed workers depending on the cause of their job loss is illustrated by the fact that conventional unemployment benefits are denied to workers who turn down jobs which pay the highest minimum wage available in the area.

The second characteristic that gives H.R. 3391 the look of an entitlement program is the new special account it would create. H.R. 3391 would actually sidestep the appropriations process by creating what amounts to a trust fund with a direct claim on a certain percentage of U.S. Customs duties to cover expenditures for TAA programs. This shrinks the role of the Appropriations Committee to that of appropriating funds, under tightly drawn directives, out of this fund which holds the money in reserve for a year whether or not appropriations are made.

I also oppose the extension of eligibility for benefits to firms supplying parts and services to other firms that experience trade related unemployment because of the difficulty in establishing the link to import competition. Imports are but one element of a very dynamic economic situation and we can not look to the TAA program to solve more entrenched problems such as structural unemployment.

In my view cost estimates incorporating the number of workers and firms that could be certified under this legislation are highly uncertain. The ability to feed "such funds as may be necessary" into the special account requires further authorizations for any increased costs and threatens runaway costs should estimates be too low.

I plan to offer four amendments that are designed to insure that the TAA programs are fiscally sound.

The first amendment maintains the TAA special account created under the provision of H.R. 3391 but at levels that are consistent with the first concurrent resolution on the budget. This resolution, passed only a few short months ago, provides $134 million in fiscal year 1984 for renewal of TAA programs. My amendment would limit expenditures under H.R. 3391 to $134 million in both fiscal year 1984 and fiscal year 1985. It also eliminates the authorization of unspecified "additional sums" to cover cost overruns.

Of the total $134 million, the amendment provides $61.5 million each year for training and related benefits, $40 million for weekly cash al-

lowances, $5 million to cover additional 26 weeks of benefits for workers in training, and $27.5 million for firms. These figures are consistent with CBO estimates of the prospective cost of weekly allowances and training for payments or for TAA benefits for secondary workers.

I would like to point out that my amendment provides slightly more money, a total of $123 million, for prospective training benefits than does H.R. 3391. However, it does not include $55 million in retroactive training payments to TAA recipients certified between September 30, 1982, and date of enactment of this bill. Most of these workers qualify for training and relocation benefits under the Jobs Training Partnership Training Act, and such extensive retroactive benefits in my view are not justified.

The second amendment takes care of a problem I reviewed earlier. It would eliminate the provisions of H.R. 3391 that extend eligibility for benefits to workers in firms that supply essential parts and services to trade-impacted industrties. These new provisions are expected to bring more than 8,000 additional workers per year under TAA at a cost of about $44 million annually. Coverage for secondary workers will increase the cost of weekly allowances and training by about 67 percent over existing law.

The link to import competition becomes very superficial with respect to secondary workers and implies that the real goal of TAA programs is unemployment compensation rather than trade adjustment. To create an expectation that TAA will cure all the ills of structural unemployment can only lead to disappointment. My amendment will insure that imports are a direct causal factor in qualifying for TAA benefits.

My third and fourth amendments simplify the authorization process by providing direct authorizations of $217 million in fiscal year 1984 and $163 million in fiscal year 1985 for TAA programs. There would be the special account, no authorization for unspecified additional sums to cover cost overruns, and no circumvention of the appropriations process. Yet the full amount of money to cover the cost of H.R. 3391, as estimated by the Congressional Budget Office, will also be provided under my amendment.

The major difference in my amendments and the provision of H.R. 3391 is that the amendments reduce considerably the entitlement nature of TAA programs as envisioned by this bill and place a ceiling on expenditures for TAA programs. My last amendment does provide some flexibility in the authorization of money to cover weekly cash allowances, as is the case under existing law, but declines to carry any entitlement over to training or firms as provided under H.R. 3391.

AMENDMENTS

Because H.R. 3391 broadens TAA coverage, mandates the approval of training benefits and removes all caps on spending, we should not be surprized if costs skyrocket. The cost of weekly cash allowances is expected to jump by at least 93 percent over the cost of similar benefits under existing law. Expenditures for training will rise by a staggering 340 percent the first year, including $55 million for retroactive payments, and in the second year, will be 120-percent higher than today.

I urge my colleagues to vote for these amendments when they are offered.

□ 1440

Mr. PEASE. Mr. Chairman, I yield 6 minutes to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, the underlying philosophy of this country in trade is to make that trade as free and open as possible, to remove barriers, and to maximize the flow of international trade and commerce. Toward that objective we have participated in a series of international agreements and discussions, beginning with the Kennedy round of talks, continuing through the Tokyo round of talks and numbers in between and others that will continue, that will take place in the future.

Under those trade agreements we removed or agreed to the removal of barriers to trade which protected domestic industries and workers against unfair trade practices by foreign competition from either government-subsidized or government-owned industries.

In return, we ought to provide a measure of protection and assistance in unemployment compensation and training and adjustment to this new condition for those workers whose jobs are lost because goods produced under unfair conditions and which will compete unfairly with U.S. goods are now entering this country and displacing our commodities in our marketplace.

If we do not provide the kind of assistance authorized, envisioned under this legislation we will see that respect will be lost for the trade agreements into which we have entered, there will be widespread clamor for protectionism against these commodities produced in foreign countries under unfair conditions; and we will see a return to a prior condition which may again disrupt international markets and cause economic problems for the United States.

Now it is a fact that as a result of the change in our trade policies millions of Americans have lost jobs and that is not an understatement. We have literally seen entire industries wiped out in sectors of this economy.

In return, however, the meager provision of the 1974 Trade Adjustment Assistance Trade for unemployment compensation and the very strict conditions under which that adjustment is meted out have been inadequate to compensate the people whose jobs have been lost.

Even in the absence of unfair competition free trade policies are going to result in technological change, dislocation of the domestic marketplace and a host of other conditions that have been discussed in the course of the hearings conducted very ably by the gentleman from Ohio (Mr. PEASE).

More than 70 percent of all goods produced in the United States face competition from foreign-made commodities that are imported into our marketplace.

□ 1450

And that is a growing range of competition, particularly in the wake of the international trade agreements that we have signed.

The Congressional Budget Office estimated that as of January 1983, there were 750,000 dislocated workers due to international agreements.

The Chairman of the International Trade Commission estimated that there will be in the course of this year an additional 1 million workers displaced in 1983.

What I would like to do is just for a moment share the human impact of that trade dislocation. I would like to quote from a letter from an unemployed steelworker, a woman who in late August wrote to one of my Minnesota colleagues, sent me a copy of her letter, a colleague who is opposed to this legislation. She wrote:

Upon hearing that you are the motivating force behind termination of the act on September 30, I feel that I must speak my mind. In case, you haven't heard the situation here in northeastern Minnesota is extremely bad. On second thought, bad isn't the word to describe it, suicidal is a more appropriate choice. Sheer desperation has set in around the entire area. Displaced steelworkers are pushing the panic button. With sky high unemployment, only a scattered amount of part-time, minimum wage jobs available, and no hope of being called back to work at a dying Minntac—

That is Minnesota taconite plant, that produces iron ore pellets—

people desperately need somewhere to turn.

Now, I ask you to figure it out. If there are not jobs to be found in this state, and no hope returning back to the boom days of the taconite industry, what would your options be? Logically speaking, I would say two ideas pop into my mind: one, relocation, and two, retraining.

Now, that comes from a person who is there on the firing line, a person whose job is at stake, unlike some who, in this Chamber, speak so grandiloquently and in such abstract terms about this issue. Those are the words of a person whose job is lost, whose income is demolished, whose future is uncertain. And all she is saying is,

"Give me a chance to create a new life, a new opportunity."

The letter goes on to make an eloquent and effective appeal not for welfare but for retraining, for an interim income so that she can retain her dignity and keep her family together and create a new future for herself and for her children.

The Federal Government has a responsibility to those who have lost their jobs through policies adopted by the Federal Government that have created the dislocation in the workplace. Those are not policies adopted by any of the States, they are not adopted by the workers or the industry; those are policies adopted by the Federal Government. And we as Representatives of that Federal Government have an obligation to repond.

The extension of benefits that is provided in this legislation to workers engaged in production of component parts and provision of essential services is long overdue, and I commend the gentleman from Ohio for having included that provision in this legislation. I have argued for it and cosponsored such legislation along with him going back several years. There is a clear and direct link between Minnesota or Minnesota raw iron ore and taconite, processed ore, and imported steel. We have no other market for that iron ore and those taconite pellets. There is nothing you can do with them except make steel out of that ore, and when imported steel comes in and dislocates jobs in the lower lake ports and puts the steelworkers there out of work, they do not need the Minnesota taconites and our people are laid off. That is the direct link to which the gentleman on the other side of the aisle referred a moment ago.

I urge the adoption of this legislation and rejection of the amendments from my colleague from Minnesota.

Mr. PEASE. Mr. Chairman, I yield myself 2 minutes for the purpose of entering into a colloquy with the distinguished chairman of the House Budget Committee, the Honorable Mr. JONES of Oklahoma.

Opponents have attacked this bill with charges that it creates new entitlement authority for training in relation to the Budget Act and that it opens the door to uncontrollable spending. These charges are not true by my understanding.

H.R. 3301 reauthorizes the worker training provisions which expire at the end of this fiscal year. It also amends the training provisions by requiring the Secretary of Labor to approve training for workers whom he determines meet certain criteria. Under existing law, the Secretary may approve training for workers whom he determines meet certain criteria. However, since the Secretary of Labor's initial determination as to whether a worker meets certain criteria is discretionary in nature, those provisions would not create an entitlement for purposes of the Budget Act.

I would like to ask if that is the gentleman's understanding also?

Mr. JONES of Oklahoma. If the gentleman will yield, the gentleman is correct, that is my understanding. According to House precedents, the provisions for worker training in the reported bill do not create an entitlement for Budget Act purposes. Therefore, the authorization levels provided in this bill, H.R. 3391, would not violate the budget resolution or the Budget Act. The Labor-HHS Appropriation Subcommittee will have to determine the actual funding levels for the various aspects of the TAA program, and that is where the budget limitations would come into play.

Mr. PEASE. I thank my colleague very much for those words of clarification. We have heard some discussion this afternoon about budgetary problems, and it seems to me that we have no more authoritative source than the chairman of the House Budget Committee on that subject.

Mr. Chairman, might I inquire how much time is remaining on both sides?

The CHAIRMAN. The gentleman from Ohio (Mr. PEASE) has 5 minutes remaining, and the gentleman from Colorado (Mr. BROWN) has 15 minutes remaining.

Mr. PEASE. Mr. Chairman, I reserve the balance of my time.

Mr. BROWN of Colorado. Mr. Chairman, I have no other requests for time, and I yield back the balance of my time.

Mr. PEASE. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. GONZALEZ.)

Mr. GONZALEZ. I thank the distinguished gentleman from Ohio (Mr. PEASE) for yielding, and I rise, actually, in joinder with his efforts and in support of this bill and against the thus far announced and explained amendments, and really mainly for the purpose of asking a question or two. But may I preface my question by saying that I was here in 1962 at the time of the consideration, debate, and approval of what was known as the Trade Expansion Act of 1962. It was one of the very few recommended legislative programs that I did not vote for that President Kennedy, whom I supported almost without exception in every other way, had asked the Congress to approve. One of the reasons is because of the fact that no consideration was being given then for what I considered a new development, the emergence of the multinational cartels, in a manner reminiscent of post-World War I. And I am sorry to say that, although I support this bill now out of sheer necessity, I foresaw what would be happening if we did not become realistic enough to anticipate the forces that would impinge on our economic life to the point where our workers would be placed, as they have been and are now continuing to be, to compete with every coolie, peon, and slave laborer that is now working under the onus of authoritarian regimes throughout the world. This is exactly what we are confronting and continue to confront. Until we address that, the best thing that we can do is to approve this type of assistance to the victim American workers.

My question was this, Mr. Chairman: We are caught here in a sort of a catch-22, if I understand the dilemma. If an individual in a given State would want to apply for relief under this trade assistance provision, we are caught since 1981, are we not, with the dilemma that any State that is willing to do it and conduct a program of retraining, without the benefit of having the Federal Government or the Congress approve this act, would face the fact that since 1981 the Secretary of Labor in effect has prevented States from funding this type of activity? Am I correct in that interpretation?

□ 1500

Mr. PEASE. If the gentleman would yield, I think under this legislation there is no provision for State funding, so if the States wanted to put in money they probably could not absent the availability of Federal money.

Mr. GONZALEZ. I thank the gentleman, and also commend him for his effort on this behalf and I certainly intend to support the bill.

Mr. FAUNTROY. Mr. Chairman, I rise in support of H.R. 3391, the Worker and Firm Trade Adjustment Assistance Act of 1983. This legislation will reauthorize and improve the trade adjustment assistance programs which have been aiding workers and firms which have suffered economic dislocation because of adverse trade and import conditions.

This legislation is especially needed at this time when our economy is undergoing major structural changes in response to the increasing interdependence of the world economy. Trade adjustment assistance has always been a constructive alternative to trade restrictions. It provides workers with a financial cushion and training to prepare them for new employment opportunities when their old jobs have been lost because of foreign competition.

H.R. 3391 not only continues this sensible approach to the loss of certain businesses and jobs to foreign competition, it also makes improvements in the program by expanding its coverage to include workers in firms that supply services or parts to import-impacted producers. It also makes it easier for dislocated workers to pursue training programs for new jobs, by extending the period of training during which cash payments can

be received, by requiring approval of training for qualified individuals regardless of whether there are sufficient funds, and by increasing the maximum job search and relocation allowances.

Given the transition pains that sectors of our economy are suffering, this bill is deserving of our support.

● Mr. CORRADA. Mr. Chairman, I rise in strong support of H.R. 3391, a bill to reauthorize the trade adjustments assistance program. The Trade Expansion Act of 1962 established this program of trade adjustment assistance for workers and firms. The thrust behind the program was the recognition of the problems arising from trade policies that may affect industries.

In the 20 years of its existence, the program has provided technical and other assistance to hundreds of thousands of workers and industries to enable them to recover from the impact of foreign imports. The program has also served as an option to the imposition of import restrictions as a way to provide relief to domestic industries.

Since January 1982 to the present, 14 firms have become eligible in Puerto Rico for adjustment assistance. Although it is regrettable that there is a need for such a program, it is nevertheless very important that this program be continued and expanded.

H.R. 3391 amends the program in the following way:

First, it expands coverage to additional workers in independent firms which are essential to qualifying firms and to workers who may be laid off because of a firm's relocation in a foreign country.

Second, the bill increases the maximum number of weeks of authorized leave under certain conditions which are then credited for the minimum amount of time needed to qualify for assistance.

Third, extends the benefit period during which a worker may collect benefits.

Fourth, worker training provisions are amended to remove lack of funding as a reason for not approving training. In addition, the requirement that there be a reasonable expectation of employment after training does not mean that there be a concrete offer of employment.

Fifth, there is an increase in the maximum job search allowance from $600 to $800.

Sixth, there is an increase in the maximum annual amount of technical assistance per industry from $2 to $10 million.

Seventh, a separate account will be established to be administered by the International Trade Administration and which will consist of all repayments of loans, interest payments, et cetera, for use in future loans, loan guarantees, and technical assistance under the program.

The bill extends the program through 1985 and reauthorizes appropriation levels of $217 million in fiscal year 1984 and $163 million in fiscal year 1985.

The legislation places renewed emphasis on retraining and thus addresses a key issue that will confront us in the next years; the need to retrain workers for jobs that are responsive to our industrial policy.

I urge my colleagues to reject amendments to weaken the provisions of this legislation and to vote in favor of H.R. 3391.●

The CHAIRMAN. The gentleman from Ohio (Mr. PEASE) has 2 minutes remaining.

Mr. PEASE. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. PEASE) having assumed the chair, Mr. KILDEE, Chairman of the Committee of the Whole House on the State of the Union reported that that Committee, having had under consideration the bill (H.R. 3391) to improve worker training under the Trade Act of 1974, and for other purposes, had come to no resolution thereon.

TIME TO BE ANNOUNCED FOR SPECIAL ORDER ON THE LATE HONORABLE LARRY McDONALD

(Mr. JENKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JENKINS. Mr. Speaker, all of the people of America and indeed of the entire world have been shocked and dismayed and sorrowed at the tragedy that has recently occurred which took the lives of many people, including one of our colleagues here in the House.

I recognize that many Members of the House have asked about when a special order be granted. Tomorrow that will be announced for a day certain and a time certain so that all the Members of this House will have the opportunity to speak during that special order.

THE LATE HONORABLE LARRY McDONALD

Mr. JENKINS. Mr. Speaker, on behalf of all of the members of the Georgia congressional delegation, I offer a privileged resolution (H. Res. 307) on the death of the Honorable LARRY MCDONALD, and I ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 307

Resolved, That the House has heard with profound sorrow of the death of the Honorable LARRY MCDONALD, a Representative from the State of Georgia.

Resolved, That a committee of such Members of the House as the Speaker may designate, together with such Members of the Senate as may be joined, be appointed to attend the memorial service.

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That when the House adjourns today, it adjourn as a further mark of respect to the memory of the deceased.

The resolution was agreed to.

A motion to reconsider was laid on the table.

HOUSE SHOULD DEMONSTRATE SUPPORT FOR DEFENSE PROGRAMS

(Mr. STRATTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRATTON. Mr. Speaker, I was interested, indeed, to listen to the remarks of Members of the House this morning expressing their outrage and concern over the shooting down of the Korean plane 007, with some 61 American citizens aboard, and expressing their desire to do something to retaliate against the Soviet Union.

At the same time I had on my desk a letter from 71 Members of the House who are proposing to send back the defense conference report agreed to by the House and Senate conferees because of the fact that the conferees agreed to begin a very minor kind of military capability to deter a much more massive chemical capability that the Soviets have.

If anybody really means what was said this morning about trying to retaliate, the best way to retaliate is to demonstrate that the House of Representatives is solidly behind the defense programs that the committees of the House and the Senate have recommended.

NEGOTIATED FHA INTEREST RATES—CORRECTING THE RECORD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, at the time the House debated the bill H.R. 1, which is the Housing and Urban Rural Recovery Act of 1983, my colleague from Texas (Mr. BARTLETT) offered an amendment to allow the Federal Housing Administration to issue mortgage insurance on mortgages with negotiated interest rates. This amendment was accepted. Its effect, as I pointed out fruitlessly at the time, is to eliminate the maximum interest rate ceiling on FHA loans that is set by the Secretary of Housing and Urban Development from time to time and which has been in the law since its inception over 40 years ago.

The House did not have a full understanding of the impact of this amendment and the claims made by proponents of it were in fact not true.

Their claims, proposed by Mr. BARTLETT, were based on what they palmed off on the House at that time as the results of an experimental pilot project. It was claimed that if this amendment were accepted, the so-called points that are charged by lenders would be eliminated, or at least minimized.

The truth of the matter is that the very opposite will happen. This is one reason why that provision of the law has been unchanged through the years, for over 40 years. The truth of the matter is that what data does exist on the question of negotiated FHA interest rates, including that data referred to by Mr. BARTLETT, shows that not only are the loans issued at above FHA's fixed-rate level; the points are still assessed. Ultimately, in fact, the Bartlett amendment, if enacted and approved by the Senate, would raise the cost of home ownership by generally increasing the interest rates which today are intolerable, exorbitant, and paralyzing the attempt on the part of any otherwise eligible American family to own their own home.

□ 1510

What this amendment will do is simply give lenders a mortgage instrument that is easier to sell, because some points that would be charged under a loan with an FHA ceiling would simply be folded into the loan principal itself. That would mean less cash up front, meaning a mortgage that is easier to sell but a loan that ultimately costs much more.

What has been the experience with the experimental negotiated rate program?

In December 1982, the FHA rate was 12 percent, and points were 6 to 7. At that time, a negotiated rate FHA loan in Boston was from 12 to 14 percent, with points ranging from 4 to 10. In other words, not only was the interest higher, so were the points. Down in Richmond, the negotiated rate was a half percent above the FHA ceiling, and points were from 8 to 12—again, a higher interest and higher points as well.

Indeed, nothing suggests that the negotiated loan program would eliminate or even minimize points. This, as a matter of fact, worsens the situation. But even if it did, the higher interest rates that result would make the cost of the home loan much higher over its lifetime. How much higher would depend on the length of time the loan was held.

Those who favored the Bartlett amendment spoke of market forces, as if home buyers could conduct the same kind of interest rate auction that a sophisticated borrower like the U.S. Treasury or General Motors can carry out. But the typical home buyer is not a professional money manager. The lender is. The lender knows all about the market and what it will bear and how to work in a little bit more profit at the expense of the innocent. So when we talk about negotiated interest rates on a home mortgage, we are talking about a one-way negotiation; we are talking about a negotiation between a shark and a little fish. The little fish has not a prayer of getting a good deal; his only chance is to run and hide. And the data on negotiated rates show that this is exactly what is happening. The points go right on being charged and the interest rate goes right on up, too.

The FHA ceiling approach at least tells the buyer that he can reasonably expect a certain ceiling in a reasonable market. It is at least a benchmark. It may well be that up front cash in the form of points payments will be needed to make the posted ceiling yield enough to meet market rates. But at least the overall interest rate is held to a reasonable level according to modern standards. In my book, it is still usurious and exorbitant. At least there is a point of reference, a benchmark set by people who do know what a reasonable market price is, who do know what lenders ought to be able to live with, which the typical home buyer does not.

Proponents of the Bartlett amendment were asked to show what the facts of the matter were. We asked them. Since we were not acquainted with any tangible results from any pilot program, we asked them to support their claim with hard facts. They could not do it on the House floor during the debate. But though the existence of such facts was claimed, no such information was adducible by them, of course.

I have been able to gather some information on this matter, and it shows clearly that experience has not given cause to think that points will disappear when interest rates are higher. I am submitting that information for the RECORD because I feel that had Members known the true facts, they might have voted differently on the Bartlett amendment. Even if the vote would not have been affected, the House was entitled to know the facts and to act upon those facts rather than the false impressions held out by the proponents of the Bartlett language.

I have suggested to my colleague, the gentleman from Texas (Mr. BARTLETT), that he should correct the record. I did this several weeks ago, and I make my letter to him on this matter a part of the RECORD today. I have not heard from him and am, therefore, placing in the RECORD information that the House should have had before its vote on this matter.

Mr. Speaker, that information and the letter to which I referred are included as follows:

HUD REGIONS—SURVEY CONDUCTED DECEMBER 1982, UNDER FHA NEGOTIATED RATE DEMONSTRATION PROGRAM

	Interest rates (percent)	Points
Region I	12–14	4–10
Region II	11–14½	3–9
Region III	10–12½	3–11
Region IV	10–14	2–11
Region V	9½–12½	3–8
Region VI	10–15½	0–9½
Region VII	11–15	2–9
Region VIII	9½–14	1–9.75
Region IX	7–12½	1–12.5
Region X	11–13½	0–8.5
Some selected cities in these regions:		
Boston	12–14	4–7
Buffalo	12	3
Richmond	12½	8–11
Detroit	11½–12	4–6
San Antonio	10–12½	
Kansas City	11–12½	8
Denver	11–12½	1–8
Los Angeles	12½	2–3
Seattle	11–12½	0–8.5

Note: Under the regular FHA program the interest rate during December 1982 was 12% and the points being paid varied from 6–7.

AUGUST 30, 1983.

Hon. STEVE BARTLETT,
Longworth House Office Building,
Washington, D.C.

DEAR COLLEAGUE: I am writing to express my concern that the Congressional Record is incomplete and very likely misleading with respect to the amendment that you offered during consideration of H.R. 1 to authorize a negotiated interest rate under the FHA insured loan program. I believe that the amendment would not have been adopted had the House known the entire facts. My purpose, however, is to request that you take an early opportunity to supply more complete information regarding your amendment for the Congressional Record.

Some Members clearly misunderstood the effect of your proposal to establish a negotiated interest rate program. This can be evidenced by reading the proceedings of the debate on this amendment. It was claimed that the proposal would ". . . eliminate the need for a lender to charge a seller points

. . ." (C.R. July 13, 1983, 18850). In your own statement, you said that the amendment would help by ". . . lessening the need for those excessive points . . ." (C.R. July 13, 1983, 18850). When you were queried about providing data from the demonstration program, upon which your proposal is based, you indicated that it would be made available. The data never appeared.

Based on data that I have obtained from the Department of Housing and Urban Development on the demonstration program, I propose to you that the data does not suggest conclusively that points would disappear under a negotiated interest rate program. While this information might have affected the outcome of the vote on your proposal, I feel there is an obligation for the record to reflect the actual experience under the demonstration program. It should show that points continued to be assessed under the negotiated interest rate demonstration program ranged from zero to 12.5 and often did not differ significantly from the experience under the fixed rate FHA program.

I have no doubt that you acted in good faith. I trust that you will make every effort to submit for the record the data to which you alluded during the course of debate on your amendment. It should be made clear to those Members who voted in support of your amendment that the experience under the demonstration program does not confirm the belief that a negotiated interest rate policy will cause points to disappear. The reality is that homebuyers will continue to pay very steep point premiums.

Sincerely,

HENRY B. GONZALEZ,
Member of Congress.

HIGH HOLIDAYS 5744

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, for Jews all over the world, the new year began on the evening of September 7, the first day in the autumn month of Tishri, 5744, under the Jewish calendar, with the celebration of Rosh Hashanah, the Day of Judgment. This is a joyous, but solemn occasion for Jews, and a day of deep religious significance. It is also the beginning of a 10-day period of penitence, the Days of Awe, culminating in Yom Kippur, the Day of Atonement, the holiest day of the year.

The Hebrew month of Elul, which immediately precedes this high holiday period, is seen as a time for introspection and meditation in preparation for repentance and renewal. During this month, it is customary to visit the graves of relatives and teachers, to remember the sanctity of their lives, and to gain inspiration for the coming year. Penitential prayers, selikot, are recited at midnight on the Saturday before Rosh Hashanah, and continue for at least 4 days, as the tenor of the high holiday period begins to intensify. It is also customary to send friends and relatives cards containing special wishes for a new year of good will, peace, and happiness.

On Rosh Hashanah, God remembers all his creatures and judges humankind, and their destinies are inscribed in the Book of Life. It is a time for prayer, self-reflection, and penitence. The highlight of the Rosh Hashanah service in the synagogue is the blowing of the Shofar, or ram's horn, whose sound is meant to awaken man's conscience, to renew his faith, to return him to God, and to summon all Jews to self-examination and repentance.

For 10 days, beginning with Rosh Hashanah, and ending with Yom Kippur, all Jews make a concentrated effort at introspection and reconciliation. It is customary for Jews to ask forgiveness of other people they have slighted or hurt during the year. Through this direct confrontation with other persons, they approach forgiveness and reconciliation with others. Jews search their souls and repent for their sins, and ask forgiveness. Their deeds and fate are then weighed in the balance by God on the last day.

The 10th of Tishri, Yom Kippur, is the culmination of the entire high holiday period, and is marked by fasting and all other physical abstinence, in order for Jews to concentrate to the utmost on spiritual elements. The entire day is spent in the synagogue, praying and repenting for past sins. The day ends with the loud, long piercing shofar blast which marks the final sealing of the heavenly gates, the renewal of the spirit, and a final cleansing of the heart. Jews return to their homes for a large and joyous break-the-fast meal.

During these most holiest of days, I extend my greeting and best wishes for a happy new year to my many constituents and friends of the Jewish faith who reside in the 11th Congressional District of Illinois which I am honored to represent, as well as to all Jews throughout the world, especially those who must daily live a dismal existence under the tyranny and oppression of the Communists. Hopefully the new year 5744 will bring with it a relaxation of restrictions and permission for them to emigrate to Israel where they may worship in religious freedom.

"May you be inscribed for a good year," and let us hope and pray that the coming year brings a lasting peace in the Middle East, an end to all bloodshed in Lebanon, and a new beginning for all Jews.●

CONCANNON AND WENTE WINERIES—100 YEARS OF EXCELLENCE IN THE LIVERMORE VALLEY OF CALIFORNIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

● Mr. STARK. Mr. Speaker, this year, the people of the Livermore Valley—and people throughout the entire San Francisco Bay area—are celebrating the centennial of two great vineyards and two great families who have made those vineyards famous.

The Concannon and Wente wineries, the families that established and maintained them, and the people of our area who worked in these vineyards are all to be congratulated for a 100 years of hard work, imagination, and foresight, which have given our area and the Nation a quality product.

We are proud of our Livermore Valley wineries, not just because they have helped identify our valley to the world, but because the personal efforts of those who have worked on this land have been an example of hard work and determination which has helped shape all of us, and helped make all of us better citizens of the Livermore Valley.

Personally, I would just note that California is still a fairly young and rough State. Most of it has developed since World War II, but the permanence and endurance of these families and their wineries have helped establish California. The hard work represented by the quality product of these wineries demonstrates the full potential and sense of community which can be achieved. Robert Frost's words apply, I think:

The land was ours before we were the land's . . .
Such as we were we gave ourselves outright . . .
To the land vaguely realizing westward,
But still unstoried, artless, unenhanced,
Such as she was, such as she would become.

The extraordinary giving of the Concannon and Wente families to the land they settled has indeed brought us an art, famous worldwide. For this, they are all to be congratulated.

The celebration of the wineries continues this fall as the new crush of grapes is brought to the presses. This week, the Livermore Lions Club honors both wineries with a dinner. The weekend of the 24th of September begins 10 days of festivities, tours, and exhibits, with the Livermore Valley Harvest Festival.

I hope everyone will join me in wishing a "bon voyage" as these two wineries begin a second century of excellence.

I would like to include in the CONGRESSIONAL RECORD at this point a history of the two families and wineries:

CONCANNON—LIVERMORE VALLEY

HISTORY

If the vines could speak, they would have much to say about the effort put forth by three generations of Concannons and those more recently of Agustin Huneeus in establishing Concannon Vineyard as a leader in viticultural practices and premium wine pro-

duction. Further evidence of the success at Concannon was its recent acquisition by Distillers Company, Limited of London. This company, after having researched the California wine industry for two years, selected the historic Concannon winery because of the uniqueness of the Livermore appellation and its solid position in the national wine market.

The first vines were planted in 1883 when founder James Concannon brought cuttings of Sauvignon blanc and Semillon from that part of Bordeaux France known as Chateau d'Yquem. The Livermore Valley soil, classified by the USDA as Livermore Valley Very Gravelly Loam, accepted those vines successfully. The wines earned awards as early as the 1890's in national and international competition and are still doing so.

The earliest endeavors of James Concannon were geared primarily toward producing wines to be used for sacramental purposes. Joseph Concannon, upon leaving the military, continued the winemaking traditons set by his father. The succeeding generation, brothers Joseph, Jr., and James, pioneered in both viticultural practice and wine production. During the 50's and 60's, the marketing area extended to over thirty states and all major cities. Today, Concannon can be found in forty-four states.

The most notable innovation at Concannon was the release in 1964 of a varietal Petite Sirah, long used as a blending grape in Burgundy. The Concannons recognized that grape's unique adaptability to the gravelly soil and realized immediate success. Today, Petite Sirah is produced by more than thirty wineries in California and has taken its place as one of the most important red varietals.

After the death of Joe Concannon in 1978, the Concannon family decided that the extensive modernization in both the winery and the vineyard was an expense that would require an additional capital investment. The decision was made to sell the winery to Agustin Huneeus, who instituted a program of renewing the vineyard, establishing a barrel aging program for red wines, adding more modern production equipment, restructing the product line, and redesigning the label. James Concannon remained as president overseeing all aspects of the winery business.

In 1983, Distillers Company, Limited, ended its search for a premium estate winery that would be the entry of this prestigious firm to the California wine business. They recognized the wisdom of using the unique Livermore soil for the three varieties the Concannons had long felt best suited and supplementing the product line with wines produced from selected vineyards in the best appellations for each variety. The plan of specializing in the Livermore vineyards for the estate wines and developing, through long-term contracts, the best sources for the selected vineyard segment of the wines produced will enable the winery to reach its full capacity of 150,000 cases in 1986. During 1983, Concannon Vineyard observed its Centennial with a celebration on April 30 and May 1 attracting over 20,000 visitors.

The special events long associated with Concannon will continue—Art in the Vineyard during Memorial Day Weekend, Tasting in the Wood, a vertical tasting of Cabernet and Petite Sirah at each stage in the wines' development, during Thanksgiving weekend; and the Harvest Festival in late September.

Throughout the many changes that have taken place in the last decade, the philosophy instituted by the Concannon family has remained. The winery's goal of producing the highest quality wine is shared by all the personnel, many of whom have been employed for 15 years or more.

CONCANNON VINEYARD

TIME LINE

1883—James Concannon purchased 47 acres, built house, planted Sauvignon blanc and Semillon.

1887—Added 30 acres to estate.

1889—Began shipping vinifera cuttings to Mexico.

1893—Added 57 acres to estate.

1895—Winery building erected.

1898—Added 100 acres to estate.

1911—Planted Petite Sirah.

1918-1933—Volstead Act—Winery continued producing and selling sacramental wines.

1958—Champagne introduced (no longer produced).

1964—Petite Sirah released as a varietal.

1971—Planted Rkatsiteli (no longer produced).

1976—First to introduce rose made from Zinfandel grapes.

1980—Winery purchased by Pacific Land & Viticulture, Inc., headed by Agustin Huneeus.

1983 Winery purchased by Distillers Company, Limited.

WENTE BROTHERS

This year, 1983, Wente Bros. celebrates their 100th Anniversary of winemaking. At 100, Wente Bros. is the oldest, continuously operating family-owned winery in California. Indeed, there are very few family-owned wineries of pioneer vintage left, most have been absorbed by conglomerates.

The fourth generation of Wentes took over about five years ago, after the unexpected death of their father. With guidance from their mother, Jean, and 86 year old grandfather, Ernest, the young Wentes-Eric, 25, Philip, 24, and Carolyn, 21—picked up where their dad left off.

Since then they have doubled the size of their vineyard and winemaking operations, and are introducing a classic style brut sparkling wine to commemorate their centennial year.

The winery was founded in 1883 on 47 acres bordering Tesla Road southeast of Livermore. Since C. H. Wente planted his first cuttings imported from Europe, the winery has grown to some 1,600 acres in Alameda and Monterey counties. Another 2,300 acres of hill and flatland is used for grazing cattle and growing hay, grain and walnuts.

Today, Wente is considered a medium-sized winery yet, one of the largest producers of premium, cork finished wines. "We stress quality rather than size," says Eric, the family winemaker.

The Wentes take their grape growing and winemaking personally. All decisions are made jointly in family conferences that include Jean, the mother, and Carolyn, Eric and Phil.

"We grow virtually all the grapes that go into our wines," said Phil, the family farmer and a graduate of the University of California, Davis. "We know all of our vines and tanks by name, and each one of us tastes every batch of wine to make sure it meets our standards. Whenever anyone buys a Wente wine, he or she can be sure that it was first tasted by every adult member of our family before being approved for the marketplace."

Carolyn is in charge of marketing and public relations for Wente Bros. She drove the tractor, picked the grapes, bottled the wines and shoveled the grape skins from the fermenters, just like the brothers did. She is a Wente, and Wentes, man and woman, work. It's family tradition.

Carolyn, a Stanford graduate, explains: "We got the work ethic from dad, whose name was Karl. He got it from grandfather, Ernest; and gradfather got it from great-grandfather, who was called C. H.—C. H. thought idleness was bad for growing youngsters."

Carl Heinrich Wente, a young German immigrant, arrived in Northern California in the 1870's. Moving through several jobs as an hourly laborer, he was hired by a winemaker, (Charles Krug), and soon became cellarman. As his knowledge and interest in wine increased, so did his ambition to have his own vineyard and winery. He found his vineyard land in the gravelly soils of the Livermore Valley. Here he planted his vines, built his winery and raised his family of seven children. Two sons, Ernest and Herman, became Wente Bros., Inc. The third son, Carl F., opted for a different life in the world of banking and, eventually, became the president of the Bank of America.

Believing that life without wine was an unnatural state, Herman and Ernest turned to cattle ranching during Prohibition, which enabled them to also maintain the vineyards and the winery in excellent condition. As survivors of Prohibition, they were ready-made pioneers of the California wine industry when Repeal finally came. One of their first far-reaching innovations was to varietally label wine—a direct departure from the European wine industry's marketing of generic names such as Chablis, Burgundy and Sauterne. The first varietal label was for Sauvignon Blanc. This won the Grand Prix at the Paris International Exhibition in 1937—a great beginning following 18 years of hard work to keep vines and winery ready.

In 1949, Karl, Ernest's son, joined the original Wente Bros. He continued the innovative practices of his father and uncle. The amount of acreage increased, new farming and winemaking techniques were introduced, and the Wente winery became the model for many of the new plants during the great wine boom of the 60's and 70's.

The young Wentes have continued to expand along the lines envisioned by their grandfather and father. Besides pioneering vineyards in Monterey county, they have purchased the abandoned Cresta Blanca winery near Livermore. They are in the midst of rennovating the building for use as additional cellar storage and aging of their wines. They also may rehabilitate the historic tunnels that penetrate the hill beyond the winery.

New Industry innovations by the fourth generation include the design of the now widely used wine bottle called the "California bottle" and the development of a new tank press for immediate treatment of juice for champagne cuvee.

The fourth generation of Wente Bros. has the same sense of pride that C.H. Wente started with in 1883 and is as concerned in every way today, as he was then, to produce premium quality table wines.

COMPENDIUM OF 1982 CONCANNON WINE AWARDS

1982 ORANGE COUNTY FAIR WINE AWARDS

1981—Johannisberg Riesling, Livermore Valley, Estate Bottled—Bronze.
1981—Sauvignon Blanc, Livermore Valley, Estate Bottled—Bronze.
1978—Petite Sirah, California—Bronze.
1981—Muscat Blanc, Livermore Valley, Estate Bottled—Bronze.

1982 ALAMEDA COUNTY FAIR WINE AWARDS

1979—Chardonnay, California—Silver.
1981—Muscat Blanc—Silver.
1978—Petite Sirah—Bronze.
1981—Zinfandel Rose—Bronze.
1981—Chablis, California—Bronze.
1981—Sauvignon Blanc, Estate Bottled—Honorable Mention.
1981—Sauvignon Blanc, California—Honorable Mention.
1981—Johannisberg Riesling, Livermore Valley—Honorable Mention.
1981—Vin Rose—Honorable Mention.
1977—Cabernet Sauvignon, Livermore Valley—Honorable Mention.
NV—Rkatsiteli—Honorable Mention.

1982 LOS ANGELES COUNTY FAIR WINE JUDGING AWARDS

1981—Zinfandel Rose—Silver.
1980—Burgundy—Honorable Mention.
1981—Livermore Riesling, Livermore Valley—Honorable Mention.
1981—Johannisberg Riesling, Livermore Valley—Honorable Mention.

1982 SAN JOSE MERCURY NEWS CALIFORNIA WINE AWARDS

1981—Sauvignon Blanc, California—Professional Silver.
1981—Sauvignon Blanc, Livermore Valley—Professional Silver.
1978—Petite Sirah—Professional Bronze and Consumer Bronze.

1982 SAN FRANCISCO FAIR AND EXPOSITION WINE AWARDS

1978—Petite Sirah, California—Bronze.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. HUBBARD, for 60 minutes, today.
Mr. ALEXANDER, for 60 minutes, today.
Mr. GONZALEZ, for 30 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. STARK, for 5 minutes, today.
Mr. RICHARDSON, for 60 minutes, September 13.
Mr. ALEXANDER, for 60 minutes, September 13.
Mr. ALEXANDER, for 60 minutes, September 14.
Mr. ALEXANDER, for 60 minutes, September 15.
Mr. ALEXANDER, for 60 minutes, September 16.
Mr. ALEXANDER, for 60 minutes, September 19.
Mr. ALEXANDER, for 60 minutes, September 20.
Mr. ALEXANDER, for 60 minutes, September 21.
Mr. ALEXANDER, for 60 minutes, September 22.
Mr. ALEXANDER, for 60 minutes, September 23.
Mr. ALEXANDER, for 60 minutes, September 26.
Mr. ALEXANDER, for 60 minutes, September 27.
Mr. ALEXANDER, for 60 minutes, September 28.
Mr. ALEXANDER, for 60 minutes, September 29.
Mr. ALEXANDER, for 60 minutes, September 30.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BROWN of Colorado) and to include extraneous matter:)

Mr. GRADISON in two instances.
Mr. BROOMFIELD in four instances.
Mrs. JOHNSON in three instances.
Mr. BEREUTER in two instances.
Mr. KEMP in three instances.
Mr. ROTH.
Mr. PARRIS.
Mr. CRAIG.

(The following Members (at the request of Mr. GONZALEZ) and to include extraneous matter:)

Mr. ANDERSON of California in 10 instances.
Mr. GONZALEZ in 10 instances.
Mrs. LLOYD in five instances.
Mr. HAMILTON in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.
Mr. OTTINGER.
Mr. MCHUGH.
Mr. FLORIO in two instances.
Mr. BARNES.
Mr. GAYDOS.
Mr. KILDEE.
Mr. MATSUI in two instances.
Mr. KASTENMEIER.
Mrs. SCHROEDER.
Mr. SCHEUER.
Mr. EDWARDS of California.
Mr. STARK in four instances.
Mr. MURPHY.
Mr. FRANK.
Mr. BREAUX.
Mr. HARRISON in three instances.
Mr. PATTERSON.
Mr. DOWNEY of New York.
Mr. LIPINSKI.
Mr. YATES.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1372. An act to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska;

H.R. 1646. An act to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes;

H.R. 2895. An act to designate the Federal Building and U.S. Courthouse at 450 Golden Gate Avenue, San Francisco, Calif., as the Phillip Burton Federal Building and U.S. Courthouse;

H.R. 3190. An act to establish an improved program for extra long staple cotton;

H.R. 3232. An act to amend title 28 of the United States Code to authorize payment of travel and transportation expenses of newly appointed special agents of the Department of Justice;

H.R. 3409. An act to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State;

H.R. 3549. An act to amend the bankruptcy rules with respect to providing notice; and

H.R. 3677. An act to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program.

H.J. Res. 297. Joint resolution providing for appointment of Jeannine Smith Clark as a citizen of the Board of Regents of the Smithsonian Institution.

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled bills and joint resolutions of the Senate of the following titles:

S. 46. An act to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping";

S. 1696. An act authorizing three additional Assistant Administrators of the Environmental Protection Agency;

S. 1797. An act to name the U.S. Post Office Building to be constructed in Fort Worth, Tex., as the "Jack D. Watson Post Office Building";

S.J. Res. 85. Joint resolution to designate September 26, 1983, as "National Historically Black Colleges Day";

S.J. Res. 98. Joint resolution to designate October 2 through October 9, 1983, as "National Housing Week";

S.J. Res. 116. Joint resolution to designate the week of September 4, 1983, through September 10, 1983, as "Youth of America Week"; and

S.J. Res. 149. Joint resolution to temporarily suspend the authority of the Secretary of Agriculture, under the milk price support program, to impose a second 50 cents per hundredweight deduction from the proceeds of sale of all milk marketed commercially in the United States.

BILLS AND A JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills and a joint resolution of the House of the following titles:

On August 3, 1983:

H.R. 2973. An act to promote economic revitalization and facilitate expansion of economic opportunities in the Caribbean Basin region, to provide for backup withholding of tax from interest and dividends, and for other purposes.

On August 5, 1983:

H.R. 2355. An act to establish an emergency program of job training assistance for unemployed Korean conflict and Vietnam-era veterans, and for other purposes;

H.R. 3329. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purposes;

H.R. 3394. An act to provide additional authority for the consolidation of student loans and to make certain other changes in Federal student financial assistance; and

H.R. 3564. An act to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

On August 10, 1983:

H.R. 1646. An act to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes.

On August 22, 1983:

H.R. 1372. An act to provide for the operation of certain foreign-built vessels in the coastwise trade of Alaska;

H.R. 2895. An act to designate the Federal Building and U.S. Courthouse at 450 Golden Gate Avenue, San Francisco, Calif., as the Phillip Burton Federal Building and U.S. Courthouse;

H.R. 3190. An act to establish an improved program for extra long staple cotton;

H.R. 3232. An act to amend title 28 of the United States Code to authorize payment of travel and transportation expenses of newly appointed special agents of the Department of Justice;

H.R. 3409. An act to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State;

H.R. 3549. An act to amend the bankruptcy rules with respect to providing notice;

H.R. 3677. An act to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program; and

H.J. Res. 297. Joint resolution providing for appointment of Jeannine Smith Clark as a citizen of the Board of Regents of the Smithsonian Institution.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 306 and House Resolution 307 of the 98th Congress, the House stands adjourned, in the memory of the late Senator HENRY M. JACKSON and the late Representative LARRY MCDONALD, until 10 a.m. tomorrow, Tuesday, September 13, 1983.

Thereupon (at 3 o'clock and 15 minutes p.m.), pursuant to House Resolution 306 and House Resolution 307, and under its previous order, the House adjourned until tomorrow, Tuesday, September 13, 1983, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1694. A communication from the President of the United States, transmitting a request for an appropriation amendment for fiscal year 1984 for the Arms Control and Disarmament Agency (H. Doc. No. 98-101); to the Committee on Appropriations and ordered to be printed.

1695. A communication from the President of the United States, transmitting a request for appropriation amendments and amended appropriation language for fiscal year 1984 (H. Doc. No. 98-102); to the Committee on Appropriations and ordered to be printed.

1696. A communication from the President of the United States, transmitting requests for supplemental appropriations for fiscal year 1983 for the District of Columbia (H. Doc. No. 98-103); to the Committee on Appropriations and ordered to be printed.

1697. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of August 1, 1983, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 98-105); to the Committee on Appropriations and ordered to be printed.

1698. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of September 1, 1983, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 98-106); to the Committee on Appropriations and ordered to be printed.

1699. A letter from the Comptroller General of the United States, transmitting his review of the proposed three deferrals in the tenth special message from the President dated July 28, 1983 (H. Doc. No. 98-88), pursuant to sections 1014 (b) and (c) of Public Law 93-344 (H. Doc. No. 98-108); to the Committee on Appropriations and ordered to be printed.

1700. A letter from the Secretary of Housing and Urban Development, transmitting notification of an over obligation of contract authority that was apportioned and allotted for amendments to rental assistance program contracts, pursuant to 31 U.S.C. 1517(b); to the Committee on Appropriations.

1701. A letter from the Secretary of State, transmitting notification that during the month of July the Commodity Credit Corporation made payments to the U.S. creditors on credits quaranteed by the CCC on which payments had not been received from the Polish People's Republic, pursuant to section 306 of Public Law 97-257; to the Committee on Appropriations.

1702. A letter from the Executive Associate Director for Budget, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriations to the Veterans Administration for fiscal year 1983 have been reapportioned on a basis which indicates the necessity for supplemental estimates of appropriations, pursuant to 31 U.S.C. 1515(b)(2); to the Committee on Appropriations.

1703. A letter from the Assistant Secretary of the Army (Civil Works), transmitting the final environmental impact statement on the Saginaw River and tributaries at Shiawassee Flats, Mich., pursuant to section 404(r) of the Federal Water Pollution Control Act; to the Committee on Appropriations.

1704. A letter from the Assistant Secretary of Interior (Land and Water Resources), transmitting certification that adequate soil survey and land classification has been made on certain additional lands of the San Felipe Division, Central Valley Project, Calif., and additional lands within the Pacheco Creek Areas (within the San Felipe Division Service Area), pursuant to Public Law 172, 83rd Congress (section 1 of the act of July 31, 1953); to the Committee on Appropriations.

1705. A letter from the Secretary of Defense, transmitting notification of the Department's latest allocation of fiscal year 1983 civilian end strength, pursuant to section 601(d) of Public Law 97-252; to the Committee on Armed Services.

1706. A letter from the Acting Assistant Secretary of Defense (Comptroller), transmitting a list of contract award dates for the period September 1, 1983 to October 31, 1983, pursuant to provisions of 10 U.S.C. 139; to the Committee on Armed Services.

1707. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the Army's emergency disposal of a suspected chemical agent munition at Dugway Proving Ground, Utah, pursuant to section 506(d) of Public Law 91-441; to the Committee on Armed Services.

1708. A letter from the General Counsel, Department of Defense, transmitting a draft of proposed legislation to amend the Armed Services Procurement Act of 1947; to the Committee on Armed Services.

1709. A letter from the Principal Deput Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to provide for the transportation of dependents of members of the uniformed services who are stationed in Alaska and Hawaii and who are in need of medical attention not available in the area where the member is stationed; to the Committee on Armed Services.

1710. A letter from the Principal Deput Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend titles 10 and 37, United States Code, to reform the procedures for providing the Armed Forces the medical services necessary to supplement those provided by uniformed personnel; to the Committee on Armed Services.

1711. A letter from the Principal Deput Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notification of the proposed decision to convert to contractor performance the custodial services, insect and rodent control, grounds (improved) and surfaced areas functions at the Marine Corps Air Station, Kaneohe Bay,

Hawaii, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1712. A letter from the Principal Deput Assistant Secretary of the Army (Shipbuilding and Logistics), transmitting notification of the Navy's plans to study the conversion from in-house operation to commercial contract of various functions at different installations, pursuant to section 502(a) of Public Law 96-342; to the Committee on Armed Services.

1713. A letter from the Chief, Program Liaison Division, Department of the Air Force, transmitting a report on research and development contracts over $50,000, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

1714. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a report on loan, guarantee and insuarnce transactions supported by Eximbank during July 1983 to Communist countries; to the Committee on Banking, Finance and Urban Affairs.

1715. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction involving U.S. exports to Brazil exceeding $100,000,000 or more, pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

1716. A letter from the President and Chairman, Export-Import Bank of the United States; a statement describing a proposed transaction involving U.S. exports to Mexico exceeding $100,000,000 or more, pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

1717. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction involving U.S. exports to Singapore exceeding $100,000,000 or more, pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

1718. A letter from the Mayor, District of Columbia, a petition for the admission of the District of Columbia to the Union of States as New Columbia, the 51st State, pursuant to D.C. Law 3-171; to the Committee on the District of Columbia.

1719. A letter from the Auditor of the District of Columbia, transmitting a report "Followup report on installation of fire alarm system and smoke detectors at the D.C. Armory," pursuant to section 455(d) of Public Law 93-198; to the Committee on the District of Columbia.

1720. A letter from the Auditor of the District of Columbia, transmitting the annual report of his office covering fiscal year 1982, pursuant to section 455(d) of Public Law 98-198; to the Committee on the District of Columbia.

1721. A letter from the Secretary of Education, transmitting notice of final regulations; 1984-85 Pell Grant Family Contribution Schedule; Student Assistance General provisions; Definition of an Independent Student, pursuant to section 431(d) of the General Education Provisions Act, as amended; to the Committee on Educaton and Labor.

1722. A letter from the Acting Secretary of Education, transmitting the 31st annual report on the administration of Public Laws 81-874 and 81-815, pursuant to section 12(c) of the act of September 23, 1950 and section 401(c) of the Act of September 30, 1950; to the Committee on Education and Labor.

1723. A letter from the Director, ACTION Agency, transmitting notice of a final regulation "Intergovernmental Review of ACTION programs," pursuant to section 420(d) of Public Law 93-113, as amended; to the Committee on Education and Labor.

1724. A letter from the Secretary of Commerce, transmitting the final report on the 1980 Olympic winter games, pursuant to section 7(b) of Public 94-427; to the Committee on Energy and Commerce.

1725. A letter from the Secretary of Energy, transmitting a report on the industrial energy efficiency program for the period ending December 31, 1981, pursuant to section 375(e) of the Energy Policy and Conservation Act, as amended; to the Committee on Energy and Commerce.

1726. A letter from the Secretary of Energy, transmitting a report on the operation of State energy conservation plans for calendar year 1982, pursuant to section 365(c) of the Energy Policy and Conservation Act, to the Committee on Energy and Commerce.

1727. A letter from the Secretary of Energy, transmitting the quarterly report on the Strategic Petroleum Reserve, pursuant to section 165(b) of the Energy Policy and Conservation Act, as amended; to the Committee on Energy and Commerce.

1728. A letter from the Secretary, Interstate Commerce Commission, transmitting a report on the reasons for extending the deadline in a rail carrier proceeding, pursuant to 49 U.S.C. 10327(k); to the Committee on Energy and Commerce.

A letter from the Secretary of Commerce, transmitting a report on the status of marine mammal species and population stocks for the period April 1, 1982, through March 31, 1983, pursuant to sections 103(f) and 110(a) of Public Law 92-522, as amended; to the Committee on Merchant Marine and Fisheries.

1793. A letter from the Secretary of Transportation, transmitting a report on the obligations, commitments, and reservations made under authority of the Urban Mass Transportation Act during the period October 1, 1982, through March 31, 1983, pursuant to section 4(h)(1) of Public Law 88-365, as amended; to the Committee on Public Works and Transportation.

1794. A letter from the Secretary of Transportation, transmitting a report on cost estimates for completing substitute transit or highway projects, pursuant to 23 U.S.C. 103(e)(4); to the Committee on Public Works and Transportation.

1795. A letter from the Secretary of Transportation, transmitting the annual report for calendar year 1982 on "The Effect of the Airline Deregulation Act on the Level of Air Safety", pursuant to section 107(b) of Public Law 85-726; to the Committee on Public Works and Transportation.

1796. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a report from the Chief of Engineers, Department of the Army, together with accompanying papers and illustrations, on the Northeastern U.S. water supply study, pursuant to Public Law 89-298 (H. Doc. No. 98-107); to the Committee on Public Works and Transportation and ordered to be printed.

1797. A letter from the Assistant Secretary of the Army (Civil Work), transmitting a report from the Chief of Engineers on Metropolitan Christina River Basin, Del. and Pa., together with other pertinent reports; to the Committee on Public Works and Transportation.

1798. A letter from the Assistant Secretary of the Army (Civil Work), transmitting a report from the Chief of Engineers, Department of the Army, on Southeastern New Hampshire, together with other pertinent reports; to the Committee on Public Works and Transportation.

1799. A letter from the Administrator, U.S. Environmental Protection Agency, transmitting a prospectus to retain, by succeeding lease, the Environmental Research Center Annex at Research Triangle Park, N.C., a delegation of authority for such action having been made by the Administrator of the General Services Administration, pursuant to section 7(a) of Public Law 96-249; to the Committee on Public Works and Transportation.

1800. A letter from the Administrator, National Aeronautics and Space Administration, transmitting notification of the proposed transfer of research and development funds to the construction of facilities program for the construction of a solid rocket booster assembly and refurbishment facility, pursuant to section 103 of Public Law 97-324; to the Committee on Science and Technology.

1801. A letter from the Executive Secretary, Office of the Secretary of Defense, a report on Department of Defense procurement from small and other business firms for the period October 1982 through April 1983, pursuant to section 602 of Public Law 94-329; to the Committee on Small Business.

1802. A letter from the Administrator of Veterans' Affairs, transmitting the report of the Advisory Committee on Former Prisoners of War, pursuant to section 6(b)(2) of Public Law 97-37; to the Committee on Veterans' Affairs.

1803. A letter from the U.S. Trade Representative, transmitting a request for early enactment of legislation previously proposed by the President concerning tax deductions for expenses for advertising placed with a foreign broadcast station and directed primarily at the U.S. market; to the Committee on Ways and Means.

1804. A letter from the U.S. Trade Representative, transmitting a draft of proposed legislation to amend the International Coffee Agreement Act of 1980; to the Committee on Ways and Means.

1805. A letter from the Chairman, U.S. International Trade Commission, transmitting the 34th report on the operation of the trade agreements program, pursuant to section 163(b) of Public Law 93-618; to the Committee on Ways and Means.

1806. A letter from the Chairman, Advisory Committee for Trade Negotiations, transmitting the Advisory Committees' statement on trade reorganization, pursuant to section 453 of Public Law 96-39; to the Committee on Ways and Means.

1807. A letter from the Comptroller General of the United States, transmitting a review of the Commodity Credit Corporation's financial statements for the year ended September 30, 1981 (GAO/AFMD-83-87; September 2, 1983); jointly, to the Committees on Agriculture and Government Operations.

1808. A letter from the Chairman, Board of Directors, Pension Benefit Guaranty Corporation, transmitting a report on the activities and financial statements of the Corporation for fiscal year 1982, pursuant to section 4008 of Public Law 93-406; jointly, to the Committees on Education and Labor and Ways and Means.

1809. A letter from the Chairman, U.S. Consumer Product Safety Commission, transmitting the Commission's fiscal year 1985 budget request, pursuant to section 27(k) of the Consumer Product Safety Act; jointly, to the Committees on Energy and Commerce and Appropriations.

1810. A letter from the Chairman of the Board, U.S. Synthetic Fuels Corporation, transmitting the financial report of the Corporation for the quarter ended June 30, 1983, pursuant to 177(c) of Public Law 96-294; jointly, to the Committees on Energy and Commerce and Banking, Finance and Urban Affairs.

1811. A letter from the Acting Chairman, Nuclear Regulatory Commission, transmitting a report on regulations issued to prohibit unauthorized disclosure of safeguards information for the quarter ending June 30, 1983, pursuant to section 147d. of the Atomic Energy Act of 1954; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

1812. A letter from the Director, U.S. Arms Control and Disarmament Agency, transmitting a draft of proposed legislation to amend title II of the Arms Control and Disarmament Act, and for other purposes; jointly, to the Committees on Foreign Affairs and Post Office and Civil Service.

1813. A letter from the Comptroller General of the United States, transmitting a report on the examination of the Panama Canal Commission's financial statements for the years ended September 30, 1982 and 1981 (GAO/NSIAD-83-34; September 2,

1983); jointly, to the Committees on Government Operations and Merchant Marine and Fisheries.

1814. A letter from the Acting Assistant Secretary of State (Legislative and Intergovernmental Affairs), transmitting notice of the proposed transfer of certain property to the Republic of Panama, pursuant to section 1504(b) of Public Law 96-70; jointly, to the Committees on Merchant Marine and Fisheries and Foreign Affairs.

1815. A letter from the Director, Office of Personnel Management, transmitting a draft of proposed legislation to repeal statutory minimum grade levels for certain Federal positions; jointly, to the Committees on Post Office and Civil Service and Energy and Commerce.

1816. A letter from the Administrator of Veterans Affairs, Veterans Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to provide for confidential treatment of medical and prosthetic research information; jointly, to the Committees on Veterans' Affairs and Government Operations.

1817. A letter from the Secretary of Health and Human Services, transmitting the annual report for calendar year 1982 on the activities of the Maternal and Child Health Services Research Grants Review Committee, pursuant to section 1114(f) of the Social Security Act; jointly, to the Committees on Ways and Means and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PRICE: Committee of conference. Conference report on S. 675 (Rept. No. 98-352). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CONTE:

H.R. 3856. A bill to amend the Internal Revenue Code of 1954 to provide that a State shall not be required to deny unemployment benefits to certain individuals providing services to educational institutions; to the Committee on Ways and Means.

By Mr. UDALL (for himself, Mr. HOWARD, Mr. ANDERSON, and Mr. BREAUX):

H.R. 3857. A bill to provide for the movement of coal, including the movement of coal over public lands, by coal pipeline; jointly, to the Committees on Interior and Insular Affairs and Public Works and Transportation.

By Mr. BREAUX:

H.R. 3858. A bill to amend title 17 of the United States Code with respect to public performances of nondramatic musical works by means of coin-operated phonorecord players, and for other purposes; to the Committee on the Judiciary.

By Mr. DANIEL:

H.R. 3859. A bill to amend title II of the Social Security Act to provide increases in primary insurance amounts to account for depressed replacement rates; to the Committee on Ways and Means.

By Mr. DANNEMEYER:

H.R. 3860. A bill to amend the Internal Revenue Code of 1954 to repeal any unnecessary limitation on the performance of certain hospital services in order for such services not to be treated as an unrelated trade of business; to the Committee on Ways and Means.

By Mr. FAUNTROY:

H.R. 3861. A bill to provide for the admission of the State of New Columbia into the Union; to the Committee on the District of Columbia.

By Mr. MARKEY:

H.R. 3862. A bill to amend the Outer Continental Shelf Lands Act with respect to the Outer Continental Shelf leasing program, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. STARK (for himself, Mr. PEASE, and Ms. KAPTUR):

H.R. 3863. A bill to provide a consolidated program of extended unemployment compensation which shall replace the current extended compensation and Federal supplemental compensation programs; to the Committee on Ways and Means.

By Mr. WEAVER (for himself, Mr. PANETTA, and Mr. STUDDS):

H.R. 3864. A bill to amend the Outer Continental Shelf Lands Act with respect to the Outer Continental Shelf leasing program, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. DOWNEY of New York:

H.J. Res. 348. Joint resolution directing the President to submit to the Congress the report required by section 4(a)(1) of the war powers resolution concerning the involvement in hostilities of U.S. Armed Forces in Lebanon; to the Committee on Foreign Affairs.

Mr. MAVROULES:

H.J. Res. 349. Joint resolution urging the President to prohibit the exportation of agricultural commodities and advanced technology to the Soviet Union; to the Committee on Foreign Affairs.

By Mr. MURPHY (for himself, Mr. KOLTER, Mr. DYMALLY, Mr. SMITH of New Jersey, Mr. SUNIA, Mr. SABO, Mr. EMERSON, Mr. O'BRIEN, Mr. HORTON, Mr. HOWARD, Mr. FAUNTROY, Mr. STOKES, Mr. JENKINS, Mr. VANDERGRIFF, Mr. ACKERMAN, and Mr. DWYER of New Jersey):

H.J. Res. 350. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Rehabilitation Facilities Week"; to the Committee on Post Office and Civil Service.

By Mr. PARRIS:

H.J. Res. 351. Joint resolution designating September 1983 as "Victims of Communism Month," as a memorial to the millions of victims of communism, including most recently the passengers and crew of Korean Air Lines flight 007; to the Committee on Post Office and Civil Service.

By Mr. WEAVER:

H.J. Res. 352. Joint resolution prohibiting the export of grain to the Soviet Union until there are resolutions to international problems resulting from the destruction of the South Korean airliner by the Soviet Union; to the Committee on Foreign Affairs.

By Mr. GEKAS (for himself, Mr. SUNIA, Mr. CHAPPIE, Mr. HAWKINS, Mr. DEWINE, and Mr. NIELSON of Utah):

H. Con. Res. 160. Concurrent resolution condemning the Soviet attack on Korean Air Lines flight 007; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

243. By the SPEAKER. Memorial of the Legislature of the State of California, relative to cotton; to the Committee on Agriculture.

244. Also, memorial of the Legislature of the State of California, relative to salinity; to the Committee on Agriculture.

245. Also, memorial of the Legislature of the State of California, relative to mobile home park development; to the Committee on Banking, Finance and Urban Affairs.

246. Also, memorial of the Legislature of the State of California, relative to Federal student financial aid; to the Committee on Education and Labor.

247. Also, memorial of the Senate of the State of Illinois, relative to secondary coal recovery operations; to the Committee on Interior and Insular Affairs.

248. Also, memorial of the Legislature of the State of California, relative to weather forecasting; to the Committee on Science and Technology.

249. Also, memorial of the Legislature of the State of California, relative to reconvening the 1980 White House Conference on Small Business; to the Committee on Small Business.

250. Also, memorial of the Legislature of the State of California, relative to health care services for disabled veterans; to the Committee on Veterans' Affairs.

251. Also, memorial of the Legislature of the State of California, relative to international trade; to the Committee on Ways and Means.

252. Also, memorial of the Legislature of the State of Oregon, relative to tax-free employer contributions to employee health benefits; to the Committee on Ways and Means.

253. Also, memorial of the House of Delegates of the State of West Virginia, relative to importation of foreign steel, to the Committee on Ways and Means.

254. Also, memorial of the Legislative Assembly of the State of Oregon, relative to expenditures for first-strike nuclear weapons; jointly, to the Committees on Armed Services and Foreign Affairs.

255. Also, memorial of the Legislature of the State of Oregon, relative to establishment of a National Academy of Peace and Conflict Resolution; jointly, to the Committees on Foreign Affairs and Education and Labor.

256. Also, memorial of the Legislature of the State of West Virginia, relative to the rights of disabled persons who have been denied disability social security benefits; to the Committee on Ways and Means.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 29: Mr. BROOMFIELD, Mr. HARRISON, Mr. DAVIS, Mr. PEPPER, and Mr. HILER.

H.R. 433: Mr. MARTINEZ and Mr. SCHEUER.

H.R. 624: Mr. GILMAN.

H.R. 825: Mr. SEIBERLING.

H.R. 891: Mr. MOLLOHAN and Mr. HERTEL of Michigan.

H.R. 991: Mrs. SCHNEIDER and Mr. WIRTH.

H.R. 1016: Mr. GORE, Mr. TORRICELLI, Mr. HEFTEL of Hawaii, and Mr. SCHEUER.

H.R. 1092: Mr. ANTHONY, Mr. ANDREWS of Texas, Mr. BROWN of California, and Mr. WALKER.

H.R. 1131: Mr. LAGOMARSINO.

H.R. 1159: Mr. TALLON.

H.R. 1225: Mr. LAGOMARSINO.

H.R. 1415: Mr. EMERSON, Mr. BONER of Tennessee, Mr. HYDE, Mr. BROOMFIELD, Mr. YOUNG of Missouri, Mr. HANSEN of Idaho, Mr. KOGOVSEK, Mr. BARNARD, Mr. CHAPPIE, Mr. EVANS of Iowa, Mr. MARLENEE, Mr. ROBERTS, Mr. BRITT, Mr. DICKINSON, Mr. STANGELAND, Mr. DYSON, Mr. ANDREWS of North Carolina and Mr. SMITH of New Jersey.

H.R. 1543: Mr. FEIGHAN.

H.R. 1942: Mr. YOUNG of Florida, Mr. EDWARDS of California, Mr. SUNIA, Mr. VANDER JAGT, and Mr. MATSUI.

H.R. 1959: Mr. KILDEE, Mrs. HALL of Indiana, Mr. MITCHELL, Mr. MRAZEK, Mr. CONYERS, Mr. OXLEY, Mr. OWENS, Mr. PANETTA, Mr. ACKERMAN, Mr. CARR, Mr. SIMON, and Mr. VENTO.

H.R. 2109: Mr. LANTOS, Mr. WAXMAN, Mr. LELAND, Mr. SCHEUER, Mr. STOKES, Mr. LEHMAN of Florida, Mrs. HALL of Indiana, Mr. MITCHELL, Mr. GONZALEZ, Mr. DWYER of New Jersey, Mr. CORRADA, Mr. SOLARZ, Mr. FAUNTROY, Mrs. BOXER, Mr. DYMALLY, Mr. WEAVER, and Mr. FAZIO.

H.R. 2228: Mr. LEWIS of Florida.

H.R. 2236: Mr. DICKS, Mr. GEJDENSON, Mr. MCKERNAN, Mr. MRAZEK, Mr. PRITCHARD, and Mr. VENTO.

H.R. 2244: Mr. CROCKETT, Mr. FEIGHAN, Mr. DWYER of New Jersey, Mr. MATSUI, and Mr. BEDELL.

H.R. 2447: Mr. FORD of Tennessee.

H.R. 2468: Mr. LEWIS of California, Mr. TORRICELLI, and Mr. RIDGE.

H.R. 2714: Mr. BATES and Mr. ECKART.

H.R. 2715: Mr. BARNARD, Mr. KOGOVSEK, Mr. MINETA, and Mr. ROBINSON.

H.R. 2887: Mr. RUDD.

H.R. 2911: Mr. AKAKA, Mr. CARPER, Mr. ALBOSTA, Mr. GORE, Mrs. KENNELLY, Mr. CONYERS, Mr. MARRIOTT, and Mr. BROWN of Colorado.

H.R. 2967: Mr. BATEMAN and Mr. VANDERGRIFF.

H.R. 3031: Mr. FAZIO and Mr. LUNGREN.

H.R. 3277: Mr. ECKART, Mr. EVANS of Illinois, Mr. FAUNTROY, Mr. LEVINE of California, Mr. GARCIA, Mr. STOKES, Mr. DELLUMS, Mr. OBERSTAR, Mr. CROCKETT, Mr. D'AMOURS, Mr. BATES, Mr. CONYERS, Mr. WILLIAMS of Montana, Mr. WEISS.

H.R. 3280: Mrs. COLLINS and Mr. MOLLOHAN.

H.R. 3281: Mrs. COLLINS and Mr. MOLLOHAN.

H.R. 3350: Mr. ACKERMAN.

H.R. 3371: Mrs. COLLINS, Mr. SCHEUER, Mr. DURBIN, Mr. OWENS, and Mr. AKAKA.

H.R. 3440: Mr. DORGAN, Mr. MARLENEE, and Mr. DICKS.

H.R. 3635: Mr. RINALDO.

H.J. Res. 1: Mr. ANDREWS of North Carolina and Mr. VANDER JAGT.

"(A) for fiscal year 1984, $172 million, of which not more than $27,500,000 shall be available for adjustment assistance to firms under chapter 3; and

"(B) for fiscal year 1985, $118 million, of which not more than $27,500,000 shall be available for adjustment assistance to firms under chapter 3.".

(b) The item in the table of contents to the Trade Act of 1974 that refers to section 245 is amended to read as follows:

"Sec. 245. Authorization of appropriations for adjustment assistance for workers and firms.".

EXTENSIONS OF REMARKS

FIFTIETH ANNIVERSARY OF CIVILIAN CONSERVATION CORPS CELEBRATED AT REUNION IN WEST VIRGINIA

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Monday, September 12, 1983

Mr. RANDOLPH. Mr. President, 50 years ago the Civilian Conservation Corps was created in an effort to provide jobs for depression-ridden young people and to initiate conservation practices to save our parks and forests.

Last weekend, at Camp Woodbine in the Monongahela National Forest of West Virginia, it was my privilege to address the 50th annual reunion of the surviving members of the CCC program. A total of 372 former CCC members with their families were registered at the reunion. They came from 12 States and from as far away as California to relive however briefly their experiences a half century ago.

It is timely to review that time of our lives when America tottered, and a time when America's youth responded to the call for service and sacrifice. The dwindling legion of former CCC enrollees is proud of its contributions to a better America. In addition to helping the poor, the program lifted America's spirit and helped our Nation to survive one of the worst periods of our history.

Present for the 50th anniversary program were Ralph Mumme, supervisor of Monongahela National Forest, and Gil Churchill, U.S. Forest Service information officer. The national forest, with headquarters at Elkins, covers 851,000 acres in 11 counties of West Virginia. Two other forests, George Washington and Jefferson National Forest, cover parts of the State. Master of ceremonies for the lively reunion of CCC oldtimers was Jim Comstock, nationally known weekly newspaper editor and author.

Mr. President, I ask that my remarks on the 50th anniversary of the CCC be placed in the RECORD.

The remarks follow:

It is a joy to join with you in celebration of the 50th anniversary of the Civilian Conservation Corps. That program helped lift America out of the darkness of Depression and into the sunlight of better times.

Today, America's economy is slowly recovering from the deepest recession since the 1930's. Despite recent movements toward economic expansion, the nation's unemployment remains at a high rate of 9.5 percent. In West Virginia it is 18.2 percent.

The economic recovery is bypassing some of our basic industries, such as coal and steel. Technological advances in robotics and automation are eliminating many jobs. More than 10.6 million American workers—many of them without training and without hope—face a bleak future in competing for jobs that may soon disappear. Unemployment among young people ranges up to 60 percent in our major cities.

On October 1, the new Job Training and Partnership Act goes into effect. It is intended to form an alliance between government, labor and industry to train and retrain one million Americans a year. The program may be too little and too late. I feel it is illusionary to expect steelworkers and coal miners to become computer analysts. America today is a service-oriented economy. Entry of more than 40 million women into the job market over the past two decades has created even more competition for males who expect to start meaningful careers in the service industries.

On March 31, 1933, President Franklin Roosevelt signed into law the Emergency Conservation Act, which established the Civilian Conservation Corps.

It was to become, over the next nine years, probably the most productive and cost-efficient public works and conservation program our government has devised.

By June 17 of 1933, more than 255,000 young men had signed to join the CCC. Overall, more than three million youths were enrolled and worked in 1,600 CCC camps during the life of the program.

In West Virginia, there were 26 camps established with a total enrollment of 55,000 corpsmen from 1933 to 1942.

During its first seven years, CCC workers planted 15 trees for every inhabitant of the United States. They built trails and roads which could encircle the earth four times.

There were 42,000 bridges and four million erosion-control dams constructed. Corpsmen fought forest fires and engaged in fire prevention; worked in flood disasters; drained swamps and built wildlife refuges.

Historian Arthur Schlesinger wrote that the CCC "left monuments in the preservation and the purification of the land, the water, the forest and the young men of America."

That last phrase—the young men of America—is important, and it is too often overlooked. For more than 300,000 of the CCC enrollees each year, there was no place in school or industry.

Their average age was 19, and the average enrollment program was nine months. They worked eight hours a day, five days a week, and earned the sum of $30 a month. Of this amount, $22 was alloted to dependents or, if there were none, paid to the Corpsman when he left the program.

Despite this hard work and low pay, applicants outnumbered vacancies by two to one.

In their spare time, nine out of 10 enrollees took advantage of voluntary educational programs for self-improvement. More than 65,000 CCC enrollees learned to read and write. In one single year—1939—5,176 earned elementary school diplomas; 1,048 received high school diplomas; and 97 were awarded college degrees.

From this effort emerged the future leaders and contributors to the greatness of America. The training, the discipline, the camaraderie which existed and is so evident at Woodbine today, enabled millions of young Americans to gain maturity and self-reliance. It is this factor which overshadows the actual physical achievements of the Civilian Conservation Corps.

My belief in this concept led me to introduce—with the late Senator Henry (Scoop) Jackson whose death we mourn, the—legislation to create the Youth Conservation Corps in 1970. A companion program for young adults also was created. This program involved 85,000 young people in much-needed conservation work on our public lands and waterways, creating many productive projects. Senator Jackson and I dedicated Camp Wood, a YCC Camp in Greenbrier County, in June of 1971.

In today's economy, where experienced workers are unemployed by the millions, the uncertain future for many high school graduates and school dropouts represents a tragic potential loss of minds and manpower.

I believe the spirit and the substance of the Civilian Conservation Corps lives on, and it serves as a model for present and future job or manpower programs. This spirit of America—of sacrifice and hard work—was the crowning contribution of the CCC.

At a time when our country's fortunes were at lowest ebb, our people were given new hope and optimism for the future.

The Corps was an investment—a sound and productive investment—for a better future of our country. It has paid off manyfold. It is time, I feel, that America rolls up its sleeves and invests again.

INDUSTRIAL POLICY

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, August 17, 1983, into the CONGRESSIONAL RECORD:

INDUSTRIAL POLICY

For at least a decade, the American economy has failed to achieve its primary objectives of full employment, international competitiveness, and non-inflationary growth resulting in a higher standard of living. This flawed performance has many causes. Among them are bad economic policy, energy and food price shocks, tough foreign competition, and accelerated technological change.

How to better our performance is the main question for economic policy-makers. The ills of the economy are obvious. The cures are not so evident. However, a systematic response to economic problems on the part of the federal government, known in many quarters as "industrial policy," is rap-

idly becoming the focus of the debate. Those who favor an industrial policy believe that it will help reshape the economy and will set us squarely on the path of growth. Those who oppose it say that it will involve too much federal planning and will break down the liberal trading order. The concept of industrial policy intrigues economists and politicians alike, but they are nowhere near agreement on the details.

An industrial policy has two dimensions. At one level, it involves much of what the federal government can do to assist commerce generally. One example is the federal investment in roads and bridges, which helps reduce the cost of transportation. Another is the federal investment in education and vocational training, which provides employers with skilled workers. Overall, such investments serve to raise productivity in the private sector, and there is broad-based support for them in Congress and the public.

At another level, an industrial policy tries to do something more controversial: select particular industries for preferential federal treatment. Some advocates want the federal government to assist declining basic industries, like steel and automobiles, by protecting them from foreign competition and financing the improvement of their plant and equipment. The aim is to preserve jobs and stabilize the economies of regions dependent on basic industries until they can again compete without federal support. Other advocates urge the federal government to channel funds into high-technology industries: semiconductors, computers, robotics, biotechnology, and others on the frontier of world economic development. They argue that if the United States fails to nurture these industries, other nations will cut America out of the markets of the future.

Although the advocates differ as to who should receive preferential federal treatment, they tend to agree that domestic banks and financial markets have not been putting investment dollars where they are needed most. To help correct the problem, many are proposing a national economic development bank which would make loans to worthy businesses that could not obtain credit elsewhere. Another problem cited by the advocates is the tension among business, labor, and government, the principal institutional actors in the economy. The favored solution is a national economic development board, composed of representatives of all three sectors, which would analyze various industries and develop support for appropriate policies. The advocates also tend to agree that an industrial policy would require a major new source of federal revenue. Some of them urge replacement of the income tax with a national consumption tax on income not saved, a predetermined portion of which would go to remake America's industrial base. These proposals dominate the general discussion, but it is clear that an industrial policy could also involve protectionism, tax relief, changes in antitrust or environmental law, increased spending for research and development, technical assistance to labor-management committees, and other measures.

The advocates are quick to point out that the basic premise behind industrial policy is not new. There are many federal programs (329, by one count) which help particular industries or businesses and cost billions every year. The problem with them is that they have been enacted one by one over the years without much regard to their cumulative effect on the economy. An industrial policy is better because it would be coordinated. The advocates also point to the industrial policies of other nations to justify having one here. While there is disagreement about the success of these policies, many argue that they have given foreign firms an unfair competitive advantage and ought to be offset.

Opponents of industrial policy contend that more federal intervention is not the answer. A national economic development bank would face intense pressure from powerful politicans who wanted to use it for their own benefit. A national economic development board would be too weak if it were advisory and too strong if it had the power to override management decisions or collective bargaining agreements. A national consumption tax would be a startling departure from tradition and should be justified by something more than the claim that the federal government needs more revenue for worthy purposes.

I approach the emerging debate on industrial policy with some skepticism. I do not necessarily want to see a comprehensive solution to our economic problems imposed from the top down. Such a solution would require far too much federal control, and any industrial policy, even a good one, would take us only a short way toward our goal. It seems to me that it is far better for the federal government to concentrate its efforts on broad fiscal and monetary policies designed to boost employment, foster growth, and keep prices stable. For example, a policy of stimulating savings and investment throughout the economy is bound to have a deeper and longer-lasting effect than a policy of making loans to specific firms.

At the same time, the federal government must be sensitive to people without jobs and an economy without growth. It must be prepared to ease the hardships of those who are most affected by economic change, and to assure the competitiveness of our enterprizes. Whether the country in fact adopts an industrial policy will depend on the progress of the economy and, of course, on the outcome of the presidential election.●

TRIBUTE TO FRANK IVALDI

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. STARK. Mr. Speaker, the friends, family, and the colleagues of Frank Ivaldi met on September 9, 1983, to honor him for his outstanding contributions to the community.

A man whose life has been one of giving of himself for worthy causes received the "Spirit of Hope" award at an event to benefit the City of Hope Medical Research Center.

Mr. Ivaldi has demonstrated devotion, persistence, and an abiding faith and love for his country.

I join in saluting Frank Ivaldi and extend to him my warmest thanks for his contributions and best wishes for continued success.●

FUTURE STATUS OF AMERICAN WORKERS A MAJOR CHALLENGE

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Ms. KAPTUR. Mr. Speaker, Labor Day gave us an opportunity to pause and contemplate the current and future status of workers in America. Despite the present recovery, the status of American Workers is less than satisfactory. Some 10.7 million persons are officially classified as unemployed; another 1.7 million are too discouraged to continue looking for jobs: and roughly 5 million are working in parttime positions because they have not been able to find full-time jobs. As we consider the policy options before us, these statistics should not be forgotten.

Unfortunately, a look toward the future for American workers includes some discouraging trends. Columnist David Broder noted two in a recent Washington Post Column. One trend is the higher base of unemployment that has occurred after each of the most recent recession-recovery cycles. Clearly, policies must be designed to whittle away at this increasingly high structural unemployment base. A second trend is the elimination of jobs which provide middle-class incomes for millions of Americans. The further development of dual job structure—with some high-income and quality jobs and many more low-income and quality jobs—is not a trend that should be embraced. We must focus not only on job development, but also on the quality of job development.

Mr. Broder's timely column follows:

FEWER JOBS, DIFFERENT JOBS—AND YOU CAN'T JUST BLAME REAGANOMICS

(By David S. Broder)

The approach of another Labor Day finds Americans more seriously concerned about the subject of work and workers than in many years. Although the current economic recovery has reduced the official unemployment rate from 10.8 percent to 9.5 percent, there is no sense of smugness about the future on the part of anyone who understands what we face.

Whether it was television correspondent Edwin Newman in an impressive NBC News documentary last week, journalist Robert Kuttner in a powerful and disturbing Harper's magazine article in July, economist Barry Bluestone in a raptly followed talk at the National Conference of State Legislatures early in August, or the AFL-CIO executive council in an August report on "The Future of Work"—my impression is that almost wherever I turn, this topic of work and workers is finally receiving the attention it deserves.

All of them are saying America and its workers face two major challenges in the decade ahead. Even if the recovery continues we can expect a higher level of unemployment—a shortage of 4 million to 6 million jobs—than we have endured since the

Great Depression. Equally troubling, the technological changes taking place in the economy, particularly the spread of computers, robots and microprocessing, are compounding, not easing, the severe loss of the high-pay skilled and semi-skilled production and lower-level management jobs that now provide the bulk of the middle-class incomes in America.

The first point is generally understood, though neither party's politicians like to dwell on it. Partly for demographic reasons, partly because of shifts in the domestic and global economy, each of the 5 recession-recovery cycles in the past 13 years has left us with a higher base of unemployment than the one before.

Democrats like to blame all the current jobless miseries on Reaganomics; Republicans like to pretend that the Reagan recovery will make it all disappear. The truth is that there has been a secular trend to ever-higher levels of employment under governments of both parties. That trend is likely to continue through the decade, unless far more sweeping policy changes are made than anything attempted so far.

Less well understood until recently are the forces that are operating to split the labor market into two unequal halves: providing more challenging, more rewarding jobs for a few highly trained and highly skilled people, and less fulfilling, lower-paying jobs for the large majority of workers.

That prospect has been camouflaged by all the talk about "high-tech," and the implication that "high-tech" translates directly into high-pay, high-interest work. It does not, almost all the authorities agree. There are not that many new "high-tech" jobs likely: perhaps 600,000 in the remainder of the decade, according to the AFL-CIO's estimate. Many of those represent low-skilled repetition assembly jobs, the kind that are being transferred to low-wage foreign countries.

Meanwhile, the categories of jobs that the experts see as the fastest growing in this decade include janitors, clerks-secretaries, food-service workers, hospital attendants and the like—all traditionally low-pay, dead-end occupations. This suggests a rich man/poor woman economy, because many of the new jobs are likely to be filled by women, who will, according to the AFL-CIO study, provide two of every three additions to the work force for the remainder of this decade.

The political and social tensions that can be generated by this two-track pattern are bad enough. But they are compounded by the loss of income and middle-class status of the middle-aged males, who are being displaced by the decline of jobs in such traditionally high-paying industries as steel, autos and machine tools.

The trends are real, but the outcome is not predetermined. Kuttner argues that unionism itself can be part of the solution: that organizing the unorganized in the growing clerical and service categories can push up wages to preserve the number of needed middle-class jobs.

But given the current weakness of the unions, the availability of surplus workers and a large stream of immigrants, and the option of moving jobs overseas, organizing the unorganized cannot be anything but difficult. Chances are that the solution will have to involve more basic changes in the length of the workweek, the gradations between part-time and full-time jobs, and the distinction between management and labor functions.

Almost certainly, it will require revision of our concept of the relationship between education and work. A part of workers' pay in the future will probably be time-credits for futher education, as a stepping-stone to better jobs.

All that one can say as we approach this Labor Day is that the country has at last begun to think about these needs. And not a day too soon.●

ALEXANDER LERNER

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BARNES. Mr. Speaker, Dr. Alexander Lerner became 70 years old on September 7. He is a man who has enjoyed a distinguished career and international acclaim for his work in the field of cybernetics. He has authored 200 scientific works and inventions including 12 books translated into many languages. Among these, his "Introduction to the Theory of Automatic Control," published in 1958, became a standard textbook in the field. He has, in the past, received a number of awards from his government for the work he has done.

But Alexander Lerner is a Soviet refusenik.

In 1972, when he applied to Soviet authorities for an exit visa to emigrate to Israel, his request was denied for reasons of "state security" even though he has not had access to classified material since 1964. He was dismissed from all of his academic, scientific, editorial, and elected positions.

Yet, Professor Lerner continued his scientific work as best he could, publishing scientific papers outside the U.S.S.R. Until recently he conducted a regular series of seminars in his home, hosting lectures by many prominent scientists. Under recent KGB threat, however, Professor Lerner has stopped these seminars.

Despite his professional success, Professor Lerner has had a difficult life of great personal tragedy. During World War II, his two daughters were murdered by the Nazis. His in-laws and many of his relatives were killed by the Nazis during the Holocaust. And, in 1981, after 45 years of marriage, his life-long companion, Yudif, died of a heart attack.

Now, Alexander Lerner is 70 years old, he is alone, without a family, and has been robbed of the honor and respect due him by his government. He is a man of great talent who has made immeasurable contributions and given dedicated service to his country. But now his government treats him as an outcast.

I hope that Soviet authorities will take another look and see this case, this request, for what it is. What is so threatening about a man asking to spend the rest of his life with his daughter and to get to know the grandchildren he has never seen? Why should a man who has exemplified scientific excellence and who has given honorable service to his country be so despised by his government?

Dr. Jack Minker, professor of computer science at the University of Maryland and vice chairman of the Committee of Concerned Scientists, Inc.—who has diligently pressed Professor Lerner's case—said recently of him:

> The best birthday present he could receive for his distinguished service to the Soviet Union and to the scientific community is an emigration visa from the Soviet Union so that he may continue his scientific work and live out his years in Israel.

Last month, Dr. Minker organized and chaired a special 70th birthday session for Professor Lerner at the Joint International Conference on Artificial Intelligence in West Germany. Two hundred participants signed an appeal to several Soviet officials for Professor Lerner's release. At the conference, Dr. Minker so poignantly put the case to his colleagues:

> I will never tire of seeking justice for Alexander. That a man who has suffered the loss of two daughters in the Holocaust and recently the death of his wife, and has served his country honorably and faithfully, should be maltreated—that should rile the consciences of good people everywhere.

Professor Lerner deserves and needs our support and help. I hope that my colleagues will join me in doing everything they can to secure his release.●

THE 40TH ANNIVERSARY OF ORDINATION OF REV. ANTHONY NOVIELLO

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HARRISON. Mr. Speaker, on Sunday, September 3, the parishioners of Holy Rosary Church, Wilkes-Barre, celebrated with their pastor, the Reverend Anthony Noviello, the 40th anniversary of his ordination to the priesthood. Mass was offered at 3 p.m. and a testimonial dinner followed immediately.

Father Noviello was born in Williamsport, Pa., the son of the late Gennaro and Rose Piccolo Noviello. He graduated from Williamsport Senior High School and St. Thomas College, now the University of Scranton. He completed his studies for the priesthood at St. Mary's Seminary, Baltimore, Md., and was ordained on June 5, 1943 in St. Peter's Cathedral, Scranton, by the Most Reverend William J. Hafey, D.D.

Father Noviello served as assistant pastor at St. Dominic's, Parsons, St. Anthony's, Dunmore, Holy Rosary in

Wilkes-Barre, Our Lady of Grace, Hazleton, and Epiphany in Sayre. After 1 year of service as assistant pastor at St. Anthony's, Freeland, he was appointed pastor there on September 30, 1959. Three years later, he was transferred back to Holy Rosary where he has served as pastor ever since.

Father's Noviello's diocesan assignments include service as a consultor, a member of the diocesan committee on vocations, and a member of its liturgical commission. He has been active in the work of the Blue Army and was instrumental in the visit to the Scranton Diocese of the International Pilgrim Statue of Our Lady of Fatima, which was viewed by thousands as it moved from church to church.

In spite of his many religious commitments, Father Noviello has long been active in community affairs. He is one of the principal supporters of the Wyoming Valley Chapter of Pennsylvanians for Human Life and is chaplain of the Wilkes-Barre Chapter of Unico National.

Mr. Speaker, Sunday, September 11, will be a day of celebration for the parishioners of Holy Rosary and for the entire Wilkes-Barre community. It will be a day for all of us to pay tribute to Father Anthony Noviello for 40 years of dedicated service and to wish him many, many more years of happy and fruitful service to God and man.●

CONGRESSMAN PERKINS HONORED FOR HIS OUTSTANDING CONTRIBUTION TO EDUCATION

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HAWKINS. Mr. Speaker, one of our distinguished colleagues, CARL PERKINS, was recently presented the James Bryant Conant Award by the Education Commission of the States for his outstanding contribution to education in America.

I would like to submit for the record the remarks of North Carolina Governor Jim Hunt who personally presented the award to our honored chairman of the House Education and Labor Committee.

REMARKS BY GOVERNOR JIM HUNT PRESENTATION OF JAMES BRYANT CONANT AWARD

In presenting this award tonight I want to list one man's accomplishments which tell the story of educational programs in America—one man who may very well have done more for education than any other living American.

Chairman of the U.S. House of Representatives' Education and Labor Committee since 1967, father of the landmark Elementary and Secondary Education Act of 1965, sponsor of the Library Services Act of 1956, the Adult Basic Education Act of 1961 and the Middle Income Student Assistance Act of 1978; the roll call of new actions for excellence that our national government has taken over the last decades. I have the high honor tonight to present the 1983 James Bryant Conant Award to the premier champion of American education—the Honorable Congressman Carl Perkins.

The James Bryant Conant Award is presented by the Education Commission of the States each year to someone who has made an outstanding contribution to education in the United States. The award was established in 1977 by ECS in honor of Dr. Conant, an internationally known scholar, scientist, statesman and author. Conant, a former President of Harvard University wrote "Shaping Educational Policy," which sets forth the concepts and philosophy behind the establishment of the Education Commission of the States.

To honor Conant's lasting influence on American schools and colleges, ECS annually presents this prestigious award to a person who has made an outstanding contribution with national impact on education in the United States, and who has already attained a measure of recognition for such a contribution. Previous recipients of the Conant Award are Benjamin Mays, former President of Morehouse College in Atlanta; Joan Ganz Cooney of the Children's Television Network in New York; Francis Reppel, former U.S. Commissioner of Education; Ralph Tyler, Director Emeritus of the Center for Advanced Study in the Behavioral Sciences, Chicago; President Terry Sanford of Duke University and former Governor of North Carolina; and last year's winner, former Indiana Congressman John Brademus, now President of New York University.

This year, the honoree has made outstanding contributions year-in and year-out since 1948.

Since 1948 this nation has weathered wars and economic crises. We have seen Administrations come and go in Washington, and we have seen priorities change.

But for a man who grew up on the Left Hand Fork of "Troublesome Creek" in the hills of Eastern Kentucky, this nation's "number one priority" never changed.

He saw that education could break the cycle of poverty. He saw the promise education held for every single American. Time and again he focused America's attention on our schools and our children.

As a former schoolmaster and grade school teacher, he had seen "up close" the new road education offered to every young person. He never forgot what he had learned.

And he has taught that lesson to America. So, when it comes to education, this nation looks to this great leader. We have placed our trust in the right man. He has both shaped and safeguarded American education longer than any other public figure.

Please join me in honoring a true twentieth century champion of American education. I am proud to present the highest award that American education presents, the 1983 James Bryant Conant Award to the Chairman of the U.S. House of Representatives Education and Labor Committee, the Honorable Carl Perkins.●

AN INTERIM REPORT ON THE 98TH CONGRESS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, August 24, 1983 into the CONGRESSIONAL RECORD:

When the 98th Congress began in January, Washington braced itself for a standoff. The President was pledged to "stay the course", the Democrats had picked up strength in the House of Representatives, and the Republican-controlled Senate was growing more tentative in its support of presidential initiatives. But after the first seven months of the session, the mark of this Congress has been compromise, not impasse. In the circumstances, perhaps its most significant accomplishment has been its avoidance of impasse. Events of these initial months represent a sharp shift away from the previous Congress, when the President and his congressional supporters dominated the agenda.

In the appropriations process, unnecessary confrontation has been avoided so far. With Congress cutting back the appropriation bills, the President's threat of a "veto war" has faded. Some potentially contentious legislation has gone through as well. The social security compromise and an emergency jobs bill were approved by strong bipartisan majorities. Even some difficult budget issues have been resolved. Congress passed a budget resolution raising taxes by $12 billion and holding real growth in defense spending to 5%, well below the 10% the President wanted. It should be noted, however, that Congress has not followed through on the resolution, and it is doubtful that taxes will go up. The resolution may be little more than a signal of congressional intent. The acid test may lie ahead, when the money bills come up for final consideration.

The President's drive to reshape the federal government by restraining government spending, building up the military, and reducing taxes has been slowed by the 98th Congress, but the President's basic program has not been upset. The tax cuts are in place, the increase in the defense budget has not been stopped, and restraint in domestic programs is still the rule. Some of the President's bolder moves may have been checked, but the general direction of his policies has not been altered. A large number of extremely tough decisions are simply being delayed, probably until after the 1984 election.

The most heated clashes in Congress to date have occurred in debates on foreign affairs. The President won, at least for the moment, a fight to build the MX missile. On the other hand, the House sent a message of its displeasure to the President when it called for a nuclear freeze and voted to cut off aid to the anti-Sandinista rebels in Nicaragua. It is clear that Congress remains uneasy about the President's strong military moves in Central America, and I would judge that our policy toward Central America is the most volatile issue in Washington today. However, the President appears to have a fairly ample reservoir of bipartisan congressional support on which he can con-

tinue to draw as he manages the nation's foreign policy.

For the moment, then, the President and Congress have reached a precarious co-existence—a jittery detente. All of the carefully crafted accommodations and arrangements, however, could come unglued in the months ahead. The spirit of compromise will be tested when Congress returns next month. On the domestic side, the appropriations bill for health and human services may spark a battle. The appropriations bill for defense is bound to be hotly contested, too. On the international side, it is unlikely that we will form a consensus on policy toward Central America. As the 1984 election draws nearer, political posturing will undoubtedly increase. It is plain that the shaky presidential-congressional accord we now see will not last indefinitely.

I would suggest that the work of Congress so far this session reflects the impact of the 1982 election on the members. Republican legislators were stung by the criticism that they were unfair to the poor, and Democratic legislators were hurt by the charge that they were big spenders. Action on the emergency jobs bill illustrates what happened. The bill was cut back in size even though many Democrats would have preferred a larger effort, and it enjoyed bipartisan support even though many Republicans would have preferred no bill at all. Action on the budget provides another illustration. Congress passed a budget resolution despite enormous differences among members because members concluded that if they failed to produce a budget, fiscal chaos (with very adverse electoral consequences) would likely result. It is interesting to note that both the emergency jobs bill and the budget resolution were drafted in Congress with only minimal involvement on the part of the President.

Seriously disturbing to me is the problem of the huge federal deficits now running at $200 billion per year over the next several years. The President and Congress simply have not addressed the problem. Despite the President's constant threat of veto, he has signed all five of the appropriations bills Congress has sent him this year even though some of them did not embody his spending priorities. It seems that no one at either end of Pennsylvania Avenue wants to seize the reins of a budget that, for all intents and purposes, is out of control.

The unwillingness to deal with burgeoning federal deficits is my principal disappointment with the 98th Congress. The trouble, I think, is that too many members have been lulled to sleep by widespread evidence of an economic upturn. For his part, the President apparently has decided to see whether he can get through 1984 without major changes in his economic policy. This complacency will probably not disappear when Congress returns in September, but sooner or later the President and Congress will have to face the fiscal facts. The danger signs are already present, especially in the recent rise in interest rates. Without action to control the deficits, a wrenching fiscal crisis is inevitable. In my opinion, averting that crisis will require a broad-based bipartisan effort to cut spending and raise taxes, no matter how disagreeable the prospect may now seem.●

COMMEMORATION OF THE ANNIVERSARY OF THE INVASION OF POLAND

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. ANNUNZIO. Mr. Speaker, 44 years ago a tragic event occurred in the history of Poland and the free nations of the world. During September 1939, the peaceful state of Poland was invaded by the forces of nazism from the west and the forces of communism from the east, and almost overnight the country became a tyrannized and persecuted nation, deprived of half its territory and millions of its people.

Often forced to survive for months in the forests and mountains, members of the resistance and Polish populace at large reacted consistently with spirit and conviction, fighting to maintain their freedom, Refusing to betray their national honor and collaborate with the enemy, 6 million Poles preferred death to capitulation. The nation lost close to one-quarter of its population, and the beautiful city of Warsaw, the Polish capital, was leveled to the ground.

But the end of World War II brought no respite, for an even crueler fate awaited the Polish people. Once the Nazis had been eliminated, the Communist regime which had occupied the country set out to systematically destroy the culture, religion, and national identity of the Polish people. Nevertheless, the Poles have continued to this day to fight for their personal liberty and national integrity, and the Communists have been unable to completely crush the spirit and pride of the Poles, and their desire to achieve self-determination.

At this point in the RECORD, I would like to include excerpts from the statement of Lech Walesa, leader of the Polish trade union Solidarity, which appeared in the Christian Science Monitor on June 21, 1983. His remarks are representative of the daily acts of courage, and the strong belief among all Poles that the desire for human rights, human dignity, and liberty will survive and one day overcome every threat of the Communists and every act of violence. Lech Walesa's statement follows:

POLAND'S "NEW CONSCIOUSNESS"

The August [1980] breakthrough demonstrated to the authorities in Poland the simple commonplace that ignoring reality, treating it as secondary to doctrine and underestimating the objective laws of economics, lead to an inevitable and dangerous crisis. It proved that the old methods, preventing influence of society on public affairs, could not be used to govern effectively.

After the strike at the shipyard and the establishment of Solidarity, everyone could take part in the social work for reform, could personally learn what free elections meant, what the hitherto mythical democracy meant in practice. Millions of people again became citizens. Those events also helped us to realize better that it is not only the authorities but all of us who are responsible for the fate of the country, its economy and political life.

The events initiated in Gdansk also showed to the world the extent of the true problems of a nation of 36 million in Europe. If realism has its foundation in objective knowledge about political and economic reality, then the establishment of Solidarity certainly enriched that knowledge.

A rejection of the world of fiction, that introduction of reality, was perhaps most evident in the system of communicating in Poland. People began expressing loudly and publicly their genuine thoughts, what was tormenting their minds and souls and not what they should be saying in accordance with official instructions.

That pillar of the old system, the magic language of "Newspeak" stopped functioning since it referred to a world which still existed only in the textbooks of ideologists, propagandists, and censors. Someone who has not lived for many years hearing everywhere an Orwellian style of describing and evaluating the world cannot comprehend how beautiful and communicative can be the ordinary language of truth.

It was not only the society—through the movement of renewal—which realized the true scope of problems facing it, but also the authorities. Not only the governing team changed, but the style of government and of communicating with society changed in many important ways. Dialogue dominated until Dec. 13, 1981, despite numerous tensions and problems which could not be solved. It is too early yet to assess fully that short, eventful period.

Martial law slowed the process of reform but did not halt it. For the change in relations between people, between institutions and individuals is achieved not only through passage of new laws or cancellation of old ones, but to a greater extent through changes in awareness which bid one to either respect or ignore these laws.

The legal system in Poland did not change in a fundamental way, but in practice enormous changes have taken place. Until recently people working together in the same room feared to talk sincerely with each other; they feared each other, and today they constitute one underground Solidarity cell. They are not indifferent and apathetic as they once were. Through small, daily acts of courage, they implement the ideals of our union. They do not support undertakings promoted by the martial law authorties, but readily join in any initiative which may lead to reform.

Such people are everywhere, in every factory, steel mill, mine, and shipyard, everywhere—even in the prosecutor's offices, courts, the police and security service. Many of my interned and imprisoned colleagues experienced not only harassment and humiliation, but also humane gestures and true solidarity from their oppressors. Also—and perhaps most importantly of all—such people and their thousand-fold actions constitute what is known as the historic process. And the significance of these positive attitudes is greater as far as I am concerned, for—after all—violence is in a way inscribed in the doctrines being implemented in this part of the world.

The new consciousness evident in the young generation of Poles is the greatest capital of the 16 hot months after the strike at Gdansk Shipyard. The consciousness which I have mentioned is my great hope. It is a fact which truly exists and thus has great impact on reality. This is why we do not have to overthrow the system; it is weaker than the national selfawareness, it either shrinks before it or absorbs it. The process continues, and that is why I am an optimist.

As we observe this anniversary, I am honored to join Americans of Polish descent living in the 11th Congressional District of Illinois which I am honored to represent, and Poles all over the world, in their hopes and prayers for the reentry of Poland into the community of free nations, so its people may once again live in personal and economic freedom enjoying fully the fruits of democracy and liberty.●

COAL SLURRY PIPELINES

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BEREUTER. Mr. Speaker, later this week the House will be considering legislation which will grant the power of Federal eminent domain for the acquisition of rights-of-way for coal slurry pipelines. Recently I received a copy of a letter which the attorney general of the State of Nebraska sent to the chairman of the Senate Committee on Environment and Public Works, stating the strong concerns of the State of Nebraska over the failure of both the House and Senate bills to adequately protect the legitimate interests of all States which may be affected by the sale of shared water resources for use in these pipelines. I request that this letter be printed in the RECORD, so that my colleagues can have the opportunity to examine and consider the ramifications of these bills upon relations among the States which share these precious water resources.

I have long advocated the adoption of amendments to these bills which would address these serious concerns. I want to make it clear that I am not opposed to coal slurry pipelines, per se, so long as the long-standing water rights of the affected States can be adequately protected. When the House considers H.R. 1010 later this week, I will once again be offering what I believe is a responsible approach to the resolution of these most serious questions of shared water resources, and I urge my colleagues to lend their support to that effort at the appropriate time.

The letter of the attorney general of the State of Nebraska follows:

STATE OF NEBRASKA,
DEPARTMENT OF JUSTICE,
Lincoln, Nebr., May 13, 1983.

Re S. 267, Coal Distribution and Utilization Act of 1983.

Hon. ROBERT T. STAFFORD,
U.S. Senator, Hart Senate Office Building, Washington, D.C.

DEAR SENATOR STAFFORD: I am writing to you to express my concerns and those of the State of Nebraska regarding the above-identified bill pending before the Senate Environmental and Public Work Committee. My concern is the effect that the bill will have over the water resources of any state which are shared with adjoining states. It is my hope that Congress will give protection to each state over the water resources it shares with other states. Although Section 5 does adequately establish the primacy of state water law in the context of coal slurry pipelines, it does so only for the state granting the water permit. However, Section 5(c) seems to apply only to the water law of the state in which the water right is acquired. Senator Wallop recognizes this in his additional views in Report No. 98-61 accompanying S. 267 at 38.

This bill fails to recognize an important fact relating to any significant water resource: it crosses state boundaries. It is a shared resource whether in an underground aquifer or in a surface stream or impoundment. The people of each of these sharing states have an interest in the water resources which straddle their common boundaries, whether there is a compact upon that water resource or a Supreme Court decree or no agreement at all. Disposition by one partner state will have an effect upon the right of any other partner state to this resource. No state should be allowed to make a disposition of this common resource for its sole benefit to the detriment of the right of any partner state. To permit such unilateral action by any one state only encourages disharmony among the states.

I would strongly recommend that you seek to insert into S. 267 recognition of the sharing of water resources and the obligation of any interstate user under this Act to obtain rights from any partner state to a shared water resource. The bill would recognize that the withdrawal of water for any interstate coal pipeline distribution system from any shared water source must be approved by each state sharing that resource, whether it is surface or subsurface water. With such a provision, Congress will be encouraging state cooperation among themselves in the planning and utilization of their water resources.

On behalf of the citizens of Nebraska, I appreciate your consideration of our concerns in this important area.

Very truly yours,

PAUL L. DOUGLAS,
Attorney General.

THE 50TH ANNIVERSARY OF ORDINATION OF THE RIGHT REVEREND MONSIGNOR MICHAEL C. POLCHA

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HARRISON. Mr. Speaker, on Sunday evening, September 11, the Holy Trinity parish of Swoyersville honored its paster, Rev. Msgr. Michael C. Polcha, on the 50th anniversary of his ordination to the priesthood. This occasion marks also his 25th year as a monsignor and his 25th year as pastor of Holy Trinity Church.

Monsignor Polcha was born in Dunmore, Pa., on July 15, 1908, the son of the late Jacob and Mary Hanisek Polcha. He attended the Dunmore public schools, St. Procopius College, which is now Illinois Benedictine College, and St. Francis College, where he obtained both his bachelor and master of arts degrees. He studied for the priesthood at St. Francis Seminary in Loretto and was ordained in St. Peter's Cathedral, Scranton, on June 10, 1933, by the Most Reverend Thomas C. O'Reilly, D.C.

Over the years, Monsignor Polcha has served as assistant pastor at St. Julianne parish, Rock Lake, and St. John the Baptist parish, in Pittston. On June 19, 1942, he received his first pastoral appointment to establish and organize the new parish of Corpus Christi in Montdale, Pa. He was assigned to his present pastorate on October 16, 1958. On July 2 of that same year, he received notice of his elevation to the rank of domestic prelate by the late Pope Pius XII.

Mr. Speaker, September 11 will be a special day for the people of Swoyersville and the parishioners of Holy Trinity. It is my pleasure to join with them in honoring their friend and pastor, Rev. Msgr. Michael C. Polcha, on the occasion of this golden jubilee in the holy priesthood and, at the same time, to wish him many, many more years of devoted and rewarding service to God and man.●

THE COIN-OPERATED PHONO-RECORD PLAYER COPYRIGHT ACT OF 1983

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BREAUX. Mr. Speaker, I am introducing today legislation to modify an excessive copyright royalty payment schedule imposed annually on the Nation's jukebox industry. Without these amendments, the jukebox industry will continue to decline. As a result, a source of public entertainment is threatened. Small businessmen, who predominate in the industry, will be hurt. Importantly, copyright owners would lose, ultimately, a source of income.

As established by the Copyright Royalty Tribunal, the payment schedule through 1990 represents a royalty increase of over 500 percent from the $8 fee set by Congress, which became effective in 1978. Though Congress authorized the CRT to review and adjust

the royalty payment, the current rate schedule it has set for this decade goes far beyond congressional intent, I believe.

The amending legislation is entitled the Coin-Operated Phonorecord Player Copyright Act of 1983. Its purpose is to retain payment of a royalty fee, but at a rate and in a manner more reasonable and fair. The bill is intended to help stabilize the jukebox industry, which has been on the decline. Since the fee took effect in 1978, jukebox registrations with the Copyright Office have dropped by 40,000.

As proposed, the legislation would require a one-time royalty fee to be paid in a dual-tracked fashion. First, each new jukebox machine would be assessed a one-time $50 royalty fee, to be paid by the manufacturer. Second, jukebox operators would pay fees for each existing machine they own, on a one-time basis, with the fee level determined by the machine's remaining useful life, but not to exceed $25 per machine. Compliance with and enforcement of the legislation would be made easier. The bill's approach is a far more equitable and effective method to set and collect a royalty payment. Without this, the industry is faced with a current $25 annual fee, which escalates to $50 annually in 1984 and to $50 plus an inflation adjustment from 1987-90 for each jukebox machine.

This legislation would benefit everyone. Copyright owners would be protected. A source of revenue would be retained for them through stabilization of the jukebox industry. The businessman would be freed from an exorbitant royalty payment. Royalties would be paid. Machines would be registered. Administration of the law and collections would be facilitated.

The subsequent legislative summary of the bill outlines further what the proposed legislation would do. I would ask that Members read it and join with me in support of the bill and as one of its cosponsors.

LEGISLATIVE SUMMARY—COIN-OPERATED PHONORECORD PLAYER COPYRIGHT ACT OF 1983

The "Coin-Operated Phonorecord Player Copyright Act of 1983" would provide for a one time compulsory license for coin-operated phonorecord players (jukeboxes) for manufacturers of new machines and operators of old machines. The key portions of the bill are summarized below.

1. COMPULSORY LICENSES AND ROYALTY FEES

The Act creates a two-tier compulsory licensing system for jukeboxes. The first tier is for manufacturers and importers of jukeboxes that are manufactured or imported on or after the effective date of the Act. They must file an application with the Copyright Office, deposit a statement of account and pay the royalty fee, which is set at $50 per jukebox.

The second compulsory license is for operators who own a jukebox prior to the effective date of the Act for use thereafter. They must file an application with the Copyright Office, deposit a statement of account and pay the specified royalty fee, which may be set no higher than $25 per jukebox. The Register of Copyrights will establish the actual fee by rule based upon the number of years of useful life remaining to the jukebox. The operator's royalty fee is a one time only fee. He may elect to pay it on a quarterly basis over a two year period.

2. JUKEBOX LIST

The Copyright Office is required to keep an updated list of all registered jukeboxes that will be available to the public.

3. LIABILITY FOR PRIOR ACTS

To maximize collections under this Act, the bill provides that operators who register their jukeboxes on the one time basis and pay the royalty fee will have no liability in the event that they faled to register or pay the fees under any prior law. Litigation that has been filed as of the effective date of the Act, however, would not be affected.

4. DISTRIBUTION OF ROYALTY FEES

The Register will deposit the royalty fees in the U.S. Treasury after deducting the Copyright Office's costs. These funds will be invested in interest-bearing U.S. securities until they are distributed by the Copyright Royalty Tribunal.

Annually, persons who claim to be entitled to the royalty fees must file a claim with the Tribunal. Claimants are granted an antitrust exemption for the purpose of agreeing among themselves on their proportionate share of the fees.

In October, the Tribunal will determine whether a controversy exists over the distribution of the fees. If there is none, the Tribunal, after deducting its reasonable costs, will distribute the fees to the copyright owner or to his representatives.

If there is a controversy, the Tribunal will conduct a hearing to determine how the fees should be distributed. Its decision will be subject to judicial review.

5. CRIMINAL PENALTIES

Persons who knowingly make a false representation of a material fact in an application or statement of account will be fined up to $2,500.

Persons not complying with the Act could be subject to copyright infringement litigation.●

OUR TAX ON THE POOR

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. FRANK. Mr. Speaker, during our recess Prof. Alan Feld of Boston University published a very important article about the regressive nature of some aspects of our Federal tax system in the Washington Post. Mr. Feld's article is an important reminder that we continue to act in ways that are unfair to the working poor and I believe the membership would benefit from reading his analysis:

OUR TAX ON THE POOR

(By Alan L. Feld)

The Census Bureau's recent report on the economic state of the poor did not discuss one federal trend that has worsened their condition: the federal income tax now takes an increasing bite out of incomes that are below the poverty level.

Taxing the poor sounds remote and archaic, the sort of thing that Old Testament prophets inveighed against or that swashbuckling movies disclosed about the pre-revolutionary French aristocracy. It seems obvious that no modern income tax ought to tax the incomes of those who have so little as to be designated poor.

Yet the U.S. income tax now does so. According to the Census Bureau, the 1982 poverty line for a family of four was $9,862, a number that seems, if anything, too low. A worker who earned $9,862 for his family of four nonetheless incurred federal income tax. After claiming four personal exemptions ($4,000) and the zero bracket amount (ZBA) ($3,400), $2,462 remained subject to income tax, for a liability of $288 in tax.

The poverty-level worker also owed other taxes based on his earnings. He incurred Social Security taxes of $661, as did his employer. In addition, the state in which he lives also may impose an income tax. Such taxes frequently follow the federal model, so the state likely exacted some additional tax from him in 1982.

The federal income tax, which grants a deduction for state income taxes, supplied no such balm here. The poverty-level worker, having claimed the zero bracket amount, foreclosed any further deduction of state income taxes, along with medical expenses or interest.

These tax rules thus required families that the government formally declared needy to help pay for the federal and state budgets, generally at the same time as the public fisc is called on to support the same needy families.

When a similar paradox emerged in the late 1960s and early 1970s, tax policymakers sought to exempt poverty-level families from federal income tax. Congress and the administration worked to increase the personal exemption and the predecessor to the ZBA (and for a brief period introduced the general tax credit) to levels that would keep poverty families out of the federal income tax system. Unfortunately, inflation in the late 1970s and early 1980s pushed up the poverty line. As the inevitable result of a rising poverty level and a static threshold for taxability, large numbers of officially poor became liable for federal income tax.

The 1981 tax cuts sought to adjust for this kind of bracket creep at higher income levels. But they failed to increase the personal exemption or the ZBA; the president and Congress simply deferred consideration of the bracket creep of the poor to a later day.

The mechanics for raising the federal tax threshold are straightforward: increase the personal exemption and the ZBA. An added grace note would allow the deduction for state income taxes even when a taxpayer claims the ZBA.

But do not expect rapid implementation of these changes. A major problem, quite simply, is cost. Any change in the personal exemption of the ZBA, even of modest dollar amounts per family, involves billions of dollars in lost federal revenues. A Congress concerned about huge deficits is unlikely to incur revenue losses on behalf of its silent constituents. Prevailing economic theories find no public benefit in surrendering future tax revenues to poor families.

And so the United States income tax probably will continue to levy on the income of the poor, worsening the condition of those least able to help support us all.●

OBSERVATIONS ON THE 1984 ELECTION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, September 7, 1983, into the CONGRESSIONAL RECORD:

OBSERVATIONS ON THE 1984 ELECTION

The 1984 presidential election is underway. There is speculation as to whether President Reagan will run again, but his speeches before key voting groups, his "summer offensives" seeking to allay the fears of blacks, women, and Hispanics, and his recent approval of a re-election committee suggest that he is seriously testing the political waters for 1984, even if he is not wholly committed to run again. Six Democratic hopefuls, making one appearance after another all across the country, have hit their stride and have begun to move at the grueling pace required of presidential challengers. Presidential polls and straw votes of all kinds are now regularly featured in the news media. A few observations may be in order.

The conventional wisdom in Washington is that the President will run again. I have my doubts. I do not assume that he will run again. Every Republican member of Congress with whom I have spoken is certain that he will, and without his candidacy it is clear that Republicans would face agonizing and potentially divisive choices. But the President's decision is personal and cannot be easily predicted. At age 72, he surely does not relish another presidential campaign. I make no claim of being close to him, but my guess is that the President has not made up his mind yet. He certainly could argue that he has turned things around in the country and that his policies have produced peace and prosperity. The President can also see a few clouds on the horizon—Central America, possible economic troubles, and the polls which show him, with a surging economy to boost him, running only even, if not behind, his principal Democratic rivals. By no means can he look ahead to 1984 with serene confidence.

It is also conventional wisdom in Washington that if the President runs again, he will win. Once more, I have my doubts. Nothing in the polls today indicates that the President will have an easy time getting re-elected, and I see no other basis for thinking that he will win his reelection bid handily even though six sitting Presidents have succeeded themselves since 1900 while only four have failed in the effort. In fact, he faces three serious problems: his advanced age, the unfairness of his economic program, and widespread doubts about his ability to conduct foreign policy. The strongest factor in his favor is the people's belief that an economic recovery is underway.

I am not predicting who will be the Democratic nominee, but the rules of the nominating process dictate that half the delegates will be chosen by the end of March, 1984. That gives the candidates with solid financing and good organization a distinct advantage, and makes it hard for the others. The Democratic nomination now appears to be a two-way race between Vice President Mondale and Senator Glenn. It is by no means impossible for one of the other candidates to win the nomination, but he would have to have some big breaks to do it.

The Democratic candidate will be a formidable contender even if the President is a candidate. If the Democrats avoid a divisive fight for the nomination, their candidate will be stronger still. However, avoiding division is a genuine problem for them. The Democrats have six candidates competing for delegates, and they are members of the broad-based party of large and disparate interests that the nominee must bring together in order to win. Reform of the nominating process has not made it any easier for the Democrats to achieve unity, but if they can hold their groups together, they will win. There are many more Democrats than Republicans. Presidential elections are battles for the allegiance of loosely attached Democratic voters. If the Republicans attract enough of them, as the President did in 1980, they will win. If they do not, they will lose. The Republican Party is a much more homogeneous group, and it is able to resolve its internal conflicts more readily.

At this point in time, my impression is that the election will be hard to call until the final days of the campaign. In recent years, the voters have become quite volatile. People decide late in the campaign whether they will vote, and even later for whom they will vote. Ordinarily, I think they vote on the basis of their personal evaluation of the candidates, with issues also laying an important role. In 1984, I expect to see large numbers of loosely attached Democrats returning to the Democratic column after having broken ranks in 1980.

My sense is that the contest for the southern states will be critical in the election. The Republican strategy is to win with a combination of the West and the South, plus a state or two in the Midwest and the Northeast. The Democrats count on winning with the Northeast, the Midwest, and a solid showing in the South.

Most politicians are discussing another major factor in the presidential race: the "gender gap". The fact is that the polls show women disapproving of the President in far greater numbers than men. My sense is that the gender gap is real. Its existence is explained by women's rejection of militarism in American foreign policy, of budget cuts that harm the poor, and of the President's stand on issues such as abortion and the Equal Rights Amendment. In each instance, women identify the President as a person who does not share, and may not even understand, their point of view.

A key to the election will be the "have-not" American, the low-income person who traditionally has not been much interested in voting. This group of citizens, which tends to be Democratic and is located in "swing" states, made a difference in the 1982 election. If they turn out and vote heavily in 1984, the Democrats probably will win. That is why voter registration drives aimed at this group are especially important. The economic recovery now underway is another key to the election. If it is broad and sustained, the Republicans will gain, but if it is a "split-level" recovery benefitting the rich and leaving the middle-class and the poor in permanent recession, the Democrats will gain.●

TRIBUTE TO SENATOR HENRY JACKSON

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. KEMP. Mr. Speaker, the Nation has lost a truly great leader. Senator HENRY "SCOOP" JACKSON was a warm and wise man, whose clear voice and sound judgment inspired the deep respect of his colleagues across the political spectrum. I personally feel a deep sense of loss at his death, and shall miss his counsel and his friendship. America and the free world will miss his vision and dedication to democratic values; but his ideas and example will live forever.

Senator JACKSON's over 40 years of distinguished service in Congress spanned a proud and enormously challenging epoch in American history. During his service in Washington, he was called upon to take a stand on an amazing range of difficult and momentous issues, from the U.S. participation in World War II, the Yalta agreements, the Berlin Wall and the dawn of the cold war, to the Korean war, to the first manned space flights and Neil Armstrong's walk on the Moon, to the Cuban missile crisis and the tragic assassination of President Kennedy, to the war in Vietnam and the social upheaval at home, to the seizure of the *Pueblo* and the *Mayaguez*, to the celebration of our bicentennial, and the demise of détente.

In crises and triumphs, Senator JACKSON was a leading spokesman for all that is best in America's traditions and beliefs in individual rights and justice and freedom. During his tenure on the Armed Services Committee, he was an outspoken advocate of a strong defense and an assertive foreign policy. His deep commitment to the cause of human rights engendered the birth of the Jackson-Vanik amendment, to promote freedom of emigration from the Soviet Union. The historic Jackson amendment to the SALT I accords charted and remains a seminal tenet in U.S. arms control policy. Most recently, his sponsorship of a bipartisan commission on Central America has focused national attention on America's vital interests in that region. For all this and more, SCOOP earned the enduring gratitude of his countrymen.

It would be a fitting tribute for a grateful nation to honor HENRY JACKSON's memory by designating the President's Commission on Central America the Jackson Commission, after the man who first conceived and fought for its creation. I have written to President Reagan, suggesting this salute to a great and respected American.●

PRESIDENT REAGAN'S PRUDENT RESPONSE

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BEREUTER. Mr. Speaker, the Reagan administration recently faced one of its most difficult international incidents with the downing of the Korean airliner. Unlike Presidents of the past, however, Mr. Reagan did not respond with rash export controls which harmed no one but our own businessowners and farmers. By working with our allies and other nations from throughout the world, the President acted responsibly and thoughtfully in attempting to formulate a meaningful and effective response to this latest incident of Soviet savagery.

National Journal columnist Robert J. Samuelson made some important observations in his most recent column regarding the wisdom of export controls. I commend the following to my colleagues.

[From the National Journal, Sept. 10, 1983]

TRADING WITH THE ENEMY

(By Robert J. Samuelson)

When James H. Giffen, a vice president of Armco Inc., testified before a congressional committee earlier this year on export controls, he ended in virtual exasperation.

"Mr. Chairman, I first testified on this subject before this committee in 1969," he said. "After 14 years of submitting testimony . . . , I begin to ask myself, 'Is anyone listening?' "

Well, maybe somebody is.

The Reagan Administration's response to the downing of the Korean Air Lines jetliner notably excluded sweeping economic sanctions. Compare that with President Carter's reaction to the invasion of Afghanistan (a partial grain embargo) or to the Reagan Administration's response to the imposition of martial law in Poland (an embargo on oil technology).

Americans find trading with the enemy—even when there isn't a formal state of war—illogical and loathsome. But it is one of those unpleasant ambiguities of modern life to which it is necessary to adapt. The lesson may finally be taking.

The trouble with economic sanctions is simple. They don't work. Consider:

The 1979 grain embargo did not prevent the Soviets from obtaining needed supplies elsewhere. Although the Soviets may have paid higher prices, American farmers also suffered. President Reagan used the embargo as a campaign issue against Carter, and Agriculture Secretary John R. Block recently signed a new five-year agreement with the Soviets.

The embargo of oil technology has not prevented the Soviets from proceeding with their trans-Siberian natural gas pipeline. Orders for pipelaying gear that might have gone to the Caterpillar Tractor Co. went instead to Komatsu Ltd. When the Administration sought to apply its export ban to foreign firms, other nations reacted in horror. Now, many of the controls have been lifted or modified.

Although the United States restricts the export of equipment for making electronic "chips," the Soviets have obtained significant imports elsewhere. The Semiconductor Equipment and Materials Institute Inc., a U.S. trade association, reports that at least 60 "ion implantation machines"—a critical machine for chip making—have been shipped to the Eastern bloc and China.

Many long-standing American assumptions about export controls have been overtaken by events. The most basic is the belief that trade with Communist nations primarily benefits them. Americans believe that they have superior technology—and, in general, they do—and that transferring any of it to the Soviets is mostly a giveaway.

Modern technology is more complicated. Using it involves more than buying equipment. The know-how of applying it, fixing it, duplicating it and assuring quality control does not come automatically. These depend on a nation's basic economic strengths: the quality of its work force and economic enterprises.

Moreover, technology constantly changes. A dilemma emerges. To prosper and finance the next round of development, technology firms need to export. But exports spread technologies elsewhere.

The United States has not handled this dilemma adeptly. American export controls exceed those of any other Western nation. The North Atlantic Treaty Organization nations (minus Iceland, plus Japan) participate in something called the Coordinating Committee for Multilateral Export Controls—CoCom for short. This group maintains a list of about 180 items that aren't supposed to be shipped to Communist nations without prior approval of the entire group.

But U.S. controls are far stricter. On the CoCom list, items are distinguished by level of technical sophistication; exports of some signal generators, for example, might be permissible and others not. But the United States requires export licenses for many shipments that fall below the CoCom thresholds. Moreover, licenses are required for shipment to all countries, not just Communist nations.

The result is a system that is large, unwieldy and ineffective. In fiscal 1982, the Commerce Department received more than 100,000 license requests. Only about 8,000 involved exports to Communist nations. A relatively small proportion went to CoCom for possible exemption from export prohibition (1,100 for the United States, 700 for other nations). Most other licenses were approved.

The gripe of American firms is that the licensing system and the use of specific export controls—for example, the post-Afghanistan embargoes—have erected new barriers to exports. In some cases, sales to Soviet bloc nations are lost. More important, U.S. firms argue, these measures have the unintended effect of putting U.S. firms at an increasing competitive disadvantage in sales to non-Communist countries.

Though difficult to quantify, the effect is beyond doubt. American companies and farmers feel increasingly stigmatized as unreliable suppliers. As U.S. technological superiority has declined, the licensing requirement imposes an increasingly heavy burden on export sales. To buyers, it means added uncertainty and jeopardizes the flow of spare parts.

The growing availability of high-technology products also means that unilateral U.S. actions are increasingly futile. Paradoxically, expansive U.S. efforts to apply unilateral sanctions may have impeded effective multilateral controls by alienating the Europeans and hampering CoCom cooperation.

The Korean airline incident may signal a shift. For once, the response seems to fit the offense and gain allied support. Have broader lessons been absorbed? Congress may provide an answer when it considers the Export Administration Act, which governs export controls and expires on Sept. 30. The temptation will be to tighten controls to symbolize "getting tough"; the wiser response will be to narrow the controls and to focus them on areas where direct military use is clear.

The frustration of being unable to retaliate forcefully needs to be kept in perspective. At best, controls can only delay the Soviets from gaining new technology. No nation can bottle up knowledge. The most effective defense lies in the sluggishness of the Soviet system and the vitality of ours. In general, the Soviets have not innovated successfully and we have. The differences stem from within—and aren't for sale.●

THE MARCH ON WASHINGTON REVISITED

HON. SANDER M. LEVIN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. LEVIN of Michigan. Mr. Speaker, I would like to take this opportunity to commend the following article to the attention of my colleagues. It is an excellent summary of the impact of Dr. Martin Luther King on our national conscience as well as the work of achieving equality that remains to be accomplished. The author, Mark Arnold, was formerly with the National Observer and is now the editor in chief of the North Shore Weeklies in Massachusetts.

THE MARCH ON WASHINGTON REVISITED

(By Mark Arnold)

The year was 1958, and a young Negro minister from Montgomery, Ala., visited the small Ohio college I attended to lecture middle-class Northern white students on the virtues of non-violent resistance.

Martin Luther King Jr., I concluded after hearing him, was a man with a cause and a commitment, but it would take 100 years to reach the goals he outlined. I also wondered if a modest-mannered black man with a Southern drawl could reach outside his core constituency to stir the conscience of white America.

Dr. King did, ultimately, stir white America's conscience. The moment came exactly 20 years ago today, when more than 200,000 people, white as well as non-white, gathered under a broiling sun at the Lincoln Memorial in Washington for the largest civil rights demonstration in U.S. history.

The power of Dr. King's message—a message of simple justice delivered with historic eloquence—legitimized the Negro struggle for equality in the minds of most Americans. "I have a dream," said Dr. King on August 28, 1963, and on that day, white America finally accepted the black man's right to share in the American dream.

This weekend, the march of 20 years ago is being repeated in Washington, minus, of course, Dr. King. The goals, now as then, are jobs and justice, but in the years since

his death in 1968, no one has emerged with Dr. King's ability to dramatize the cause and re-awaken the nation's conscience.

The assassin who cut him down in Memphis, Tenn., secured Dr. King's place in history but he also made it easier for the nation to ignore problems of inequality and injustice.

In some ways, things are better now. The elaborate legal structure that supported discrimination has crumbled. Probably a higher proportion of nonwhites are receiving a good education than ever before. Educated nonwhites are finding better jobs; some are buying homes in white areas—though few on our own North Shore—and being accepted without incident.

While court-ordered busing for racial balance has not achieved its educational objective—a better education for both races—one-way voluntary busing, as exemplified in the METCO program locally, is well-established. And some of the federal aid that has gone into slum schools has indeed given minority youths a head start in life.

On the other hand, poverty in America remains a national scandal—one that receives less and less attention each year. A new Census Bureau report entitled, "America's Black Population: 1970 to 1982," shows the number of blacks below the poverty line grew by 12 percent during the period. Almost one out of every two black teenagers was unemployed in 1982. Income of black families lags further behind that of white families than it did in 1970.

The major bright spot concerns black married couples. Their income is growing faster than that of white married couples—starting, to be sure, from a base 30 percent lower. Countering that is an alarming increase in the number of black families headed by women; more than 40 percent of all black families have a woman head of household, compared with 32 percent in 1970 and such families are often among the poorest.

Overt discrimination has ended; subtle discrimination remains. Instead of answers, we're left with questions: What does equality mean? Sure, most everyone believes in equality of opportunity, but how is it to be measured—by equality of results? What debt does the present generation bear for the legacy of past discrimination? Are color-blind policies—in employment, in college admissions, for example—fair or is affirmative action, including establishment of quota systems or minority enrollment goals, called for? And are such special efforts, smacking of what critics call reverse discrimination, legal?

Congress next month is expected to give final approval to legislation making Dr. King's birthday of Jan. 15 a federal holiday. It's an honor not accorded to Abraham Lincoln or Thomas Jefferson. President Reagan is opposed, but only for financial reasons, the White House says: it would cost $18 million a year to give federal employees another holiday.

Whether or not Dr. King is honored by a national holiday is less important than that the values he personified continue to grow and take hold. Martin Luther King made equality respectable—by the example of his leadership, the power of his rhetoric, the simplicity of his dream.

Translating that dream into reality will take another kind of leader—one who can mobilize voters at the polls.●

NATIONAL REHABILITATION FACILITIES WEEK

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. MURPHY. Mr. Speaker, today I am introducing a joint resolution which would designate the week September 25, 1983, through October 1, 1983, as National Rehabilitation Facilities Week. The week would be used to commemorate the efforts of the more than 4,000 locally based rehabilitation facilities throughout the Nation.

Our local rehabilitation centers help to increase physical capabilities, as well as mental attitudes of self-worth and self-esteem for the over 35 million disabled Americans so they may lead independent lives. Those disabled persons who become employed, thus taxpaying citizens, stimulate our economy in terms of productivity. Furthermore, the centers offer guidance and support for the over 1 million additional Americans who become disabled each year due to chronic disease, birth defects or traumatic injury.

Because of the Rehabilitation Act, trained professionals are able to make possible individual progress among the disabled, which then becomes evident to all Americans. The human potential remains strong for the disabled as long as Congress continues to recognize its financial responsibility on behalf of rehabilitation programs. It is increasingly important that America focus much attention and lend support toward all its resources. By expressing sincere gratitude, it is my hope that this week will bring deserving recognition to the dedicated workers of the local rehabilitation facilities and disabled Americans themselves.

I urge my colleagues to support this resolution.●

SYRIAN WITHDRAWAL FROM LEBANON

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Foreign Affairs Newsletter for August 1983 into the CONGRESSIONAL RECORD:

SYRIAN WITHDRAWAL FROM LEBANON

The major question before the United States in the Middle East this summer is how to encourage Syria to withdraw its troops from Lebanon.

Senior American diplomats in the Middle East have been huddling in Washington much of this summer. They are trying to devise a strategy to achieve Lebanese-Syrian accord on the withdrawal of Syrian, other Arab, and Iranian troops now stationed in the Biqa Valley and northern Lebanon. This will be a difficult task. The line dividing diplomacy from violence in Lebanon will be a fine one in the coming months. It may be crossed at times, but we must work to see that negotiations dominate the agenda.

Ambassador McFarland's mission must take account of several factors. Syria may not have closed the door on an accord with Lebanon or on talks with the United States, but the American-Syrian relationship hangs by a thread. We will have to summon all our diplomatic skill in order to promote a withdrawal of troops in the uncertain environment that surrounds a strained relationship. We must accept that the critical issue for President Assad is political survival. History shows that the Arabs themselves can misread events in Damascus, so we should be cautious in taking the advice of Syria's fellow Arabs. Egypt, Iraq, Lebanon, and Jordan too often have confused their hopes for Syria with the realities there. The United States has also misjudged Syria. A year ago, American officials were saying that all foreign troops could be out of Lebanon by the end of 1982. We were wrong.

Other factors are important to American diplomatic strategy in the area. The influence of the Soviets in Syria has grown since the late 1970's. The use of Eastern Bloc intelligence to root out Syrian political opposition and the large Soviet military resupply effort of last summer reveal a Soviet desire to get back onto the Middle East stage. We also face major psychological barriers. Involvement of Syria in the peace process in Lebanon will make the Israelis nervous because of their suspicions of Syria. For its part, Syria is the least willing of all Arab nations to contemplate direct dealings with Israel. Finally, we will have to see Syria as the gatekeeper in the areas of Lebanon it occupies. With Chairman Arafat's power fading, Syria controls much of the PLO and will usher that group out of Lebanon only when it chooses to do so.

The goal of our diplomacy in Lebanon is a political reorientation of that nation toward a neutrality which depends on stable relations with its more powerful neighbors. Thus, a successful diplomatic strategy contains several elements.

The first element is support of Syria as a state. Despite all our problems with Syria, we know that it is a key state in the region. We ignore that fact at our own peril. Syria's independence, its legitimate role in the region, and its political and economic development are unequivocal interests of ours. We should say so.

Recognition of Syria's security interest in Lebanon is the second element. Unlike other Arab states, Syria has a legitimate security interest in Lebanon. It must be part of any negotiations. Syria wants to be assured that Lebanon will not be used by its opponents in the Arab world, by its own exiles, or by the Israelis as a base of military operations. Aspects of the Israeli-Lebanese agreement which allow for Israeli access to southern Lebanon trouble President Assad since Damascus is but a few miles from the area. With his political survival in doubt, he looks to us to recognize this security interest.

A third element involves action to create an environment in which it is clear to Syria that its interests will be served by leaving Lebanon. Lebanon can formally ask Syria to leave, and through other actions can pressure Syria to modify its stance. Because of the Israeli presence near the Syrian capital of Damacus, Israel can send the message

that withdrawal makes sense for both countries. All interested parties can support the Lebanese government and thereby show Syria that its effort against Lebanon are not weakening Lebanon, but are strengthening the resolve of Lebanon and its friends, especially the U.S.

Enlistment of outside support for diplomacy is the fourth element. Western Europe is Syria's largest trading partner. The task of dislodging Syria from Lebanon also has an Arab dimension. Saudi Arabia's help is particularly important, and that nation has leverage because it gives Syria billions of dollars in aid. However, Saudi Arabia's preference for quiet diplomacy suggests that its involvement will not be decisive.

The fifth element is expression of interest in a comprehensive peace. Syria cannot be engaged in the general peace process until the issue of the Golan Heights is addressed, but resolution of this issue will have to await direct negotiations between Israel and Syria. For purposes of our diplomacy in Lebanon, it may be useful to restate our longstanding policy that a comprehensive peace include an Israeli-Syrian peace and a settlement of the Golan Heights issue. In this process, we should adhere to United Nations Resolution 242 and the Camp David Accords without giving our version of an Israeli-Syrian settlement. To do so would strain American-Israeli relations.

Constructive interaction with the Soviet Union is the final element. The Soviet Union has interests in Arab groups with interests in Lebanon, but it has few interests in Lebanon itself. Lebanon sees little room for Soviet efforts. Israel distrusts Soviet motives. Syria may not feel comfortable in the Soviet embrace. We should consult freely with the Soviets, but allow their friends in the region to judge the value of their involvement. Since last fall, the Soviet Union has not backed the peace process.

As we press on with the peace process in Lebanon, we should not expect quick results. The road ahead is filled with obstacles. A careful diplomatic initiative can surmount them. Formulating and executing this initiative are the primary tasks of our Middle East policy today.●

THE 50TH ANNIVERSARY OF ORDINATION OF REV. JAMES BENISH, ORDER OF FRIARS MINOR CONVENTUAL

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HARRISON. Mr. Speaker, on Sunday, August 28, Rev. James M. Benish, Order of Friars Minor Conventual celebrated the 50th anniversary of his ordination to the priesthood. This event was commemorated by the celebration of mass at noon and, immediately thereafter, by a dinner hosted by his many friends.

Father James is the son of the late Mr. and Mrs. Jacob Benish of Plains. He was educated at Sacred Heart Slovak School, Wilkes-Barre, and at Mount St. Francis Minor Seminary, Floyd Knobs, Ind. He entered the novitiate of the Conventional Franciscans on August 7, 1928 at Syracuse, N.Y.

Father James studied philosophy and theology at St. Anthony on the Hudson, Major Seminary, Rensselaer, N.Y. He completed his theological studies at St. Bonaventure Friary, Washington, D.C. He was professed on August 7, 1931, and was ordained at the Immaculate Conception Cathedral, Albany, N.Y., by the late Most Reverend Edmund Gibbons, D.D., on June 10, 1933.

Father James has served in numerous assignments and has spent most of his priestly years in parishes and missions of Slovak denominations. He has been a confessor, counselor, and friend to many of the elderly of the Slovak people, especially those who are confined to hospitals and nursing homes. He is presently assigned to the Parish of St. Cyril and Methodius, Schenectady, N.Y.

Sunday, August 28, was a memorable day in the Slovak community as his family and many friends celebrated with Rev. James M. Benish, Order of Friars Minor Conventual, a golden jubilee of service to God and man. It was my pleasure to share in this occasion and to congratulate Father James as it is my pleasure, today, to share this happy event with my friends and colleagues in the House.●

SALUTE TO FIRE CHIEF DONALD A. SMOTHERS

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Ms. KAPTUR. Mr. Speaker, I want to take this opportunity to honor a very special constituent of mine from Walbridge, Ohio. For the past 40 years, Chief Donald A. Smothers of the Walbridge-Lake Township Fire Department has unselfishly, and with the utmost dedication, served the communities of Lake Township and Wood County.

The valuable service of Chief Smothers is an inspiration to all of us concerned about the safety of our communities. It is a tribute to Chief Smothers that he is being honored in a grand event organized by the people who know him the best—his family and his colleagues. We, the Members of the House of Representatives, congratulate Chief Donald Smothers and thank him for setting such a fine example of citizenship and community leadership.●

TRIBUTE TO MSGR. MANUEL ALVERNAZ

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. STARK. Mr. Speaker, on September 18, the San Leandro Boys' Club will honor Msgr. Manuel Alvernaz for his dedicated efforts on behalf of the club.

In 1946, a small group of local citizens got together with Monsignor Alvernaz, priest at St. Leander's Church, to lay the foundation for a club for boys in San Leandro.

Father Alvernaz, in September 1945, offered the use of St. Joseph's Hall for the first Boys' Club facility. The San Leandro Boys' Club, with a membership of 385, was accepted as a charter of the Boys' Club of America, a national organization then headed by former President Herbert Hoover. The San Leandro club membership has grown significantly over the years and has expanded to surrounding cities to serve youth.

The new modern facility in San Leandro was dedicated on November 22, 1966. The growth and success of the San Leandro Boys' Club could not have been accomplished without the commitment and leadership of Monsignor Alvernaz. He saw the need for a recreational organization that would offer companionship and enrichment to boys in his community. Through Monsignor Alvernaz' efforts, the San Leandro Boys' Club has become a meaningful experience for the youth it serves. I join in honoring Monsignor Alvernaz for his contributions.●

SENATOR HENRY M. JACKSON

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BROOMFIELD. Mr. Speaker, it is with great sadness and a profound sense of loss that we mourn the passing of Senator HENRY M. JACKSON. He was a plain-spoken man whose compassion, integrity, and steadfast dedication to his responsibilities as a legislator served the broad interests of the American people well throughout his distinguished career in the Congress.

He leaves behind two distinctive yet plainly appropriate monuments to his contributions to the welfare of his fellow men. The first of these is an array of significant and important statutory provisions on freedom of emigration, national security, energy, and environment of which he was the guiding spirit. Second, he has left us the very considerable light of his ex-

ample to help guide our footsteps along the often daunting and arduous paths of duty which democracy requires of us. As the Washington Post so appropriately editorialized, "He leaves behind an example of honorable and effective public service, responsive to events but informed by conviction and steadiness of purpose."

President John Kennedy once enunciated four questions by which the "high court of history" would eventually judge each of us for our conduct in public office. "First, were we truly men of courage? Second, were we truly men of judgment? Third, were we truly men of integrity? Finally, were we truly men of dedication?" HENRY JACKSON's career, and indeed his life, was a straightforward and eloquent affirmative to each of those fundamental questions.

All of us, in the executive branch as well as the Congress, who had the privilage of working with HENRY JACKSON and the benefit of his vision and his candid and thoughtful approach to the important problems of our time, were enriched by that experience. He will be sorely missed.●

DEDICATED NURSES AT NATIONAL CANCER INSTITUTE

HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. YATES. Mr. Speaker, there are few tragedies in life that parallel the news that someone you love has cancer. That happened to me 1 year ago, Mr. Speaker, when our doctors told us that my wife, Addie, had lymphoma. Where does one turn for help when this dread disease strikes? One feels so helpless.

Fortunately, our inquiries brought me to the National Cancer Institute to an old friend Dr. John Doppman and to his associate, Dr. Robert Ozols. They hospitalized Addie and the brutal period of chemotherapy began.

I had always supported the programs of the National Institutes of Health, but that was very much in the abstract, from reading articles and appropriations justifications. Now we were to learn at first hand why the National Cancer Institute was created and what it did for its patients and for the country.

Mr. Speaker, I cannot say enough about the competent and sympathetic treatment Addie received from NIC's personnel. There's such a large patient load that I wondered frequently how this small band of therapists could deal with their enormous problems. They did so courteously, cheerfully, ably, and thoroughly. They really work hard.

All the nurses who work in the clinics are so good. I want particularly to pay tribute to the young nurse, Mary Grace Tighe, who was assigned to Addie and who did so much to bring her through to recovery. I do not think Addie was a special patient for her because she considers all her patients as special—and treats them as such—but Mary Grace was and is a very special person and a very special nurse. She is an optimist where optimism is so important. She is warm and sympathetic where those qualities are needed to fight the despair and defeat that cancer brings to its victims. She is competent, conscientious, and painstaking in providing the treatments that may mean the difference between life and death. She is love personified.

I want to say "Thank you" to Mary Grace for Addie and me for doing so much and so well in bringing Addie through her most difficult trial. She must take great pride and satisfaction in her work—but I want her to know she will always be someone special to us.

Mary Grace recently received the cherished award as Nurse of the Year. Her exemplary traits of character are described in the article which I attach to my remarks entitled "Nursing Department Presents Annual Awards."

NURSING DEPARTMENT PRESENTS ANNUAL AWARDS

(By Charlotte Armstrong)

The presentation of awards to three CC nurses opened the 9th Annual Nursing Research Symposium sponsored May 5 by the CC Nursing Department. Awardees then joined the audience of CC nursing staff and visiting nurses in listening to the lectures of distinguished keynote speakers Barbara Stevens, R.N., Ph.D., and Phyllis B. Kritek, R.N., Ph.D.

Honored by the CC Nursing Department were Mary Grace Tighe, who received the Nurse of the Year Award; Susan Fisher who received the Nurse Research Award; and Dan Sands, recipient of the Distinguished Nurse Award. Rena Murtha, R.N., CC Associate Director for Nursing, presented the awards.

The Nurse of the Year Award is presented in recognition of exemplary practice in the care of patients in a research environment. Ms. Tighe is a primary nurse whose field is ambulatory care of medical oncology patients. She has taught chemotherapy courses for nurses, represented nursing in interdisciplinary programs for medical oncology patients and has acted for six weeks as head nurse on her unit in the absence of a permanent head nurse. Ms. Tighe "has demonstrated excellence in practice and leadership in the coordination and direction of patient care and nursing activities."●

WE ALL WILL MISS MSGR. CLEMENT KERN

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. KILDEE. Mr. Speaker, I wanted to pay tribute to the life and contributions of the late Msgr. Clement Kern of Detroit, who had been a theological and sociological hero of mine for many years. Having read the reflections by Msgr. George G. Higgins of Catholic University of America, who also has contributed so much to social justice, I felt that no greater tribute to Monsignor Kern could be expressed. I am sharing with my colleagues the words of Monsignor Higgins:

"CLEM KERN WAS A GREAT PRIEST"

Msgr. Clement Kern, a priest of the Archdiocese of Detroit and one of the unsung heroes of the Catholic social action movement in the United States, died last week at the age of seventy-six as the result of an automobile accident. The most beloved clergy-man in Detroit for more than half a century, he will be sorely missed by people of all faiths, rich and poor alike, in that economically troubled city.

Msgr. Kern was one of the most perfectly integrated Christians I have ever met. To begin with, he was a deeply spiritual and profoundly prayerful priest with an extraordinary sense of confidence in the goodness and providence of God. At all times and under all circumstances he was completely unflapable. In the 40-odd years that I knew him, I never once saw him out of sorts or out of patience. His rectory at Most Holy Trinity parish on the edge of the downtown business area of Detroit was frequently a madhouse, a magnet-like haven for people from all walks of life with problems that they thought only Father Clem could help them resolve. St. John Bosco is said to have been the first educator to make a virtue out of noise in the classroom and the workshop. For his own part, Clem Kern made a virtue out of confusion. On any given day his rectory was as hectic and as confused as Grand Central Station on the eve of a national holiday. But Clem took it all in stride, with great respect for the dignity of each of his importunate callers. He could be as calm as a cucumber in the midst of the kind of disorder and confusion that would have unnerved the average person.

Always full of good cheer, Clem spent his entire lifetime, as the Gospel puts it, rejoicing with those who rejoice and weeping with those who weep. Long before the phrase came into our language, he had a preferential option for the poor, the poorest of the poor—for the derelicts on nearby Skid Row, for prisoners and ex-convicts, for abandoned mothers and children, for the victims of racial or ethnic discrimination, for the mentally or physically ill, in short, for all the lame, the blind and the halt. At the same time, though not a respecter of persons, he moved comfortably and with great good feeling among the rich and the powerful in the Detroit Establishment. He counseled with them, as he did with the poor, about their personal, family, and professional problems. Moreover, without fawning on them, he quietly persuaded them to share their abundance with the poor and helped them to understand the broader social implications of the Gospel. They vied with one another to support his multiple and highly imaginative social welfare and antipoverty projects. I have no doubt that these pillars of Detroit society will mourn his passing every bit as much as his nameless friends on Skid Row. He treated them all the same. That is to say, he was literally all things to all men and women.

Unlike many others with a highly personalized concern for the spiritual and material

needs of individual men and women, both rich and poor, Clem never lost sight of the big picture. Early on in his priesthood, he came to realize that it was not enough to feed and clothe needy individuals, not enough to put band-aids on the socio-economic sores of urban America. Specifically, he clearly recognized the need for a strong trade union movement in a highly industrialized city such as Detroit and did as much as any other single individual outside the movement to help the workers of Detroit get organized. He was the best friend that the autoworkers and their union, the UAW, have ever had. Though by nature a disarmingly modest, low-key, and soft-spoken person, he was never afraid to stand up and be counted on controversial labor-management issues and could be as tough as nails, though gently and humorously so, when the going got rough. Through it all, however, he retained the respect and friendship of top management representatives in the auto industry and was instrumental more than once in bringing them together informally with their union counterparts in joint labor-management and community projects.

Following his retirement a few years ago as pastor of Most Holy Trinity parish, Clem joined the faculty of St. John's Provincial Seminary in suburban Detroit as pastor-in-residence. From all accounts, he had a profound influence on the seminarians. I envy them. They are fortunate to have enjoyed his company and to have profited from his wise counsel in his declining years.

Because of his long association with the auto workers, it was altogether fitting that Clem's last major public appearance should have been at the union's national convention in Dallas, Texas just a few months ago. I was with him there for a week and was delighted to see how warmly he was received by the officers and members of the UAW. They greeted him with deep affection as a revered member of the family, little knowing at the time that they were saying goodbye to him forever.

Clem Kern was a great priest, one in a million. We are going to miss him very much. May he rest in peace.●

JAPAN'S UNFAIR IMPORT RESTRICTIONS

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BEREUTER. Mr. Speaker, the Secretary of State, George Shultz, has recently approached Japanese officials and presented them with the opportunity to relax that nation's continued import restrictions on agricultural products and in other areas, in return for the administration's continued opposition to protectionist legislation in the Congress. The Secretary has pointed out to the Japanese that, although no seriously damaging protectionist legislation has yet passed the Congress, continued strict limits on the importation of U.S. goods, particularly agricultural products, by that country may result in the adoption of protectionist legislation as the trade deficit continues to grow worse, unemployment in the United States remains high, and next year's elections get closer.

I would hope that the Secretary's offer, as well as his observations on the possibility of a serious deterioration of trade relations between our two nations, will be given serious consideration by the Japanese. They must realize that they could make a great contribution to improved relations at this crucial time in history by a liberalization of these unfair import restrictions. They must also realize the potential for serious retaliation exists, if progress on this matter is not made soon.

The Washington Post of September 6 published an editorial relating to this important issue, and I request that it be printed in the RECORD for the benefit of my colleagues who may have been out of town. The editorial follows:

SECRETARY SHULTZ' BARGAIN

Secretary of State George Shultz proposed a bargain with Japan the other day—and the right kind of a bargain. It's time for Japan to open its markets wider, particularly for agricultural products and in government procurement. In anticipation of greater access for American products, as Mr. Shultz put it, the Reagan administration will continue to oppose the protectionist legislation now before Congress.

Japan's barriers to imports are more important as politics than as economics. The difficulties in exporting certain categories of goods to Japan have become an issue almost to the point of obsession with several American industries. But the potential volumes of sales there are not large enough, by any reasonable estimate, to make any great difference in the balance of trade or to the Japanese econony as a whole.

These barriers are mostly traditions inherited from a time when Japan was less rich and a good deal less self-confident. Probably the least defensible of the agricultural policies is the one that keeps imports of meat down to a trickle and holds prices in Japan outrageously high. Among other things, it's an unjustifiable burden on Japanese consumers.

Japanese government procurement policy attracts attention because the issue here is chiefly high-technology equipment for the national telecommunications system. In the past, Japan kept most of this field closed to foreigners to keep its own manufacturers from being suffocated by the overwhelmingly strong American companies. But the Japanese industry is no longer an infant.

The Reagan administration and, for that matter, Congress have done pretty well on balance in the endless struggle to keep the American market open to all comers. The administration has made compromises, but some were hardly avoidable and most have been temporary. Congress has done a lot of shouting and ritual sword-waving, but most members are well aware of the damage that protectionist legislation inflicts. Unfortunately, it is very possible that moods can change over the coming year as American trade deficits get worse, unemployment stays high and elections get closer.

That is the prospect that concerns Mr. Shultz as well as a good many other people in Washington. And that is why Mr. Shultz proposed his bargain to the Japanese. He is aware that, under Prime Minister Yasuhiro Nakasone, Japan is enjoying stronger and more decisive government than it has had for many years. One of the attributes of a competent government is that it does not allow third-rate issues like beef and electronic switching gear to become intractable, inflammatory and disruptive.●

FLIGHT 007 AND THE MX

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Ms. KAPTUR. Mr. Speaker, the Soviet atrocity exhibited in the destruction of Korean Air Lines flight 007 deserves international condemnation and countermeasures. It does not, however, justify the need for the MX missile. The arguments against the MX cannot be dismissed. In fact, as Tom Wicker clearly explains in the following op-ed piece which appeared in the New York Times, the terrible downing of the Korean airliner further demonstrates the dangers of MX deployment. I urge my colleagues to carefully consider Mr. Wicker's message. His article follows:

FLIGHT 7 AND THE MX

(By Tom Wicker)

Right-wing hawks are calling President Reagan, once one of their own, "pusillanimous" (from the Latin *pusillus*, meaning "very small," and *animus*, meaning "soul") in his response to the destruction of Korean Air Lines flight 7 by a Soviet fighter plane.

But if Mr. Reagan is successful in his calculated attempt to capitalize on this Soviet atrocity to win Congressional approval for the MX missile system, he will in fact be able to aim at the Soviet Union what its paranoically suspicious leaders are sure to regard as a first-strike weapon. That's not pusillanimous ("marked by contemptible timidity"); it's reckless to the point of irresponsibility.

Mr. Reagan not only cited the Korean airliner and its 269 lost passengers as a reason why the MX should be built; in his emotional TV address, he also invoked the name of the late Senator Henry Jackson, an MX proponent who died the day after flight 7 was shot down. These tactics flow from the growing difficulty the President faces in forcing the unnecessary and destabilizing MX through the various stages of Congressional approval.

Actually, there is no link whatever between the "termination" of flight 7 and the supposed need for the MX. If anything, the gross Soviet deed over the Sea of Okhotsk reflects Soviet fear, suspicion, insecurity and distrust—not the "aggression" Mr. Reagan repeatedly cited. And Foreign Secretary Gromyko's stonewall remarks at Madrid, together with all the other Soviet bombast, sound much like "whistling past the graveyard"—desparate defiance, that is, of a world fearfully seen as threatening on all sides.

Against this paranoid leadership, Mr. Reagan says it is now essential to pose the MX—100 of them in the old Minuteman silos—as a deterrent to Moscow's bent for aggression. But the MX is likely to have just the opposite effect.

The Soviet leaders know that both the Carter and the Reagan Administrations failed to devise an invulnerable basing plan for the giant, 10-warhead missile. They know that, therefore, its supposed justification—to give the United States an invulnerable land-based deterrent force—has disappeared. And they are altogether likely to draw the conclusion, plausible for such fearful and suspicious men, that the deployment of 100 MX missiles in the very silos once deemed vulnerable to Soviet attack means that the U.S. is planning to use them in a first strike.

(That, after all, is what the hardest-line leaders of the Reagan Administration believe Moscow is planning to do with its heavy, multiple-warhead missiles.)

If, therefore, the Soviet leaders are intrinsically as aggressive as Mr. Reagan claims the flight 7 incident demonstrates, they will be motivated all the more by MX deployment to launch their own first strike before the U.S. can do so. And if flight 7's destruction suggests, as Mr. Reagan insists, that war with an aggressive Soviet Union can be deterred only by U.S. strength, the MX is surely the wrong weapon for the task; not only will it be perceived as threatening, but it will also present a most attractive target—1,000 warheads lined up on 100 missiles like battleships at Pearl Harbor, to be destroyed by 200 Soviet warheads.

Thus, far from being a deterrent, MX deployment in Minuteman silos will doubly invite Soviet attack—and that is so whether the Soviet leaders are ruthless aggressors, as in Mr. Reagan's view, or Nervous Nellies unable to tolerate even a civilian airliner violating their air space and not secure enough in their power to admit a mistake and atone for it. If the latter, aiming the MX at such leaders will be even more dangerous.

If the shooting down of flight 7 has any relevance to the U.S. military program, it is in whatever the incident shows about Soviet leadership psychology. In that light, swift development and deployment of the proposed Midgetman single-warhead missile appears a more sensible response than building the MX; and if Congess approaches the matter analytically rather than with Mr. Reagan's understandable emotion, flight 7's grim fate may even prove to be the stake through the monster's heart.

Midgetman could not be perceived even by paranoid Soviet leaders as a first-strike weapon, particularly since it would represent an alternative to the MX. Once deployed, whether or not as a mobile missile, its single warhead would present a low-priority target at which the Russians would have to aim two warheads; some experts argue, therefore, that Midgetman would not even require deceptive basing. Thus it would be about as invulnerable as any land-based missile could be, as well as non-threatening—eliminatng both the incentives to strike first that the MX would give Moscow.

Weapons experts with no Pentagon turf to defend say 1,000 Midgetman could be deployed as soon as and for less money than 100 MX's and would provide a more stable deterrent. That, together with flight 7's evidence of Soviet paranoia, calls for the death rather than the birth of the MX.●

HON. POWELL A. MOORE—IN APPRECIATION

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BROOMFIELD. Mr. Speaker, it was with deep regret that I recently learned of the imminent departure from Government service of the Honorable Powell A. Moore, Assistant Secretary of State for Legislative and Intergovernmental Affairs. I have known Powell for many years, and will sorely miss his friendship, his counsel, and his dedication to serving the interests of our Nation.

Powell has had a remarkable, diverse and rewarding career, which has included military service, congressional assignments, and a number of very successful years in the private sector. He served for 3½ years as a military officer in the early 1960's and had a tour of duty in Germany during that period. Powell later worked as a weekly newspaper editor in Georgia for a number of years.

He began his Washington career in 1966 as an aide to the late Senator from Georgia, Richard B. Russell. After Senator Russell's death in 1971, Powell became Deputy Director of Public Information for the U.S. Department of Justice and later served in the Office of Legislative Affairs at the White House under Presidents Nixon and Ford. When he left the White House staff to enter private business in 1975, he was a Deputy Special Assistant to the President.

For the next 6 years, Mr. Moore was engaged in governmental relations and Washington representation as a consultant for a variety of corporations and associations.

His association with the Reagan campaign began in early 1979 and he served as an Assistant Director of Congressional Relations for the Reagan transition team between election day in 1980, and the inauguration on January 20, 1981.

He was appointed Assistant Secretary of State for Legislative and Intergovernmental Affairs in January 1981. Needless to say, Powell and his skilled team at State have provided invaluable assistance to the Foreign Affairs Committee on a variety of complex foreign policy matters during the past 2 years. In spite of the weighty responsibilities and challenges which come with the Assistant Secretary position, Powell performed admirably and maintained his fine sense of humor and professionalism. He did a yeoman's job whenever we called upon him and asked for his help or advice.

Powell worked especially hard at fostering a spirit of bipartisanship in the conduct of America's foreign policy. In addition, he constantly strove to develop an effective partnership between the executive branch and Congress. He is a person of high integrity, superior judgment and true dedication who, I am sure, will perform equally well in his new capacity as vice president for government affairs for the Lockheed Corp. He will, however, be truly missed by his friends on the Hill.

I am certain that all of my colleagues in the House will join me in wishing Powell A. Moore, and his lovely family, much success in the coming years.●

CITY OF WHITE PLAINS, N.Y., CELEBRATES TRICENTENNIAL

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. OTTINGER. Mr. Speaker, I would like to call to the attention of my colleagues a celebration which is taking place this week in my home Westchester County, N.Y. This Sunday, September 18, the city of White Plains will celebrate its 300th birthday. I would like to congratulate the people of White Plains on this historic occasion and offer special tribute to Mayor Al Del Vecchio and common council members Robert Ruger, Mary Ann Keenan, Michael Coffey, David Grauer, Joseph Delfino, and Richard Hendy, Jr., for their efforts to insure a successful gala.

The city of White Plains has played an important chapter in our American history. I would like to share with my colleagues a brief history of this magnificent city written by Renoda Hoffman, the White Plains city historian.

WHITE PLAINS IN A CAPSULE

Quaroppas became the property of white settlers on November 22nd, 1683, when the Weckqueeskeck Indians sold their 4,435 acres to men from Rye. Quaroppas, the Indian word for White Marshes, was translated into White Plains, to become the name of the new settlement. Home lots were laid out along an old Indian trail, and named simply the Village Street (Broadway). Land for a common was set apart, houses were built, and a new frontier village challenged the wilderness.

In 1757, when the county Courthouse in the Town of Westchester (now the Bronx) burned, Dr. Robert Graham, prominent White Plains physician and merchant, donated land for a courthouse, and White Plains became Westchester's county seat. The new Courthouse was completed (on Broadway) in 1758.

In the beginning Westchesterites were not unanimous for independence from Britain. Boston's problems were a world removed until the violent clash at Lexington and Concord sent shock waves across all thirteen colonies. By then a dozen houses had sprung up along the Village Street and about seventy others occupied the outlying area. A Convention called for April 11th, 1775, at the County Courthouse hastened the polarization of fections in Westchester.

That day freeholders came to White Plains to elect delegates to the Provincial Congress. Over 500 people crowded into the village. Loyalists gathered at Hatfield's Tavern (on Maple Avenue) while those whose views were more revolutionary, found Oakley's Tavern, across from the Courthouse, more attractive.

The Loyalists waited until the Patriots were inside before they entered the Courthouse. Then their spokesman denounced the meetings as having been unlawfully called and for an unlawful purpose. Because opposition would acknowledge the authority of those who called the meeting, the Loyalists protested only, and demanded that such protest be written into the records. Then, loudly singing "Long Live Our Noble King" they returned to Hatfield's where more than 300 men signed a document pledging allegiance to King George III.

In New York City on June 30th, 1778, the Provincial Congress adjourned when British ships sailed into the harbor. Members reconvened in the Courthouse at White Plains and here, on July 8th, an explosive document, a declaration of independence from Britain, was brought by messenger from the Philadelphia Congress. By that afternoon the Committee headed by John Jay directed to study the document, recommended approval. The resulting Resolution for adoption of the Declaration, forwarded to Philadelphia, also changed the name of the Provincial Congress to the Convention of the Representative of the State of New York.

On July 11th, the Declaration of Independence was read in public and the first time in N.Y. State. Preceded by dramatic drum beats, Judge John Thomas of Purchase, standing on the steps of the Courthouse read the document that proclaimed freedom for the United States of America. Thus three drama packed days transformed a Province into a State. White Plains had been the birthplace of that State.

Following the Long Island defeat, Washington withdrew to Westchester. On October 28th, 1776, Sir William Howe, the British commander, found Washington awaiting him with his ragged Continentals on the fortified hills of White Plains. In a spirited attack and defense action featuring approximately 8,000 British against 1,600 Americans entrenched on Chatterton Hill. Sir William overran the hill, but failed to follow up his advantage. The result was eight more days of attacking and skirmishing. Finding himself unable to dislodge Washington, General Howe than resigned his frustrating White Plains campaign and returned to New York City.

On the night of the British withdrawal, Massachusetts Major John Austin, while under the influence of liquor marched his men along the Village Street. He robbed the townspeople of their possessions, evicted the aged, dumped the ill upon the frozen ground, and ignored the cries of little children as he set their homes afire. At his court martial Austin's excuse was that the villagers were "all damn Tories". Much of White Plains went up in smoke that night, including the courthouse, the Presbyterian Church, Daklay's tavern & Dr. Graham's home.

Although Howe won Chatterton Hill, his avowed purpose of destroying Washington's "band of rebels" had not been accomplished. Washington had out-generated the King's general and saved his ill clad, hungry army for future battles.

Following the Revolution, scars healed slowly. A new Courthouse did not become a reality until 1787, in 1844 the Iron Horse came puffing into White Plains. Businesses left the Village Steet to concentrate along a new street known, appropriately enough, as Railroad Avenue (Main Street). In 1855 when it became apparent that the old Courthouse had become too small, too far from the business center, another civic minded citizen responded. Charles A. Purdy donated land on Railroad Avenue for a new courthouse.

On April 3, 1866, White Plains became a village with a board of seven trustees. Four years later census takers counted 2,630 people in residence. When White Plains became a city on January 1, 1916, there were 19,285 residents. Today, the city with approximately 50,000 residents has been designated as a "Central City" by the Federal Government.●

STATISTICAL PORTRAIT OF THE NINTH DISTRICT OF INDIANA

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, August 31, 1983 into the CONGRESSIONAL RECORD:

A STATISTICAL PORTRAIT OF THE NINTH CONGRESSIONAL DISTRICT

Everyone is familiar with most of the political jurisdictions—states, counties, cities, towns, and so forth—which divide the United States into smaller regions. Of these, the congressional distict is probably the least well-known. It is used principally for electing a Congressman, but because it is the region most nearly equal in population all over America, the Bureau of the Census also uses it to compile statistics. In its recent Congressional District Census, the Bureau of the Census gives some comparisons that should be of interest to residents of southern Indiana.

GEOGRAPHY

The Ninth Congressional District takes in all southeastern Indiana, most of south central Indiana, and portions of the state's southwestern quadrant. It is bordered by the Ohio River to the South, the State of Ohio to the East, and the zig-zag edge of three other districts to the North and West.

The district contains sixteen entire counties and parts of five others. The full counties are Brown, Clark, Dearborn, Dubois, Floyd, Franklin, Harrison, Jackson, Jefferson, Jennings, Ohio, Perry, Ripley, Scott, Switzerland, and Union. Portions of Bartholomew, Crawford, Fayette, Monroe, and Washington comprise the balance of the district. Covering 6,107 square miles, it is the largest of Indiana's ten congressional districts.

POPULATION

The Ninth Congressional District has 544,873 residents, 9.9% of Indiana's population. There are more females (277,953) than males (266,920) in the district—about 104 women to every 100 men.

The median age of the district (half above, half below) is 28.4 years, the second lowest among congressional districts in a state where the median age is 29.2 years. The district has 56,470 residents aged 65 years or more. Six other districts have more elderly residents.

In the 1960's, Indiana and the district had almost the same rate of population growth. However, between 1970 and 1980 the district grew more than twice as fast as the state as a whole. While Indiana's population increased by 5.7%, the district's burgeoned by 14.2%.

The district is second only to the Third Congressional District (bordering on Michigan) in numbers of people who recently resided in other states. Apparently, a large number of southern Indiana residents are newcomers to the state.

The ethnic background of major groups in the district is interesting. The largest single ancestry group is German, followed by English and Irish. Of those with mixed ancestry, German descendants again predominate, followed by Irish and English. The district has the second lowest black population of Indiana's congressional districts. Blacks comprise 7.6% if the state population, but only 1.9% of the district's. There are only 3,180 residents of Spanish origin in the district—again, the second lowest in the state.

DISTRIBUTION

Not surprisingly, the Ninth Congressional District is the most rural in Indiana. It has only 89.2 persons per square mile. Compare this to the state as a whole, with 152.8 persons per square mile, and to the Tenth Congressional District (Indianapolis), with 2,897.4 persons per square mile.

New Albany is the largest city in the district. The next largest is the part of Bloomington which is in the district. Jeffersonville, Connersville, and Clarksville are third, fourth, and fifth in terms of size. Seymour and Madison round out the district cities with populations above 10,000.

HOUSING

The Ninth Congressional District has 199,981 housing units. Some 74.8% of them are owner-occupied, the fourth largest concentration of homeowners in Indiana. Most homes are heated by gas, oil, or electricity, but wood is used as the primary fuel by 13,605 district residents, by far the highest figure in the state. The district leads the state in homes without complete kitchen and bathroom facilities and in homes without telephones. On the positive side, it leads the state in new owner-occupied housing units.

The median value of owner-occupied housing units in the district is $36,500, as compared to a median value statewide of $37,200. These figures place the district and the state near the center of the spectrum nationwide. New York's Fifteenth Congressional District (Manhattan) has the country's highest median housing value, $185,800, while the lowest, $16,600, can be found in the Second Congressional District of Pennsylvania (Philadelphia). The median rent in the district is $158 per month, the second lowest among congressional districts in the state. The median rent statewide is $166.

INCOME

At $6,191, median income per capita in the Ninth Congressional District is the lowest among Indiana's ten congressional districts. However, the median household income of district residents is $15,884, eighth in the state. In 1979, 10.6% of income-earning district residents were below the poverty level.

EDUCATION

The Ninth Congressional District has 117,220 children in school, kindergarten through twelfth grade. Of this number, 7.4% are in private schools, less than the statewide average of 8.8%. The district ranks second highest in the state in the number of people enrolled in college—33,522 students. The figure is high because Bloomington and Indiana University are in the district. Of the 33,522 college students, 31,470 are in public institutions and 2,052 are in private institutions.

ELECTIONS

The Census Bureau reports there are 383,018 persons of voting age (18 years and over) in the Ninth Congressional District. Women comprise 51.9% of those eligible voters, and blacks make up 1.9%. The congressional election of 1982 brought 180,539 district voters (47.1% of those eligible to vote) to the polls. Three other congressional districts had larger turnouts.

The Congressional District Census tells every Congressman something that he already knows about the area he represents: that it is unique and has special needs and strengths it shares with no other district.●

WE MUST CONSOLIDATE AND REFORM OUR UNEMPLOYMENT INSURANCE SYSTEM

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. STARK. Mr. Speaker, our unemployment insurance system has become a confusing, unreliable and ineffective income maintenance program. To help alleviate this national disgrace Representatives PEASE, KAPTUR, and I are introducing today legislation to consolidate and reform our extended benefits and Federal supplemental compensation systems.

This legislation, the House equivalent of S. 1784, the Byrd-Heinz bill, will establish a permanent system of weekly benefit levels, where only a crazy-quilt patch work of temporary laws now exist. Equally important the reforms proposed will make our unemployment insurance system easier to implement and to understand by both administrators and recipients.

Although our economy is beginning to show signs of recovery, we in Congress must remember that over 10 million people are still unemployed, another 5.7 million are working part time, because they are unable to find full-time employment, and some 1.7 million more Americans are so discouraged that they have stopped looking for work and are therefore not even included in our official unemployment statistics. While this translates into a 9.5 percent national unemployment rate, it hides the fact that 19 States and the District of Columbia actually have unemployment rates well over this unacceptably high national average.

Congress has responded in the past by providing additional weeks of benefits to the States' regular basic 26-week unemployment insurance system. These additional weeks are provided by two additions to the basic 26-week program: First, extended benefits (EB) financed by State and Federal moneys, and second, the wholly U.S.-financed Federal supplemental compensation (FSC) assistance. Unfortunately, several problems beset these two systems which have underminded their ability to aid the unemployed.

To begin with, the extended benefits system simply is not functioning. Even though unemployment is higher today than at any time in the past 40 years (except during this past winter of dispair) incredibly, only 2 States and Puerto Rico are today eligible for this second tier of EB benefits.

Mr. Speaker, the distress and cynicism resulting from this unacceptable situation must not be underestimated—nor can it be allowed to continue.

The question is how did 48 States wind up triggering off of the extended benefits program? This situation is primarily the result of two changes made in legislation enacted in 1981. First, the insured unemployment rate (IUR) which is used to determine a State's eligibility for EB was raised from 4 to 5 percent. To compound the problem of qualifying, the IUR was further modified so that all persons who are receiving extended and supplemental benefits are excluded from the computation of the IUR. It must also be remembered that the IUR does not include all those Americans who have exhausted all their unemployment insurance benefits. As a result, the IUR fails miserably in reflecting the true unemployment situation in those States needing the most help—namely those in which the duration of unemployment is highest.

In addition to the faulty IUR trigger, the present unemployment insurance system is unacceptable because it requires continued legislative action to provide the third tier of benefits known as Federal supplemental compensation (FSC). We in the Public Assistance and Unemployment Compensation Subcommittee spent several days in April and are holding hearings now to consider extending the FSC beyond its September 30 expiration date. It makes far more sense to combine this third tier of benefits with the EB system and have them triggered automatically by appropriate formulas.

In establishing a permanent system of additional weeks of UI assistance as unemployment levels rise, we will be able to respond quickly and effectively to peoples' needs. This will contrast sharply to this Congress inability to provide FSC in the present recession unitl unemployment reached 10 percent. Mr. Speaker, I need not detail the great suffering this caused workers who lost jobs early in the recession and exhausted basic and extended benefits before the supplemental benefits were available.

Also by combining and making permanent the EB and FSC programs both the unemployed and administrators of the unemployment programs will be relieved of the anxiety now caused by the necessity for continued extensions of the FSC system.

Further, it seems a waste of time in the Public Assistance and Unemployment Compensation Subcommittee and the whole Congress to discuss so frequently extending the FSC program, when it is so clearly imperative that we continue this program. Our time surely could be better spent in finding ways to get these unemployed people back to work.

The third major problem with our present system goes beyond the issues of absence and inadequacy of benefits. Mr. Speaker, the system has become so complex and confusing that it defies understanding by the workers it is designed to protect, by those administering the program, by employers and taxpayers who pay into the trust funds and the treasury, and also by the Members of Congress who created the system.

It makes no sense to have a system that allows States to trigger onto the third tier of benefits (FSC) while denying these States the second level of benefits (EB). It also makes no sense to change the number of weeks an unemployed person is eligible for several times during the course of their unemployment. Excluding those who are on EB and FSC benefits and exhaustees from the State's unemployment figures which determine a State's eligibility for extended benefits also seems absurb.

Mr. Speaker, we must have some supplemental benefits program. However, the present system needs to be reformed so that it actually will provide dependable protection for the unemployed. The system of extended benefits must also be repaired so that those who pay the costs, and those who operate the programs can understand what help is available, how to obtain it, how much it costs, and how to operate the programs providing it efficiently.

Now is the time to make sense out of these two programs and combine them in such a way that they complement each other rather than exacerbate the flaws in the other.

The major provisions of the legislation we are introducing are as follows:

First, the extended benefits and Federal supplemental compensation systems would be merged into one system providing benefits beyond those available through the basic UI system operated by the States;

Second, benefit levels would be structured so that States with the highest levels of unemployment would be eligible for the greatest number of weeks of benefit, and the number of weeks would be reduced as unemployment levels declined;

Third, reduce the IUR to 4 percent so that States would be eligible for at least the lowest tier of benefits;

Fourth, a State's benefits would be available to the long-term unemployed, based on the State's IUR or on its total unemployment rate (TUR), whichever results in a greater number of weeks of benefits for the State.

The following table explains the benefit and financing structure of the proposed program:

When State IUR equals (percentage)	And IUR is "X" percent or greater of prior years [1] or	TUR is "Y" percent or greater	Unemployed persons receive "Z" weeks of benefits [2]	Costs split: State share/ Federal share [3] (percentages)	Percent Federal share from trust fund [4] general revenue
0 to 3.99		N/A	0		
4 to 4.99	130	9	10	50/50	100/00
5 to 5.99	105	10	20	40/60	75/25
6 to 6.99	105	11	25	30/70	50/50
7 and above	105	12	30	20/80	25/75

[1] That is, "X" percent of the average of the IUR in the same week in each of the 6 previous years.

[2] When the national seasonally adjusted total unemployment rate equals or exceeds 10 percent, unemployed persons in States in the 0 to 3.99 percent IUR tier will be eligible for 5 weeks of "Additional Benefits," and 5 additional weeks will be paid (beyond the number listed) for each other tier—with all such weeks being funded 100 percent from Federal general revenue.

[3] State share to be paid from the State trust fund.

[4] Federal trust fund revenues derived from FUTA.

I urge my colleagues on both sides of the aisle to consider this proposal and would welcome their comments and suggestions for improving this legislation. Admittedly this bill will not solve the problems that have caused our unacceptably high unemployment rate, nor does it address ways to reemployed UI beneficiaries. We urgently need to consider linking retraining and relocation assistance to unemployment compensation for dislocated workers and other disadvantaged groups in our society. I hope that we will be able to take up these issues once we have made sense out of the extended benefits program.

Now is the time to end the confusion and irrationality in the present system of extended benefits so that the Congress can move on to putting people back to work.●

CHILE'S 10 YEARS OF MISRULE

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. OTTINGER. Mr. Speaker, the excellent analysis by Professor Peter Winn of Tufts University, "Chile's 10 Years of Misrule," in the New York Times of September 7, 1983, vividly catalogs the brutalities that the Pinochet regime has visited on what was one of America's greatest democracies.

When I helped establish the Peace Corps in Chile in 1961, Chile was the gem of Latin America, justly proud of its democratic, cultural, and economic leadership. Professor Winn describes how this proud heritage has been trampled by the current military dictatorship.

It is a great irony that America under Reagan should ignore the gross abuses of fundamental human rights by the Pinochet dictatorship and proclaim this travesty as the staunchest of American allies, even as it dashes the principles America is supposed to stand for and crushes the aspirations of the Chilean people for freedom and a decent way of life.

I strongly commend the Winn article to the attention of my colleagues.

The article follows:

CHILE'S 10 YEARS OF MISRULE

(By Peter Winn) [1]

BOSTON.—A decade has passed since the Chilean military seized power in a bloody coup that overthrew President Salvador Allende Gossens and put an end to his democratic road to socialism. It has been a decade since a Chilean colonel proudly told me to come back in 10 years and "see what we have done for Chile." In fact, he and his fellow officers have destroyed Chile's economy and united the people in opposition to their regime. They have proved to be incompetent as well as inhumane, sowing the seeds of their own overthrow.

During the weeks that followed the coupe d'etat, the military killed 25,000 of its 10 million countrymen—the equivalent of 500,000 in the United States. Another 100,000 passed through the prisons, concentration camps and torture chambers of the secret police, which intimidated one out of every 10 Chileans into spying on their colleagues and neighbors. Where Chile used to be famous for its civil liberties, the military made it notorious for the denial of human rights.

When the armed forces seized power, they said they did it to uphold "the rule of law" and to make sure that Chile would remain "a free country." But they have destroyed their country's democratic institutions and imposed the arbitrary personal dictatorship of Gen. Augusto Pinochet. They have censored the press, emasculated the courts and made a mockery of both liberty and law. Their totalitarian purpose is clear in their efforts to penetrate and purge the unions and universities, the churches and civic associations. Like Mussolini, they have not hesitated to murder their opponents in their places of exile, even on the streets of Washington.

When the military seized power, it said that its purpose was to defend the economic security of the nation, but what has it done to Chile's economy? The regime has given free rein to conservative economic ideologues, whose monetarist dogmas and free-market policies have destroyed the country's industrial fabric and undermined the state's capacity to promote development or to ameliorate crisis. The consequences of the embrace of Milton Friedman's "Chicago Boys" are now all too clear. Speculators have made millions and colonels' wives drive Mercedes-Benzes, but the country is bankrupt and the people are hungrier than they ever were under President Allende.

After 10 years of misrule, industrial production and productive investments are half what they were a decade ago, and foreign capital is fleeing, along with the best educated citizens. The regime has made unemployment and underemployment a way of life for almost half the work-force and poverty a reality for most of the people. It has turned a global recession into a national depression. Inflation is 35 percent and rising, the economy shrank 14 percent last year and the per capita foreign debt is the highest in the world. The regime's vaunted economic miracle has proved a mirage.

When the armed forces seized power, they talked about the moral regeneration of Chile. But the regime has made beggars of the poor and paupers of the middle class. It has turned daughters into prostitutes and fathers into alcoholics, neighbors into informers and soldiers into torturers. Its policies have destroyed the stability of families and the fabric of society. It has deprived grown men of their dignity and children of their health. And it has become corrupt itself. It has given Chile a Government with few redeeming virtues, one with nothing to be proud of.

Many Chileans applauded the coup a decade ago, but few support the military today. Members of the middle class who beat their pots and pans for President Allende's overthrow then are banging them now for the ouster of General Pinochet. In this, the military has worked a political miracle: It has united a divided people—against itself.

It is all too clear what the military has done to Chile. Ten years ago, the colonel told me that he would "do what was necessary to save Chile." Today, it is obvious what is required. It is time that the officers returned to their barracks and gave the Chilean people another chance to rule themselves. Democracy may not be perfect, but it is far better than the military's disastrous despotism.●

[1] Peter Winn is professor of Latin American history at Tufts University and senior fellow at Columbia University's Research Institute on International Change.

AIRBORNE AGGRESSION

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BROOMFIELD. Mr. Speaker, it was with deep regret that I learned of the recent downing of Korean Air Lines flight 007 which resulted in the death of 269 innocent people. A colleague, Representative LAWRENCE MCDONALD, along with 60 other Americans, perished when a Soviet fighter attacked the unarmed commercial aircraft. This event shocks the sensibilities of people everywhere. In spite of the cruel nature of this terrorist act, the President is to be commended for his measured response during this period of tension between the United States and the Soviet Union.

This barbarous act is a crime against all humanity. It is a violation of the most fundamental rules of the air on which all the nations of the world, including the Soviet Union, depend in the busy, crowded skies of the jet age.

Thanks to the Japanese and American governments' technical capabilities to track and monitor U.S. civilian flights, as well as the ability to follow Soviet interceptor activity, the facts are quite clear. Flight 007 accidentally strayed into Soviet airspace and was headed out into international waters when it was brought down with minimal warning by a rocket-firing SU-15. the Soviets obviously put a greater premium on preventing the escape of an intruder than on protecting innocent human lives.

It is interesting to note that the Soviets themselves frequently violate U.S. airspace. If that invisible boundary is violated, international law, which is endorsed by both superpowers, prohibits the use of force except under extreme conditions. Even then, the law bars the use of excessive force.

Since January of this year, 77 Soviet military planes have entered the Atlantic coast AIF defense identification zone. All of them have been escorted out of the area. Shortly before the U.S. withdrew Aeroflot's landing rights in 1981, Aeroflot aircraft frequently entered off-bounds airspace in the United States. In addition, Polish and Czechoslovakian commercial carriers have passed over sensitive military facilities as they wandered into restricted zones. None of these Soviet or bloc aircraft has been shot down, or fired upon.

The Soviets have shown little respect for the rules of the game. Their past track record in this regard is dismal at best. At this point, I would like to insert some statistics from the September 12, 1983, issue of U.S. News & World Report. The brief article lists the attacks by Soviet aircraft on military and commercial planes over the past three decades.

AIRBORNE AGGRESSION: A SOVIET TRADEMARK

The downing of the South Korean airliner was only the latest and most extreme episode in a series of attacks by Soviet gunners on military and commercial planes over the past three decades.

Other incidents——

April 8, 1950. American bomber with 10 on board disappears over Baltic. U.S. says plane was brought down by Soviets.

Nov. 6, 1951. U.S. Navy plane lost over international waters off Siberia after Soviet planes fire on it. Crew of 10 missing.

April 29, 1952. Soviets attack French airliner. Two of passengers on the commercial flight injured.

June 13, 1952. U.S. reconnaissance plane missing after interception by Soviet planes over Japan.

June 16, 1952. Russian jets down unarmed Swedish military plane over international waters in the Baltic. Seven crewmen rescued.

Oct. 7, 1952. U.S. bomber with crew of eight disappears over northern Japan after taking Soviet fire.

March 10, 1953. U.S. Air Force jet fighter shot down by two Russian MiG's in Germany. No casualties.

March 12, 1953. Soviet MiG's down British bomber above Elbe River Valley at the East-West frontier of Germany. Five crewmen die.

March 15, 1953. U.S. reconnaissance plane attacked by MiG about 25 miles from Soviet border. Shots exchanged, but neither is hit.

July 29, 1953. U.S. bomber shot down by MiG's over the Sea of Japan. Sixteen crewmen killed.

Jan. 22, 1954. U.S. reconnaissance plane over Yellow Sea attacked by eight MiG's. No casualties.

March 12, 1954. Two U.S. military planes flying near Czechoslovak border on training flight attacked by MiG. Both land safely.

June 3, 1954. Belgian transport carrying livestock fired upon over Yugoslavia by MiG fighter. One crew member killed, two injured.

Sept. 4, 1954. U.S. Navy plane shot down by Soviet jets 30 miles off Siberian coast. One dead.

Nov. 7, 1954. American reconnaissance plane shot down over northern Hokkaido, Japan. One American killed.

May 10, 1955. Eight American fighter planes on patrol over international waters near North Korea attacked by MiG's. No casualties.

May 22, 1955. U.S. Navy patrol bomber attacked by Soviet aircraft near St. Lawrence Island in Bering Sea. Seven in crew injured.

June 27, 1958. Unarmed American military transport, diverted from its course by storm, shot down over Soviet Armenia. No deaths.

Sept. 2, 1958. Seventeen Americans lose lives when C-130 transport aircraft is shot down in Soviet Armenia near Turkish border.

Nov. 7, 1958. Soviet MiG's fire on U.S. Air Force reconnaissance jets over Baltic and Sea of Japan.

June 16, 1959. U.S. Navy patrol plane attacked by Soviet-made MiG over Sea of Japan. One crewman wounded.

May 1, 1960. Russians down U.S. spy plane piloted by Francis Gary Powers. U-2 pilot captured, jailed.

July 1, 1960. American RB-47 shot down in Barents Sea near Kola Peninsula. Four of six on board die.

Nov. 20, 1963. Soviets down Iranian plane after it strays over Russian border and flies back into Iran.

Jan. 28, 1964. U.S. Air Force jet trainer shot down over East Germany. Three American deaths.

March 10, 1964. American bomber downed by Soviets after it strayed across East German frontier. No one was killed.

April 20, 1978. South Korean airliner flying from Paris to Seoul fired at when it crosses Soviet territory. Two passengers killed, 13 hurt.

July, 1981. Argentine cargo plane crashes after colliding with pursuing Soviet plane in Armenia.

It appears to me that the Soviets often fire first and ask questions later. It is sad to say that the incident showed no new aspect of Kremlin policy. Their apparent disregard for human life and the rules of civil aviation continue. As might be expected, the Kremlin reacted to Western allegations that the 747 has been intentionally shot down in a rather predictable way.

After remaining virtually silent on the matter for almost 2 days, the Soviets finally admitted that they were aware of an aircraft in their area. Not until 5 days after the tragedy did they admit that they had terminated the flight.

Soviet Foreign Minister Gromyko initially refused to discuss the incident at his meeting in Madrid with Secretary of State Shultz. After our Secretary insisted that the issue be reviewed, Gromyko's response was to shift the responsibility to the U.S. authorities. He later brazenly threatened to kill more men, women, and children should another civilian aircraft make the same mistake.

Later, Gromyko told the same preposterous story to the 35-nation European Security Conference. In recent days, Soviet authorities have attempted to rearrange available evidence concerning the tragedy in order to justify their callous behavior. The free world was treated to a rare press conference in which Soviet Chief of the General Staff, Marshal Nikolai V. Ogarkov, gave the Soviets' distorted view of the atrocity. The fighter pilot who downed the aircraft also added his side of the story.

In the face of the Soviets' refusal to apologize to the world for this terrible massacre, I have been impressed by the administration's response to this sad incident. All along, the United States has sought to rally international support for punishing the Soviets in the field in which they had transgressed—civil aviation. The President is closing the two Aeroflot offices in the United States, and is sending Soviet airline officials home. American airlines are being encouraged to stop selling tickets in this country even for connecting flights with Aeroflot. The United States is also hoping that the International Civil Aviation Organization meeting in Montreal will pass a resolution of condemnation and deny landing rights to Soviet aircraft. Already, Canada, Japan, and other nations have taken appropriate measures against Aeroflot.

NATO foreign ministers will also adopt a package of measures in reaction to the incident. Work stoppages are also planned by European pilots and other airline personnel involved in servicing the Soviet airline.

I strongly support the President's measured response to the disaster and his concerted efforts to join our allies in uniting to show the free world's revulsion at such a brutal attack. Common decency dictates that threats of this kind toward international civil aviation must cease, and never happen again.

Although I am shocked by this incident, I believe that our Government

should not let this incident create a military confrontation between our country and the Soviet Union. Our ultimate goal has been, and should continue to be, the reduction in tensions between the superpowers, along with a cutback in the weapons of destruction which are now in the arsenals of both nations. We cannot let this crisis stand in the way of the President's efforts to negotiate major arms reductions with the Soviets in Geneva.

The incident does, however, point to the need for verification of all agreements with the Soviet Union. If the downing of the Korean airliner is any indication of Soviet attitudes concerning signed international agreements, then all of us in the free world should be concerned. We must be able to determine if the Soviets are really abiding by future international arms reduction accords. It would be foolhardy to sign an agreement with the Soviets that we could not verify.

I am certain that all of my colleagues will join me in sending our heartfelt sympathy to the families to all of those who lost loved ones in the disaster. Let us hope that this incident will create new understandings in the future of the sanctity of international commercial flights and reemphasize to all nations in the world the importance of preserving the lives of innocent human beings.●

JAROSLAV JAVORSKY: PRISONER OF CONSCIENCE

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. McHUGH. Mr. Speaker, Amnesty International is well known for bringing news of human rights abuses to the attention of the American and, to the extent possible, world public. Without such a vigilant and serious organization, those of us in the West who enjoy the blessings of freedom might never be aware of the fact that many people in other nations do not enjoy the same basic human liberties that we do.

Recently the Binghamton chapter of Amnesty International called my attention to the particularly urgent case of Jaroslav Javorsky of Czechoslovakia. For the benefit of those of our colleagues who may not be familiar with his case, I am inserting into the RECORD the following statement.

THE PLIGHT OF JAROSLAV JAVORSKY

Jaroslav Javorsky (36) is the son of Jiri Javorsky, former Captain of the Czech Davis Cup Tennis Team and for many years during the 50's and 60's Czechoslovakia's No. 1 ranked player. Six years ago Jiri Javorsky together with his wife and two sons opted to stay in West Germany, where he had been conducting tennis clinics. He is today a West German citizen and a prominent tennis coach and teacher in Heilbronn, as are his wife and younger son.

In 1977 Jaroslav attempted to bring his fiance, who had been refused permission to leave the country by the Czech authorities in direct defiance of the United Nations Universal Declaration of Human Rights, to West Germany via Bulgaria with forced papers. Both were captured, and Jaroslav, who had taken full responsibility for the deed, was sentenced to 13 years imprisonment by a secret military tribunal on trumped-up charges of espionage. In direct violation of Czech law Jaroslav was refused a defence lawyer of his own choice and was assigned a military lawyer who was also a member of the tribunal that tried him. The record of the tribunal's proceedings have never been released, although Czech law specifies that the prisoner's nearest relatives have a right to a copy of the indictment and verdict. It is generally recognized that Jaroslav's unprecedented harsh sentence is an act of revenge for the defection of one of Czechoslovakia's leading sports heroes.

Since 1978 Jaroslav has been incarcerated in Valdice Prison, a converted medieval convent, where he is assigned to "Group 3," consisting of career criminals and those convicted of violent crimes. He suffers from serious skin, eye, and kidney diseases, the results of the rigorousness of the prison conditions and the lack of medical care, is allowed only half an hour of fresh air per day and that during the hours of darkness, and recently was forcibly obliged to end a 21 day hunger strike in protest against the injustice of his sentence and the inhumanity of the above-described conditions.

Since 1978 Jaroslav Javorsky has been an adopted Prisoner of Conscience of Amnesty International, the urgency of his case being indicated by the unusual fact of its being assigned to adoption groups in the United States, Canada, and West Germany.●

AGRICULTURE AS A WORKING MODEL OF INDUSTRIAL POLICY

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. BEREUTER. Mr. Speaker, the Economic Stabilization Subcommittee is in the midst of an important investigation into the merits of creating a new industrial policy. In the course of that investigation, the subcommittee recently had the opportunity to hear from an excellent panel of witnesses who discussed our Nation's agricultural policy. That group shared many important insights from the agricultural experience which should be of value to this study.

I would like to share with my colleagues the remarks of one of those panelists, noted agricultural trade specialist and former U.S. Department of Agriculture officer, Dr. Dale Hathaway. I commend the following statement to both my farm State and my metropolitan colleagues for its perceptive look at agricultural policy:

AGRICULTURE AS A WORKING MODEL OF INDUSTRIAL POLICY

(By Dale E. Hathaway)

There is much current discussion on the desirability of developing an "industrial policy," largely arising from the apparent success of Japanese industrial policy. Many in the U.S. have argued that such a concept does not fit the U.S. system. My position is that the U.S. has had such a policy for its agriculture, and it has been quite successful in terms usually used to judge success.

In order to help define the issues let me describe an "industrial policy," because I think an "industrial policy" is easier to recognize than to define. To me it involves some or all of the following:

Government support for research and development.

Preferential financing for investment in productive capacity.

Significant government involvement in export development including targeting, market development, subsidies, and export financing.

Substantial protection for the domestic market through tariffs, quotas, and other devices.

Domestic adjustment programs when capacity exceeds world demand.

Strong and continuous interaction between the private sector and government in all program and policy formulation.

These are the features of industrial policy which I recognize when the Japanese experience is discussed and they are the features of our agricultural policy over the past several decades. Let me discuss these features as they have applied to U.S. agriculture. Since other witnesses are going to concentrate on some issues, I will only mention those and concentrate on the export aspects of the policies.

I. GOVERNMENT SUPPORT FOR RESEARCH AND DEVELOPMENT

Many people attribute this policy as being the major factor behind amazing long-run productivity gains in U.S. agriculture. It is a model for the world which has been much emulated but not often reproduced.

Public (government) support for R&D in agriculture goes back over a hundred years to the founding of the land-grant university system. It continues today with large federal and state expenditures for agriculture research done in the State Experiment Stations, the 1890 Colleges, and Agricultural Research Service, grants and contracts to private universities, and grants research institutes.

The research support has been supplemented by a publicly supported education system to aid in the adoption of new technology, to provide management assistance and advice on all phases of production and marketing.

Over the years the mix of publicly supported research has changed and more of the applied work is being done by the private sector. Even so, the public sector support continues to be an important factor in both basic and applied research.

II. PREFERENTIAL FINANCING FOR INVESTMENT IN PRODUCTIVE CAPACITY

Historically the government has played a significant role in financing investment in agricultural productive capacity and it still does. This role currently is carried out by the Farm Credit system, the Farmers Home Administration, and the Commodity Credit Corporation.

In many cases the financing of the necessary infrastructure for agriculture was entirely public. This is true for our farm-to-market roads, our inland waterways, and much of our surface irrigation. All of these have been important in the development of our highly productive, capital-intensive agriculture.

III. EXPORT DEVELOPMENT

This aspect of our agricultural policy is especially interesting for its uniqueness and its comprehensive nature. It has several features which I will cover in some detail inasmuch as other witnesses may not. Among its features are:

A. Government responsibility for worldwide supply and demand statistics and export market estimates.

B. Direct involvement of U.S. embassy personnel in market development.

C. Public-private cooperative market development programs.

D. Concessionary financing of exports for market development.

E. Special export financing.

F. Direct export subsidies.

G. Special government to government agreements.

These programs are extensive and complex. I will only summarize their general thrust.

Worldwide statistics and market estimates

The federal mandate in agricultural statistics is greater than in any other area. The USDA provides the most comprehensive and timely set of statistics on world agriculture that exists. While many private companies produce various agricultural statistics and market estimates in addition to the USDA, all the private estimates depend in some way on the USDA data base. The fact is that this government service is important to all segments of the industry and has been an important factor in the ability of our private sector to plan, develop, and maintain a successful export program.

The Foreign Agricultural Service

Another unique feature of our agricultural export policy is the direct and continuing role of the USDA's Foreign Agricultural Service (FAS). It has as one of its major mandates the expansion of U.S. agricultural exports and its personnel stationed abroad have a dual responsibility to the local Ambassador and the Secretary of Agriculture.

FAS generates the local statistics and information on foreign agricultural developments, does market estimates of import needs by product and country, carries on trade promotion activities and generally is U.S. agriculture's representative abroad. They inform U.S. businesses of specific trade opportunities and the Secretary of Agriculture on trade barriers.

The unique position and functions of FAS are such that neither President Carter nor President Reagan has seen fit to change the FAS role in their respective proposed reorganizations of the trade functions of the government. It is generally agreed that the system works, and the private agricultural sector in the U.S. would strongly resist its abolition or major changes. This support comes from a wide range of firms from individual farmers to some of the world's largest multinational business organizations.

Market development programs

One of the most interesting activities carried out under FAS auspices is the public-private cooperation programs. This is a jointly financed market development program in which 40-50 trade or commodity groups participate and jointly financed by the U.S. Government and the private sector.

Their activities abroad cover a wide range of projects from high fashion fur shows to the building of a demonstration bakery in Beijing, China. Much of their activity in many countries is technical assistance on matters such as animal feeding, flour milling, etc. Some of their activities are straightforward trade promotion. Some activities are market servicing, i.e., dealing with complaints and questions about U.S. products.

Many government officials, especially in OMB, have questioned the use of public funds for market development activities. They have found, however, that the private sector, which also puts up some of the funds, strongly supports the public expenditures.

Concessionary export financing

One of the oldest continuing concessionary financing programs in the world is our Public Law 480 or Food For Peace Program, which dates from 1954. Originally begun as a surplus disposal program it has evolved into a multi-purpose market development, food aid, and surplus disposal program. Periodically, it has been used as a foreign policy tool, often over the objections of agricultural groups.

Public Law 480 has multiple objectives because the Congress says it should, and, despite all its difficulties, it has and does play a significant role in both market development and foreign aid. Its surplus disposal role has declined over time, although there are some periods where it makes a difference for some commodities.

Other export financing

One of the largest export financing facilities in the world is run by the Commodity Credit Corporation (CCC). During this fiscal year something over $5 billion has been allocated in the form of direct CCC credit or CCC guaranteed commercial bank credit to foreign buyers of U.S. farm products. Some of CCC credit is at "market" rates and some is offered at below market rates via direct CCC loans.

CCC Export Credit is targeted by country and commodity. Its purpose is to maintain and expand U.S. agricultural exports and the USDA has resisted both executive and congressional pressure to use it for foreign policy proposals—not always successfully.

Export subsidies

Direct export subsidies were a common feature of U.S. agricultural export policy in the 1950s and 1960s until its Russian wheat sale of 1972 gave them a bad name. Many people believed they should be used more frequently, especially as an offensive weapon against the export policies of competitors and to gain market share.

We recently have returned to export subsidies in wheat flour and dairy product sales to Egypt. While these are cited as special cases, it should be noted that the CCC has standing authority to use export subsidies to expand our exports of foreign products.

Import restrictions

While by world standards the U.S. policy on agricultural imports might be noted as fairly liberal, they are not in fact as liberal as we sometimes profess.

For some commodities such as sugar and dairy products, where we are not competitive with some of the low cost world producers, import quotas are a way of life and have been during most of the past several decades. We have a meat import law which requires quotas under certain conditions, and these conditions appear to apply for the rest of 1983.

We have the unilateral right to impose import quotas for all price-supported crops under a grandfather clause in GATT which allows us to prevent import competition on several price-supported crops.

Just as we view the attempts of other countries to maintain their domestic market for their domestic producers as part of an industrial policy, many countries view our agricultural import restrictions with some frustration. It also is worth noting that while the protected domestic markets have been protected from lower-cost foreign producers, they have been saved as such. Thus, our sugar producers are losing their domestic market to high fructose corn sweeteners just as the butter market was lost to domestic margarine.

Domestic adjustment

We have over 50 years of experience in intermittent agricultural adjustment programs to deal with excess production problems. The current and most expensive ever of these is the Payment In Kind (PIK) program. By and large, however, the government adjustment programs have not been designed to bring long-run structural adjustment. In fact, many of them have, by accident or design, worked to retard or prevent it.

However, despite these programs, immense adjustment has taken place in all parts of our agricultural industry. In other words, even though many argue that government programs prevent or impede an adjustment to the needs of the market, I would argue that this case is hard to prove for agriculture.

IV. WHERE HAS OUR AGRICULTURAL POLICY GOTTEN US?

Where has over a hundred years of this complex intervention by government in U.S. agriculture led us? Despite the many and often expressed fears to the contrary, we have:

An efficiently organized, low cost agriculture which for most products is competitive in world markets in normal times and generally envied by the world.

An agriculture that is privately owned and operated.

An efficient privately owned agribusiness complex which was largely funded by private capital.

General cooperative—not adversarial—relations between agriculture and the USDA, so much so that it is both envied and suspect by other industrial sectors.

The lowest food costs relative to income in the world and generally high quality, safe foods.

This is not to say that everything worked out easily or perfectly. Large amounts of public money have gone as income transfers through price support and adjustment programs, but these were a result of the special characteristics of supply and demand conditions in the industry rather than of the basic policy thrust.

Another problem has been the winner and loser problem. It has been politically difficult to recognize and adjust certain policies so as to not try to protect and maintain the production of specific crops and enterprises in certain regions when economic realities indicate that other areas in the U.S. or abroad can produce them more efficiently.

This problem has been lessened by the fact that the labor force in agriculture is largely family labor and, thus, the large-

scale displacement of organized labor has not occurred as a result of these various policies. There was large-scale displacement of hired labor in agriculture, but this was largely as a result of mechanization, not of foreign competition. The public R&D and financial assistance probably aided and hastened the mechanization process. However, the largest capital asset in agriculture is land, and since land prices have risen almost steadily for 40 years you have not had the "worthless asset" problem faced by owners of factories in non-competitive industries.

This is not to imply that U.S. agriculture and the people in it have not undergone serious and sometimes painful adjustment. But most of the adjustments were not caused by the government policies.

In closing, I would make two observations. One, our agricultural policies have proven that a comprehensive industrial policy can work. But this complex set of policies did not spring from a single Congressional committee. They are the result of growth by trial and error over nearly a century of interaction of the industry and all levels of government.●

BAN SPACE WEAPONS

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. KASTENMEIER. Mr. Speaker, I wish to call to the attention of my colleagues the editorial comment of the Economist which appeared on August 27, 1983, regarding the recent Soviet proposal on weapons in space.

The Economist, which has in the past questioned the sincerity of various Soviet arms proposals, believes that Soviet President Andropov's comments that the United States and the Soviet Union should agree to a ban on space weapons is a most welcome suggestion and should open the way for negotiations between the two superpowers on stopping the development of killer satellites in space.

President Reagan, if he is serious about arms control, should seize upon this opportunity and offer to begin immediate talks with the Soviets on banning the space arms race.

PEACE IN SPACE?

THIS RUSSIAN IDEA IS WORTH PURSUING

Here is one Soviet offer there is no point in refusing. Most of Russia's recent disarmament proposals have been patently self-serving, because they would prolong a Russian advantage over the west. That applies to the idea of a general freeze on all nuclear weapons, and to President Andropov's insistence that Russia should have medium-range missiles in Europe but America must not. It does not apply to the Soviet leader's new suggestion, about weapons in space. This will not quite guarantee "peace in space", let alone on earth; but it could save a lot of money, avoid the risk of some alarming bangs and clangs in the deep blue yonder—and remove a small Russian advantage.

Mr. Andropov suggested to some American senators visiting Moscow on August 18th that Russia and the United States should agree to ban weapons designed to destroy satellites floating through space. Russia, he said, would not deploy such things if America did not. The first reactions from Washington were sniffy. Mr. Caspar Weinberger, the secretary of defense, dismissed the idea on the ground that the Russians have tested an anti-satellite weapon but the Americans, so far, have not. A state department spokesman said there could be difficulties in policing an anti-satellite deal. Mr. Edward Rowny, the chief American negotiator at the Geneva talks on long-range nuclear weapons, was a bit more forthcoming. He called the timing of Mr. Andropov's offer—just before the first American test—"disingenuous", but said it was worth asking the Soviet leader how he would propose to check that both sides were respecting any such agreement.

The danger of satellite-killers is that both Russian and America are becoming greatly dependent on satellites, particularly for military communications. If anti-satellite weapons were deployed, one superpower or the other might be tempted to strike first in space—and then attack the other on the ground, while its communications were blown into silence.

The Russians have been tinkering with satellite-killers for about 10 years, and have destroyed some of their own satellites with them. Their technique is to manoeuvre the killer near the target, and then either simply bash into it or set off an explosive charge. The system the Americans are about to test is more sophisticated. It is a two-stage missile that would be carried on an F-15 fighter up to 70,000 feet or so, and then fired on a computer-calculated course to intercept the satellite. When it got near, it would turn on an infra-red sensor and home in for the kill.

Does this mean that anti-satellite systems are already in being, and Mr. Andropov's offer is yet another futile effort to lock the stable door after the horse has gone galloping? Not quite. A serious satellite-killer system needs to be able to knock down large numbers of enemy satellites almost simultaneously. Anything less merely warns the victim what is happening and gives him time to retaliate. The device the Russians have tested is still a far cry from an array of weapons that could knock down a network of dozens of satellites within a short time. Neither the Russians nor the Americans can do the full job now. Either side could almost certainly catch the other out if it began to test a system that could. A ban is feasible.

NOTHING VITAL GIVEN UP

The next question is whether the Americans have, in ascending order of importance, (a) political, (b) economic and (c) military reasons of agreeing to a ban. Politically, the answer is certainly yes. The Reagan administration needs all the help it can get in convincing the world that it is serious about arms control. Here is one chance to show that it is. Economically, a ban could save an American defense budget already bursting at the seams from another large expense. Anti-satellilte systems could turn out to be horribly costly.

The remaining issue is whether a ban is militarily desirable for the Americans. Dismiss Mr. Weinberger's argument that the Americans need to test an anti-satellite weapon because the Russians have tested one. In general, the Americans know as much about the techniques of intercepting one satellite with another as the Russians do. An American test is not indispensable. And a ban on such weapons would produce in this field the same sort of zero-zero balance the Americans wanted for medium-range missiles in Europe.

What about the argument that a ban on anti-satellite weapons might rule out the hope of an anti-missile defence operating in outer space? Anything that can destroy a ballistic missile can also knock down a satellite at the same altitude. And, sci-fi though it sounds, an anti-missile shield could make the world a safer place. But it is by no means certain that an anti-missile defence has to be based in space. Low-altitude anti-missile missiles are one alternative. Another is to keep your own missiles moving about on land, or hidden under the sea, so that the other man never knows quite where they are.

It adds up to a case of negotiating a ban on anti-satellite weapons now. Such a treaty could be for 15 years, and renewable: a space-based anti-missile defence is unlikely to be available to either side before the end of the century. The United States and Russia have a chance to chop off one of the expensive and dangerous hydra-heads military technology keeps on growing.●

U.S. ARMED FORCES IN LEBANON

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. DOWNEY of New York. Mr. Speaker, the time has come to bring the debate concerning the President's involvement of U.S. Armed Forces in the hostilities in Lebanon before the House of Representatives. More importantly, however, we must bring the President's commitment of U.S. forces in Lebanon within the scope of the law. I am today introducing legislation to achieve these ends.

One needs only to have read the morning headlines to understand that U.S. Armed Forces are involved in what is rapidly becoming an explosive international situation. No reasonable person can view our involvement as anything less than the commitment of troops to a hostile situation where our own involvement is imminent, if not by now a fact. On November 7, 1973 the war powers resolution became Public Law 93-148 and clarified by force of law the mechanism by which the President must consult with Congress in circumstances such as the existing situation in Lebanon. No such consultation has taken place. The President's continuing refusal to report to Congress on the nature of U.S. involvement is evidence of either his own view that the situation in Lebanon is not hostile or, more significantly, of his clear and continuing disregard of the law.

On July 6, 1982, President Reagan said that he had agreed in principle to contribute a small contingent of troops to a multinational force for temporary peacekeeping in Lebanon, the purpose being to assist in the evac-

uation of PLO fighters in Beirut. The administration said that if the forces were dispatched, it would report under the war powers resolution.

On August 25, U.S. Marines began to land in Lebanon to participate in the multinational force. President Reagan notified Congress under a provision of the war powers resolution, saying that the agreement in Lebanon expressly ruled out any combat responsibilities, and the forces would stay no longer than 30 days. After overseeing the departure of the PLO force, the Marines left Lebanon on September 10, 1982.

On September 20, the President announced that the United States, France, and Italy had agreed to form a new multinational force to return to Lebanon for a limited period of time to help maintain order until the lawful authorities in Lebanon could assume their duties. On September 29, the President submitted a report that 1,200 Marines had begun to arrive in Beirut. He said that the American force would not engage in combat but might exercise the right of self-defense and would be equipped accordingly. He also said that the deployment would be for a limited period and that there was no intention for the troops to become involved in hostilities. The President said Congress was being informed of this question "consistent with the war powers resolution," but no specific provision of the resolution was cited. On September 30, 1982, the first American Marine was killed in Lebanon and three were wounded.

On November 28, 1982, the end of the 60-day period following their introduction, the Marines were still in Lebanon. The executive branch took the position that, since the President has not cited secton 4(a)(1) of the war powers resolution in his report on the action, the provision in section 5 calling for a troop withdrawal within 60 to 90 days did not apply. Congress did not pass any legislation to the contrary.

Section 4(a)(1) of war powers resolution requires the President to submit a written report within 48 hours whenever U.S. Armed Forces are introduced without a declaration of war into hostilities or into situations where imminent involvement in hostilities is clearly indicated by the circumstances. The executive branch contends that the President's report does not fall under section 4(a)(1) of the war powers resolution. Since the introduction of troops in Lebanon, the toll of U.S. dead and wounded has grown. Recently U.S. warships fired on Druze militia in Beirut. The President is either ignoring the tragic facts of this situation or he is disregarding the laws of the land.

Many Members of Congress support the President's actions in handling the difficult foreign policy decisions in Lebanon; many oppose these policies. My legislation does not attempt to question the President's policies in Lebanon. It seeks only to question the President's policy of defiance of the will of the House of Representatives. The war powers resolution spells this requirement out in law and the Constitution underlines the President's duty to faithfully execute these laws. No amount of sophistry or word-play will alter these facts.

One need not restate the tragic legislative history of the reasoning behind the war powers resolution. Congress addressed the issue toward the end of our involvement in Southeast Asia in an effort to deal with the problem of protected future involvements in hostilities without either a declaration of war or specific congressional authorization.

Our acquiescence in the present situation will only serve to erode the principles of law as written in the war powers resolution. If we do not act today, I ask my colleagues to consider what the situation may be in another time, under another President. The lessons of history tell us that if we do not address this issue now we may address it in the future in even harsher terms.

Many of my distinguished colleagues have discussed alternatives to bringing this issue under congressional authority. I submit that there is only one appropriate tool to accomplish our goal and it is written in law. The legislation I am offering requires the President to respond to the dictates of the war powers resolution by reporting to Congress on the nature of the conflict in Lebanon. This joint resolution would direct the President to submit to the Congress the report required by section 4(a)(1) of the war powers resolution concerning the hostilities of the U.S. Armed Forces in Lebanon. According to section 5(b) of the war powers resolution, "Within sixty calendar days after a report is submitted or is required to be submitted pursuant to 4(a)(1), whichever is earlier, the President shall terminate any use of United States Armed forces with respect to which such a report was submitted (or required to be submitted) . . ." unless Congress takes the necessary action or extends the period—the President may also extend the period to 90 days if necessary for the safe withdrawal of troops.

In closing, let me restate that this legislation seeks only to bring the decision to commit U.S. forces into hostilities within the procedures dictated in the war powers resolution. As the House Committee on Foreign Affairs has explained:

(the objective of the War Powers Resolution was to outline arrangements which would allow the President and Congress to work together in mutual respect and maximum harmony toward their ultimate, shared goal of maintaining the peace and security of the Nation. (H. Rept. 93-287, at 5.)

Mr. Speaker, I rise today in rededication to the proposition that no individual is above the spirit of the law. I ask my colleagues to join me in this important effort.

A copy of the joint resolution follows:

H.J. RES. 348

Directing the President to submit to the Congress the report required by section 4(a)(1) of the War Powers Resolution concerning the involvement in hostilities of United States Armed Forces in Lebanon

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That United States Armed Forces in Lebanon having been introduced into hostilities or situations where imminent involvement in hostilities is clearly indicated by the circumstances, within the meaning of section 4(a)(1) of the War Powers Resolution, the President shall submit the report which is required by that section to the Congress within 48 hours after the enactment of this joint resolution.●

MINESWEEPERS—THE NAVY'S WEAK LINK

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. ROTH. Mr. Speaker, recently, articles in the Washington Post and Time magazine described this Nation's urgent need for a new generation of minesweepers. These articles cited the newest edition of Jane's Fighting Ships, as well as compelling testimony given before Congress.

Currently, the United States has an active force of 21 minesweepers. Compare this with the Soviet force of 388 minesweepers. Even when the minesweepers of our NATO allies are included, the U.S.S.R. still has a force one-third larger.

Yet the United States has a strategic need to keep open its ports and sea lanes, much more so than the Soviet Union. According to Jane's, however, the U.S. Navy could keep open only two of the twelve ports which would be most essential in wartime with its present complement of minesweepers.

It makes little sense to build a 600-ship Navy if we cannot even insure that our ships can leave or return to their home bases. While we have been focusing on the "big ticket" items in the Navy budget, we have forgotten minesweepers.

As Vice Admiral Walters, Deputy Chief of Naval Operations for Surface Warfare, testified earlier this year, "No segment of naval warfare has been underfunded for so many years as has the mine-warfare community."

Clearly, it is time to act. The fiscal year 1984 Defense Authorization Bill authorized the construction of three modern minesweepers. I believe it to be imperative for the Defense Appropriations Subcommittee, which is soon to meet, to appropriate the funds for all three minesweepers. Our Nation depends upon it for our security.●

AFGE LOCAL 1857 CELEBRATES 25 YEARS OF EXEMPLARY SERVICE

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. MATSUI. Mr. Speaker, for a quarter century, the American Federation of Government Employees (AFGE), Local 1857, has diligently represented the labor needs of civilian workers at McClellan Air Force Base in Sacramento, Calif.

As McClellan has grown, so has this fine labor organization. In 1958, the then new union represented only 700 maintenance and instrument repair shop employees. Today, Local 1857 is the largest AFGE union in the western United States with membership totaling 3,000 workers.

This union has been at the forefront in representing employees at McClellan. In 1970, Local 1857 was the first AFGE union to hold representation elections for blue- and white-collar workers at a military installation under an Executive order signed by President Richard Nixon.

Among its many accomplishments, Local 1857 was instrumental in establishing the week including Labor Day as "Labor Recognition Week" during which McClellan Air Force Base officially honors the services of civilian and military working men and women of America, the first Department of Defense installation to accord such honors to the occasion.

Mr. Speaker, I wish to give special recognition to the outstanding leadership and dedication provided by key officers within Local 1857. They are Jon Salas, president; Ed Hill, first vice president; Dora Solorio, second vice president; and John Timblin, third vice president.

I also want to commend the executive board, which consists of Joann Simmons, treasurer; Marian Bird, Joseph McGruder, and James Daniels, sergeants-at-arms; and Martha Cree, secretary to the board, for all of their tireless efforts on behalf of Local 1857 and the employees at McClellan Air Force Base.

Today, 25 years later, the union is large enough and the needs of the membership diverse enough so that Local 1857 employs three former managers on its professional staff. These three fine gentlemen, along with the union officers and executive board members, are the nucleus of this successful team.

Each one of them deserves praise and admiration for a job well done. They are Jim Yocum, who handles Department of Labor workers' compensation claims; Mack McCloud, a former AFGE national vice president, who works with stewards and on local activity grievances, employee arbitration cases, and on Merit Systems Protection Board cases; and Chuck Pettingell, editor of AFGE Local 1857 news and labor management relations officer.

Mr. Speaker, it is therefore with great pleasure and much honor that I bring to the attention of the House of Representatives the silver anniversary of AFGE Local 1857. The continuing quality of their work in the past has earned them the right to represent the needs of the civilian work force at McClellan Air Force Base for many years to come.●

HON. JOHN A. CARROLL, 1901-83

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mrs. SCHROEDER. Mr. Speaker, John A. Carroll, who represented Colorado's First Congressional District from 1947 to 1951, and served Colorado in the U.S. Senate from 1957 to 1963, died last month at age 82.

Senator Carroll was one of Colorado's most distinguished citizens. His public service spanned almost 50 years, from his enlistment in the Army at age 16 to his retirement from the Senate in 1963.

Throughout his career he devoted himself to the cause of the underdog. He was a strong proponent of civil rights laws. He worked tirelessly on behalf of the working men and women of the country.

Colorado will miss John Carroll.

I include the following articles:

[From the Denver (Colo.) Rocky Mountain News, Sept. 1, 1983]

JOHN CARROLL, VETERAN POLITICIAN, DIES AT 82

(By Al Nakkula)

Former Sen. John A. Carroll, who virtually led the Colorado Democratic ticket into office in 1956, died Tuesday night in his Denver home. He was 82.

Carroll, who had been in failing health, died at 9 p.m., according to a son-in-law, Denver lawyer Donald MacDonald.

Services are pending at McConaty's Mortuary. Burial will be in Fort Logan National Cemetery.

Carroll served in both world wars, as a Denver policeman, as an assistant U.S. attorney, a term as Denver district attorney, two terms in the U.S. House of Representatives and a term as U.S. senator.

Told of Carroll's death, Gov. Richard A. Lamm said, "The first political campaign I worked on was John Carroll's race against Peter Dominick in 1962, when I was president of the Young Democrats. He was a guy who loved politics and loved life. He was important to a whole generation of young politicians because of his idealism and his commitment to Colorado."

Carroll is remembered by many as a liberal. Carroll's political career was unusual in that he probably lost as many times as he won.

His charisma drew a following of political workers who had little campaign experience. Volunteers included blue-collar and white-collar workers, housewives, taxi drivers, newspaper reporters, lawyers and other professionals. After working for Carroll, many of them withdrew from politicking.

Two of his most ardent and hardest workers were his wife, Dorothy, and daughter, Diane MacDonald, also a Denver attorney.

Carroll was born in Denver on July 30, 1901. He sold newspapers on Denver's west side and helped his father who drove a horse-drawn ice wagon. He joined the Army at the age of 16 and served in the Philippines during World War I.

Returning from service, he became a Denver policeman in the 1920s. He walked a beat during the day and studied law at night. He received his degree from Westminster Law School, now incorporated into the University of Denver Law School.

As a lawyer in the early 1930s, Carroll's political skills were honed as a worker for the successful election of Sen. Edward Costigan. Costigan's aggressive Democratic supporters were dubbed, "Young Turks," a name which they proclaimed proudly later.

At Costigan's request, Carroll managed the 1932 gubernatorial primary campaign of Josephine Roche, one of the most vibrant women in Colorado politics. Carroll's early political work included serving as Denver Democratic chairman. He became an assistant U.S. attorney in 1933.

Carroll was elected district attorney in 1936. After serving a four-year term, he ran for governor of Colorado and was defeated in the primary. He practiced law until the outbreak of World War II, when he rejoined the Army, as serving as a major in Italy.

Returning again from military service, he ran for the U.S. House in 1946 and won in what otherwise was a state Republican landslide. Carroll was probably the only congressman ever elected during his freshman term to the Ways and Means Committee. He served two terms in the House.

After his second term, Carroll in 1951 became a special assistant to President Harry Truman. He was an associate with many other national Democratic leaders, including President John Kennedy, President Lyndon Johnson, Adlai Stevenson, Hubert Humphrey and Averell W. Harriman.

Carroll ran for the U.S. Senate in 1950 and 1954 and was defeated. One campaign was marked by smears branding him a communist, while at the same time others cast aspersions because he was a Catholic. Only his wife and daughter were of the Catholic faith.

Large sums of money also came into Colorado from oil interests seeking his defeat because of his position against oil depletion allowances and for preserving off-shore drilling for the government.

He ran for the Senate again in 1956 and won, defeating Republican Gov. Dan Thornton.

Carroll, in his freshman year as a senator, was embroiled in the civil rights issue. He drafted a bill calling for federal voting registration of blacks. He was persuaded by colleagues not to push the bill because the time was not appropriate. Eight years later, a much stronger bill became law.

Carroll's battles continued in the Senate over preserving the federal court system and its jurisdiction, which was challenged by states' rightists who wanted to keep civil rights issues out of the federal courts.

Carroll also was a leader in passing some of the later legislation on Social Security. He backed federal assistance to farmers.

He was an ardent foe of placing intercontinental missiles near populated areas and argued against any Titan or Minuteman missile bases being built in Colorado.

After his defeat in his bid for a second Senate term by Peter Dominick, he returned to Denver and private law practice.

In October 1977, Carroll presented his public papers to Metropolitan State College, where the John A. Carroll Institute was founded to establish scholarship programs. The college also gave him an honorary degree of Doctor of Humanities.

Carroll on March 4, 1922, married Dorothy R. Doyle, a sister of William E. Doyle, a judge on the 10th U.S. Court of Appeals. She died on Jan. 1, 1982.

He is survived by his daughter, Diane MacDonald; two brothers, Charles Carroll of Santa Rosa, Calif., and Matthew Carroll of Las Vegas, Nev.; a sister, Charlotte Smith of Los Angeles; and three grandchildren.

Memorial contributions may be made to the John A. Carroll Institute, in care of Metropolitan State College, 1006 11th St., Box 3, Denver 80204.

[From the Denver Post Sept. 1, 1983]

FORMER SENATOR JOHN A. CARROLL DIES

Former U.S. Sen. John A. Carroll, 82, an outspoken liberal and civil rights advocate of his time, died at his home Tuesday night. He had been in ill health for years.

Carroll lived relatively quietly in his native Denver since his bid for a second Senate term failed in 1962. He retired from the active practice of law about 10 years ago.

The funeral will be at 10 a.m. Saturday at the Church of the Good Shepherd, 2626 E. Seventh Ave. Burial will be in Fort Logan National Cemetery.

Carroll was born July 30, 1901, and was raised here before forging his mother's name on a permission slip to join the Army at the age of 16.

Discharged after serving in the Philippines in World War I, Carroll joined the Denver Police Department at the age of 21, working first as a beat patrolman and then in the department's identification bureau. He married Dorothy Doyle in Denver in 1923.

He earned his law degree at night school and was admitted to the bar in 1929.

Carroll by then a member of the local Democrats' "Young Turks" liberal wing, was appointed assistant U.S. attorney for Denver in 1933. His first electoral bid was in 1936, when he was elected Denver district attorney, beating the dean of his law school.

In that post, he became known for his battles with gamblers and corruption.

Carroll made an unsuccessful bid for governor in 1940, and returned to private law practice until 1942, when he assumed a post in the federal Office of Price Administration.

Carroll rejoined the Army as a major in 1943, and helped restore civilian local governments to liberated portions of Italy and southern France, Don MacDonald, Carroll's son-in-law, said Thursday.

After discharge, Carroll re-entered politics, becoming one of the few Democrats to oust a Republican opponent in the 1946 congressional elections. Carroll improved his 5,000-vote margin of victory that year to more than 48,000 votes two years later, but he wasn't successful when he left his "safe" congressional seat from Denver in 1950 to oppose incumbent Republican Sen. Eugene Milliken in 1950.

He then joined the staff of President Harry Truman as a foreign policy advisor.

Carroll tried for the Senate again in 1954, defeated this time by Gordon Allott. According to his daughter, "getting beat never seemed to bother him," and his third attempt was more successful when he defeated former Gov. Dan Thornton in the senate race of 1956.

Carroll's term in the Senate was characterized by "concern for the working people," MacDonald said, but a bid for re-election in 1962 failed when he lost to Peter Dominick.

Survivors include his wife; a daughter, Diane MacDonald, Denver, and three grandchildren.

Memorial contributions may be made to the John A. Carroll Institute, Metropolitan State College, Denver 80204.●

SCOTTDALE, PA., REMEMBERS ITS PAST

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. GAYDOS. Mr. Speaker, on the 16th, 17th and 18th of this month, residents of Scottdale, Pa., will mark the 109th anniversary of their community and pause to reflect on their heritage.

It is not unusual for cities and towns in Pennsylvania to stage such celebrations. Pennsylvania is rich in history and we have many communities that go back 100 years or more.

Scottdale's observance, however, is somewhat unusual in that it draws upward of 30,000 visitors to this small town of approximately 7,500 residents. There are a number of reasons for this.

For instance, today Scottdale is typical of small town America. It is primarily supported by commercial businesses and light industry but is surrounded by farmland. But, once, it was the hub of a heavy industrial empire.

At the turn of the century, smoke belched from a number of factories, including such facilities as the American Sheet & Tin Plate Co., the Scottdale Foundry & Machine Co., and the National Foundry & Pipe Works.

It was the birthplace and homestead of one of America's great industrialists—Henry Clay Frick. At one time, Mr. Frick's coal and coke operations included 39,000 beehive ovens in the area. Today, it boasts the only operable beehive oven in the world and special permission is received from the State of Pennsylvania to fire it up for the "Heritage Festival."

Because of its industrial base, Scottdale once ranked among the richest communities per capita in the United States. The number of magnificent mansions of Victorian architecture which have been preserved or restored attest to that fact.

But, its industry and wealth of the past are not the only historical assets of Scottdale. It has strong religious ones as well. Its population today is served by no less than 18 churches representing the major denominations.

Much of the success of Scottdale's "Heritage Festival" belongs to the promotional efforts of two organizations: the Scottdale Coal & Coke Heritage Festival Committee and the Scottdale Merchants Association. These groups have worked closely together to instill a spirit of pride among residents of the community and the area as well.

Mr. Speaker, on behalf of the Congress of the United States I want to extend our thanks and appreciation to the people of Scottdale for by remembering their heritage they preserve a bit of American history for all of us.●

THE POPULATION EXPLOSION IS NOT FIZZLING

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. SCHEUER. Mr. Speaker, several weeks ago I submitted for my colleagues' attention an article which appeared in the Christian Science Monitor written by Robert Fox, senior analyst at the Inter-American Development Bank, and Carl Haub, a Washington demographer. This article, "The Population Explosion Is Not Fizzling," was drawn from a larger paper which addresses population growth and refutes the contention that we have experienced a population explosion that is now declining. I believe my colleagues will find the remainder of this work quite interesting and I commend this to their attention.

THE POPULATION EXPLOSION IS NOT FIZZLING

The flap caused by the belief that the UN thought that world population would be 7.5 billion in 2000 and "now" thinks that it will "only" be 6.1 billion is no doubt supported by a general misperception of the entire issue, based on using the term the "population explosion". It is an entirely inappropriate metaphor, implying a far higher degree of flexibility in population projections than underlying demographic variables permit.

An explosion implies two things—a sudden release of energy accompanied by outwardly radiating pressure waves, and an equally sudden termination to the event. World population rapidly increased in an apparent

sudden burst in the third quarter of the 20th century, and in "explosion" analogy fashion, one presumes this force may abate in a similarly brief period.

That we are now in the abatement phase is encouraged by any report or misreading of statistics that notes a radically lower projected estimate than reported earlier or derives a similar conclusion from evidence that the birth rate or population growth rate has peaked and is diminishing. This is perfectly understandable in an economic-oriented world that conditions our thinking where interest rates can bounce up or down drastically almost overnight.

There was no explosion. After World War II there was instead a radical worldwide transformation in the age-old relationship between birth and death rates. Both had always been high, but in the mid-20th century the death rate plummeted in Third World countries. Of this much we may be aware, but have not followed it through. For out of this very newly established birth and death rate relationship, age pyramids have evolved in which half the total population is now under age 18. This is the true benchmark event, one that sustains the rolling momentum for further increases.

The comparison is not to an explosion, but more aptly to a comet. The greatest visible portion is in the long tail section. Far more population will be added to a Third World country's total population after the birth rate has peaked than was added in the initial phase. The tail's length is also analogous to the long period needed for growth to be completed. It is measured in generations, not in years.

In Mexico, for example, with half of its population 17 or under, a birth rate that peaked years ago, as well as a population growth rate that peaked in the 1970s, the present 72 million population is still projected to increase to 116 million by year 2000 and to 174 million by 2025. Further increases will continue thereafter, although in smaller and smaller amounts.

Explained another way, the number of Mexican women of childbearing age in 1960—6.6 million—gave birth to 1.8 million children that year. By 2000, women in this group will have increased to 24.6 million, and will give birth to 3.1 million children. The rise in the number of births will occur under conditions of a 40 per cent fall in the birth rate during the period. The paradox of the situation is that on the one hand, birth rates in many Third World countries have entered a decline phase, but on the other hand, the world has yet to see its largest increase in absolute numbers.

Under falling birth rate circumstances for all Latin America, today's 380 million population is projected to rise to over 800 million by 2025. For all Third World countries, the UN projects a rise from 3.3 to 6.8 billion in this interval. As in Mexico, further increases continue past 2025, but in diminishing amounts.

Never having seen the "explosion" we are apt to have dismissed the entire event, particularly when its chief characteristic—the high birth rate—began to sag. How was the "hang" supposed to have manifested itself anyway? By mass starvation, or by some other cataclysmic event? Instead, as Ambassador Marshall Green has put it, population growth is a silent explosion, a quiet day-to-day process whose effects often do not impose themselves upon our workday experience.

Lacking a final event, a cataclysmic focus, we might do well to examine the known consequences of past population growth and carry those forward into the near future. In Latin America, urbanization and labor force trends are cases in point. Mexico City now has 16 million inhabitants. In 1960, it had 5 million. By year 2000, 25–30 million will call this metropolitan area home.

At mid-century, the entire Latin American labor force numbered fewer than 60 million. By 1975, this rose to 100 million. By year 2000 it will reach 200 million, and 300 million in 2025. The labor force estimate in year 2000 is quite realistic since it is based on a population already born.●

PUTTING THE FFB ON-BUDGET

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. GRADISON. Mr. Speaker, I have introduced legislation that would require all loans financed through the FFB to appear in the budgets of the originating agencies. Some Members are concerned about how the historical budget data of agencies would be affected as a result of enactment of my Truth-in-Budgeting Act.

I wrote the Director of the Office of Management and Budget to find this out. I would like to insert in the RECORD my letter and Mr. Stockman's reply.

JULY 21, 1983.

Hon. DAVID STOCKMAN,
Director, Office of Management and Budget, The White House, Washington, D.C.

DEAR DAVE: As you many know, I have introduced HR 3484, the Truth-in-Budgeting Act of 1983, a bill that would put the FFB on-budget and allocate all of its on-budget outlays back to the budgets of the agencies which initiated the outlays.

I would appreciate it if you could describe to me how in the past the historical budget data series have been adjusted as a result of budget changes such as those in HR 3484.

Of particular interest to me is the answer to the following question: In the past, was there a sudden jump in the budget outlays of an agency and in the unified budget outlays as a result of bringing that agency on-budget, or was there no sudden jump in budget outlays because outlays for past years were adjusted upwards so as to reflect what the budget outlays would have been over time if the agency being brought on-budget had been on-budget all along?

Thank you for your timely, consideration of this request.

Sincerely,

BILL GRADISON,
Representative in Congress.

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., August 24, 1983.

Hon. BILL GRADISON,
U.S. House of Representatives, Washington, D.C.

DEAR BILL: This letter is in response to your letter of July 21 asking how the Federal budget historical data base is adjusted for discontinuities caused through shifting programs from off-budget to on-budget status. Two basic principles are applicable under these circumstances:

1. The budget historical data are structured to be as comparable as is feasible, so that users can trace trends and make valid comparisons using budget data covering various time periods. When changes are made to the classification of an account, the data base reflects these changes.

2. Normally all budget data—including historical data—conform to budget concepts. These concepts are generally in accord with the 1968 Report of the President's Commission on Budget Concepts, important elements of which were restated in Part 6 of the 1984 Budget. When there is a legal requirement to deviate from normal budget concepts—for example, by requiring that a certain activity be excluded from the budget totals—the budget reflects this requirement, but only for the years for which such deviations are legally required.

An example of the application of these rules occurred when the Export Expansion Finance Act of 1971 required that the Export-Import Bank be off-budget beginning August 17, 1971. The budget—including the historical data base—continued to reflect all of the Bank's activities prior to that date on-budget, and reflected the activities beginning August 17, 1971, off-budget. When the legal requirement that the Bank be off-budget was repealed (effective October 1, 1976) the data base was reconstructed to show the Bank's outlays as if they had been on-budget for all years.

This practice has been followed in all other comparable circumstances, including reconstructing the entire data base for all years from 1940 forward to show the budget totals on a unified budget basis, even though the unified budget was not introduced until 1968.

We plan to follow these guidelines with regard to the Federal Financing Bank and any other off-budget activities.

I hope this adequately meets your concerns.

Sincerely,

DAVID A. STOCKMAN,
Director.

P.S. In short, there would be no jumps—historical series would be recast to show FFB on-budget.●

GLOUCESTER COUNTY TIMES SUPPORTS RAIL LINE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. FLORIO. Mr. Speaker, the Governor of New Jersey is currently considering whether to come up with State matching funds for the rehabilitation of the rail line between Philadelphia and Atlantic City. The Gloucester County Times, in a recent editorial, has strongly urged the Governor to support the matching funds. The editorial points out that, unless the Governor acts soon, the $30 million in Federal funds will be jeopardized. The editorial follows:

WE CAN'T AFFORD NOT TO BACK RAIL PLAN

If you've ever tried to go anywhere on the North-South Freeway during a weekend, you're probably in favor of the proposed Amtrak rail line from Philadelphia to Atlantic City.

Come to think of it, if you use any highway in South Jersey that takes you in the direction of Atlantic City, you undoubtedly realize the impact casino gambling has had on traffic. It's normal on Friday evenings, for instance, for traffic on the North-South Freeway to be backed up all the way to the toll booths of the Walt Whitman Bridge.

So why hasn't Gov. Thomas H. Kean, who likes to tout all he does for South Jersey, done something to bring passenger rail service to Atlantic City?

Congress has done its part by appropriating $30 million in federal funds. But the governor says he can't find the matching funds needed to build the line. Besides that, he thinks any rail line to Atlantic City should provide for commuter traffic.

But the state needs to come up with only $2 million a year for three years for the rail line, according to Rep. James J. Florio, D-1st Dist., of Pine Hill.

Florio, who sponsored the bill in the House of Representatives that appropriated the funds for the rail link, also said several casino interests could help pay for the rail service. Besides, paying $6 million to alleviate traffic problems on South Jersey highways is a relatively small price considering the millions of dollars the state collects in casino revenues.

Kean is correct that the current proposal will not provide commuter rail service to South Jersey residents. The Amtrak plan calls for transporting people from 30th Street Station in Philadelphia to Atlantic City, with the possibility of one stop between.

Although a total commuter rail service would be ideal, you have to start some place. Without the Amtrak line, there will be no rail link to Atlantic City suitable for passenger service. It is likely the line could later be expanded to provide full commuter service, but not if there are no connecting rails in the first place.

It is crucial to the entire South Jersey transportation network that the governor support the proposal and come up with the matching funds. And he needs to do it quickly. He has only until Oct. 1. After that, the $30 million in federal funds will go to some other part of the country that wants to improve its rail system.●

TRIBUTE TO GILLILANDS FAMILY

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. EDWARDS of California. Mr. Speaker, on behalf of Congressman NORMAN MINETA and myself, I rise to mark an occasion of major significance to San Jose—the 50th anniversary of Gill Industries and its founding family, the Gillilands, in San Jose, Calif.

The Gillilands created the first local television in San Jose; and, in 1968, launched their cable company—Gillcable—which is presently acknowledged as the largest independent cable firm in the Nation. Gillcable leads in the revolution in cable television and home entertainment due to the vision and commitment of the Gilliland family.

Gillcable provides exemplary service to its community, not just by bringing custom-tailored, education and public information programing to San Jose and its environs, but also by the active leadership and civic involvement of the Gilliland family members. Currently, Allan T. Gilliland, Jr., is the Chair of the California Cable Television Association (CCTA), after serving in the past as the Chair of the National Cable Television Association (NCTA). Mr. Gilliland serves as a member of the executive committee and board of directors for both the NCTA and the CCTA, thus contributing invaluable expertise in the forefront of the industry.

Through a half-century of innovative thinking and dedication to change, this family-operated enterprise has brought enviable honors and national recognition to the city of San Jose, to the county of Santa Clara, and to the State of California. Congressman MINETA and I are honored to represent the Gilliland family here in Congress. We are delighted to pay tribute to Gill Industries on the occasion of its 50th anniversary of excellence. We offer our special tribute to Allen T. Gilliland, Sr., the distinguished gentleman who, 50 years ago, laid the foundation upon which Gill Industries rests today.●

McCLELLAN AIR FORCE BASE AT FOREFRONT IN RECOGNIZING WORKING MEN AND WOMEN

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. MATSUI. Mr. Speaker, each year the week including Labor Day has been designated by McClellan Air Force Base in Sacramento, Calif., as "Labor Recognition Week." McClellan, with nearly 18,000 civilian and military employees, is the first Department of Defense installation to so honor the working men and women of America in this manner.

Far too often, the time and talents of civilians as well as military personnel working at our military installations are overlooked or taken for granted. By so designating this week of September 5 to 9 as "Labor Recognition Week," McClellan has demonstrated its continuing commitment to progressive employer-employee relations.

Mr. Speaker, it is therefore with great pleasure that I bring to the attention of the Congress and the American people this special week of celebration, and I wish to join with the entire McClellan community, both civilian and military, in paying special tribute to the many long hours and years of dedicated service which all the working people of America have given to the betterment of this great land.●

KOREAN AIR LINES FLIGHT 007

HON. LARRY E. CRAIG

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. CRAIG. Mr. Speaker, the facts are in and so is the verdict. The Soviet Union did in fact track, identify, and shoot down the Korean Air Lines flight 007, murdering the 269 passengers onboard.

This is a needless loss of life. It is a barbaric act performed by a paranoid, militaristic government whose pathetic attempts at a massive coverup only emphasize its blatant disregard for human life. This Nation and the world have been patient with the Soviet Union. They were given every possible opportunity to explain their actions, to apologize, and to assure us that such an atrocity will not happen again. Our administration acted with the restraint and wisdom that the moment required. But this was all of no avail. The Soviet Union, by its own actions, has chosen to disregard the loss of life, thus isolating itself from the rest of the civilized world.

The rest of the world demands and deserves to receive the whole truth. The families of the victims deserve reparations. These are the very minimums we should demand. But it is clear that the Soviet Government refuses to acknowledge their guilt. By some form of twisted and macabre logic, they have justified this act to themselves and refuse to comply with even these most basic humanitarian demands. The series of justifications and accusations that have poured forth from the Soviet Union is clear evidence that they are a society that places military secrets above human rights and military objectives above peace. There simply are no extenuating circumstances that would have required this action and no propaganda capable of explaining its brutality. It is now up to this Nation, not alone, but in concert with the rest of the civilized world, to decide on an appropriate course of action.

Today, I propose to you and to this administration that we take a course of action that reflects this Soviet preoccupation with expansion of its philosophy through violence. I propose that we go beyond the actions of anger that have in the past done little to punish the military command that sets the priorities of the Soviet Union. Instead of unilaterally enacting trade and economic sanctions and boycotts, the past results of which have been to temporarily inconvenience a government that merely passes that onto

their people, I propose that we resolve that from this point forward, we will not do business with the Soviet Union as we have done in the past.

The Soviet Union has about 305 official diplomats in this Nation. It is well recognized that at least 120 of them are KGB activists. The United States on the other hand maintains only 190 diplomats in the Soviet Union. The designs of the Soviet military are well served by these excess personnel. Our first step should be to give those excess Soviet personnel 48 hours to find a flight home and to clearly state that parity in the diplomatic corps will be maintained henceforth.

Second, we will restrict our cultural and scientific exchanges with them. Again, we must insist on like for like. In the past we have allowed their scientists to study here while we have sent historians there. Again we will strike at the very heart of the Soviet intelligence gathering community.

We must insist on a long-term policy that restricts Soviet access to this Nation's technology and economic resources. These actions will have a far more profound effect on the Soviet Union if made a standard operating procedure than any short-term sanction would ever have.

Historically, the Western World has reacted with revulsion at similar Soviet acts of violence and have enacted economic sanctions in retaliation. But the Soviet economy reacts only to deny its people's needs while maintaining the military. Our actions haven't been international in their implementation, thus they have inflicted as much damage on us as the Soviets. In the past such actions have served to ventilate our anger. But we have soon forgotten the real cause. The Soviets prey upon the forgiving nature and short memories of the Western World to further their goals. This time, we need to set a standard of dealing with the Soviet Union that etches the brutality and militarism of their government in our minds permanently. With the actions I mentioned above in place, such a standard for the future is set. It would then be up to us to keep it.●

PARRIS INTRODUCES "VICTIMS OF COMMUNISM MONTH"

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. PARRIS. Mr. Speaker, the world has been revulsed by the murder of the 269 passengers on flight 007, including one of our colleagues, Hon. LARRY MCDONALD from Georgia. I believe every one of us has said prayers, silent and public, for these hapless victims and their families.

We mourn the death of our fellow Americans and those from other countries. But the death of these passengers is only a minute fraction of the 150 million people who have died at the hands of Communist governments since 1917. In September 1918 Lenin issued his "Red Terror Edict" which legitimized the use of terror and murder as a means of controlling the population. Since then, Russian dissidents have established September 5 as a memorial day to the victims of communism.

According to Michail Makarenko, a prominent dissident exiled from the Soviet Union and currently residing in the United States, members of a dissident movement have gathered the bones of victims from mass graves, cremated those bones in a memorial service, and buried the ashes at a location just outside the Kremlin Wall in Moscow, thus establishing a kind of national "holy ground" which has become the spiritual center of their resistance.

I believe we in the United States, through congressional action, should let those repressed Soviets and dissidents, who seek a free way of life, know we are behind them with our prayers and support. Therefore, today I am introducing legislation which would designate September 1983 as "Victims of Communism Month," as a memorial to the millions of victims of communism, including most recently the passengers and crew of Korean Air Lines flight 007. I urge my colleagues to support this resolution.●

TRIBUTE TO BARON H. GOLD

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. GRADISON. Mr. Speaker, this week the Cincinnati B'nai B'rith will honor Baron H. Gold for his outstanding contributions to youth and his exemplary community leadership. For his work, he is to receive the coveted Guardian of the Monorah award.

Baron is a native Cincinnatian and a graduate of the University of Cincinnati and its law school. He has been an untiring worker for the Jewish Welfare Fund since 1947, the year he began practicing law in Cincinnati. His work within B'nai B'rith is equally impressive and important—president of B'nai B'rith District 2 and former national commissioner of the Anti-Defamation League. He also has served on the boards of the Jewish Federation, Jewish Community Relations Council, and the Cincinnati Chapter of the National Conference of Christians and Jews.

It is fitting that by honoring Baron, his past work on behalf of young people will be recognized.

Mr. Speaker, I am proud to note that Baron Gold is a constituent and a true friend. He is a credit not only to the Cincinnati community, but to our country as well. I am grateful for the opportunity to bring Baron's accomplishments and honor to your attention and to the attention of all my colleagues in the Congress.●

FRANK McMAHON IS NAMED FIREMAN OF THE YEAR

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. FLORIO. Mr. Speaker, most of us go through life without ever finding ourselves in the position of saving a fellow human being from mortal danger. Yet, there are professional men and women such as police officers and firefighters that can encounter this type of situation on a regular basis.

Recognition for such action should never be taken for granted, and that is why I ask for a moment of the House time to acknowledge the heroic act of Frank McMahon, of Somerdale, N.J.

Mr. McMahon, a constituent of mine, is a firefighter of 12 years and was recently named Camden County Fireman of the Year by Universal Lodge 216 of the Free and Accepted Masons of Cherry Hill, N.J.

The award was given to Mr. McMahon for his brave efforts to rescue a 14-year-old boy from a burning home. He and one other fellow firefighter were the only two able to get inside the burning home. When his companion was overcome by smoke, McMahon dragged him out to safety and then returned to the inferno for the young nephew of the homeowners.

McMahon was able to reach the boy in his second floor bedroom, and the fireman gave up his airpack hoping it would save the youngster's life. Tragically, Frank McMahon's efforts were unsuccessful, but his determination to continue trying should serve as an inspiration for all.

Frank McMahon acted in a heroic manner in every sense of the word, and I ask the House to join me in commending him. The community of Somerdale can be proud to have him as a resident and serving as a firefighter.●

HAROLD DIAZ, A SPECIAL AGENT IN THE SECRET WAR AGAINST DOPE, RETIRES FROM U.S. CUSTOMS ON SEPTEMBER 9, 1983

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 12, 1983

● Mr. PATTERSON. Mr. Speaker, Andrew Tully in his 1973 book "The Secret War Against Dope," describes the work of U.S. Customs in fighting illegal drug traffic coming to the United States. In the preface, Tully states:

> There is no single hero in this book; just a relatively few hard-working U.S. customs agents. They do not come on with the blazing gun, the bulging bicep, or the sexual stare of the television screen. Their heroism—and they would snort at the term—is in their patient, dogged, thinking pursuit of the twentieth century's Merchants of Death. Most of them probably have never fired a gun in anger, although they are armed twenty-four hours a day, because you don't fight narcotics traffickers with bullets but with intelligence and a kind of ingrained stealth. It is a hard job because the pusher at all levels lives by his wits, sustained by the evil wisdom of the breed. Besides, violence is illogical except as a last resort. The dead trafficker can't talk; he cannot lead his interrogators to the executive suites of the death-dealing international industry.
>
> This book, quite simply, is about good guys and bad guys. The author is on the side of the good guys. The reader will search in vain for social worker asides about the pusher driven to his vicious trade by poverty or by an unsympathetic parent or because he couldn't get along with his teddy bear. He has no redeeming virtues. He deserves only our cold, fearful contempt. He is killing our children.

Mr. Speaker, I share this with my colleagues because it gives some insight into the book's chapter 17 leading character—Harold Diaz, a special agent with U.S. Customs.

On September 9, 1983, Harold L. Diaz will be retiring after more than 20 years of loyal and dedicated service as a special agent with the U.S. Customs Service. His family, friends, and comrades from the law enforcement community will be honoring him at a tribute dinner at the Hilton Inn at the Park in Anaheim, Calif. I know my colleagues in the House want to join me in honoring the achievements of Harold Diaz upon the occasion of his retirement.

Harold Diaz was born on December 7, 1929, the sixth child in the family of Joseph F. Diaz and Ruby Bell Diaz Palmer. Hal is the youngest of the children—his brothers are John, William, Robert, and Herbert. He is fortunate to have one sister, Vivian. His youth was, by and large, spent in the Salt Lake City area.

From 1946 to 1949 and from 1951 to 1952 Hal served in the U.S. Navy. He participated actively in the Asiatic-Pacific campaign. Hal was stationed on the U.S.S. *Iowa* during his time in the Navy.

After leaving the Navy, Hal held a variety of jobs. He was a private patrol officer, a truck driver, a salesman, a hydraulic repairman, a boiler operator, a blueprint machine operator, and a typewriter repairman. It was during this time that Hal met and married Karma Barratt on February 9, 1955.

It was not until August of 1955 that Hal began what was to be his life-long career—law enforcement. From 1955 to 1963 Hal Diaz served on the Salt Lake City Police Department. While with the Salt Lake Police Department, he served in the uniformed patrol, in plain-clothes investigations on burglary detail, robbery detail, hit-and-run detail, and in the youth division.

On August 18, 1963, Hal's customs career began. He started as a customs port investigator in San Francisco. Within a year, Hal was promoted and became a special agent with the Customs Agency Service. In 1964, Hal was transferred to Los Angeles—the first of many transfers.

Hal's time in Los Angeles was spent as a working agent. It was here that he worked on some of the first narcotics smuggling cases involving small aircraft; and, it was here that he spent days on horseback across the desert looking for the load that was not to be found. In 1969, Hal was promoted to assistant special agent in charge (P & I).

July of 1970 saw Hal on the move again—this time to San Francisco as the assistant special agent in charge—enforcement. His duties included supervising special agents, customs port investigators, customs patrol officers, and air security officers in conducting investigations involving criminal and civil violations of customs and related laws. Hal also directed the sky marshal program in San Francisco.

A transfer to customs headquarters in Washington, D.C., provided Hal the opportunity to serve in a staff position as a desk officer in the Foreign Investigations Branch. His responsibilities included coordinating investigative activity between domestic and Customs Pacific Far East area offices, and furnishing managerial support for five foreign offices in Hong Kong, Manila, Saigon, Bangkok, and Tokyo; 1973 saw a major reorganization in the Federal drug enforcement activity—the creation of the mass transfer to the Drug Enforcement Administration. Hal was among those transferred to DEA where he served as the Branch Chief for Special Projects.

Happier times again prevailed in October of 1973 when Hal had an opportunity to return to Customs—this time as an inspection team leader. Hal's duties included directing a team of special agents in the conduct of management inspections of field offices with the findings reported to the Assistant Commissioner.

August of 1975 saw Hal return to Los Angeles, this time as the Assistant Regional Director for the Office of Investigations. He served in that capacity until November of 1977 when he was promoted to Regional Director, Investigations.

As the principle field officer, Hal managed and directed all activities within the Los Angeles region involving the investigative function of the Customs Service. He, along with subordinate supervisors, developed programs and strategies in response to national and local priorities. Hal managed the human, financial, and material resources to best accomplish the Customs mission. He acted as the spokesperson for the Office of Investigations in the Los Angeles region.

One of the areas in which Hal excelled was in performing the liaison function with other Federal agencies, and with local law enforcement. To this end, Hal hosted annually the Federal Law Enforcement Coordinator's Conference. This was an opportunity to interact with Federal, State, and local law enforcement managers on an individual basis. To help achieve a better understanding of customs law enforcement role, each conference had at least one session directly related to the customs mission.

Since April of this year, Hal has been the Area Special Agent in Charge—Investigations of the Los Angeles District Office. In that capacity he supervises and directs the operations of the Los Angeles Office.

Hal's professional career has included memberships in the Peace Officers Association of Los Angeles County, the Federal Criminal Law Association, the Federal Executive Board, the National Association of Chiefs of Police, and the Federal Criminal Investigators Association. Hal has served as president of the Los Angeles Chapter of the FCIA. In addition, Hal is a member of the Disabled American Veterans.

Hal and Karma have resided in Cypress, Calif., for 8 years. They have been blessed with four children and one grandchild. The eldest, Pamala, is a registered nurse in Long Beach, Calif. Cynthia, is married to Ralph Giffin, and they have one child, Elizabeth Sarah. Cynthia is also a teacher in Virginia. Deborah is a registered physical therapist in Anaheim, Calif. Their youngest child, Gregory, is completing his degree in public administration from California State University, Long Beach. He is currently serving as a staff assistant in my California office.

Mr. Speaker, I am pleased to have the opportunity to recognize the accomplishments of Harold Diaz on the occasion of his retirement. I know my

colleagues in the House wish to join me in sending best wishes to Hal and his loving family for a happy, healthy, and successful retirement. It is, after all, the support and sacrifices of his family that made today possible.

Mr. Speaker, let me conclude with a few words by H. D. Thoreau quoted by Hal's daughter, Cynthia, used to describe her father's character in a biography she wrote a few years ago:

If a man does not keep pace with his companions perhaps it is because he hears a different drummer. Let him keep step to the music which he hears however measured or far away.—*H. D. Thoreau.*●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, September 13, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

SEPTEMBER 14

9:30 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 1532, to establish a moratorium on the acquisition of nonbank banks and savings and loan associations by nonbanking firms, S. 1609, to establish a revised Federal statutory framework under which bank and thrift holding companies would operate, and S. 1682, to require divestiture of depository institutions by nondepository organizations.
SD-538

Judiciary
Patents, Copyrights and Trademarks Subcommittee
To hold hearings on S. 875, proposed Trademark Counterfeiting Act.
SR-385

10:00 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings to review private sector initiatives to feed the poor.
SR-328A

Appropriations
Defense Subcommittee
To hold hearings to examine warranties on military equipment procured by the Department of Defense.
SD-192

Commerce, Science, and Transportation
Consumer Subcommittee
To hold hearings on S. 286, proposed Office Machine and Equipment Dealers' Act.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Water Resources Subcommittee
Business meeting, to mark up S. 1739, to authorize the U.S. Army Corps of Engineers to construct various projects for improvements to rivers and harbors of the United States.
SD-406

Foreign Relations
Closed briefing on the current United States-Soviet arms control negotiations.
S-116, Capitol

Governmental Affairs
To resume hearings on S. 121, to establish a U.S. Department of Trade as an executive department of the Federal Government.
SD-342

Judiciary
Security and Terrorism Subcommittee
To continue hearings on security issues relative to the 1984 Olympics.
SD-226

Select on Intelligence
Legislation and the Rights of Americans Subcommittee
To hold closed hearings on intelligence matters.
S-407, Capitol

10:30 a.m.
Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold hearings to review options to implement an interim retirement program for civil service employees who will be covered by social security.
SD-138

2:00 p.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on S. 1432, proposed Federal Capital Investment Program Information Act.
SD-342

2:30 p.m.
Banking, Housing, and Urban Affairs
International Finance and Monetary Policy Subcommittee
To hold oversight hearings to review the Export-Import Bank of the United States proposal to offer a line of credit to Brazil and Mexico.
SD-538

5:00 p.m.
Foreign Relations
Closed briefing on the Korean jetliner incident.
SD-116, Capitol

SEPTEMBER 15

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on proposed legislation to extend the Defense Production Act of 1950.
SD-538

10:00 a.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 752, to provide for certain measures to reduce the salinity of the Colorado River; S. 1027, to provide that any construction costs undertaken by the State of Washington on the Yakima River Basin water enhancement project made prior to congressional authorization of the project, may be credited toward any future cost-sharing requirements that Congress may impose at the time of authorization; and S. 483, to authorize the Bureau of Reclamation to provide compensation to certain landowners who are deprived of winter stock water supply for their livestock along Willow Creek in Idaho.
SD-366

Environment and Pubic Works
Business meeting, to consider proposed amendments to the Clean Water Act (Public Law 95-217), and other pending calendar business.
SD-406

Foreign Relations
To hold joint hearings with the Committee on Governmental Affairs' Subcommittee on Energy, Nuclear Proliferation, and Government Processes to review nuclear nonproliferation policy.
SD-419

Governmental Affairs
To resume hearings on S. 121, to establish a U.S. Department of Trade as an executive department of the Federal Government.
SD-342

Governmental Affairs
Energy, Nuclear Proliferation, and Government Processes Subcommittee
To hold joint hearings with the Committee on Foreign Relations to review nuclear nonproliferation policy.
SD-419

Judiciary
Business meeting, to consider pending calendar business.
SD-226

Labor and Human Resources
Alcoholism and Drug Abuse Subcommittee
Business meeting, to mark up S. 503, to make it unlawful to manufacture, advertise, distribute, or possess a drug which is an imitation of a controlled substance.
SD-430

11:00 a.m.
Finance
Social Security and Income Maintenance Programs Subcommittee
To hold hearings on S. 1691, to restructure the administration of the child support enforcement program, and a related proposal, S. 1708.
SD-215

2:30 p.m.
Finance
Health Subcommittee
To hold hearings on the administration's regulations to implement the medicare hospice benefit enacted as

part of the Tax Equity and Fiscal Responsibility Act of 1982.
SD-215

SEPTEMBER 16

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on the nomination of Philip Abrams, of Massachusetts, to be Under Secretary of Housing and Urban Development.
SD-538

Commerce, Science, and Transportation
To hold hearings on the nomination of Mathew V. Scocozza, of Tennessee, to be Assistant Secretary of Transportation for Policy and International Affairs.
SR-253

Finance
Oversight of the Internal Revenue Service Subcommittee
To hold hearings on the effectiveness of the tax refund offset program for certain delinquent child support payments, and on S. 150, to establish the collection of student loans in default.
SD-215

Judiciary
Constitution Subcommittee
To hold hearings on the commemoration of the bicentennial of the Constitution.
SR-325

10:00 a.m.
Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
Business meeting, to mark up proposed legislation appropriating funds for fiscal year 1984 for the Departments of Labor, Health and Human Services, and Education.
Room to be announced

Select on Indian Affairs
To hold hearings on S. 1694, to declare that the United States hold certain lands in trust for the Las Vegas Paiute Tribe.
SD-430

Joint Economic
To hold hearings on job training needs of American workers.
SD-628

10:45 a.m.
Judiciary
Constitution Subcommittee
Business meeting, to mark up S. 501, to eliminate certain sex discriminatory provisions from the Federal Code; to be followed by hearings on S. 1189, to authorize funds for fiscal year 1984 for the Civil Rights Commission.
SD-226

2:00 p.m.
Finance
To hold hearings to review the Federal Supplemental Compensation (FSC) program.
SD-215

SEPTEMBER 19

9:45 a.m.
Finance
International Trade Subcommittee
To hold hearings on the terms of the International Coffee Agreements (Treaty Doc. 98-2), and on enabling legislation to authorize the President to enforce their provisions.
SD-215

10:00 a.m.
Finance
International Trade Subcommittee
To holding hearings on S. 1035, to provide authority to enforce the terms of the Steel Pipe and Tube Agreement between the United States and the European communities.
SD-215

Joint Economic
To hold closed hearings on the allocation of resources to the Soviet Union and China.
SR-485

2:00 p.m.
Finance
Savings, Pensions and Investment Policy Subcommittee
Taxation and Debt Management Subcommittee
To hold joint hearings on numerous tax proposals, including S. 1066, S. 1550, S. 1557, and S. 1666.
SD-215

SEPTEMBER 20

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

Labor and Human Resources
To resume oversight hearings on alleged illegal sales of union memberships or books to unqualified welders by officials of local chapters of the International Brotherhood of Boilermakers, Iron Shipbuilders, Blacksmiths, Forgers, and Helpers.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Water Resources Subcommittee
Business meeting, to resume markup of S. 1739, to authorize the U.S. Army Corps of Engineers to construct various projects for improvements to rivers and harbors of the United States.
SD-406

Foreign Relations
Business meeting, to resume consideration of S.J. Res. 2, calling for a mutual and verifiable freeze and reduction in nuclear weapons, and related resolutions, including S.J. Res. 12, S.J. Res. 29, S.J. Res. 74, S. Res. 57, S. Res. 83, S. Res. 107, S. Res. 142, S. Res. 159, and S. Con. Res. 46.
SD-419

Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings to investigate alleged involvement of organized crime and mismanagement of funds in the hotel and restaurant workers union (HEREIU).
SD-342

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings to review the accessibility of student loans.
SD-124

11:00 a.m.
Veterans' Affairs
To hold hearings to receive legislative recommendations for fiscal year 1984 from the American Legion.
SR-325

2:00 p.m.
Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

SEPTEMBER 21

9:00 a.m.
Labor and Human Resources
Business meeting, to resume markup of S. 1133, to authorize funds for fiscal years 1984, 1985, and 1986 for the Legal Services Corporation, and other pending calendar business.
SK-430

9:30 a.m.
Commerce, Science, and Transportation
To hold oversight hearings on the implementation of the Motor Carrier Act (Public Law 96-296).
4SR-253

Labor and Human Resources
To hold oversight hearings on certain activities of the International Labor Organization.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Business meeting, to consider S. 1354 and H.R. 3103, bills to provide emergency relief for disaster-damaged roads administered under the Federal-aid highway relief (ER) program, and S. 452, to establish public buildings policies for the Federal Government, to establish the Public Buildings Service in the General Services Administration, to provide for the authorization of funds for the construction, renovation, and maintenance of public buildings and related activities of the Public Buildings Service.
SD-406

Governmental Affairs
Business meeting, to mark up S. 121, to establish a U.S. Department of Trade as an executive department of the Federal Government.
SD-342

SEPTEMBER 22

9:30 a.m.
Agriculture, Nutrition, and Forestry
Soil and Water Conservation, Forestry and Environment Subcommittee
To hold hearings on S. 566, S. 1503, and S. 129, miscellaneous land conveyance bills.
SR-324

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Foreign Relations
To hold hearings to review recent developments concerning the U.S. Information Agency.
SD-419

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on a Presidential commission report on excellence in education.
SD-430

Labor and Human Resources
Family and Human Services Subcommittee
To resume oversight hearings on the breakdown of the traditional family unit, focusing on causes and societal implications.
SD-628

10:30 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
Business meeting, to mark up S. 893 and S. 894, bills to provide an effective and efficient licensing and regulatory process for the siting, construction, and operation of nuclear powerplants, and on proposed legislation authorizing funds for fiscal years 1984 and 1985 for certain programs of the Nuclear Regulatory Commission.
SD-406

2:00 p.m.
Environment and Public Works
Environmental Pollution Subcommittee
Business meeting, to mark up S. 1329, to provide financial assistance to States for wetlands conservation, and other pending business.
SD-406

SEPTEMBER 23

9:00 a.m.
Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To hold hearings on S. 1090, to establish a National Outdoor Recreation Resources Review Commission to study and recommend appropriate policies and activities to assure the continued availability of quality outdoor recreation.
SD-366

9:30 a.m.
Finance
Economic Growth, Employment and Revenue Sharing Subcommittee
To hold hearings on the future of U.S. basic industries.
SD-215

Labor and Human Resources
Aging Subcommittee
To hold hearings to review certain provisions of the Age Discrimination and Employment Act which affect Americans working abroad.
SD-430

10:00 a.m.
Joint Economic
To resume hearings on job training needs of American workers.
SD-562

SEPTEMBER 26

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on numerous tax proposals, including S. 120, S. 1397, S. 1584, S. 1814, S. 1815, and S. 1826.
SD-215

10:00 a.m.
Joint Economic
To resume hearings on job training needs of American workers.
SD-562

SEPTEMBER 27

9:00 a.m.
Office of Technology Assessment
The Board, to hold a general business meeting.
H-227, Capitol

10:00 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To hold hearings on S. 1624, proposed Merchant Marine Revitalization Act, and a committee amendment thereto, S. 1616, proposed Government Impelled Cargo Act, S. 206, to make the Secretary of Transportation responsible for determining and designating programs subject to requirements for the transportation in American vessels or cargoes procured, furnished, or financed by the United States, and S. 188, to require the U.S. Postal Service to contract with U.S.-registered vessels for international sea transportation of mail.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Nuclear Regulation Subcommittee
Business meeting, to resume markup of S. 893 and S. 894, bills to provide an effective and efficient licensing and regulatory process for the siting, construction, and operation of nuclear powerplants, and on proposed legislation authorizing funds for fiscal years 1984 and 1985 for certain programs of the Nuclear Regulatory Commission.
SD-406

SEPTEMBER 28

9:30 a.m.
Select on Intelligence
Legislation and the Rights of Americans Subcommittee
To hold closed hearings on intelligence matters.
S-407, Capitol

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
